HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire HAL, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

²GFACG, TIGO Observatory, Concepción, Chile

After publishing the above mentioned paper we discovered that by accident the last sentence from the Acknowledgements in the accompanied Ocean Science Discussions paper (“Spectral Studies of Ocean Water using DOAS” published in Ocean Sci. Discuss., 4, 459–489, 2007 by Vountas, M., Dinter, T., Bracher, A., Burrows, J. P., and Sierk, B.) was lost in the final revised paper. We therefore include now the following sentence in the acknowledgements of the published manuscript: “Funding for one of us (Bracher) has been supplied by the Deutsche Forschungsgemeinschaft (DFG) project PASAT”.
