A Experimental timeline of drug omission experiment

Habituation to operant box (2 sessions)

Cocaine SA Initial training (16 sessions) Cocaine SA TO cue off (10 sessions) Dose omission testing (18 sessions)

B Experimental timeline of preference reversal experiment

Habituation to operant box (2 sessions)

Cocaine SA Initial training (19 sessions) Alternate training Cocaine/Sucrose (6 sessions)

Discrete choice training (12 sessions)

Programmed delay testing (35 sessions)
