Almost a decade ago, the European Network of Excellence ENDURE successfully linked European institutions committed to IPM research and implementation. Many subsequent European IPM projects such as PURE, build upon the outcomes and lessons learned from ENDURE. Moreover, ENDURE paved the way for C-IPM, a recently established network among 21 European countries aiming to create added value and synergies by coordinating national IPM research and extension capabilities. By making available IPM tools and practices, C-IPM contributes to meeting the challenges of European growers transitioning to mandatory implementation of basic IPM principles following the Directive 2009/128/EC on sustainable use of pesticides.
