

To read this classification:  
 Uke has his supports on the two lines  
 To throw Uke, Tori can: move his supports on, inside, outside the lines, stay face to face to Uke (shifted or not), turn the back to Uke (shifted or not)

\* Tori is not shifted, back to Uke, on two supports outside the lines => Tai otoshi => Uke falls Forward

\*\* Tori is shifted, face to Uke, on one support outside the lines, => O soto gari => Uke falls Backward
