

## Corrigendum

## Corrigendum to “Weighting for sex acts to understand the spread of STI on networks” [J. Theor. Biol. 311 (2012) 46–53]

Mathieu Moslonka-Lefebvre<sup>a,b,\*</sup>, Sebastian Bonhoeffer<sup>a</sup>, Samuel Alizon<sup>c</sup><sup>a</sup> Institute for Integrative Biology, ETH, Universitätstrasse 16, 8092 Zürich, Switzerland<sup>b</sup> INRA, UR 341 Mathématiques et Informatique Appliquées, 78350 Jouy-en-Josas, France<sup>c</sup> Laboratoire MIVEGEC (UMR CNRS 5290, IRD 224, UM1, UM2), 911 Avenue Agropolis, 34394 Montpellier Cedex 5, France

The authors regret that some characters are missing from Fig. 1 in the article referenced above. The corrected figure is included.

The authors would like to apologise for any inconvenience caused.

**Fig. 1.** Illustration of our weighting model. In this example, individuals *i* (A) and *j* (B) are allocated a constant sex budget (set to  $b=4$  sex acts per week) that they partition equally among their partners. The number of sex acts actually realised (RSA) between individuals *i* and *j* is the minimum of the two contributions (C).
