I. Catalogue of the Greek *Tholos* Baths of Egypt

Cat. no. 1 (B69, F37)

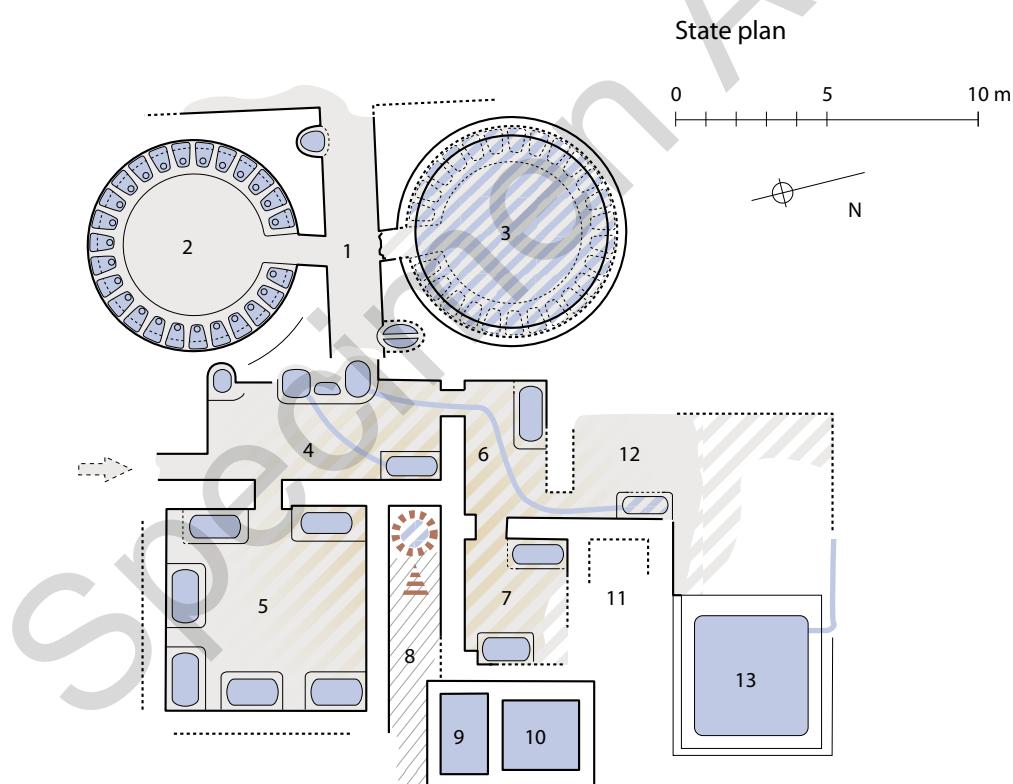

- 1 1.1. Alexandria, Baths in Cotarelli Ground
 1.2. –
- 2 2.1. About $31^{\circ}11'56.20''$ N, $29^{\circ}54'48.11''$ E
 2.2. South of ancient street L'a; inside the city walls.
 2.3. –
- 3 3.1. Destroyed.
 3.2. –
- 4 4.1. Found during rescue excavations in 1986.
 4.2. Not visited.
- 5 At least 50 m^2 .
- 6 6.1. Hellenistic (T).
 6.2. –
 6.3. –
- 7 7.1.
 7.2. –
- 8 Two hip-bathtubs, probably belonging to a *tholos* (diam. about 4.50 m); one immersion bathtub.
- 9 9.1. –
 9.2. –
- 10 10.1. Well?
 10.2. –
 10.3. –
- 11 11.1. –
 11.2. –
- 12 12.1. –
 12.2. RODZIEWICZ 2009, p. 195.
 FOURNET et al. 2013, cat. no. 37.
 RODZIEWICZ 2009, fig. 8 (plan).
 FOURNET et al. 2013, cat. no. 37 (standardised plan).
 Fournet, Redon in this volume (a), fig. 7b (typological plate).

Cat. no.	2 (B300, F38)
1	1.1. Athribis/Tell Atrib, South-East Baths 1.2. –
2	2.1. $30^{\circ}28'19.17''$ N, $31^{\circ}11'5.39''$ E 2.2. On the south-east slope of the largest <i>kom</i> of Tell Atrib. 2.3. –
3	3.1. Fairly well preserved, but heavily restored. 3.2. –
4	4.1. Almost fully excavated in 1946 by N. Farag (SCA) but unpublished by the excavator. Visited by H. Wild (IFAO) in 1948, and finally partly published by el-Khachab (SCA) in 1978. 4.2. Visited in February 2010 by B. Redon.
5	At least 505 m ² for the whole building, but likely less for each phase.
6	6.1. Hellenistic (T). 6.2. II: large remodelling probably in early Roman times (T). 6.3. –
7	7.1. I: probable classical <i>tholos</i> model. II: hybrid type. I and II: bather circuit unknown. 7.2. Different levels of rooms and bathtubs suggest at least two different phases and circuits (if not rather more): I: entrance from the west (where a possible entrance hall should be restored) leading to a corridor (1) passing between the two <i>tholoi</i> (2, 3) and leading to a distribution corridor (predecessor of the present Room 4) opening onto one or more square rooms with immersion bathtubs (floors of the first phase are visible under the present Rooms 5, 7 and 12). II: circuit difficult to assess after large remodelling: abandonment of <i>Tholos</i> 2, transformation of <i>Tholos</i> 3 (blocking of the niches and door, covered by a new interior wall with stucco + abandonment of the hip-bathtubs) into a reservoir. The passage between 1 and 4 is also blocked by the construction of three basins. Renewal of the east section with a possible entrance to the south, leading to Corridor 4 that opens into rooms with immersion bathtubs (5, 6 and 7). I: two <i>tholoi</i> (2, 3; diam. about 7 m) with 25 and probably also 25 hip-bathtubs; unknown number of immersion bathtubs in the square rooms. II: Rooms 5, 6 and 7 with a total of 9 immersion bathtubs.
9	9.1. I: unknown, but a furnace is likely to be located at the same location as in phase II. II: probable deep furnace (8) topped by a boiler. 9.2. I: unknown. II: heating walls (for Rooms 5 and 7)?
10	10.1. I: two small basins in Corridor 1; a hypothetical tank under Room 7 and near the possible furnace (to fit with the “classical model”). II: large rectangular reservoir (13), supplied by an aqueduct running north. It probably supplied one intermediary basin in Room 12 (a second one, next to the first, is visible on Wild’s pictures; it has now totally disappeared) and a water-tower with adjoining reservoir (9, 10); four small basins in the west wall of Room 4, one supplied by an oval basin contiguous to Furnace 8 and probably supplied with hot water, and one by the oval basin of Room 12 (probably with cold water). The former <i>Tholos</i> 3, likely transformed into a large reservoir, may have played a role in the water supply of the building. 10.2. – 10.3. –

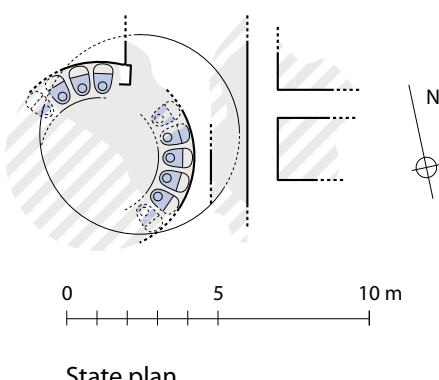

Cat. no. 2 (B300, F38)

- 11 11.1. –
 11.2. Two superposed niches are visible in Wild's pictures of the blocked wall of *Tholos 3*: one large and corresponding to the usual niches above hip-bathtubs, the others, smaller (c. 15 × 10 cm), under the larger niches.
- 12 12.1. –
 12.2. EL-KHACHAB 1949, p. 7, n. 3.
 SCHWARTZ, WILD 1950, pp. 60–61, n. 2, pl. XV.
 EL-KHACHAB 1978, pp. 12–13.
 FOURNET et al. 2013, cat. no. 38.
 Fournet, Redon in this volume (a); Guimier-Sorbets, Redon in this volume.
- 13 Unpublished photos of H. Wild taken in 1948 and stored at IFAO.
 EL-KHACHAB 1978, plan 1 (general plan), pls. 60–65 (photos).
 FOURNET et al. 2013, cat. no. 38 (standardised plan).
 Fournet, Redon in this volume (a), fig. 7b (typological plate), fig. 10 (restored state plan, two archival photos, reconstruction of the niches of *Tholos 3*).

Cat. no. 3 (301, F39)

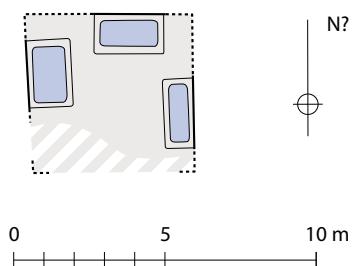

- 1 1.1. Athribis/Tell Atrib, South-West Baths
 1.2. –
- 2 2.1. $30^{\circ}28'19.47''$ N, $31^{\circ}11'3.73''$ E
 2.2. In the south-west part of the largest *kom* of Tell Atrib.
 2.3. –
- 3 3.1. Destroyed.
 3.2. –
- 4 4.1. Excavated in 1960 by K. Michałowski (Polish mission).
 4.2. Not visited.
- 5 I and II: at least 50 m².
 III: at least 85 m².
- 6 6.1. First half of 1st century AD (E).
 6.2. II: renovation of the floor in first quarter of 2nd century AD (E).
 III: rebuilding of a new *tholos* 42 cm above the first in the second half of 2nd century AD (E).
 6.3. –
- 7 7.1. –
 7.2. –
- 8 I and II: one *tholos* (diam. 6.35 m) with at least 23 hip-bathtubs.
 III: one *tholos* (diam. 5.90 m) with c. 20 hip-bathtubs, and several adjoining rooms of unknown function, visible on photos.
- 9 9.1. –
 9.2. –
- 10 10.1. Reservoir (?), north of the *tholos*.
 10.2. –
 10.3. –
- 11 11.1. Fragments of mosaics and of marble slabs, Corinthian capitals, column drums and other architectural elements of various kind of granite and marble, maybe belonging to Phase III.
 11.2. A *labrum* in red granite (diam. 2,40 m) found in the vicinity, maybe linked with Phase III.
- 12 12.1. –
 12.2. MICHAŁOWSKI 1962b.
 FOURNET et al. 2013, cat. no. 39.
 Myśliwiec in this volume.
- 13 MICHAŁOWSKI 1962b, pl. I (general plan of the site), pl. IV (two photos).
 FOURNET et al. 2013, cat. no. 39 (standardised plan).
 Fournet, Redon in this volume (a), fig. 7b (typological plate).

State plan

Cat. no. 4 (B317, F43)

- 1 1.1. Buto/Tell el-Fara'in, Baths near the temple
 1.2. –
- 2 2.1. About 31°11'50.78" N, 30°44'36.67" E
 2.2. Near the entrance of the Uadjet temple.
 2.3. –
- 3 3.1. Some ruins still visible on surface, but almost entirely destroyed.
 3.2. –
- 4 4.1. Partially excavated in 1966 by EES.
 4.2. Identified and visited by G. Lecuyot in 2010.
- 5 At least 40 m².
- 6 6.1. ?
 6.2. –
 6.3. –
- 7 7.1. –
 7.2. –
- 8 One room with three immersion bathtubs; one or two *tholoi* with hip-bathtubs may have been connected with this bathroom which was excavated in isolation.
- 9 9.1. –
 9.2. –
- 10 10.1.
 10.2. –
 10.3. –
- 11 11.1. –
 11.2. –
- 12 12.1. –
 12.2. SETON-WILLIAMS 1966, pp. 164–166.
 FOURNET et al. 2013, cat. no. 43.
 SETON-WILLIAMS 1966, pl. XXXIX (plan).
 FOURNET et al. 2013, cat. no. 43 (standardised plan).
 Fournet, Redon in this volume (a), fig. 7b (typological plate).
 One unpublished photo found in the EES archives by P. Ballet and G. Lecuyot.

Cat. no.	5 (B318, F42)
1	1.1. Buto/Tell el-Fara'in, East Baths 1.2. –
2	2.1. 31°11'43.12" N, 30°44'49.57" E 2.2. Eastern limit of the <i>kom</i> , 120 m south of the main temple, apparently not far from a canal. 2.3. –
3	3.1. Well preserved, covered after the excavations, but in danger of disappearance because located outside the enclosure wall of the archaeological site of Buto. 3.2. –
4	4.1. Fully excavated in 2010 (except for the furnace area) by W. Ibrahim, under the supervision of M. Abd el-Rafa Fadl (SCA); architectural survey and partial excavations of the furnace by S. Dhennin, G. Lecuyot and B. Redon in June 2010. 4.2. See 4.1.
5	360 m ² .
6	6.1. Probably first half of the 2nd century BC (E). 6.2. Slight remodelling, to increase capacity of bathing facilities, at an unknown date (Phase II). 6.3. Abandoned before the end of the Ptolemaic period, probably during the first half of the 1st century BC (E).
7	7.1. Classical <i>tholos</i> bath, circular circuit. 7.2. Entrance to the west, leading to an oblong hall divided in two parts (1, 2), each of them opening onto a <i>tholos</i> (3, 4) which communicates, to the east, with the distribution Hall 5. It gives access, on its southeastern corner, to the relaxation room (6). A semi-peripheral corridor (7) connects Halls 1 and 5.
8	I: two <i>tholoi</i> (3, 4, diam. 4.40–4.50 m) each with 24 hip-bathtubs; one rectangular room with three immersion bathtubs (6). II: <i>idem</i> and eight hip-bathtubs added in north part of Corridor 5.
9	9.1. Furnace 10 probably with two phases: phase I: round furnace? Phase II: oval furnace. 9.2. I and/or II: heating wall in Room 6?
10	10.1. I: one basin between the two <i>tholoi</i> , in Corridor 5; one basin near Tank 9; one basin in the south part of Corridor 5, near the entrance from Corridor 7; L-shaped reservoir (9) supplied by pottery channel from north. II: like I, but south-west basin of Corridor 5 probably levelled and replaced by a small basin near the central basin of Corridor 5. 10.2. – 10.3. I and II: all floors inclined toward Rooms 1 and 2, leading water to a drain running along the west façade of Room 1 and another one starting from the north wall of Room 2.
11	11.1. – 11.2. Excellent example of a typical Graeco-Egyptian bath building; unusual is the placement of the eight hip-bathtubs in Corridor 5, added later in the only available space, obviously to increase capacity.
12	12.1. – 12.2. ABD EL-RAFA FADL, LECUYOT, REDON 2012. FOURNET et al. 2013, cat. no. 42. Abd el-Rafa Fadl et al. in this volume; Bouchaud, Redon in this volume; Fournet, Redon in this volume (a); Guimier-Sorbets, Redon in this volume.

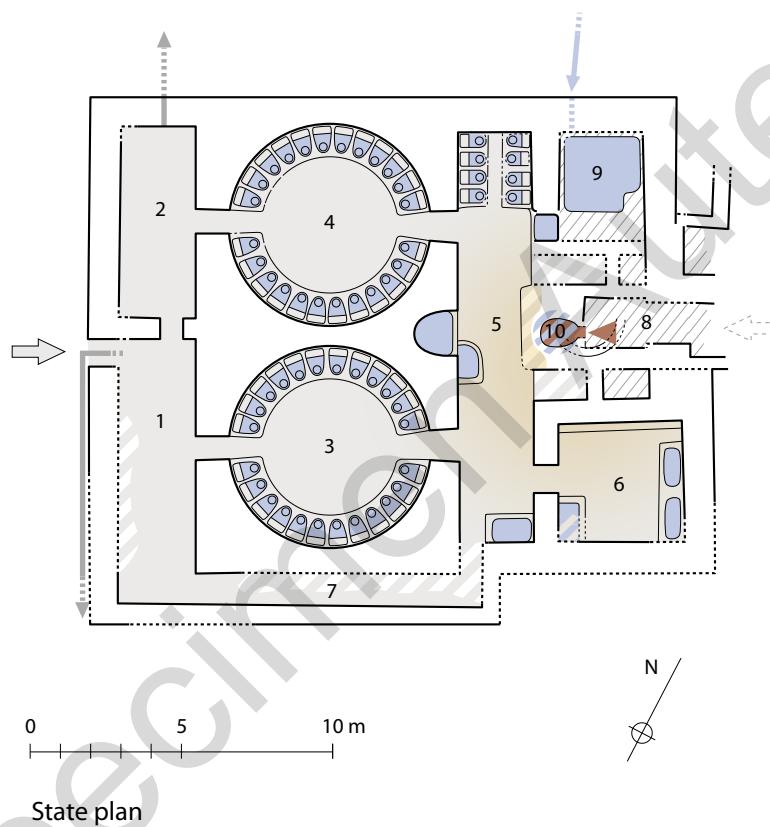

Cat. no. 5 (B318, F42)

13

ABD EL-RAFA FADL, LECUYOT, REDON 2012 (2 photos, 1 plan).

FOURNET et al. 2013, cat. no. 42 (standardised plan).

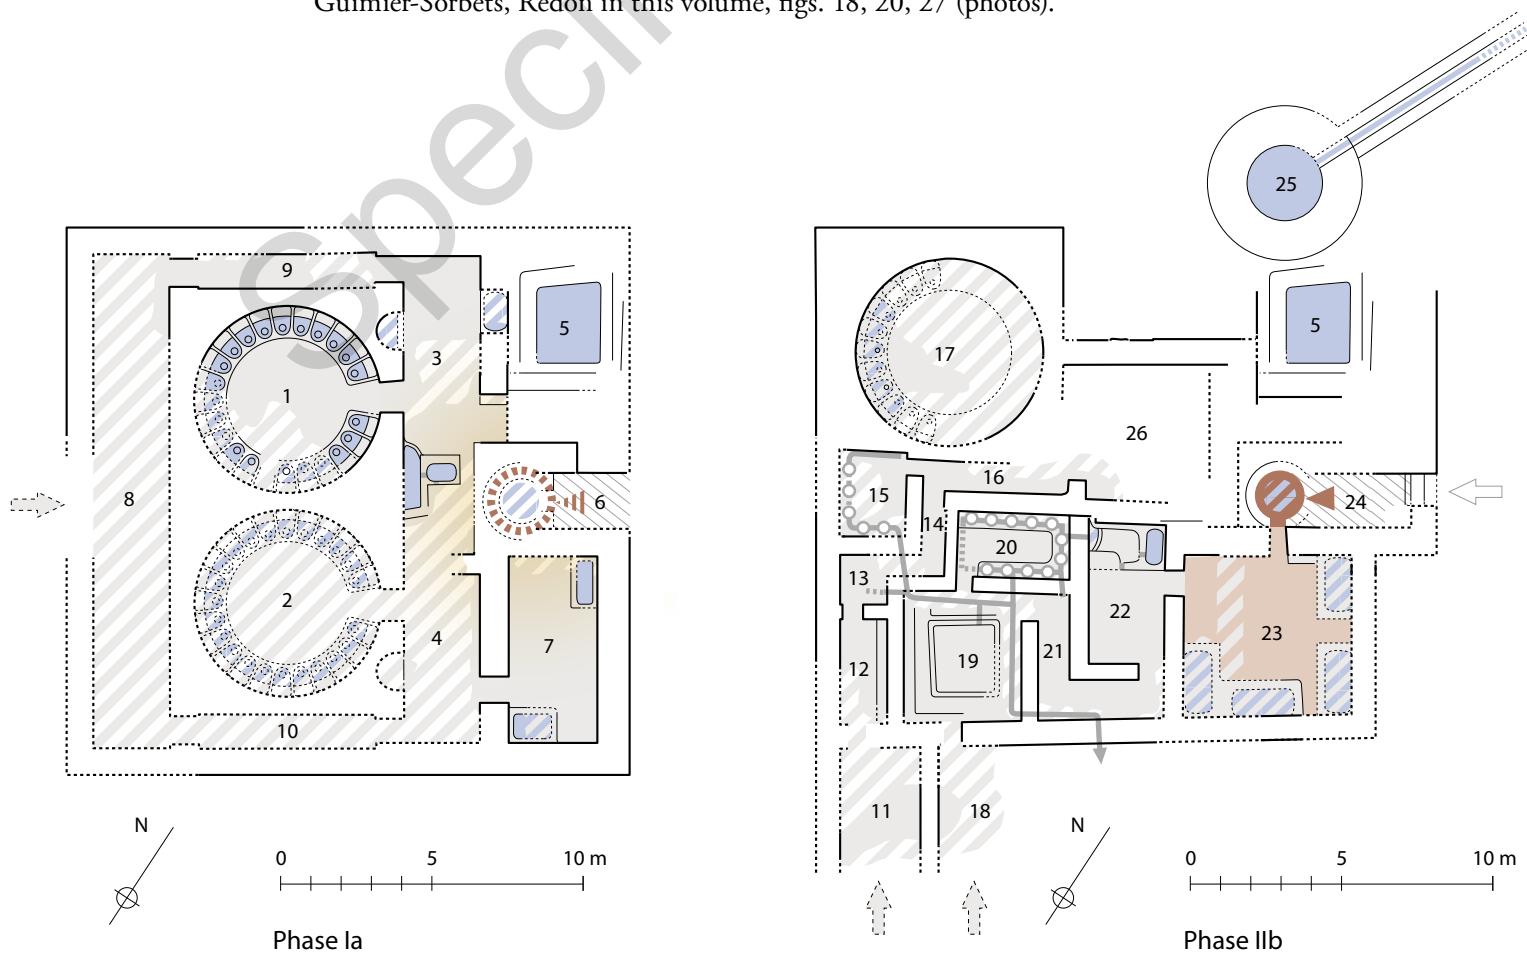

Abd el-Rafa Fadl et al. in this volume, figs. 1 (plan), 2–16 (photos); Fournet, Redon in this volume (a), figs. 3 (photo and reconstruction), 7a (typological plate); Guimier-Sorbets, Redon in this volume, fig. 10 (photo).

Cat. no.	6 (B256, F40)
1	1.1. Buto/Tell el-Fara'in, North Baths 1.2. –
2	2.1. 31°11'56.66" N, 30°44'38.36" E 2.2. Northern limit of the <i>kom</i> , maybe in an industrial area (pottery), 30 m east of a large enclosure wall, 120 m north of the main temple. 2.3. –
3	3.1. Well preserved but ancient phases partly covered by successive rebuilding of the baths. 3.2. –
4	4.1. First excavated by EES in 1968 and 1969, under the direction of D. Charlesworth. Reassessed between 2008 and 2014 by G. Lecuyot and B. Redon in the frame of the mission of the University of Poitiers (P. Ballet). 4.2. See 4.1.
5	I: 340 m ² . II: c. 355 m ² . III: Roman bath, see cat. no. 56.
6	6.1. Ia: early 2nd century BC (E). 6.2. Ib: important remodelling at unknown time that apparently led to the partial abandonment of the bathing activities. IIa: rebuilding and transformation into a hybrid bath at the end of the 1st century BC/beginning of the 1st century AD (E). IIb: remodelling phase at unknown time. III: rebuilding into a Roman bath second half of the 2nd century AD (E; not described here, see cat. no. 56). 6.3. 3rd century AD (E).
7	7.1. Ia: classical <i>tholos</i> model, probably with two retrograde circuits. Ib and IIa: unknown. IIb: hybrid type, with two retrograde circuits. 7.2. Ia: entrance from west into Hall 8, giving access to a peripheral corridor (9) to the north and its probable counterpart to the south (10); they lead to the distribution Corridors 3 and 4, maybe connected through a small pathway near the furnace. They open respectively into <i>Tholos</i> 1 and 2. Corridor 4 gives also access, to the north-west, to the relaxation Room 7. Ib: unknown circuit and possible abandonment of bathing activities: a basin is built on the levelled east wall of <i>Tholos</i> 1 and latrines above the levelled east wall of <i>Tholos</i> 2. IIa: probably identical to IIb but largely covered by Phase IIb remains. IIb: two separate sections, West: entrance from south in Room 11, leading to a cloakroom/waiting room with a bench (12), an intermediate room (13) and an L-shaped corridor (14) that opens west into Latrines 15 and east into Corridor 16. From there, probable access to a square room (26) and <i>Tholos</i> 17; East: entrance from south in Room 18, giving access to Room 19, a square room with a central space limited by a low wall (10 cm high) fitted with a drain to the north. Room 19 opens onto Latrines 20 and an L-shaped corridor (21) leading to a cold immersion room (22) and a hot immersion room (23). III: see cat. no. 57.
8	Ia: one and most likely two <i>tholoi</i> (1, 2, diam. 6.10 m) with 22 or 23 hip-bathtubs, a rectangular room with at least two immersion bathtubs (7). Ib: two <i>tholoi</i> levelled, Room 7 still operating? IIa: West section with one <i>tholos</i> (17, diam. 6.20 m) with 22–23 (?) hip-bathtubs (repaired at least once); East section: design and function unknown (hidden by phase IIb), Room 23 apparently not hypocausted. IIb: West section: <i>Tholos</i> 17 with 22–23 (?) hip-bathtubs unless already transformed into a reservoir (slabs cover the hip-bathtubs after their second renewal; for a similar transformation, see Athribis SE); East section: one room with one immersion bathtub (22); one room with hypocaust system and most likely four immersion bathtubs (23).

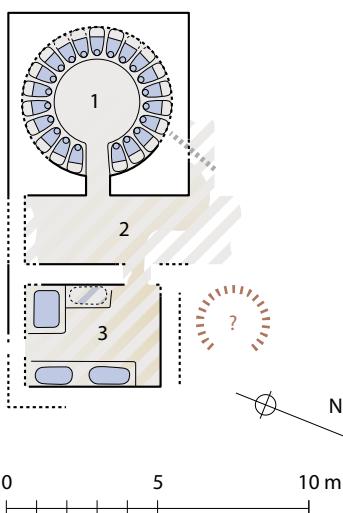

Cat. no. 6 (B256, F40)

- 9 9.1. Ia: Furnace 6 between Tank 5 and Room 7.
 Ib: unknown.
 IIa and b: Furnace 24, probably topped by a boiler, between Tank 5 and Room 23.
 9.2. IIb: hypocausted floor in Room 23.
- 10 10.1. Ia: rectangular tank (5) with an adjoining reservoir accessed from Room 3; semi-circular basin in north-west wall of Room 3; rectangular high basin in front of Furnace 6.
 IIa and b: rectangular tank (5), connected with a reservoir (25), supplied by a channel connected to a probable *sakieh* visible during 2013 geophysical survey to the north-west of the baths.
 10.2. –
 10.3. IIb: in both sections, pavements of bathing rooms sloped towards Latrines 15 and 20; from 15 and 20, drain through Rooms 19 and 21 towards south.
- 11 11.1. Painted plaster on the walls of Room 7 and possibly Room 23.
 11.2. Ib: latrines (but the bathing activities may be interrupted during that phase).
 IIa and b: bath complex mixes Greek (*tholos*, immersion bathtubs), Graeco-Egyptian (separate sections, latrines) and Roman features (hypocaust).
- 12 12.1. –
 12.2. CHARLESWORTH 1969.
 CHARLESWORTH 1970.
 LECUYOT, REDON 2011.
 LECUYOT, REDON 2014.
 REDON, LECUYOT 2012.
 FOURNET et al. 2013, cat. no. 40.
 Bouchaud, Redon in this volume; Fournet, Redon in this volume (a); Guimier-Sorbets, Redon in this volume.
- 13 CHARLESWORTH 1970, figs. 1–3 (plans), figs. 27.1–2, 28.1–2 (photos).
 LECUYOT, REDON 2011, figs. 9, 11–12 (photos).
 FOURNET et al. 2013, cat. no. 40 (standardised plan).
 LECUYOT, REDON 2014, fig. 1 (plan), figs. 3–5, 7 (photos).
 Fournet, Redon in this volume (a), figs. 7a (typological plate), 14 (standardised plan of Phase IIb);
 Guimier-Sorbets, Redon in this volume, figs. 18, 20, 27 (photos).

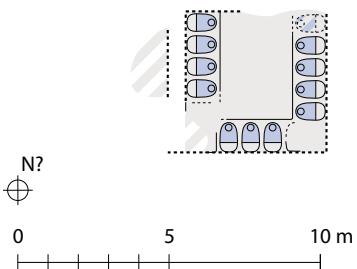

Cat. no. 7 (B316, F41)

- 1 1.1. Buto/Tell el-Fara'in, South Baths
 1.2. –
- 2 2.1. 31°11'29.71" N, 30°44'38.06" E
 2.2. Southern limit of the *kom*.
 2.3. –
- 3 3.1. Badly preserved, recovered after their discovery.
 3.2. –
- 4 4.1. Partially excavated in 2009 by a SCA team conducted by M. Adb el-Rafa Fadl; architectural survey by G. Lecuyot and B. Redon in June 2010.
 4.2. See 4.1.
- 5 5. At least 85 m².
- 6 6.1. Hellenistic (T, E).
 6.2. –
 6.3. –
- 7 7.1. Probable classical *tholos* model with retrograde circuit.
 7.2. Could correspond to a “classical bath”, with one of the *tholoi* (1) opening onto a distribution corridor (2), which gives access to an immersion bathtub room (3). As the limits of the excavated part were not visible during the architectural survey, it seems possible to restore other rooms, like a second *tholos* and an entrance hall, to the north.
- 8 One *tholos* (1, diam. about 5 m) with 21 hip-bathtubs; one rectangular room (3) with at least two immersion bathtubs (remains of a third one is visible on the floor; a fourth one is possible in the south corner, unless it is a tank).
- 9 9.1. Probable furnace near Room 3.
 9.2. –
- 10 10.1. One possible tank in Room 3.
 10.2. –
 10.3. –
- 11 11.1. –
 11.2. –
- 12 12.1. –
 12.2. ABD EL-RAFA FADL, LECUYOT, REDON 2012, p. 24.
 FOURNET et al. 2013, cat. no. 41.
 FOURNET, Redon in this volume (a); Guimier-Sorbets, Redon in this volume.

Cat. no. 8 (B63, F44)

- 1 1.1. Canopus/Abukir, Greek Baths
1.2. —
- 2 2.1. About $31^{\circ}18'43.71''$ N, $30^{\circ}3'1.40''$ E
2.2. Context unknown, south of Teufiq fort, 175 m north-east of the so-called Sarapeion.
2.3. —
- 3 3.1. Probably destroyed;
3.2. —
- 4 4.1. Excavated by E. Breccia before 1923.
4.2. Not visited.
- 5 At least 25 m^2 .
- 6 6.1.
6.2. —
6.3. —
- 7 7.1. —
7.2. —
- 8 One rectangular room with 12–14 hip-bathtubs (Breccia text: three along short sides, four along long sides; Breccia photo: three along one short side, four-five along one long side, and probably four along the other long side).
- 9 9.1. —
9.2. —
- 10 10.1. Large cistern and reservoir near the bath building.
10.2. —
10.3. —
- 11 11.1. —
11.2. —
- 12 12.1. —
12.2. BRECCIA 1923, p. 147.
BRECCIA 1926, pp. 41–42.
FOURNET et al. 2013, cat. no. 44.
Fournet, Redon in this volume (a).
- 13 No plan published by Breccia; schematic plan after description by Breccia and photo BRECCIA 1926, pl. VIII, fig. 2 in FOURNET et al. 2013, cat. no. 44.
Fournet, Redon in this volume (a), fig. 7b (typological plate).

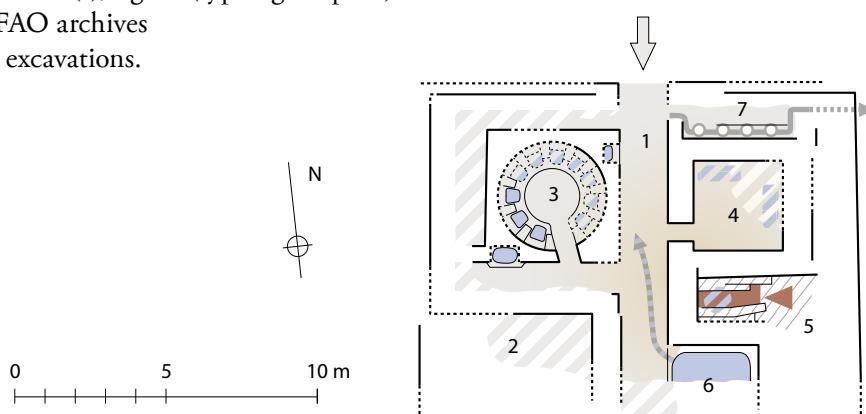

Cat. no. 9 (B290, F46)

- 1 1.1. Dionysias/Qasr Qarun, North Baths
 1.2. –
- 2 2.1. 29°24'25.94" N, 30°24'59.67" E
 2.2. To the east of and close to the Roman fortress, but not connected with it.
 2.3. –
- 3 3.1. Some remains of *tholos* still visible, relatively well preserved.
 3.2. –
- 4 4.1. Partly excavated (only one *tholos*) by H. Wild (Franco-Swiss mission led by J. Schwartz) in 1950.
 Located and briefly cleaned by M. Kenawi (Italian mission led by E. Papi, university of Siena) in February 2012.
 4.2. Visited in January 2010 by B. Redon.
 5. At least 40 m².
- 6 6.1. Hellenistic (T, certainly independent from and most likely built well before the 4th century AD fortress).
 6.2. –
 6.3. –
- 7 7.1. –
 7.2. –
- 8 8. One *tholos* (diam. about 5.15 m) with 17 hip-bathtubs and one double hip-bathtub.
- 9 9.1. –
 9.2. –
- 10 10.1.
 10.2. –
 10.3. –
- 11 11.1. –
 11.2. –
- 12 12.1. –
 12.2. SCHWARTZ, WILD 1969, pp. 9 and 105, pl. V.
 FOURNET et al. 2013, cat. no. 46.
 SCHWARTZ, WILD 1969, pl. V (plan).
 FOURNET et al. 2013, cat. no. 46 (standardised plan).

- 13 –

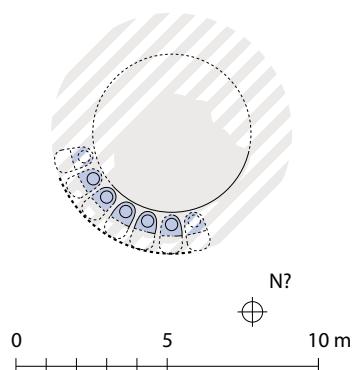

Cat. no. 10 (B291, F45)

- 1 1.1. Dionysias/Qasr Qarun, South Baths
1.2. –
- 2 2.1. 29°24'10.93" N, 30°25'01.85" E
2.2. About 100 m south of the temple, in a residential area, maybe connected with a house in its second phase.
2.3. –
- 3 3.1. Little preserved.
3.2. –
- 4 4.1. Fully excavated in by H. Wild (Franco-Swiss mission led by J. Schwartz) in 1948.
4.2. Visited in January 2010 by B. Redon.
- 5 At least 130 m².
- 6 6.1. Late Hellenistic (E, T)?
6.2. Remodelling in Roman period (E)?
6.3. Beginning of 3rd century AD (E)?
- 7 7.1. Hybrid baths with probable retrograde circuit.
7.2. I: Entrance from north leading to Corridor 1 that opens east into Latrines 7 and a square room, likely a relaxation room (4); to the west, small corridor leading to *Tholos* 3. Second entrance from W? Peripheral corridor around *Tholos* 3?
II: unknown.
- 8 I: one *tholos* (3, diam. 3.70 m) with 10 hip-bathtubs; one rectangular room (4) probably with one or two immersion bathtubs (on north or east walls where no pavement had been preserved).
II: transformation of *Tholos* 3 into round sweat bath or room with round immersion pool (diam. 1.75 m)? (not shown on the plan).
- 9 9.1. I: rectangular furnace (5) between Tank 6 and Room 4.
II: unknown.
9.2. –
- 10 10.1. I: two small oval basins in the corridor around *tholos*; Reservoir 6 with channel maybe to supply with water *Tholos* 3 or one of its basins.
II: unknown.
10.2. –
10.3. I: floors of Rooms 1, 3, and 4 inclined for drainage towards drain through Latrine 7 to east.
II: unknown
- 11 11.1. Wall painted plaster imitating structural decor in Corridor 1.
11.2. Latrine in Room 7.
- 12 12.1. –
12.2. SCHWARTZ, WILD 1950, pp. 51–62.
FOURNET et al. 2013, cat. no. 45.
Fournet, Redon in this volume (a); Guimier-Sorbets, Redon in this volume.

44 photos stored in the IFAO archives taken by H. Wild during excavations.

Cat. no. 11 (B119, F49)

- 1 1.1. Diospolis Parva/Hu
 1.2. –
- 2 2.1. 26°1'17.16" N, 32°16'58.50" E (coordinates of the site)
 2.2. Near the Nile river (which has partially destroyed the baths), in a place called Sheikh Hosheimi, 50 m north-east of a school for boys.
 2.3. –
- 3 3.1. Destroyed.
 3.2. –
- 4 4.1. Found by chance in 1958, not excavated. The mosaic said to have been carried to a SCA storeroom of Upper Egypt (Kuft?), but not found so far.
 4.2. Visited in February 2010 by B. Redon, not found.
- 5 At least 50 m² (surface area of the *tholos*).
- 6 6.1. Maybe 2nd century BC (mosaic).
 6.2. –
 6.3. –
- 7 7.1. –
 7.2. –
- 8 One *tholos* (diam. about 7.80 m) with probably 20–21 hip-bathtubs if two doors, 22–23 hip-bathtubs if one door.
- 9 9.1. –
 9.2. –
- 10 10.1. –
 10.2. –
 10.3. –
- 11 11.1. *Opus tessellatum* mosaic of *tholos* decorated with marine animals (dolphin, octopus, fish).
 11.2. –
- 12 12.1. –
 12.2. HONIGSBERG 1969.

Cat. no. 12 (B295, F47)

- 1 1.1. Euhemeria/Qasr el-Banat, Bath 1
 1.2. –
- 2 2.1. 29°22'25.91" N, 30°32'30.87" E
 2.2. Western limit of the *kom.*
 2.3. –
- 3 3.1. Poorly preserved.
 3.2. –
- 4 4.1. Unknown date of discovery and excavations; first mentioned by el-Khachab in 1978. Recent reinvestigation by C. Römer (Fayum Survey Project and DAIK mission)
 4.2. Visited in May 2010 by B. Redon and April 2011 by Th. Fournet, B. Redon and M. Vanpeene, with C. Römer.
- 5 310 m².
- 6 6.1. Hellenistic (T).
 6.2. II: pavements and hip-bathtubs remodelled many times; one major remodelling to reduce the size of *tholos* B at unknown date.
 6.3. –
- 7 7.1. I and II: classical *tholos* model with circular circuit.
 7.2. I: entrance from east in Corridor E giving access to the two *tholoi* (A, B) that open west to the distribution Corridor D; it gives access to a probable relaxation room in the north-west corner (C). A small corridor (G) connects Halls D and E.
 II: entrance from east in Corridor E leading to a central corridor (F) which opens on both sides onto *Tholoi* A and B; Corridor F probably leads to the distribution Hall D, that still opens onto Room C; Corridor G still connecting Halls D and E.
- 8 I: two *tholoi* of equal size (A, B; both diam. about 6.50 m) with c. 24 hip-bathtubs; probably one room with immersion bathtubs (predecessor of C?).
 II: one large *tholos* (A) with 25 hip-bathtubs and one double hip-bathtub/small immersion bathtub, one small *tholos* (B; diam. about 4.70 m) with 13 preserved hip-bathtubs, one double hip-bathtub/small immersion bathtub and five hypothetical hip-bathtubs (probably transformed into a bench in a later phase); one room with at least two immersion bathtubs (C).
- 9 9.1. I and maybe II: probably furnace to the south-west of Corridor D.
 9.2. –
- 10 10.1. I and II: probably reservoir to the south of Corridor D, in the south-west corner of the building.
 10.2. –
 10.3. –

 1.2. –
- 2 2.1. $29^{\circ}22'22.84''$ N, $30^{\circ}32'38.58''$ E
 2.2. Eastern limit of the *kom*.
 2.3. –
- 3 3.1. Poorly preserved.
 3.2. –
- 4 4.1. Unknown date of discovery and excavations. Recent reinvestigation by C. Römer (Fayum Survey Project and DAIK mission).
 4.2. Visited in May 2010 by B. Redon and April 2011 by Th. Fournet, B. Redon and M. Vanpeene, with C. Römer.
- 5 At least 210 m^2 .
- 6 6.1. Hellenistic.
 6.2. Pavements renewed several times but no apparent major remodelling.
 6.3. –
- 7 7.1. Classical *tholos* model with circular or retrograde circuit (depending on the existence, or not, of a corridor south of *Tholos A*)
 7.2. Entrance from west into corridor C that gives direct access to the two *tholoi* (A, B); they open into the distribution corridor (D); hypothetical relaxation room in the south-east corner; possible corridor S of *Tholos A* connecting Corridors C and D.
- 8 Two *tholoi* (A, B; both diam. about 6.05 m) with each 22 hip-bathtubs; possible room with immersion bathtubs in the south-west corner.
- 9 9.1. Probably furnace to the east of and close to Reservoir a, in front of Basin b.
 9.2. –
- 10 10.1. L-shaped reservoir (a), connected via a pipe (made of lead and inserted into a terracotta pipe) to semi-circular basin (b) between the two *tholoi*.
 10.2. –
 10.3. Drainage pipe leading wastewater northwards, outside of Corridor D.

- 1 1.1. Kom el-Khamsin
1.2. –
- 2 2.1. 29°6'7.92" N, 30°39'30.00" E
2.2. Northern limit of the *kom*.
2.3. –
- 3 3.1. Well preserved, partly restored, but slowly vanishing.
3.2. –
- 4 4.1. Nearly completely excavated in 1999 by S.M.M. Helal (SCA), with the punctual collaboration of R. Pintaudi and A. Giammarusti (Italian mission of Medinet Madi) for the architectural survey in 2006.
4.2. Visited in April 2011 by Th. Fournet, B. Redon and M. Vanpeene.
- 5 270 m².
- 6 6.1. Beginning of the 2nd century AD (HELAL 2009–2010), but more likely Hellenistic (2nd or 1st century BC) from the pottery presented in HELAL 2009–2010, pp. 211–212 and typology.
6.2. –
6.3. –
- 7 7.1. Classical *tholos* model with retrograde circuit.
7.2. Entrance from west in a small corridor (9) leading to a central corridor (7) giving access on both sides to the two *tholoi* (6, 8) and, to the east, to the distribution corridor (1) that opens onto the relaxation room (13). A secondary entrance to the north, directly into Hall 1.
- 8 Two *tholoi* (6, 8; both diam. about 5.30 m) each with 20 hip-bathtubs; one rectangular room with five immersion bathtubs (13).
- 9 9.1. Probably large furnace with boiler (15).
9.2. Heating wall in Room 13?
- 10 10.1. L-shaped reservoir (3); probably adjacent water-tower in north-east corner; supplied by channel (or aqueduct) from north.
10.2. –
10.3. Drain along south and west façade.
- 11 11.1. –
11.2. Corridor 1 was vaulted; Room 13 was covered by a dome (remains of pendentives in the south-east and south-west corners).

 1.2. –
- 2 2.1. 29°19'21.33" N, 30°50'0.15" E
 2.2. About 600 m south of the main temple, in the centre of the ancient town (?), in a place called nowadays “Ptolemaic temple”.
 2.3. –
- 3 3.1. Today covered by vegetation.
 3.2. –
- 4 4.1. Probably excavated in 1965–1966 by the SCA (F. Yacoub?); restored by Supreme Council of Antiquities in the 1990s (information of P. Davoli).
 4.2. Visited in April 2011 by Th. Fournet, B. Redon and M. Vanpeene, not visible.
- 5 –
- 6 6.1. Hellenistic (T).
 6.2. –
 6.3. –
- 7 7.1. Probable classical *tholos* model with unknown bathing circuit.
 7.2. The published photos are not clear enough to restore the bathing circuit, but the baths clearly comprise at least two *tholoi*, two rectangular rooms and several corridors.
- 8 Two *tholoi* with hip-bathtubs; probably other bathing facilities.
- 9 9.1. –
 9.2. –
- 10 10.1.
 10.2. –
 10.3. –
- 11 11.1. *Tholoi* and rectangular rooms decorated with mosaic floors; in the two *tholoi*, circular panel with a rosette.
 11.2. –
- 12 12.1. –
 12.2. LECLANT 1967, p. 191.

 DAVOLI 1998, p. 155, fig. 67 (general view).
 Guimier-Sorbets, Redon in this volume, fig. 31 (photo).
 One unpublished photo of P. Davoli taken in the 1980s showing the detail of the central panel of one of the *tholoi*.

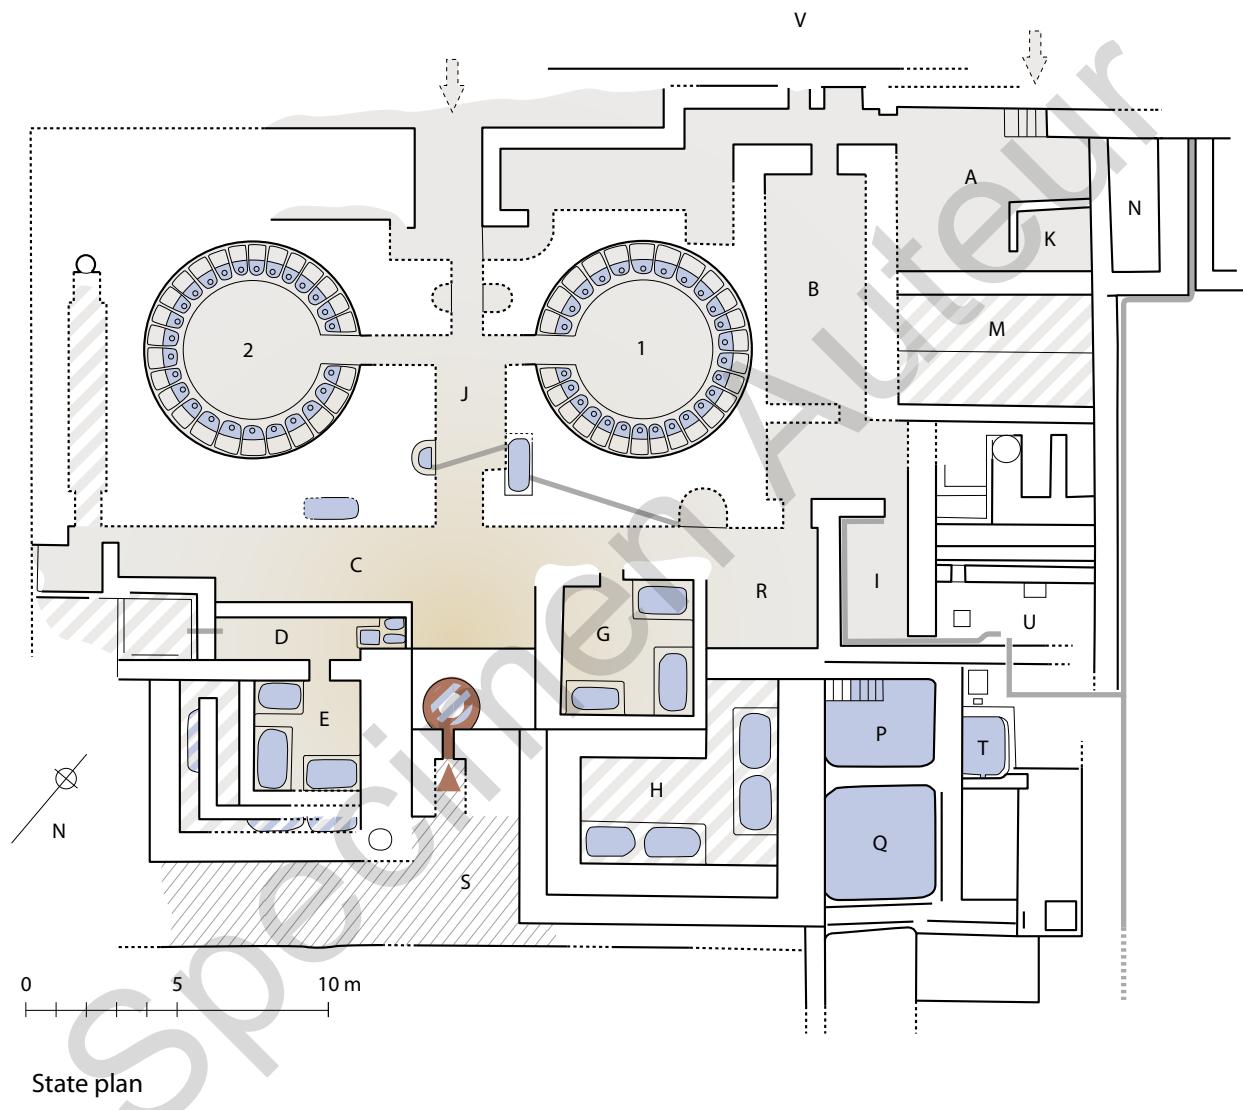

Cat. no.	20 (B303, F58)
1	1.1. Krokodilopolis / Medinet el-Fayoum, North Baths 1.2. –
2	2.1. 29°19'44.35" N, 30°49'53.23" E 2.2. Northern limit of the <i>kom</i> , 350 m west of the main temple's south-west corner. 2.3. –
3	3.1. Relatively well preserved (all walls robbed out). 3.2. –
4	4.1. Fully excavated in 2006 by the SCA under the supervision of M. Abd el-Aal, but unpublished. 4.2. Visited in April 2011 by Th. Fournet, B. Redon and M. Vanpeene.
5	About 405 m ² .
6	6.1. Ptolemaic (T). 6.2. At least one major remodelling phase, maybe in Late Ptolemaic/Early Roman times (T). 6.3. –
7	7.1. I: possible non-classical <i>tholos</i> model with staggered <i>tholoi</i> and radiating circuit. II: hybrid bath with two retrograde and separated circuits. 7.2. I: entrance in Hall 13, leading to Corridor 1 that opens on both sides into <i>Tholoi</i> 2 and 3, and into the relaxation room (5) in the south-east corner. II: circuit apparently divided into two sections. West: possible entrance from Hall 13, leading to distribution Hall 1, giving access to <i>Tholoi</i> 2 and 3 (transformed into a relaxation room), and relaxation Rooms 4 and perhaps 5; East: entrance from north-west corner into Corridor 11, leading to Corridor 6 (probably opening onto Room 10), with a small recess to the north; Corridor 6 leads to Corridor 7 that gives access to Room 8, that finally opens into a relaxation room (9).
8	I: two <i>tholoi</i> (2, diam. about 4.80 m; 3, diam. about 5.10 m), most likely each with 18 hip-bathtubs (preserved in 2) and one rectangular room with at least two immersion bathtubs and a hip-bathtub (5). II, West section: 18 hip-bathtubs in <i>Tholos</i> 2, two large immersion bathtubs in <i>Tholos</i> 3, one hip-bathtub and one immersion bathtub in Room 4; East section: at least three immersion bathtubs in Room 9 and possibly other immersion bathtubs in Room 10 (?).
9	9.1. I?: II: furnace (with boiler?) in Room 1, heated from north-west corner of Room 5 (which was probably abandoned as bathing room at this time)? 9.2. –
10	10.1. Reservoir in Room 4 and probably in Room 8. 10.2. – 10.3. –
11	11.1. – 11.2. –
12	12.1. – 12.2. TRÜMPER 2009, table 5. FOURNET et al. 2013, cat. no. 58. Fournet, Redon in this volume (a); Guimier-Sorbets, Redon in this volume.
13	FOURNET et al. 2013, cat. no. 58 (standardised plan). Fournet, Redon in this volume (a), fig. 7a (typological plate), 11 (state plan and photo); Guimier-Sorbets, Redon in this volume, fig. 24 (photo).

Cat. no.	21 (B304, F57)
1	1.1. Krokodilopolis/Medinet el-Fayoum, North-West Baths 1.2. –
2	2.1. 29°19'31.89" N, 30°49'46.43" E 2.2. North-west limit of the <i>kom</i> , 600 m south-west of the main temple, in an area called “small baths” nowadays. 2.3. –
3	3.1. Submerged. 3.2. –
4	4.1. Probably discovered in 1964 and excavated in 1965 by F. Yacoub (SCA) but unpublished. 4.2. Visited in April 2011 by Th. Fournet, B. Redon and M. Vanpeene, not found (hidden by vegetation and water).
5	
6	6.1. 6.2. – 6.3. –
7	7.1. – 7.2. –
8	One <i>tholos</i> with 20 hip-bathtubs, one room with one or two immersion bathtubs.
9	9.1. – 9.2. –
10	10.1. One (semi-circular?) basin near the entrance of the <i>tholos</i> visible in EL-KHACHAB 1978, fig. 2. 10.2. – 10.3. –
11	11.1. – 11.2. –
12	12.1. – 12.2. DAVOLI, MOHAMMED AHMED 2006, p. 85. TRÜMPER 2009, table 3. FOURNET et al. 2013, cat. no. 57.
13	EL-KHACHAB 1978, p. 78, fig. 2 and pl. XXIXb (photos). DAVOLI, MOHAMMED AHMED 2006, pl. VI (photo). One unpublished photo of P. Davoli taken in the 1980s from the E, showing the <i>tholos</i> and one immersion bathtub.

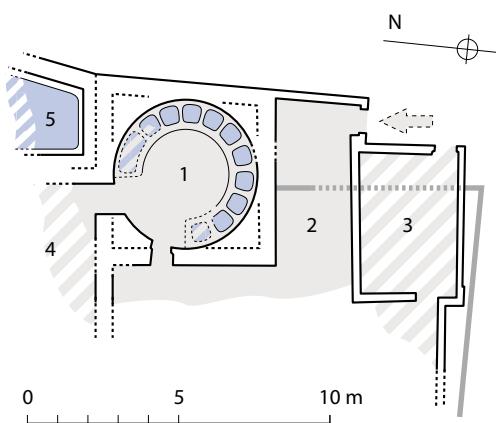

Cat. no. 22 (B305, F56)

- 1 1.1. Krokodilopolis / Medinet el-Fayoum, "Sarapeion"
 1.2. –
- 2 2.1. *Circa 29°19'17.8" N, 30°49'48.8" E* (coordinates of the site)
 2.2. South-west limit (?) of the *kom*.
 2.3. –
- 3 3.1. Destroyed.
 3.2. –
- 4 4.1. Fully excavated in 1964 by F. Yacoub (SCA), published by EL-KHACHAB 1978.
 4.2. Visited in April 2011 by Th. Fournet, B. Redon and M. Vanpeene, not found.
- 5 About 980 m².
- 6 6.1. Hellenistic (T).
 6.2. Plan suggests remodelling phases (e.g., Room G added later, Rooms E and H remodelled etc.) maybe in Late Ptolemaic/Early Roman period (T).
 6.3. –
- 7 7.1. Difficult to assess since the published plan mix remains from different phases. Probable classical *tholos* model at first, transformed into hybrid bath.
 7.2. Entrance from south-east into a central corridor (J), opened on both sides onto two *tholoi* (1, 2) and leading to Hall C, that gives access to the relaxation rooms (E via D, G and R). Possible secondary (or service?) entrance in the south corner, in Room A, giving access to a winding corridor that leads either to Corridor J or to Room B. Rooms B and R lead to Latrines I.
- 8 Two *tholoi* (1, 2; both diam. about 7.15 m) each with 26 hip-bathtubs; three rectangular rooms with a total of 10 immersion bathtubs (E, G, H), but probably not functioning at the same time. Remains of an other room fitted with three bathtubs under Room E.
- 9 9.1. Probably furnace with boiler (F) and probably heating walls in Rooms E, G and H.
 9.2. –
- 10 10.1. Three large reservoirs (P, Q, T); several small basins in corridors (C, J); three small basins in Room D.
 10.2. –
 10.3. Water from south-west bathing rooms is drained through Rooms I and U to the W, along the south-west façade; water from north-west rooms drained through a pipe in the north wall of Room D.
- 11 11.1. –
 11.2. Largest bath building found in Egypt; includes many rooms of unknown function, among them probably two or three latrines (I, N, room north of D).
- 12 12.1. –
 12.2. LECLANT 1967, p. 191.
 EL-KHACHAB 1978, pp. 65–67.
 DAVOLI 1998, p. 152, fig. 70.

 Fournet, Redon in this volume (a), fig. 7a (typological plate).

Cat. no. 23 (B134, F60)

- 1 1.1. Marina el-'Alamein, Greek Baths
 1.2. –
- 2 2.1. 30°49'28.45" N, 29°0'40.50" E
 2.2. In the town centre, north of a public square with porticoes (agora?).
 2.3. –
- 3 3.1. Well preserved.
 3.2. –
- 4 4.1. Rescue excavations in 1987 by Polish Archaeological Mission (W.A. Daszewski) but not fully published. Ongoing reassessment by R. Czerner (Polish-Egyptian Preservation Mission).
 4.2. Visited in May 2015 by B. Redon and M. Vanpeene with R. Czerner.
- 5 At least 105 m².
- 6 6.1. 1st century AD (E).
 6.2. Many traces of remodelling (cannot be assessed in detail).
 6.3. –
- 7 7.1. –
 7.2. Entrance from the street into a central space (2, Room? Courtyard?), opening south onto a rectangular room (3) perhaps functioning with the baths, and north onto a *tholos* (1).
- 8 One *tholos* (1, diam. about 4.85 m) with 10 hip-bathtubs and one double hip-bathtub or immersion bathtub.
- 9 9.1. –
 9.2. –
- 10 10.1. Rectangular reservoir (5).
 10.2. –
 10.3. Pipe running south from the *tholos*, passing under Room 3 and leading water outside, under the street.
- 11 11.1. –
 11.2. Walls in limestone, *tholos* with dome in red brick.
- 12 12.1. –
 12.2. DASZEWSKI 1991, p. 16.
 DASZEWSKI 1995, pp. 18–19.

Cat. no. 24 (B314, F61)

- 1 1.1. Marsa Matruh
 1.2. –
- 2 2.1. 31°21'6.56" N, 27°14'7.61" E (coordinates of the site)
 2.2. In a place called Hafket Saad Helouan.
 2.3. –
- 3 3.1. Probably destroyed.
 3.2. –
- 4 4.1. Seen by A. Adriani in 1936 during a visit; probably unearthed by chance.
 4.2. Not visited.
- 5 –
- 6 6.1. Hellenistic (T)?
 6.2. –
 6.3. –
- 7 7.1. –
 7.2. –
- 8 One small round room with seven hip-bathtubs; additional rooms, among them one with two oval-shaped basins (immersion bathtubs?).
- 9 9.1. –
 9.2. –
- 10 10.1. –
 10.2. –
 10.3. –
- 11 11.1. –
 11.2. Walls in limestone (and not in red bricks).
- 12 12.1. –
 12.2. ADRIANI 1940, p. 161.
 FOURNET et al. 2013, cat. no. 61.
- 13 No plan published.
 ADRIANI 1940, p. 161, pl. LXV, 1 (photo).

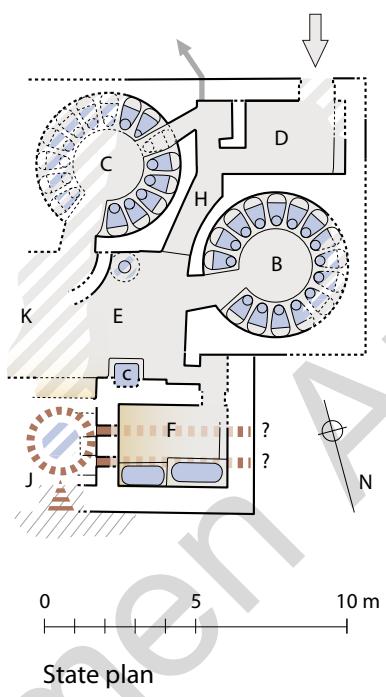

Cat. no. 25 (B319, F62)

- 1 1.1. Sais / Sa el-Hagar
 1.2. –
- 2 2.1. 30°57'54.23" N, 30°46'08.38" N
 2.2. Near the "Great Pit", urban context unknown.
 2.3. –
- 3 3.1. Very poorly preserved.
 3.2. –
- 4 4.1. Excavated in 1974 by I. Amer (SCA) and re-examined in 1999 by P. Wilson (EES, Durham University).
 4.2. Not visited but recent and ancient photos sent by P. Wilson.
- 5 About 415 m² (both Suites).
- 6 6.1. Both Suites are probably Hellenistic (T).
 6.2. Suite A (Phase I) is likely older and abandoned when Suite B is built (Phase II) since walls belonging to Suite B overlap *Tholos* 5 that belongs to Suite A, which is, also, located on a lower level than Suite B. Phase III: at least one major remodelling of Suite B, probably in Late Ptolemaic/Early Roman times (T).
 6.3. –
- 7 7.1. I: unknown; II: classical *tholos* model?; III: hybrid type?
 7.2. The remains are not clear, but from parallels of other transitional baths, we assume the following evolution:
 I: unknown, at least one *tholos* (5), possibly additional rooms.
 II: entrance from west probably leading to a peripheral corridor (likely located to the north) that gives access to Hall 7. From there, access to the two *tholoi* (1 and 2) and a possible relaxation room (3).
 III: probably same circuit but transformation of one *tholos*.
- 8 I: one *tholos* (5, diam. about 5.80 m) with c. 20–22 hip-bathtubs.
 II: two *tholoi* (1, 2, both diam. about 6 m) each with about 20–22 hip-bathtubs and possibly one rectangular room with immersion bathtubs (3).
 III: one *tholos* (1) with about 20–22 hip-bathtubs (over those of phase II), one *tholos* (2) with half-circular immersion pool and one rectangular room with at least two immersion bathtubs (3).
- 9 9.1. –
 9.2. –
- 10 10.1. I: ?.
 II and III: L-shaped reservoir (4), well or circular cistern to the south (6), large basin south of Room 3 (b), small basin north of Reservoir 4 (a).
 10.2. –
 10.3. Pipe system found around the bath building, but location not clearly specified (for fresh water or wastewater?)
- 11 11.1. –
 11.2. –
- 12 12.1. –
 12.2. WILSON 2006, pp. 132–137.

Cat. no. 26 (B113, F63)

- 1 1.1. Schedia / Kom el-Giza
 1.2. –
- 2 2.1. 31°8'25.03" N, 30°11'31.55" E
 2.2. In Hellenistic area, near a huge building (warehouse?).
 2.3. –
- 3 3.1. Fairly well preserved, heavily restored and slowly vanishing.
 3.2. –
- 4 4.1. Partially excavated in 1984 by A. Abd el-Fattah (SCA, Graeco-Roman Museum of Alexandria); reassessed by M. Bergmann and M. Heinzelmann (German mission) in 2003–2014, but the east part of the baths still hidden by a house.
 4.2. Visited in April 2014 by Th. Fournet and B. Redon with M. Bergmann.
- 5 At least 140 m².
- 6 6.1. Late 3rd century/early 2nd century BC (E).
 6.2. Remodelled at unknown date with at least the addition of Room F and probably other transformations. See Fournet, Redon in this volume (a) for a comprehensive discussion.
 6.3. 1st century AD (E).
- 7 7.1. See Fournet, Redon in this volume (a): probable progressive hybridisation.
 7.2. See Fournet, Redon in this volume (a) for a detailed description of the transformation of the circuit and layout of the baths. Hereafter, simple description as proposed by BERGMANN, HEINZELMANN 2009. I: entrance from south into Cloakroom D, leading to Corridor H, opened on distribution Hall E, that gives access to *Tholoi* B and C. *Tholos* C also accessed from Corridor H through a small recess. II: *idem* and addition of a relaxation room (F), reached from Hall E.
- 8 I: two *tholoi* (B, C; both probably diam. 4.80 m) each with 15 hip-bathtubs (preserved in B).
 II: *idem* and one rectangular room (F) with one immersion bathtub (later second immersion bathtub was added).
- 9 9.1. I?; II: Furnace E of Room F.
 9.2. –
- 10 10.1. I and II?: square basin and *labrum* in Room E.
 10.2. –
 10.3. All pavements inclined toward outlet in south façade.
- 11 11.1. Rooms B, E, and F are paved with a polychrome pebbled floor, Rooms C and D, Corridor H, and a part of Room E with a simpler white-grey-black pebbled floor.
 11.2. Rooms D and F with benches.
- 12 12.1. –
 12.2. BERGMANN, HEINZELMANN 2009.
 FOURNET et al. 2013, cat. no. 63.
 Fournet, Redon in this volume (a); Guimier-Sorbets, Redon in this volume.

Cat. no. 28 (B08, F65)

- 1 1.1. Taposiris Magna / Abusir
 1.2. –
- 2 2.1. 30°56'43.61" N, 29°31'8.07" E
 2.2. Near the Osiris temple and a necropolis of sacred animals, inserted in a luxurious domestic area.
 2.3. –
- 3 3.1. Well preserved.
 3.2. –
- 4 4.1. Almost fully excavated (except the southern and eastern limits of the baths) in 2003–2011 by Th. Fournet and B. Redon, in the frame of the Taposiris mission led by M.-Fr. Boussac (university of Paris-Ouest Nanterre).
 4.2. See 4.1.
- 5 At least 220 m² (south-east part not excavated).
- 6 6.1. Before the middle of 2nd century (E).
 6.2. II: large remodelling in the end of 2nd/beginning of 1st century (E).
 III: later remodelling (non precisely dated).
 6.3. End of the Ptolemaic Period (E).
- 7 7.1. I: probable classical *tholos* model.
 II: hybrid bath with radiating circuit.
 III: *idem* with retrograde circuit.
 7.2. I: baths entered from south (Rooms 12 and 8), giving access to a distribution corridor (3) that opens onto the two *tholoi* (1, 2) to the north and a possible immersion bathtubs room (7) to the east.
 II: like I, with insertion of a sophisticated heating system (3bis = furnace, 6, 19 = service area) and latrines (20); the doors of *Tholoi* 1 and 2, and the door between Rooms 3 and 8 are reduced in size.
 III: like II, but a tank (4) is fitted in the eastern part of Room 3, blocking the access from Room 3 to *Tholos* 2; a door is pierced between the two *tholoi*; also relocation of the door between Rooms 8 and 3 to the west.
- 8 I: two *tholoi* (1, 2; both diam. 5.15 m) each with 16 hip-bathtubs, possibly one room (7) with immersion bathtubs.
 II: *idem*, Room 7 is certain.
 IIIa: two *tholoi* (1, 2) with 14 and 15 hip-bathtubs; Room 7 with two immersion bathtubs.
 IIIb: possibly *Tholos* 2 transformed into a sweat bath.
- 9 9.1. I: probable furnace at the same location as in Phases II and III but totally destroyed.
 II and III: furnace (3bis) probably topped by a boiler.
 9.2. I: ?
 II and III: heating wall in Room 7.
- 10 10.1. I: Reservoir 5 and two basins in Room 3.
 II and III: like I, with the addition of Tank 4.
 10.2. –
 10.3. –
- 11 11.1. Cut into the rock; therefore details such as roofs and niches over hip-bathtubs are well preserved; uniquely well preserved heating system (Room 7: heating wall and vault); latrines (20).
 11.2. –
- 12 12.1. –
 12.2. BRECCIA 1923, 146–147;

Cat. no. 29 (B289, F68)

- 1 1.1. Tell Gomaimah
 1.2. –
- 2 2.1. $30^{\circ}53'33.19''$ N, $31^{\circ}53'12.39''$ E
 2.2. –
 2.3. –
- 3 3.1. Destroyed. At the time of the excavations, only limited areas of the baths preserved, all in poor condition.
 3.2. –
- 4 4.1. Excavated in 1999–2000 during rescue excavations by I. Soleman (SCA).
 4.2. Not visited.
- 5 At least 110 m².
- 6 6.1. Hellenistic (T, E).
 6.2. –
 6.3. –
- 7 7.1. Unknown (too poorly preserved), but most likely classical *tholos* model with circular circuit.
 7.2. Possible entrance from north in an entrance hall, that gives access to a central corridor (2) opening into one *tholos* (1). A second one (3) is possibly located on the other side of Corridor 2. To the S, Corridor 2 gives access to a distribution hall (4), leading to a relaxation room (6). A peripheral corridor (5) connects the possible entrance hall and Hall 4.
- 8 Two *tholoi*, but only the east one is preserved (1, diam. about 3.15 m) with eight hip-bathtubs, of the west (3, probably also diam. about 3.15 m) only faint remains of (8?) hip-bathtubs were found; at least one rectangular room (6) with two immersion bathtubs (b, c).
- 9 9.1. –
 9.2. –
- 10 10.1. One oval basin (a) in Hall 4.
 10.2. –
 10.3. –

Cat. no. 30 (B05, F69)

- 1 1.1. Tell el-Herr
 1.2. –
- 2 2.1. 30°57'53.21" N, 32°29'34.29" E
 2.2. In residential quarter, 210 m from the fortress.
 2.3. –
- 3 3.1. Well preserved; restored.
 3.2. –
- 4 4.1. Fully excavated by M. Abd el-Maksoud (SCA) in 1984–1985. Reassessed, through archival documentation, by Th. Fournet and B. Redon in 2006–2007.
 4.2. Visited by B. Redon in May 2010.
- 5 305 m².
- 6 6.1. Second half of 1st century BC/1st century AD (E, T).
 6.2. –
 6.3. 2nd century AD (E).
- 7 7.1. Hybrid type with two retrograde circuits.
 7.2. Two separate sections: West: entrance from north in L-shaped Corridor 1, leading to latrines (3), a small recess (4, shower?) and another corridor (2) that opens into Room 5 (waiting room, cloakroom). It gives access to *Tholos* 7 and a relaxation room (6); East: entrance from north in Corridor 8, giving access to Latrines 9 and a waiting room/cloakroom (10). From there, the U-shaped Corridor 11 leads to Room 12 that opens onto two relaxation rooms (13, 14).
 8. West: one *tholos* (7; diam. about 4.55 m) with 15 hip-bathtubs and one double hip-bathtub and one room (6) with two immersion bathtubs (a third one is added later); East: one room with three immersion bathtubs (13) and one room with one immersion bathtub (14).
- 9 9.1. Furnace (15), probably with boiler.
 9.2. Possible heating walls in Rooms 6, 13, and 14.
- 10 10.1. Reservoir (16) supplied by a well (17); basins in Room 12.
 10.2. –
 10.3. In both sections, floors of all rooms inclined to Latrines 3 and 9; subterranean drain from Latrine 9 through Rooms 8 and 1 to Latrine 3 to the west (large drain 18); drain from Room 4 of unknown function to west (large drain 18).
- 11 11.1. –
 11.2. Excellent example of a hybrid bath with mixed Graeco-Egyptian and Roman features; Rooms 5 and 10 with benches; *opus tessellatum* mosaic in several rooms, floral panel in *Tholos* 7.
- 12 12.1. –
 12.2. ABD EL-MAKSoud 2007.
 FOURNET, REDON 2007.
 FOURNET et al. 2013, cat. no. 69.
 Fournet, Redon in this volume (a); Guimier-Sorbets, Redon in this volume.
 13. ABD EL-MAKSoud 2007, p. 105, fig. 71 (plan), figs. 70, 72–77 (photos).

Cat. no. 31 (B292, F66)

- 1 1.1. Theadelphia / Kharabet Ihrit, Greek Baths 1
 1.2. –
- 2 2.1. 29°20'52.32" N, 30°33'50.82" E
 2.2. Northern limit of the *kom.*
 2.3. –
- 3 3.1. Poorly preserved.
 3.2. –
- 4 4.1. Partly excavated/unearthed at an unknown date; currently undergoing reinvestigation by C. Römer with the collaboration of Th. Fournet (joint DAIK-IFAO survey).
 4.2. See 4.1.
- 5 5. At least 210 m².
- 6 6.1. Hellenistic (T).
 6.2. –
 6.3. –
- 7 7.1. Classical *tholos* model with circular or retrograde circuit (depending on the existence, or not, of a corridor north of *Tholos A* or S of *Tholos B*).
 7.2. Entrance from west in a probable entrance hall. Either a peripheral corridor, not preserved, led to Hall C, or *Tholoi A* and B had two entrances, one in the entrance hall, one in Hall C (more likely). Probable relaxation room north-east of Corridor C.
- 8 8. Two *tholoi* (A, B; both diam. about 6.55 m) each with at least 22 hip-bathtubs; possibly a square room with immersion bathtubs N of Furnace D.
- 9 9.1. Probable furnace (D) in front of the two *tholoi*.
 9.2. –
- 10 10.1. T-shaped reservoir (a) and semi-circular basin (b) in Corridor C.
 10.2. –
 10.3. –
- 11 11.1. –
 11.2. –
- 12 12.1. –
 12.2. RÖMER 2013, p. 235.
 FOURNET et al. 2013, cat. no. 66.
 Fournet, Redon in this volume (a); Guimier-Sorbets, Redon in this volume.

 FOURNET et al. 2013, cat. no. 66 (standardised plan).
 Fournet, Redon in this volume (a), fig. 7a (typological plate); Guimier-Sorbets, Redon in this volume, figs. 19, 21, 25 (photos).

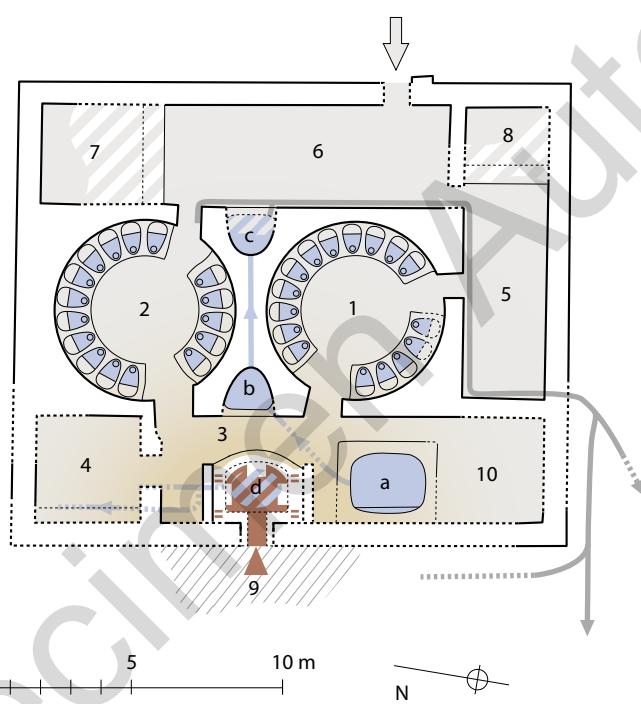

Cat. no. 32 (B293, F67)

- 1 1.1. Theadelphia / Kharabet Ihrit, Greek Baths 2
 1.2. –
- 2 2.1. 29°20'46.71" N, 30°33'53.36" E
 2.2. Eastern limit of the *kom*.
 2.3. –
- 3 3.1. Poorly to relatively well preserved.
 3.2. –
- 4 4.1. Never excavated before 2014, currently undergoing reinvestigation, partially cleaned and surveyed in September 2014 by C. Römer and Th. Fournet (joint DAIK-IFAO survey).
 4.2. See 4.1.
- 5 At least 320 m².
- 6 6.1. Hellenistic (T).
 6.2. II: large remodelling at an unknown date, several refurbishments (floors).
 6.3. –
- 7 7.1. I: classical *tholos* model with retrograde circuit.
 II: hybrid baths with retrograde circuit?
 7.2. I: probable entrance from west into two successive halls (1 and 2). Hall 2 gives direct access to *Tholoi* 3 and 4, opened E into Corridor 5/7. A relaxation room is accessed in the south-east corner of the building (Room 9).
 II: direct entrance into Hall 2 (?), leading to *Tholos* 3, Corridor 5 and the relaxation room 6. Room 9 (another relaxation room) maybe still in use during that phase, but its access is not preserved.
- 8 I: Two *tholoi* with 20 hip-bathtubs and two double hip-bathtubs or small immersion bathtubs (3, 4; both diam. about 6.40 m) and one rectangular room with two or three immersion bathtubs (9).
 II: *idem* but *Tholos* 4 abandoned and new room (6) with at least one immersion bathtub.
- 9 9.1. I: possible furnace south of Tank 11, in front of the two *tholoi*.
 II: small furnace (8) between Rooms 7 and 9, probably topped by a boiler.
 9.2. –
- 10 10.1. I: double reservoir (11) in the north-east corner of the building.
 II: two basins in Hall 2, a water-tower with six reservoirs, arranged on two stories (10), built on Tank 11 (abandoned), and a basin in Room 7.
 10.2. –
 10.3. –

 Standardised plan in FOURNET et al. 2013, cat. no. 67.
 Fournet, Redon in this volume (a), fig. 7a (typological plate with Phase I and II plans), 9 (state plan and photo); Guimier-Sorbets, Redon in this volume, fig. 11 (photo); here plan after cleaning in September 2014.

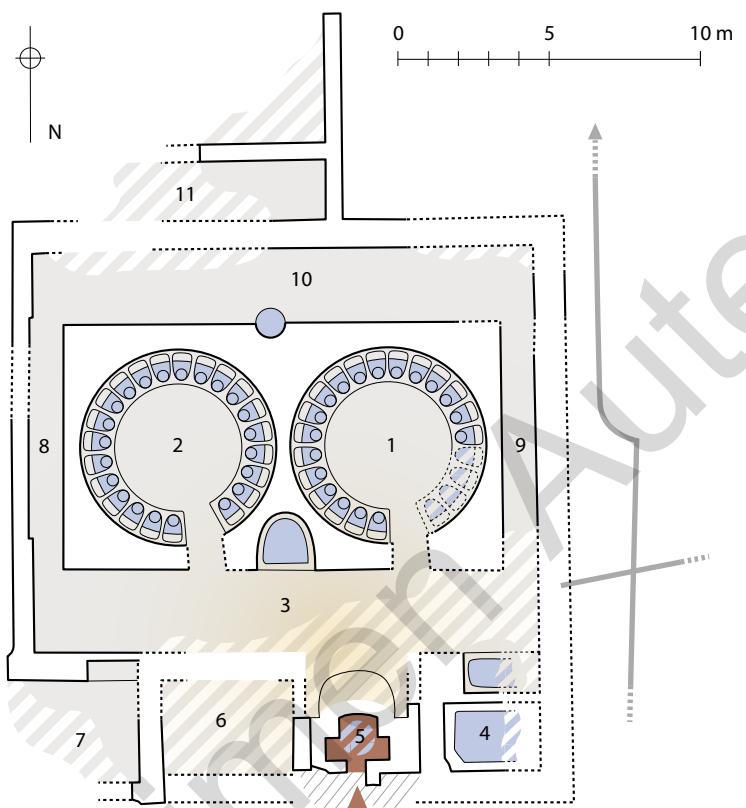

State plan

Cat. no.	33 (B07, F50)
1	1.1. Thebes / Karnak, Greek Baths north of the first pylon 1.2. –
2	2.1. 25°43'12.64" N, 32°39'23.24" E 2.2. In residential quarter developed during the Ptolemaic period, outside the temple enclosure, 50 m north of the first pylon, built on the Late Period embankment protecting the temple from floods and enabling boats to moor and pilgrims to disembark. 2.3. –
3	3.1. Well preserved. 3.2. –
4	4.1. Fully excavated in 2006–2011 by S. El-Masekh, under the supervision of M. Boraik (SCA), with the punctual collaboration of Th. Fournet and B. Redon for excavations and architectural survey. 4.2. See 4.1.
5	280 m ² .
6	6.1. Before the mid-2nd century BC, probably end of third/beginning of 2nd century BC. 6.2. Some traces of renovations (furnace, south drain) but no important remodelling. 6.3. Before the last quarter of the 2nd century (dated by coin hoard found in structures that were built above the bath building).
7	7.1. Classical <i>tholos</i> model with retrograde circuit. 7.2. Entrance from east in Hall 6, probably from a north-south street leading to the dromos of the first pylon. Hall 6 gives access to the north to <i>Tholos</i> 2, and to the south to Hall 5, opening onto <i>Tholos</i> 1. The <i>tholoi</i> open onto a distribution corridor (3), that leads, to the north, to a relaxation room (4).
8	Two <i>tholoi</i> (1, 2; both diam. about 6 m) each with 16 hip-bathtubs; one room (4) with at least one immersion bathtub (found in the backfill but not in situ, therefore not shown on the plan), and most likely two more bathtubs.
9	9.1. Furnace (d) probably topped by a boiler, supplied fuel from west. 9.2. –
10	10.1. Reservoir (a), two semi-circular basins (b, c), supplied by Reservoir a; two subterranean channels from Furnace a to Room 4 (hot water supply?). 10.2. – 10.3. Drain from <i>Tholos</i> 2 through Halls 6 and 5 to the south.
11	11.1. All rooms decorated with high-quality mosaic floors (pebbled mortar and chipped stone mosaic; in Room 2 figural mosaic with marine animals, dolphins and tilapia) and polychrome stucco in masonry style. 11.2. –
12	12.1. – 12.2. BORAIK 2009. BORAIK, FAUCHER 2010. BORAIK et al. 2013. BORAIK, NAGUIB 2013. FOURNET et al. 2013, cat. no. 50. Bouchaud, Redon in this volume; Fournet, Redon in this volume (a); Guimier-Sorbets, Redon in this volume.
13	BORAIK 2009, figs. 1, 4–8, 10–11 (photos), fig. 2 (partial plan). BORAIK et al. 2013, fig. 1 (plan), figs. 2–8 (photos), fig. 9 (sections on the heating system), fig. 10 (schematic plan), fig. 11 (plan with the location of the mosaics), figs. 12–24 (photos). FOURNET et al. 2013, cat. no. 50 (standardised plan). Fournet, Redon in this volume (a), fig. 7a (typological plate); Guimier-Sorbets, Redon in this volume, figs. 4, 8, 9, 14, 15, 39 (photos).

Cat. no. 34 (B274, F70)

- 1 1.1. Xois / Sakha, Greek Baths
 1.2. –
- 2 2.1. 31°05'21" N, 30°57'02" E (coordinates of the site)
 2.2. Near a workshop (pottery) and a so-called "nymphaion".
 2.3. –
- 3 3.1. Probably destroyed.
 3.2. –
- 4 4.1. Found by chance and excavated by el-Khachab at an unknown date between 1959 and 1963.
 4.2. Visited in May 2009 by B. Redon but not found.
- 5 390 m².
- 6 6.1. Hellenistic (E, T).
 6.2. –
 6.3. –
- 7 7.1. Classical *tholos* model with circular circuit (but could also be two retrograde circuits).
 7.2. Entrance from south in Corridor 11 and entrance Hall 10, opened onto two corridors (8–9) leading to the distribution Hall 3. It gives access, to the south, to two *tholoi* (1, 2) and to the north-east, to one or two possible square rooms (6 and 7), but heavily destroyed. The circuit could be circular (bathers entering Hall 3 from Corridor 8 or 9 and going back to Hall 10 through the other corridor), but a double retrograde circuit is also likely: entrance in Hall 11/10, and then separation of the bathers in two groups: the bathers of *Tholos* 1 passing by Corridor 9, while bathers of *Tholos* 2 taking Corridor 8 (see Buto North Phase I, cat. no. 6).
- 8 Two *tholoi* (1, 2; both diam. about 6.45 m) each with 22 hip-bathtubs; probably one or two rectangular room with immersion bathtubs (6, 7).
- 9 9.1. Furnace (5) probably topped by a boiler.
 9.2. Heating wall in Room 6?
- 10 10.1. Reservoir and adjacent basin (4); semi-circular basin in Corridor 3; small circular basin in Corridor 10.
 10.2. East-west conduit supplying Reservoir 4 to the west of the baths.
 10.3. North-south conduit possibly used as drain (but has no clear connection to the baths) to the west of the baths.
- 11 11.1. –
 11.2. –
- 12 12.1. –
 12.2. EL-KHACHAB 1978, pp. 59–60, 64.
 FOURNET et al. 2013, cat. no. 70.
 Fournet, Redon in this volume (a).
