HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

BORA

FRANK SEIFART

UNIVERSITY OF AMSTERDAM

Bora (ISO *boa*) is a language spoken in the areas of the northeast Yaguasyacu, Putumayo, and Ampiyuca rivers (in Colombia and Peru). This traditional story tells about how warfare among humans began. It is likely shared by Boras, Muinanes, and other ethnolinguistic groups belonging to the so-called “People of the Center,” a multilingual cultural complex sharing many cultural features (Echeverri 1997; Gasché 2009). One parent of the narrator, Victoria Vega, was Muinane, and this story is unknown to some, otherwise knowledgeable, Boras. On the other hand, one of the principal characters, Páábihó Iihyúné Tsíjcyátsotaáábe (“the one who raised the eggs of the hummingbird”), appears also in stories told by Boras as well as Resígaros (Andrade 2009), another group belonging to the “People of the Center.”

This text has been edited with respect to the original audio recording by an expert Bora speaker, removing repetitions and false starts, for the purpose of distribution as pedagogical material in Bora schools (Vega et al. 2009). That is why in some instances there is a slight mismatch between the audio recording and the text.
