HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Encoding, Analysis and Visualization of Demotic Accounts from the Temple of Dime

Nathalie Prévôt (Ausonius, CNRS - Université Bordeaux Montaigne)

Project Detail

The aim of the project DimeData is to renew our knowledge of the economic life of Egyptian temples under the provincial Roman administration through the study of the archives of the temple of Soknopaios in Dime, alias Soknopaiou Nesi, in the Fayyum. DimeData will publish online the demotic papyri recording the daily expenses of the temple of Dime. This will make available more than 40 long rolls still unpublished, kept mainly in the collections of Berlin, Vienna, Paris and London, for sharing with the already existing digital platforms.

Project Directors :

- Marie-Pierre Chaufray,
CNRS – Université Bordeaux Montaigne
- Martin Andreas Stadler,
Julius-Maximilians-Universität Würzburg
