

Changelog for the monograph
*The Hybrid High-Order Method for Polytopal Meshes – Design,
Analysis, and Applications*,
deposited on the hal server at
<https://hal.archives-ouvertes.fr/hal-02151813>

V2

- Thorough proofreading resulting in correction of many typos.
- Various improvements and additional explanations.
- New numerical tests for variable diffusion and skewed meshes (Sections 4.2.6 and B.1), and expanded discussion on the choice of basis functions (Section B.1).
- Added link to Matlab/Octave implementation of Poisson problem (end of preface).
- Acknowledgements.

V1

Initial submission.
