Cluster 2		p<0.0001	1584	-36 18 0	4.81
				28 22 4	9.33
				52 -14 16	9.26
				36 6 6	9.16
				-32 20 8	8.34
				-66 -26 20	7.46
				-44 14 -8	7.30

Table1s

Table 1s. Statistics for significantly activated clusters as compared to rest, for each type of stimulation (voxel-wise analysis). The analysis was limited to bilateral SII and Insula. Clusters are reported if $p < 0.001$ at the voxel-level and $p < 0.05$ FWE corrected for multiple comparisons at the cluster-level. Only the three most significant peaks are shown. Coordinates are given in MNI space.
