**HAL** is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

# Quantum Dash-based Vertical-External-Cavity Surface-Emitting Laser on InP

## Motivations

Realization of an optical laser sources with high spectral purity, low intensity noise and highly tunability for microwave photonics and coherent communication systems

## Applications

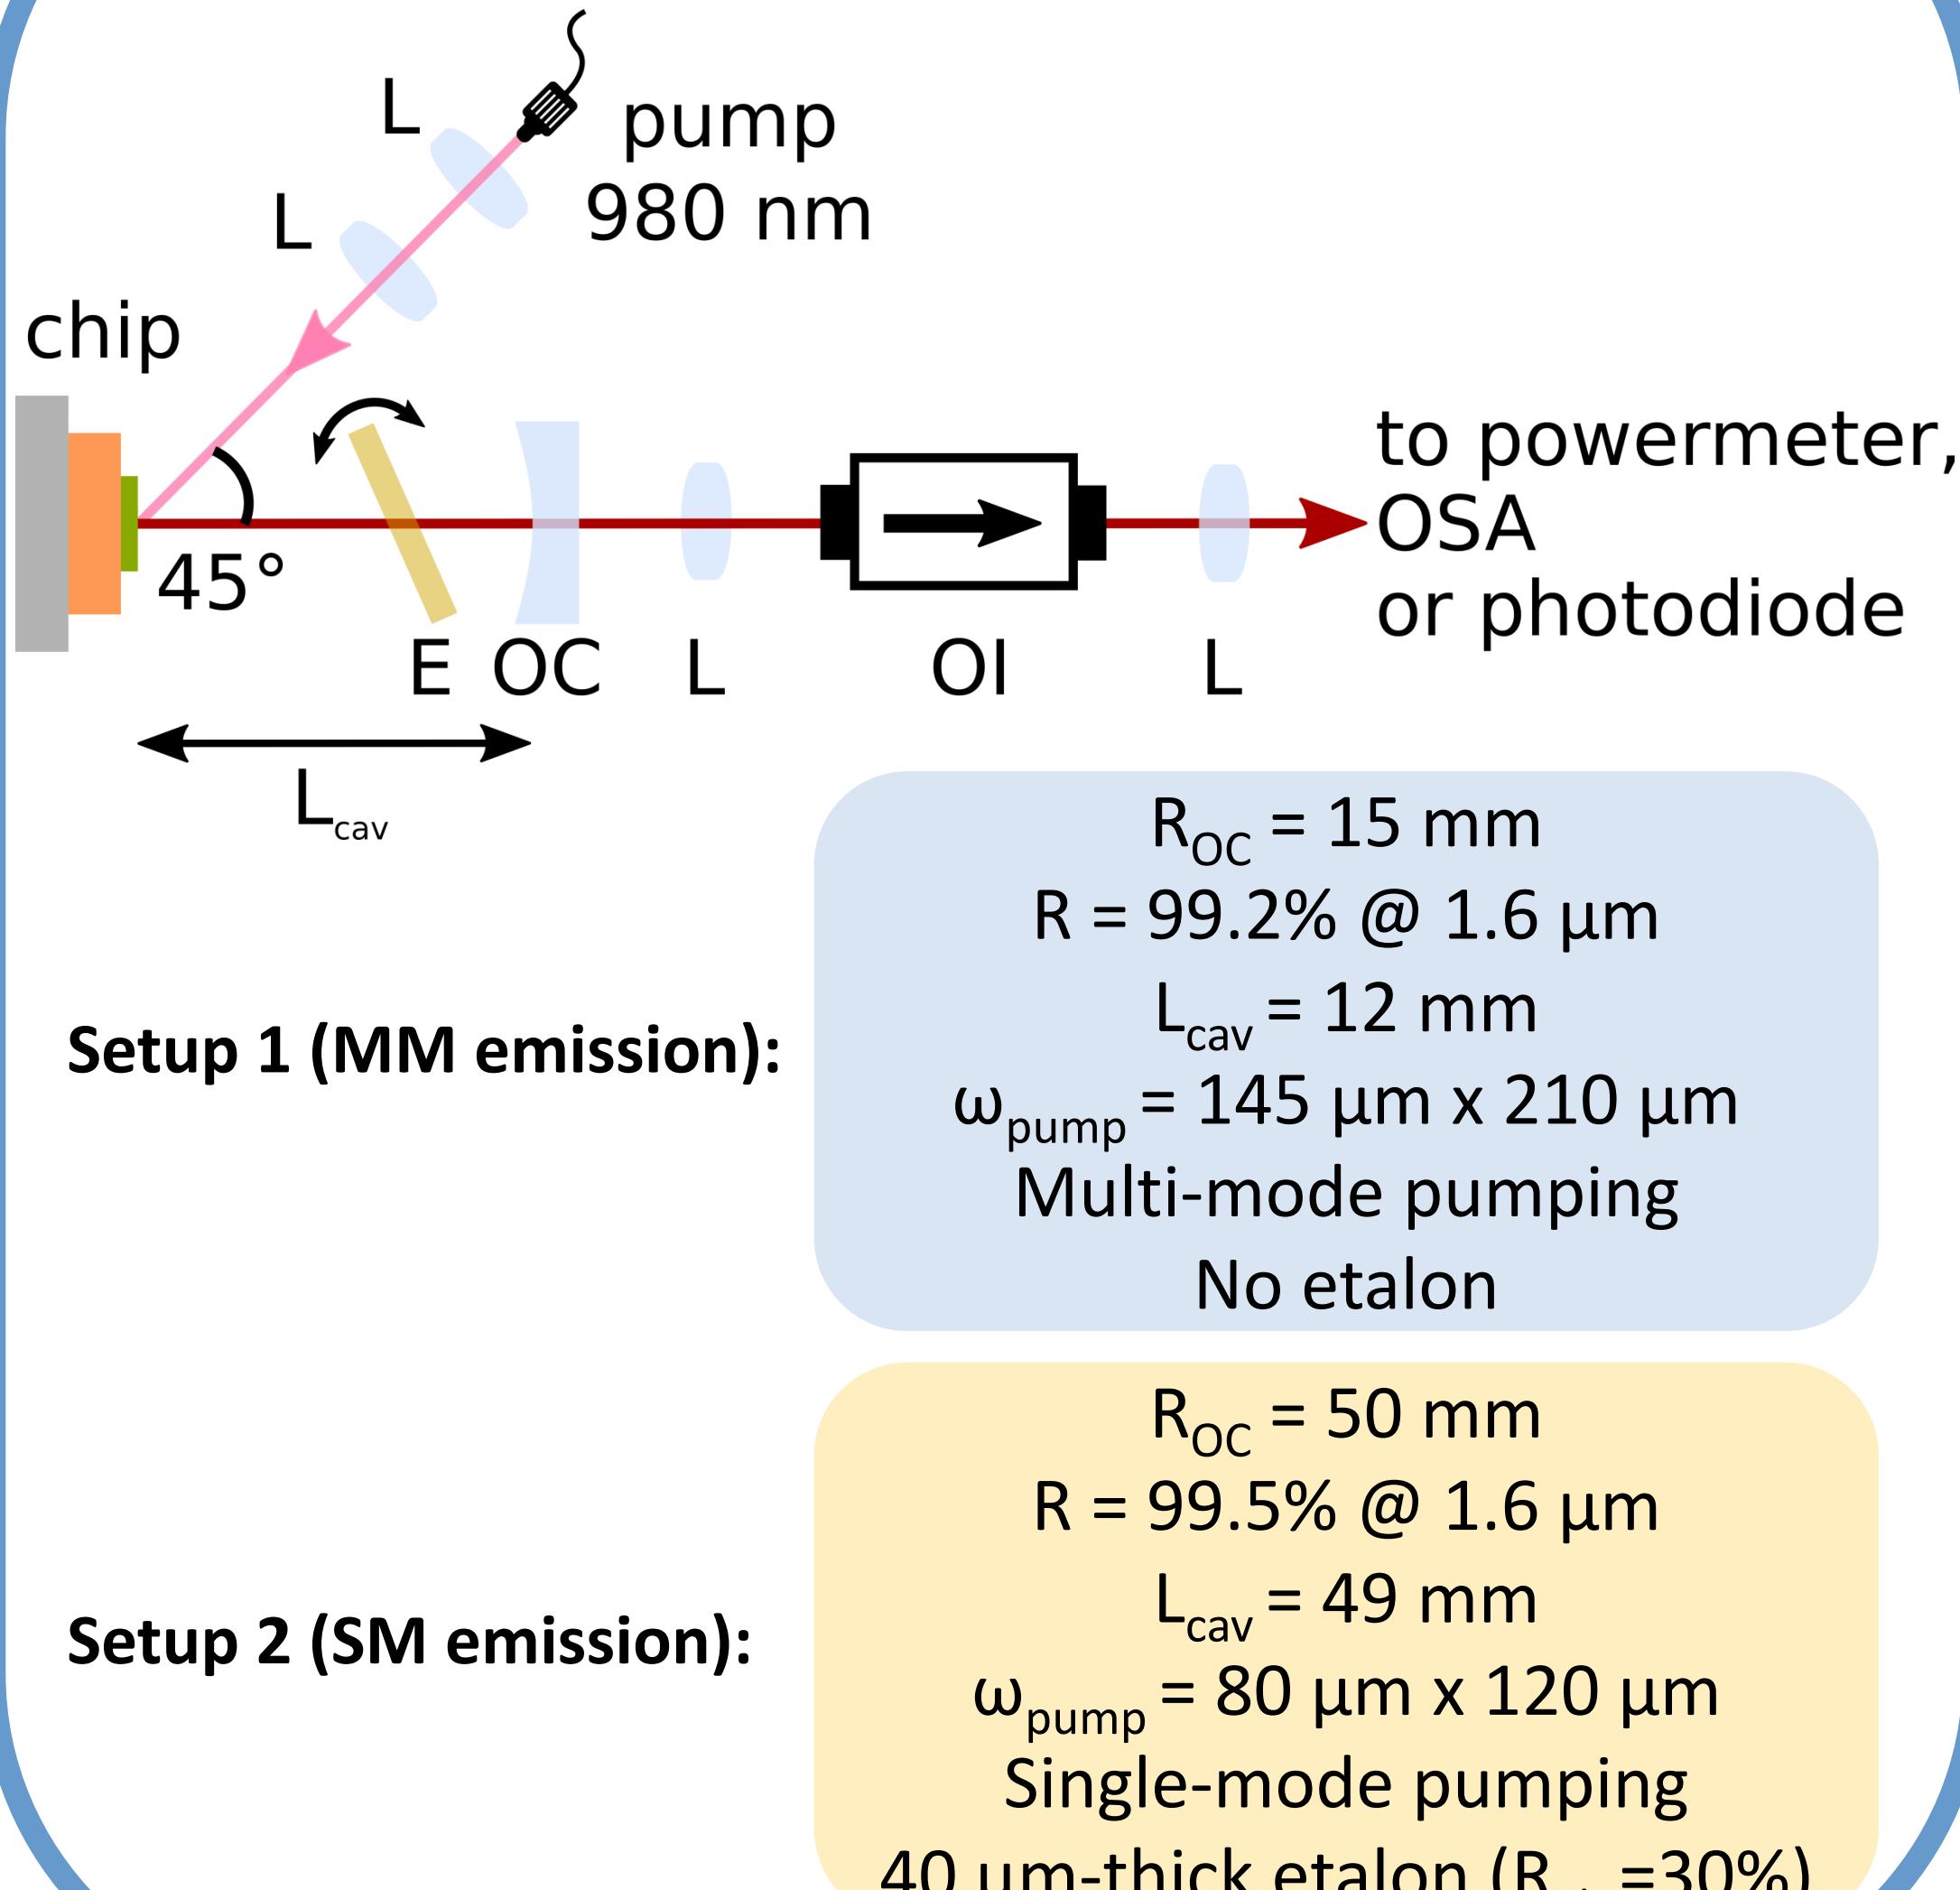

### MICROWAVES:

- RADAR/LIDAR systems
- Ultra low-noise sources
- Dual-frequency lasers
- THz generation

### METROLOGY:

- High resolution spectroscopy
- High pure optical references signals distribution
- Time/frequency metrology

## Experimental setup

## Conclusion

Demonstration of an Optically-Pumped InAs Quantum Dash-based Vertical-External-Cavity Surface-Emitting Laser on InP.

$$P_{\text{out}} = 163 \text{ mW} @ P_{\text{inc}} = 7 \text{ W}, T=20^\circ\text{C} (\text{MM emission})$$

$$P_{\text{out}} = 10.4 \text{ mW} @ P_{\text{inc}} = 1.1 \text{ W}, T=19.5^\circ\text{C} (\text{SM emission})$$

Polarization aligned along dash [1-10] direction, OPSR = 39 dB

Laser linewidth estimation: 22 kHz (49 mm-long cavity)

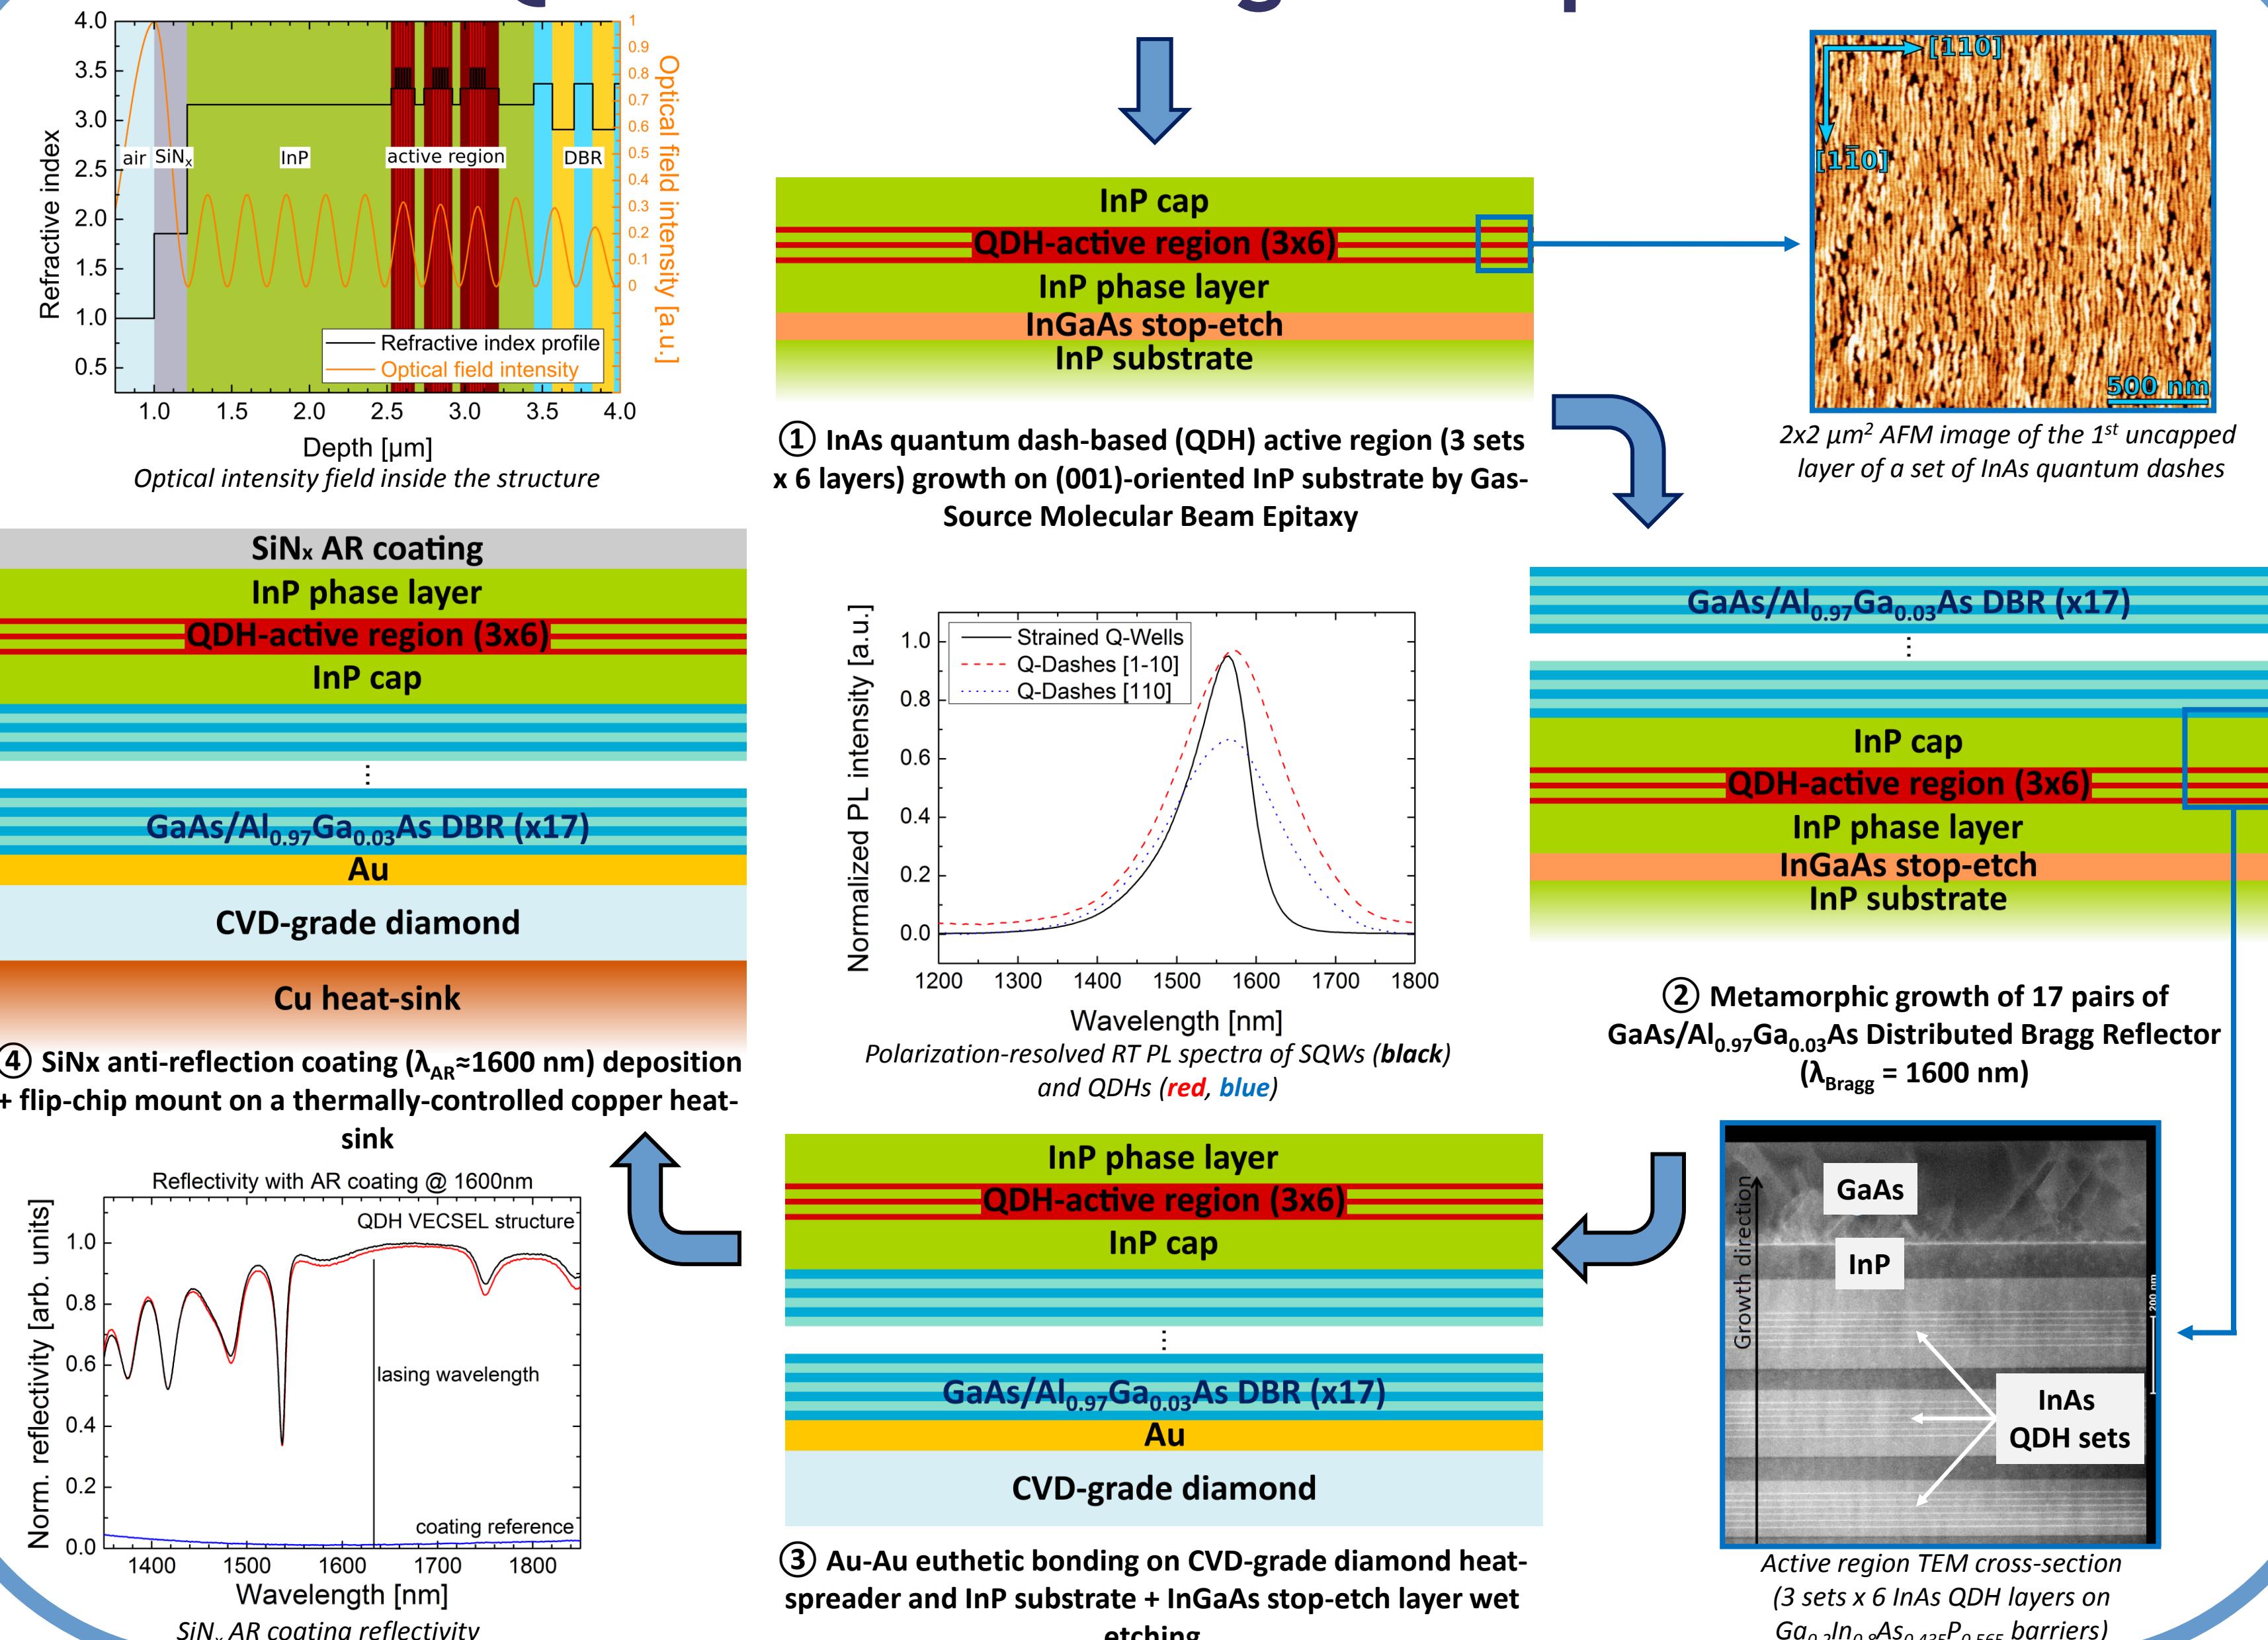

## Future perspectives

- Low-noise laser characterization
- Dual-frequency operation
- Laser stabilisation on ULE cavity (metrology)
- Electrical pumping

## Funding

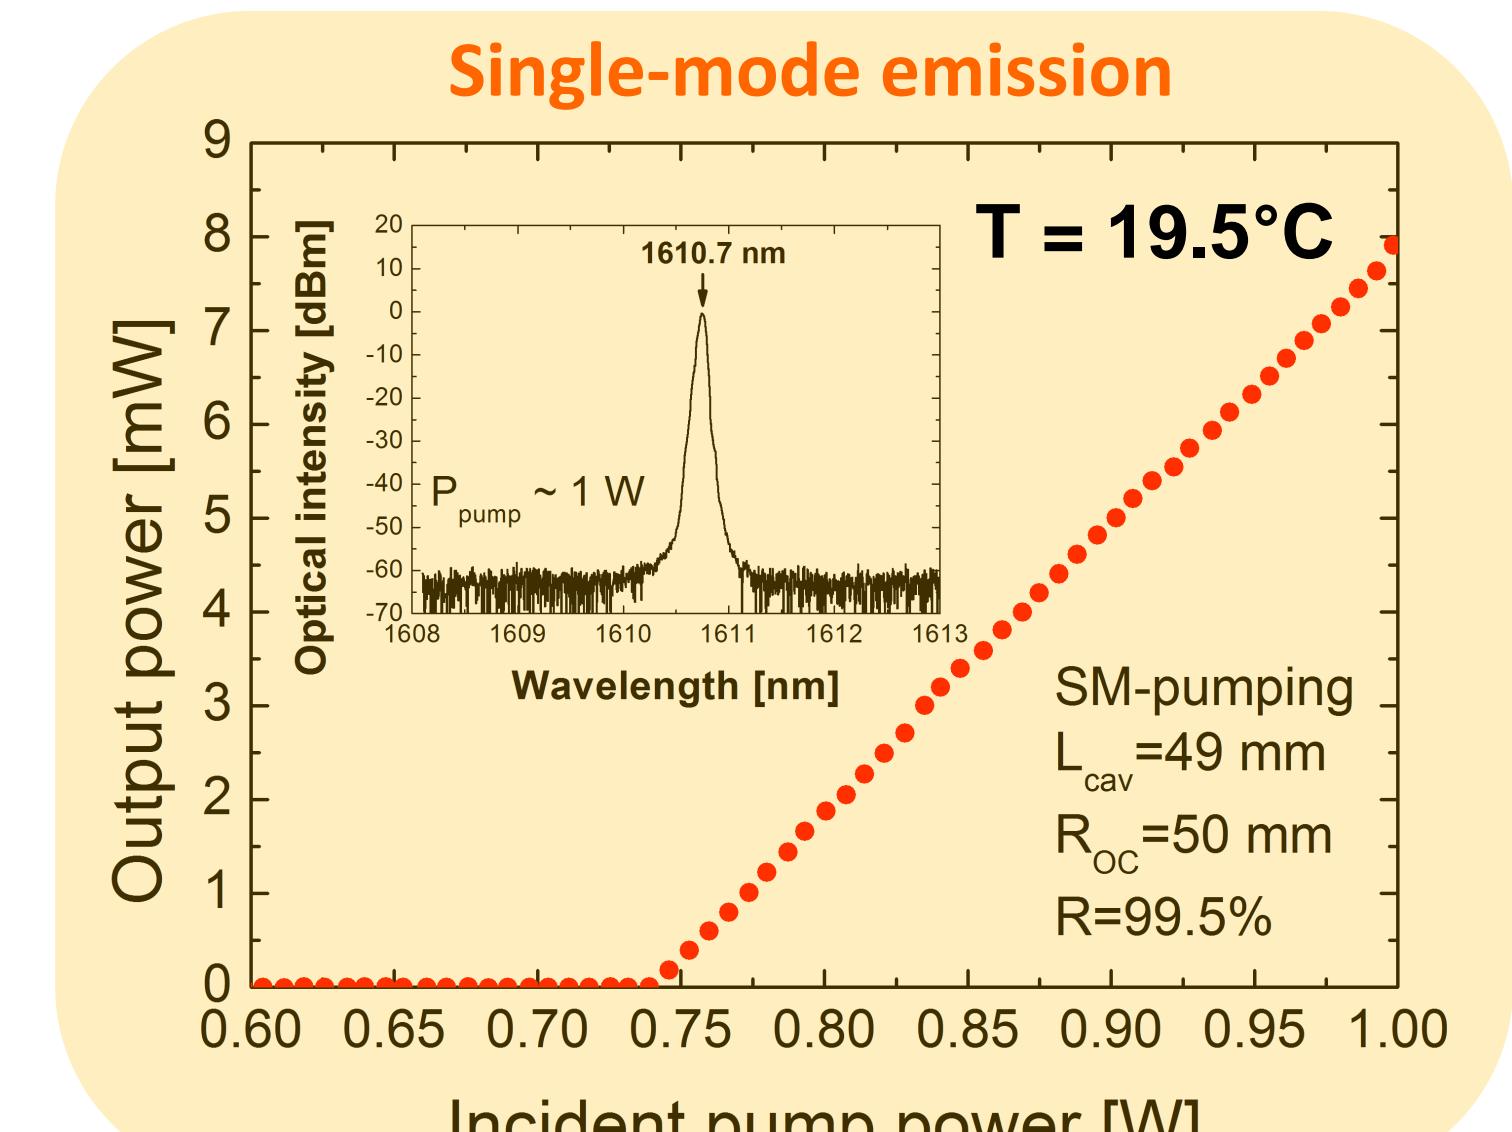

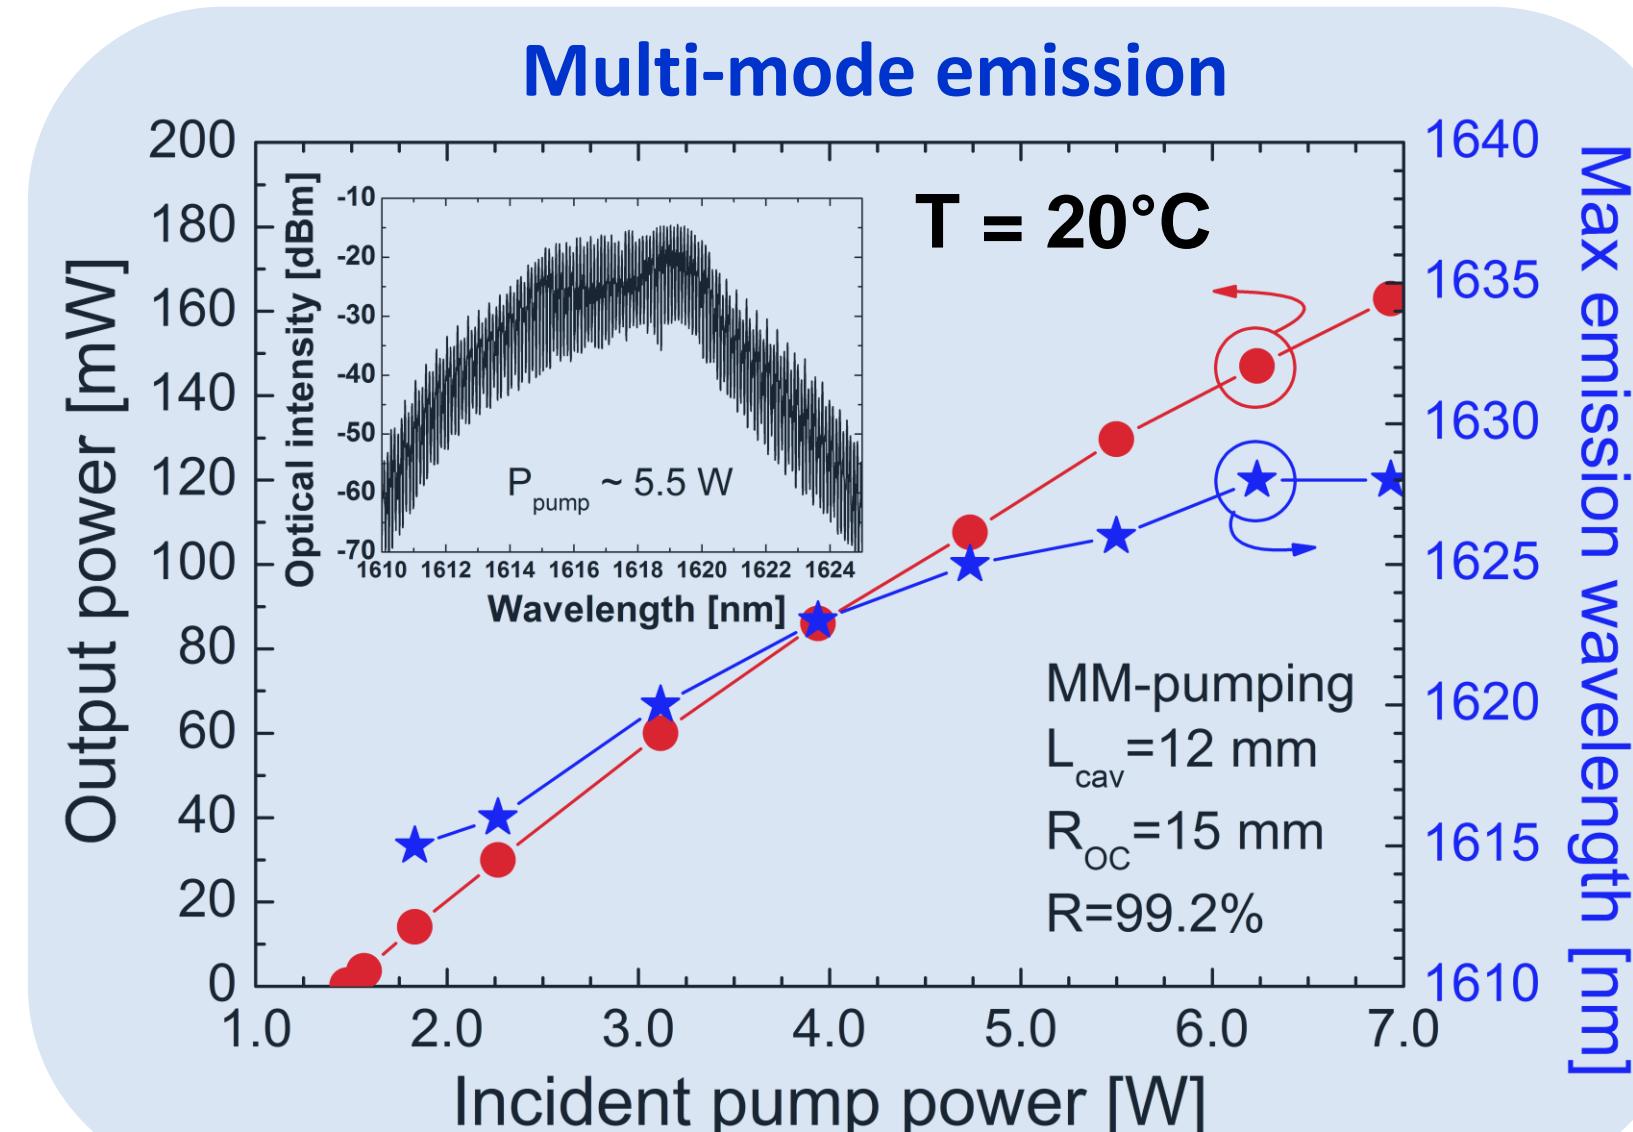

ANR and DGA within the ANR-ASTRID HYPOCAMP project (grant ANR-14-ASTR-0007-01) and a DGA-MRIS/Région Bretagne scholarship (grant ARED-VELOCE 8917).

## OP-QDH-VECSEL design and process

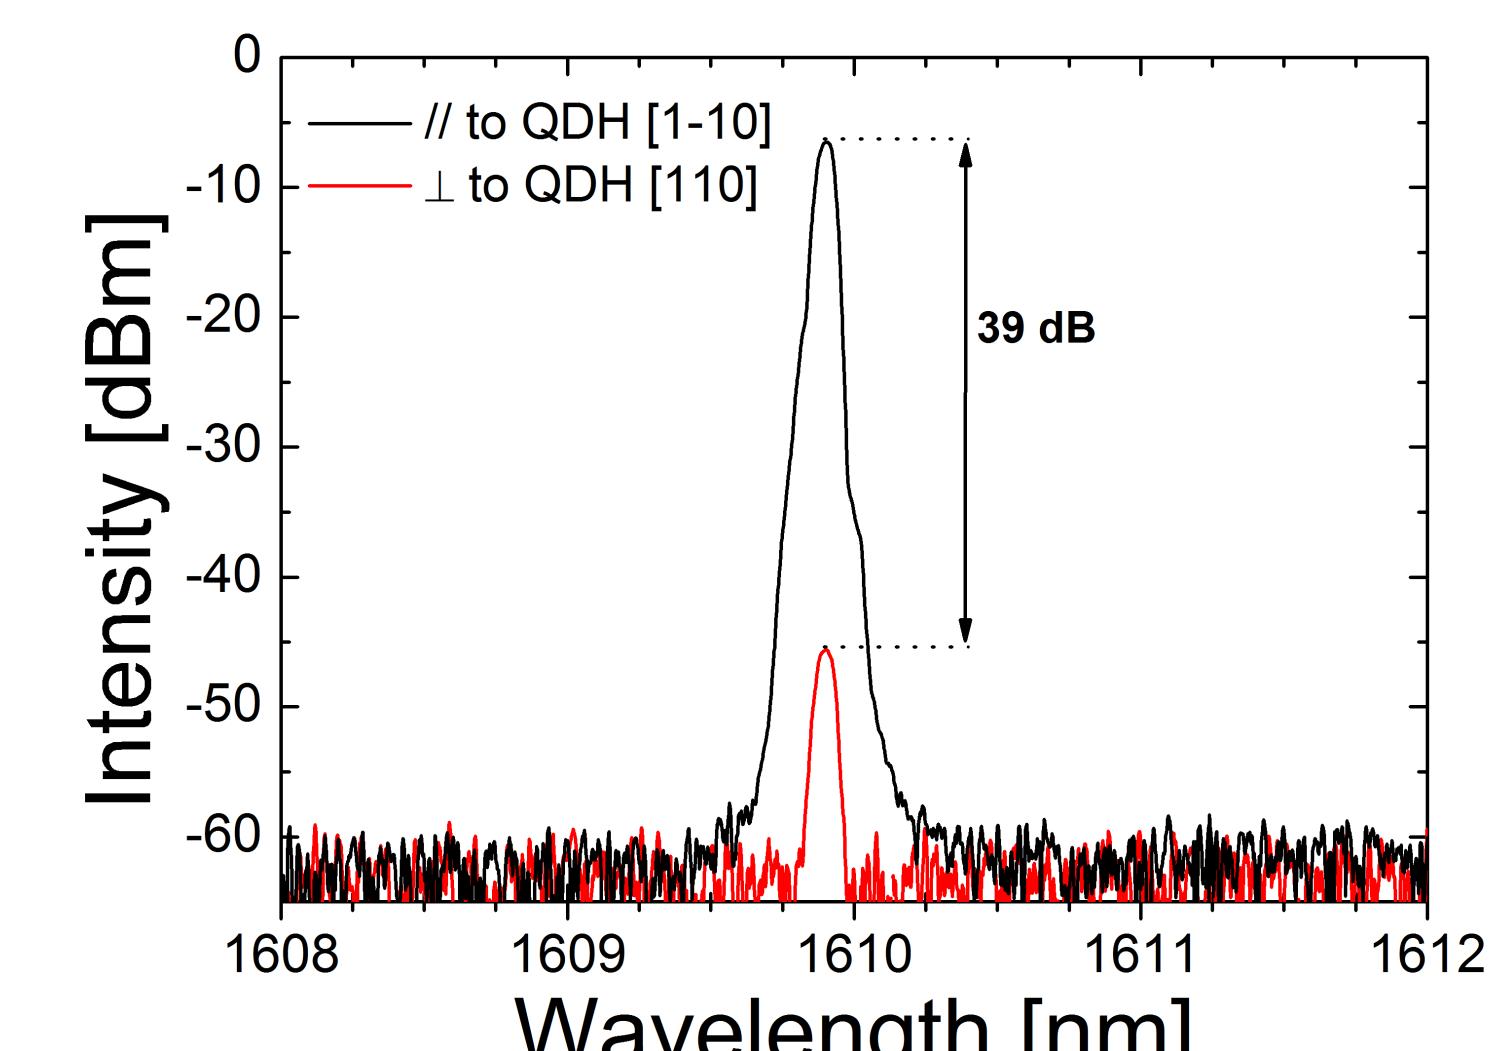

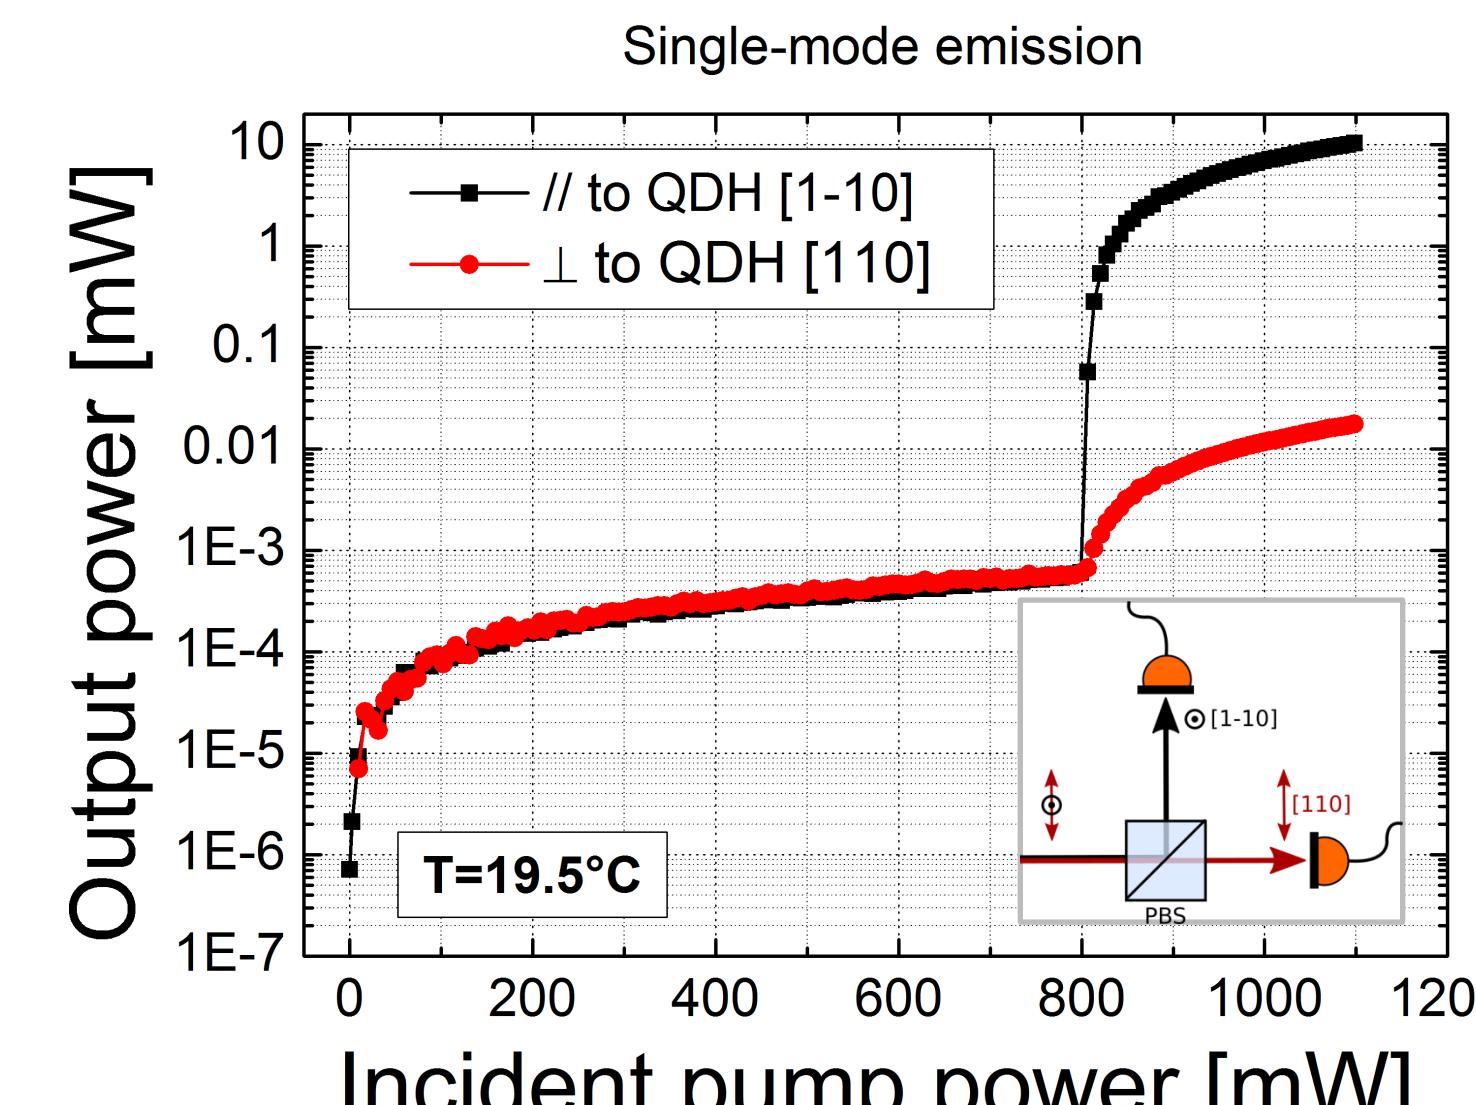

## Laser characterization

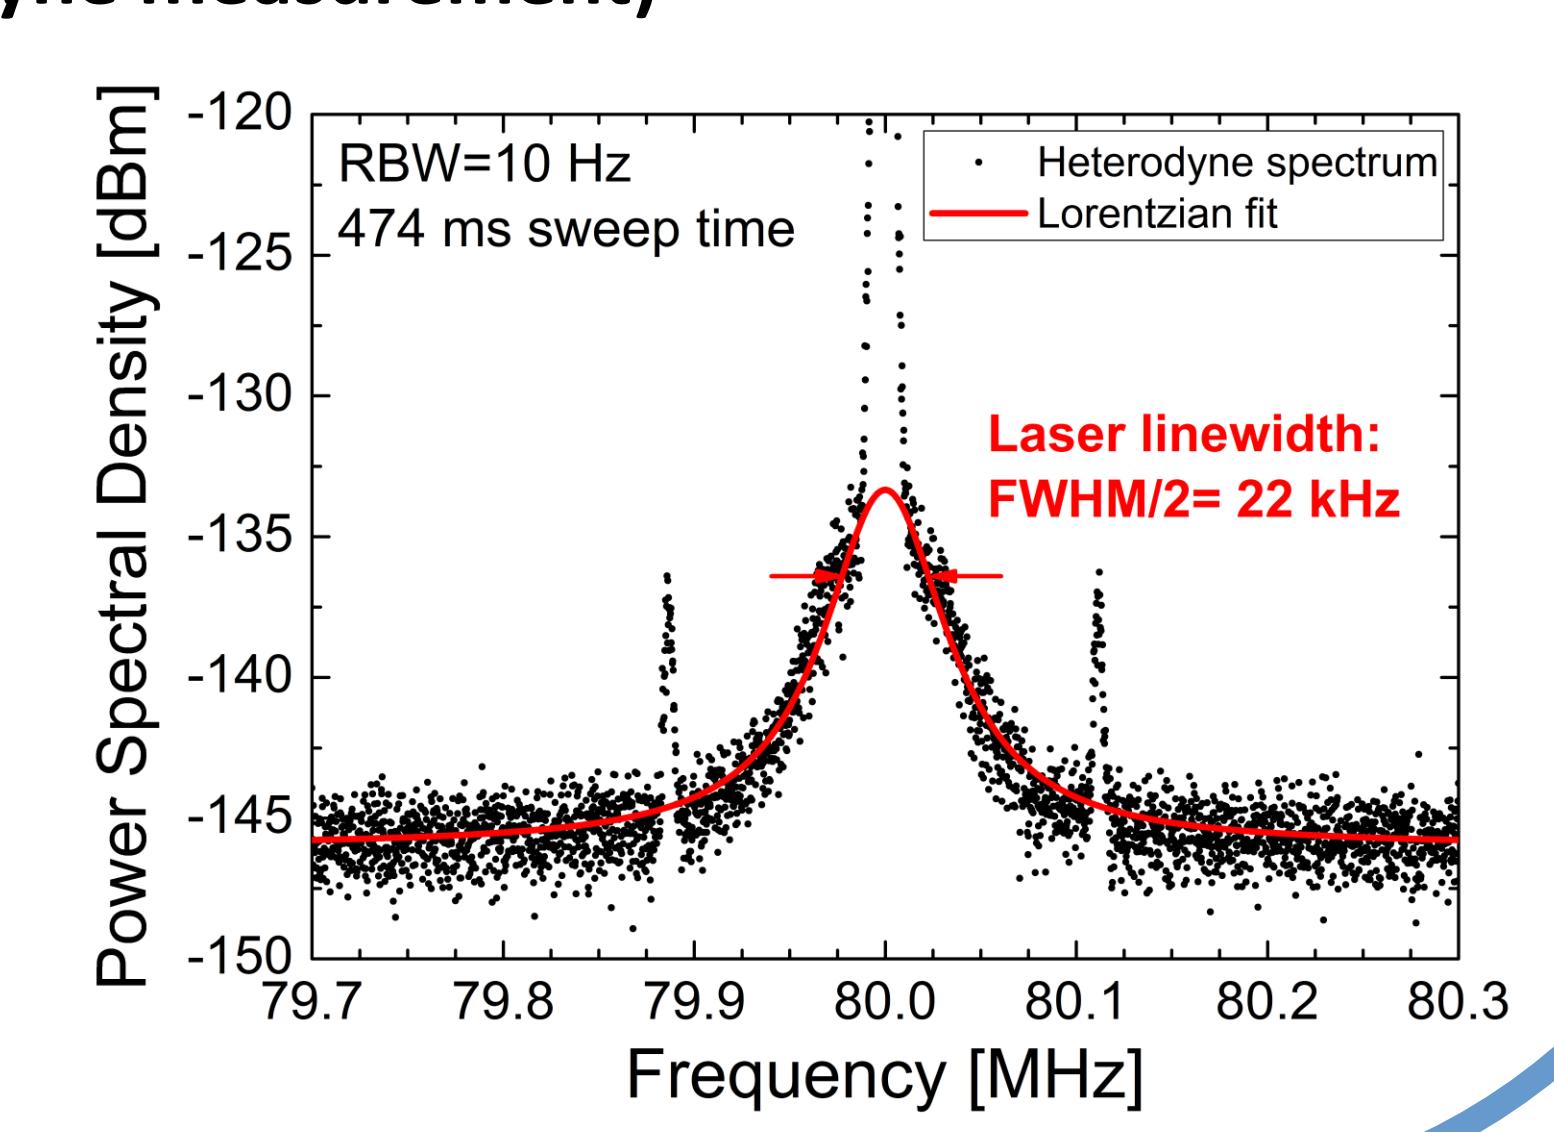

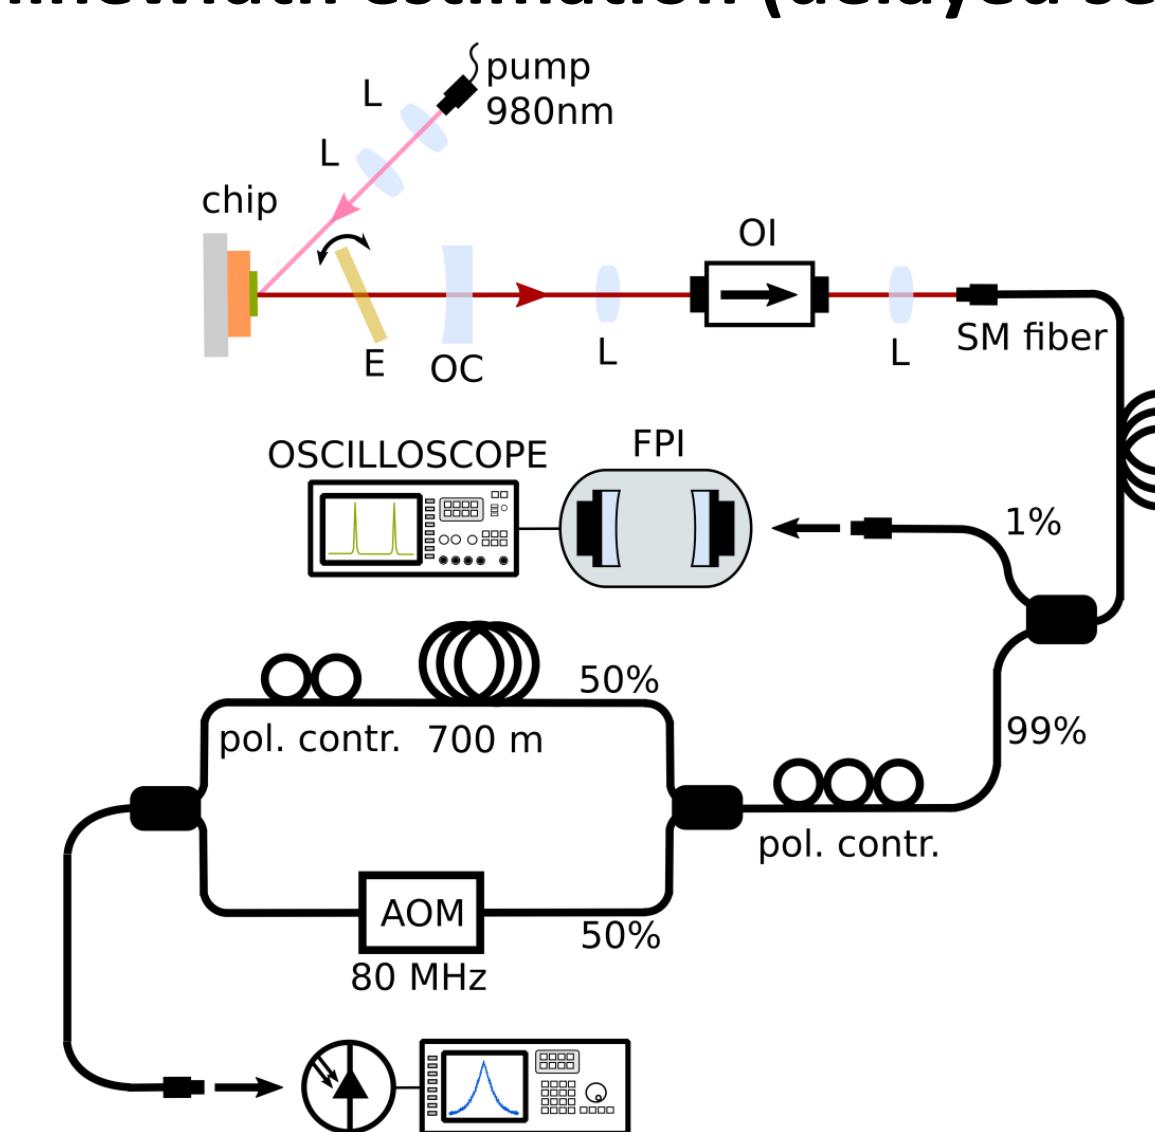

### Output characteristics and emission spectra

### Polarization-resolved laser emission

### Laser linewidth estimation (delayed self-heterodyne measurement)

Compound Semiconductor Week 2017
