

## Editorial

Biochimie Open was launched in 2015 and has quickly become established in the scientific community, providing open access to exciting new data, including articles more preliminary than those acceptable to many traditional journals.

Biochimie Open publishes manuscripts from broad areas in biochemistry, including metabolism or biotechnology. Working together with its sister journal Biochimie, it provides high quality peer-reviewing to authors.

Biochimie Open welcomes contributions on Bioinformatics, Systems Biology, Toxicology, Molecular Pharmacology and Chemical Biology.

It is a pleasure to announce the launching of the first issue of Biochimie Open. I invite you to submit your work and become part of a growing community.

Xavier Coumoul, PhD, Editor-in-Chief of Biochimie Open,  
Professor, Team Leader<sup>1</sup>
