**HAL** is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

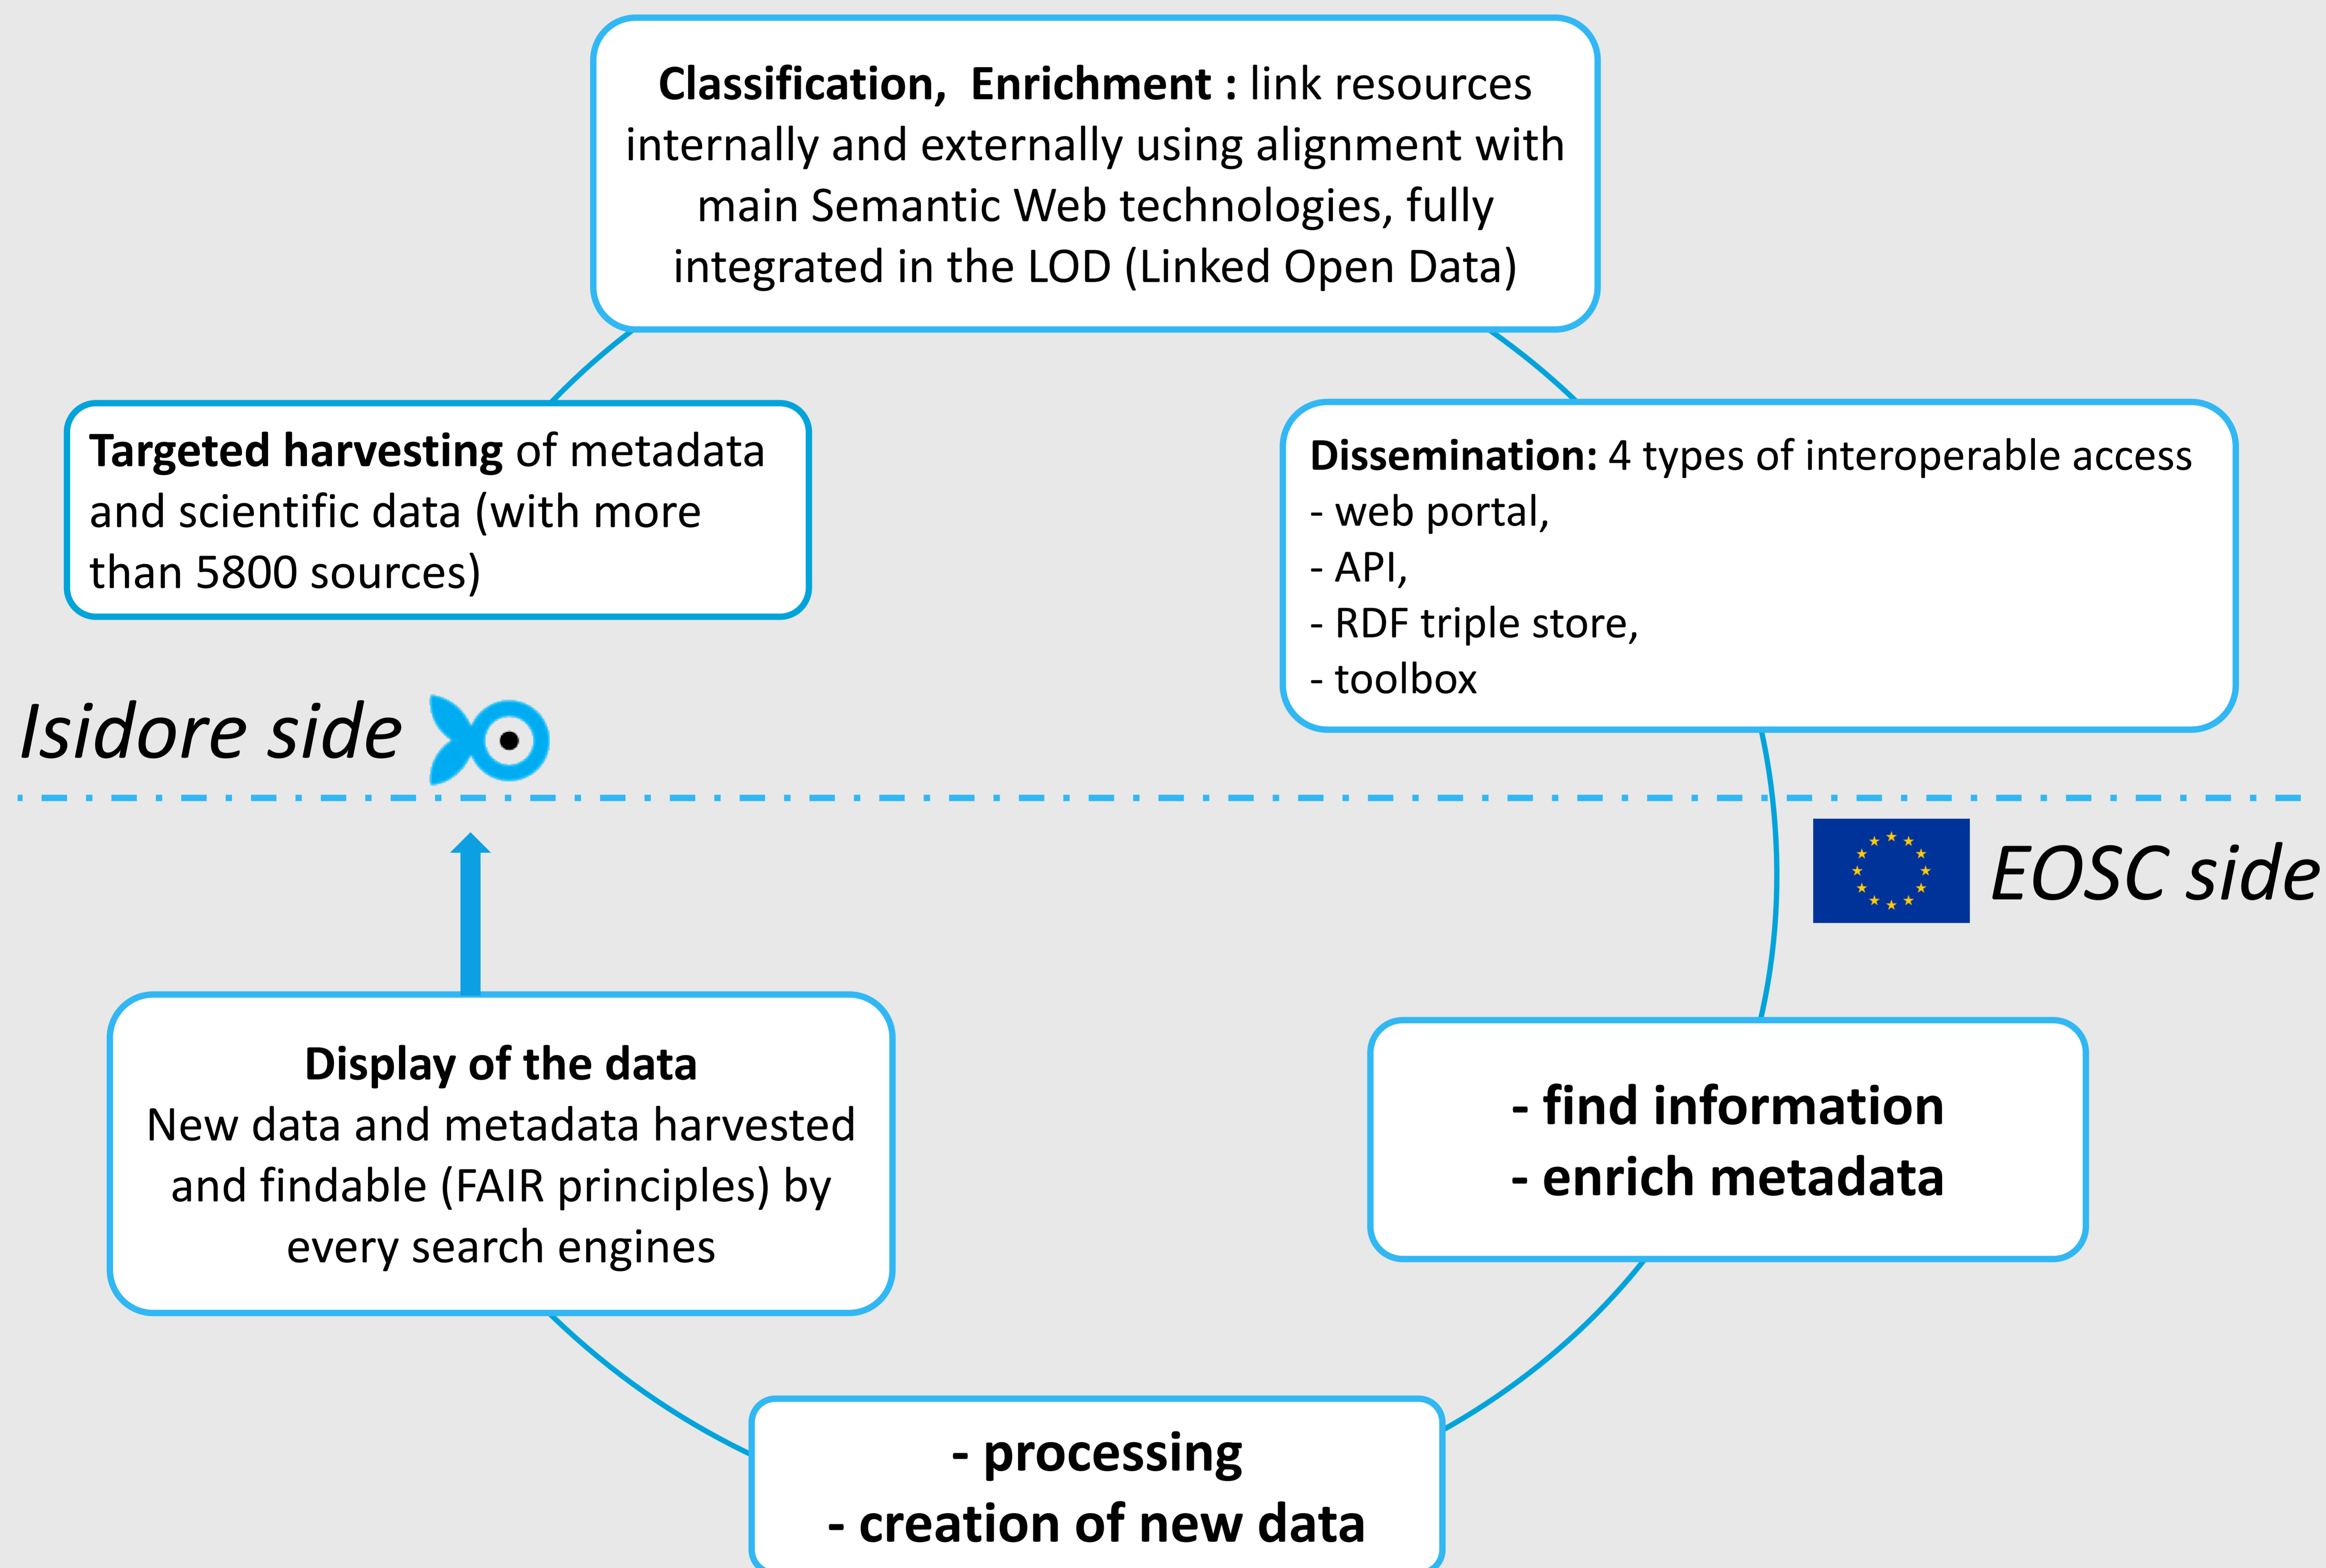

# The EOSC as a knowledge marketplace: the example of ISIDORE

*Suzanne Dumouchel*

Search engine allowing a unified access to digital data of Humanities and Social Sciences. Developed by Huma-Num (CNRS), it relies on the principles of Web of data and on Open Science. Isidore is free, open to all.

+ 5800 sources + 5 millions documents, currently in French, English, Spanish

## A virtuous circle for data producers

## Integration in the EOSC

As an EOSC service provider, Isidore could:

- beneficiate for a larger public on the European level: researchers, citizens, public and private sectors
- contribute to the visibility of SSH research data
- be integrated as a strategic software/added value service in the EOSC range of services.
- foster Open Science on a larger scale
