

## CONTENTS

### **Slamming Computation on the Multihull Groupama 3**

*Y. Roux, Company K-Epsilon, France*

*J. Wackers, Ecole Centrale de Nantes, France*

*L. Dorez, Team Groupama, France*

### **Numerical Modelling of Sail Aerodynamic Behavior in Dynamic Conditions**

*F. Fossati, and S. Muggiasca, Politecnico di Milano, Milan, Italy*

### **Experimental Validation of Unsteady Models for Wind/ Sails/ Rigging Fluid Structure Interaction**

*B Augier, P Bot and F Hauville, Research Institute of the French Naval Academy, France*

*M Durand K-epsilon, France*

### **The Use of Shell Elements to Capture Sail Wrinkles, and their Influence on Aerodynamic Loads**

*D. Trimarchi, S. R. Turnock and D. J. Taunton, School of Engineering Sciences, University of Southampton, UK*

*D. Chapelle, INRIA, MACS team, France*

### **Fluid Structure Interaction Simulation of Spinnakers – Getting Closer to Reality**

*H F Renzsch, TU Delft, The Netherlands*

*K U Graf, University of Applied Sciences Kiel, Germany*

### **Unsteady Numerical Simulations of Downwind Sails**

*M. Durand, Company K-Epsilon, Ecole Centrale de Nantes, France*

*F. Hauville, P. Bot, and B. Augier, Research Institute of the French Naval Academy, France*

*Y. Roux, Company K-Epsilon, France*

*A. Leroyer, and M. Visonneau, Ecole Centrale de Nantes, France*

### **Off-Wind Sail Performance Prediction and Optimisation**

*A M Wright and A R Claughton, University of Southampton, UK*

*J Paton and R Lewis, TotalSim, UK*

### **Performance Optimization of Interacting Sails Through Fluid Structure Coupling**

*V.G. Chapin and N. de Carlan, Université de Toulouse, France*

*P. Heppel, Peter Heppel & Associates, Port-Louis, France*

### **Automatic Sailsets Creation and Optimisation**

*Philippe Cousin, CEREOLOG, France.*

*Julien Valette, TENSYL, France*

**Performance Prediction of the Planing Yacht Hull**

*L A le Clercq and D A Hudson, University of Southampton, UK*

**The Influence of Heel on the Bare Hull Resistance of a Sailing Yacht**

*J. A. Keuning, and M. Katgert. Delft University of Technology, The Netherlands*

**Prediction of Forces and Flow Around a Yacht Keel Based on LES and DES**

*D. Mylonas, P. Sayer and A. Day, University of Strathclyde, UK*

**Coupling of RANSE-CFD with VPP Methods: From the Numerical Tank to Virtual Boat Testing**

*C Boehm, Delft University of Technology, NL  
K Graf, University of Applied Sciences Kiel, GER*

**L'Hydroptere: How Multidisciplinary Scientific Research May Help Break the Sailing Speed Record**

*M Calmon, M Farhat, P Fua, K Startchev, G Bonnier, J-A Månson, V Michaud, A Sigg, M Oggier, MO Deville, O Braun, ML Sawley, L Blecha, J Cugnoni, Ecole Polytechnique Fédérale de Lausanne (EPFL), CH  
JM Bourgeon, S Dyen, D Moyon, D Schmäh, R Amacher, D Colegrave, Hydroptère Design Team*

**A Novel Tool to Compute the Non-Linear Dynamic Behaviour of an Hydrofoil Sailing Yacht**

*L D Blecha, Almatech, Switzerland  
J Cugnoni, Ecole Polytechnique Fédérale de Lausanne, Switzerland  
D Moyon, and S Dyen, Hydroptère SA Suisse, Switzerland*

**Performance Modelling and Analysis of Olympic Class Sailing Boats and Crews with Neural Networks**

*A. Reid, Newcastle University, UK*

**Global Optimisation of a Volvo Open 70 Racing Yacht**

*J Cuzon, A Douglas, D Gorraiz, I Nicholls and T St Olive, Strathclyde University, UK*

**Structural Optimization of an America's Cup 90 Racing Yacht: The Influence of Deflections on Upwind Performance**

*T Tison, France  
P Stocking, Cranfield University, UK*

**Simulation Based Design for High Performance Composite Sailing Boats**

*P. Groenenboom, ESI Group Netherlands  
B. Cartwright and D. McGuckin, Pacific Engineering Systems International Pty Ltd, Australia  
P. de Luca and A. Kamoulakos, ESI Group France*

**Sail Aerodynamics: Full-Scale Pressure Measurements on a 24-Foot Sailing Yacht**

*I.M. Viola & R.G.J. Flay, The University of Auckland, New Zealand*

**A Fault Tree Based Investigation of the Reliability of Ocean Racing Yachts  
Incorporating Human Performance and Canting Keel Impacts**

*M.J.Streeter, L Auboin, C.E.Rigg, W.D.Robinson, D.J.Taunton, S.R.Turnock, and  
J.I.R.Blake, University of Southampton, School of Engineering Sciences, Ship Science,  
UK*

**A Fully Integrated Sail-rig Analysis Method**

*S Malpede, and F Nasato, SMAR-Azure Ltd, UK*

**Easy-to-use Advanced Performance Prediction Analysis for Yacht Racing Teams**

*JD Capdeville, KNE, France  
D Nicolopoulos, KNE, Spain  
H Hansen, FutureShip GmbH, Germany*

**6 Degree of Freedom CFD Applied to the Design of an IMOCA Open 60**

*R Azcueta and R Schutt, Cape Horn Engineering, Spain*

**Viscoelastoplastic Cyclic Behaviour of Sail Materials**

*W. Dib, and A. Tourabi, University of Grenoble, France.  
G. Bles, Engineering School ENSIETA/University of Brest/ENIB - Laboratory LBMS,  
France.*
