HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Observations

Interdisciplinarity and semantic heterogeneity of Biodiversity data disseminated among many databases

Research requirements

Harmonized and structured **terminological resources** to retrieve and share **data**
Controlled vocabulary & semantic standards

CENTRE D'ECOLOGIE
FONCTIONNELLE
& EVOLUTIVE

Interoperability of databases in ecology/biodiversity using :

- ▶ thesauri & domain ontologies
- ▶ metadata enriched with semantic relationships to describe and connect **concepts** and perform reasoning on **data**

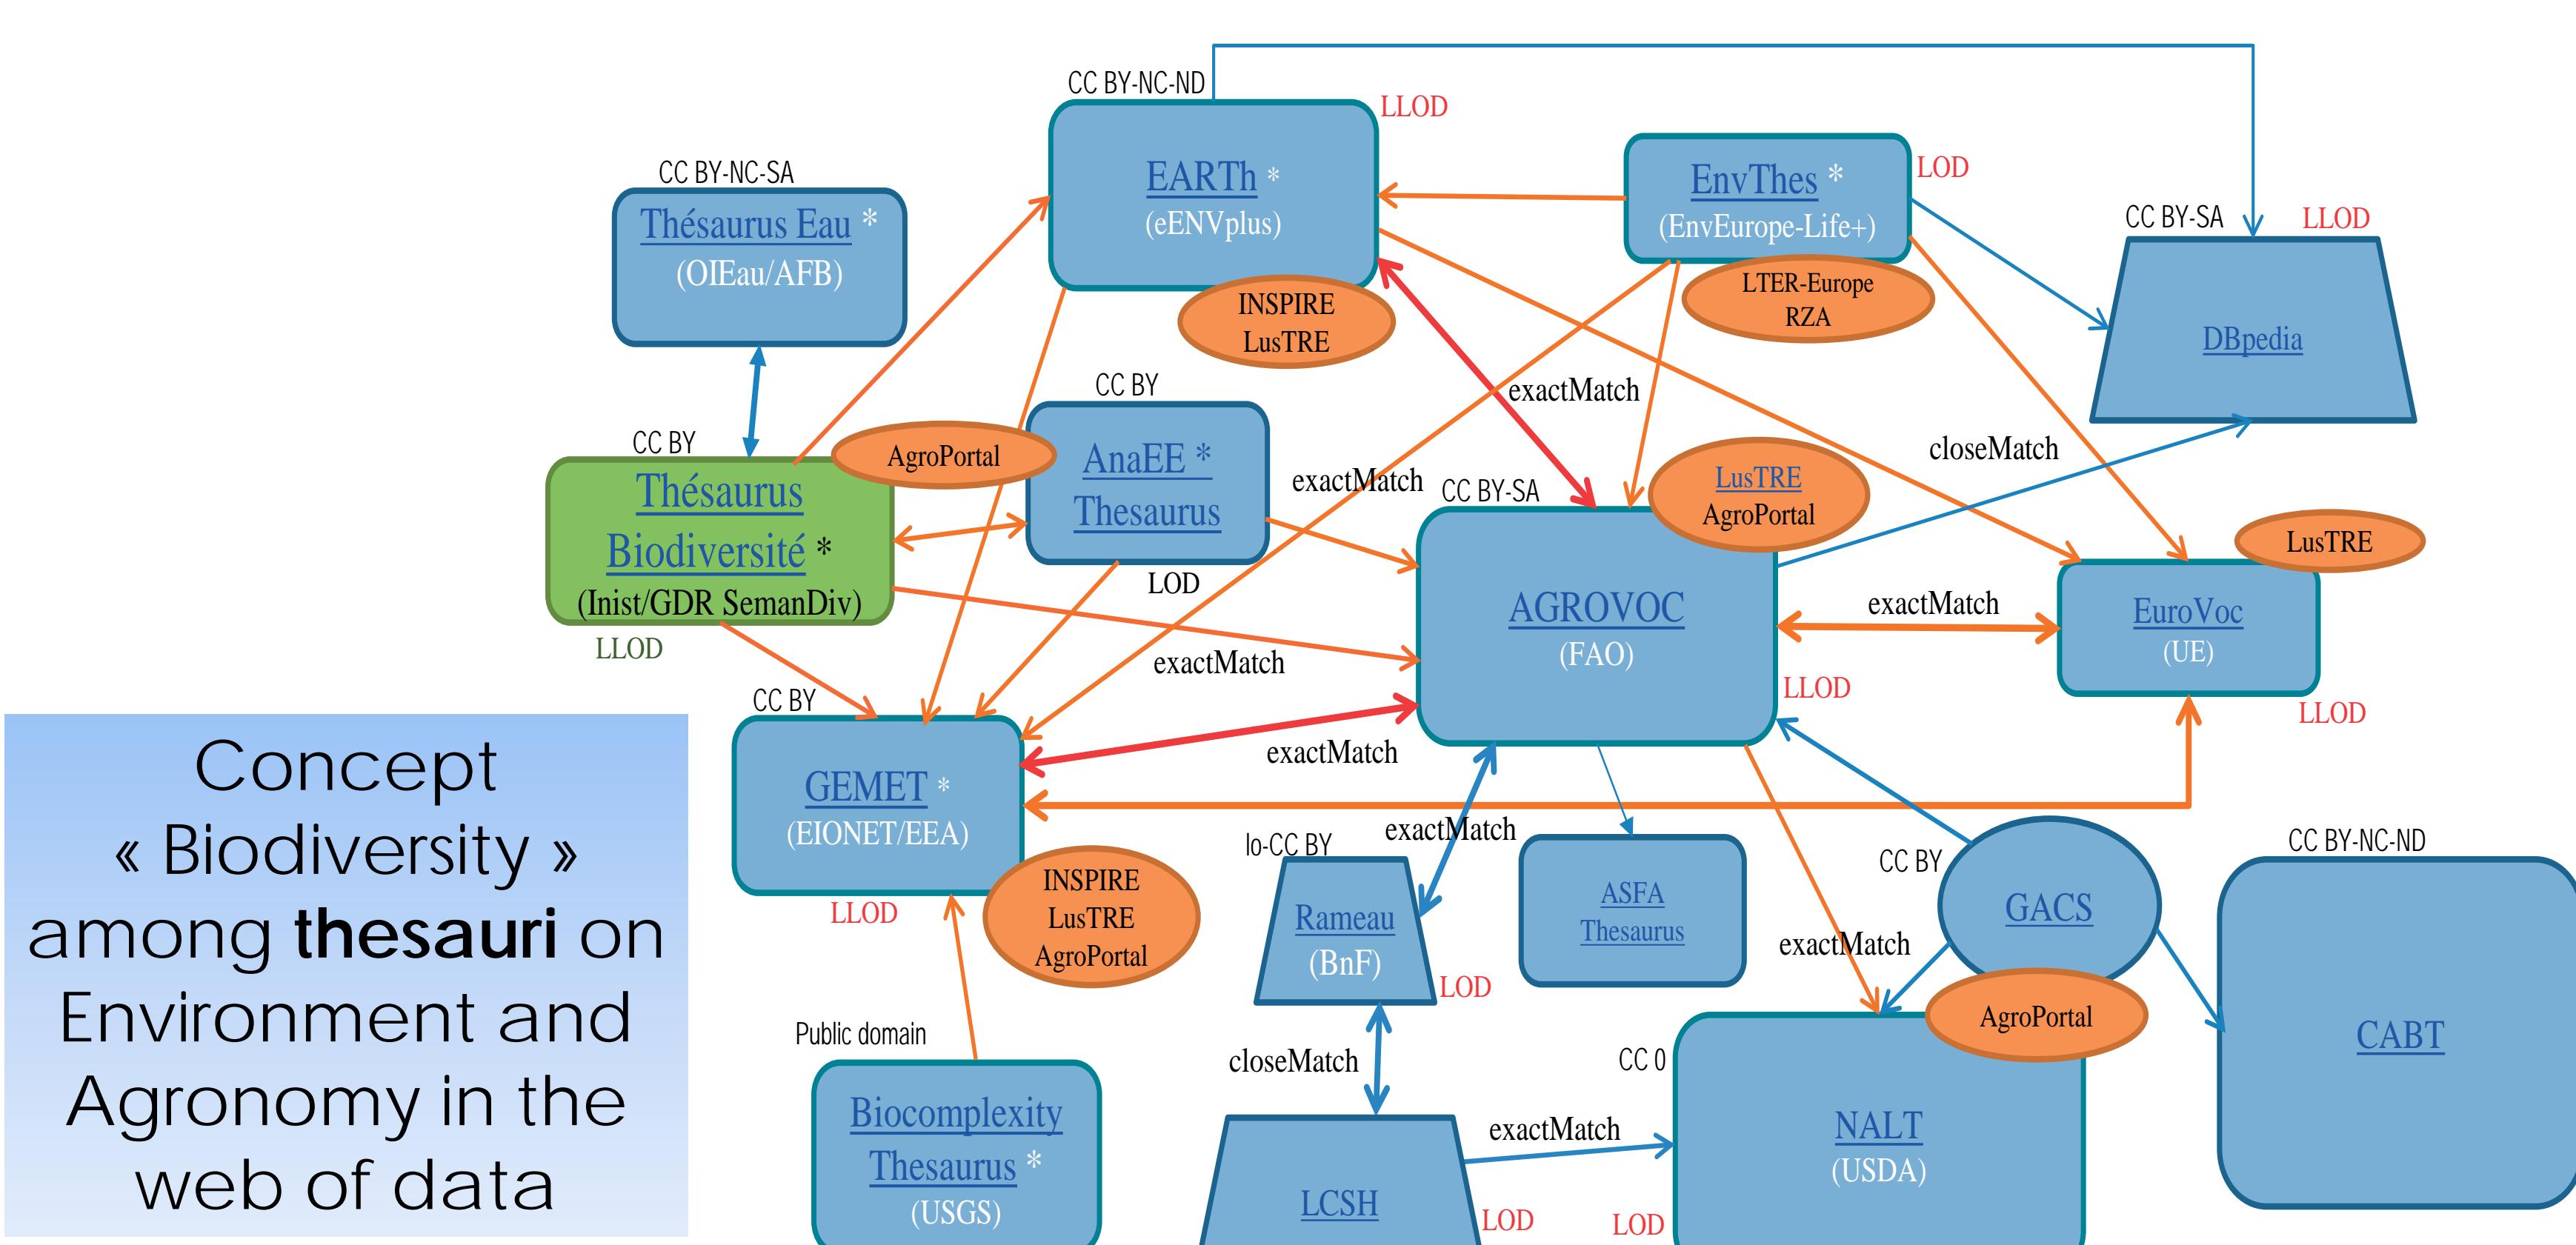

CESAB
CENTRE DE SYNTHÈSE
ET D'ANALYSE
SUR LA BIODIVERSITÉ

Objectives

The steps of the project

Partnership initiated in 2014 between INIST-CNRS and various research organizations on the interoperability of data in ecology (CNRS/CEFE, INRA/AnaEE, FRB/CESAB)

1st STEP

Comprehensive survey of thesauri in Environmental Sciences including European infrastructures

Complementarity and alignments in the LOD cloud

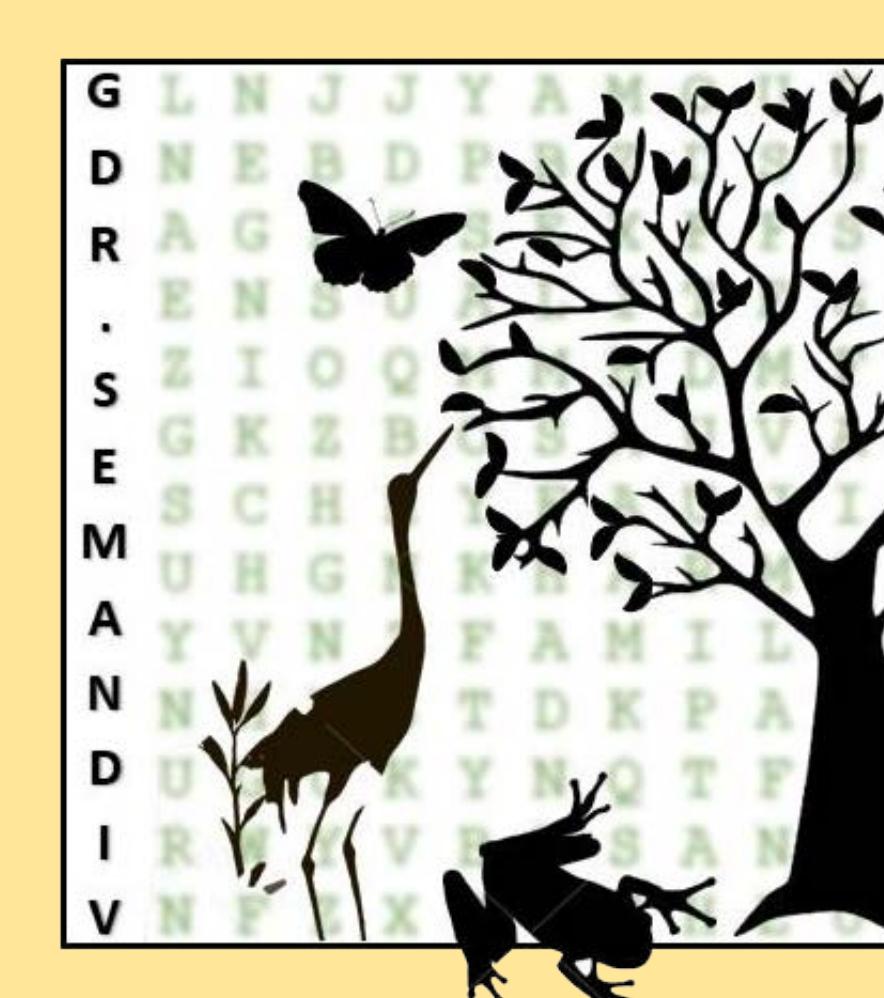

- ▶ Lack of thesaurus dedicated to Biodiversity

2nd STEP

Development of the Biodiversity Thesaurus

- ▶ bilingual and polyhierarchical
- 615 concepts
 - ▶ compliant with semantic web (SKOS/RDF) and ISO standards
 - ▶ aligned & open-access (Loterre, AgroPortal)

3rd STEP

Creation of a **research group on biodiversity semantics** – **GDR SemanDiv** –

38 participants from 17 French and international research structures (CNRS, INRA, IRD, IRSTEA, MNHN, GBIF)

conceptual basis to stimulate research in ecoinformatics

reviewing of definitions; ontology of thesaurus; mappings
to achieve **data integration & reusability**

2014

2015 - 2016

2017 - 2020
