HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

FOREWORD

This special issue of the International Journal of Impact Engineering contains nine of the papers that were presented at the Seventh International Conference on Shock and Impact Loads on Structures, which was held in Beijing, China, during 17 – 19 October 2007.

I wish to take this opportunity to thank Professor Fenglei Huang and Dr. Q. M. Li for their assistance in preparing this special issue of the International Journal of Impact Engineering. Thanks are also due to the anonymous reviewers for the diligence, as well as to the authors for their co-operation.
