**HAL** is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

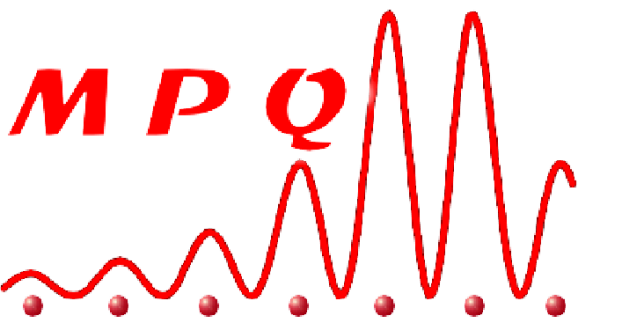

# Sympathetic cooling of ${}^9\text{Be}^+$ by ${}^{88}\text{Sr}^+$ Doppler cooled ions in large Coulomb crystals: an experimental study

## Motivation

sympathetic cooling of light species by heavy coolants

- precision molecular spectroscopy  
J. C. J. Koelemeij et al., Phys. Rev. Lett. **98**, 173002 (2007).  
J. Biesheuvel et al., Nature Comm., **7**, 10385 (2016)

- multicharged ions  
L. Schmoeger et al., Science, **347**, 1233 (2015)

- GBAR experiment  
P. Perez and Y. Sacquin, Classical and Quantum Gravity, **29**, 18 (2012)

- experiments test for molecular dynamics simulations  
N. Sillitoe et al., arXiv:1705.03347 [physics.comp-ph]

## Trap features

- inner radius  $R = 3.4$  mm
- length  $Z_1 = 30$  mm
- radio-frequency 7.6 MHz
- amplitudes  $V_{RF}$  50 - 800 V

- axial motional frequency ( ${}^{88}\text{Sr}^+$ ): 10 - 30 kHz
- typical stability parameter ( ${}^{88}\text{Sr}^+$ )  $q < 0.005$

## Sympathetic cooling of $\text{Sr}^+$ isotopes

## Experimental setup

### Doppler cooling of $\text{Sr}^+$

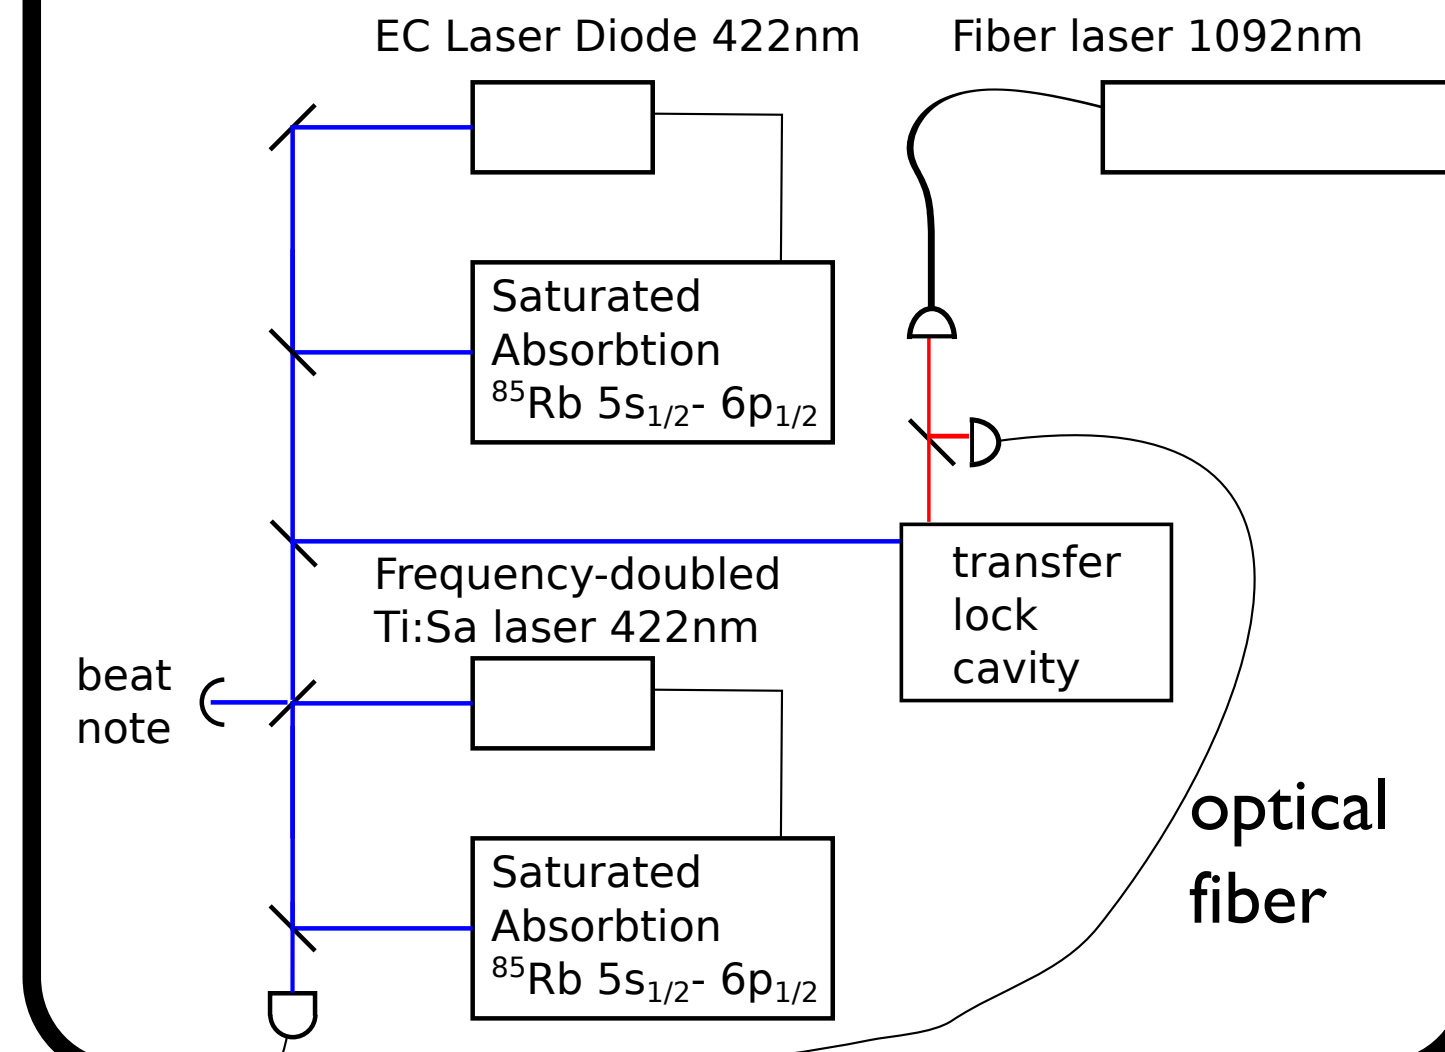

### Photoionization of Sr

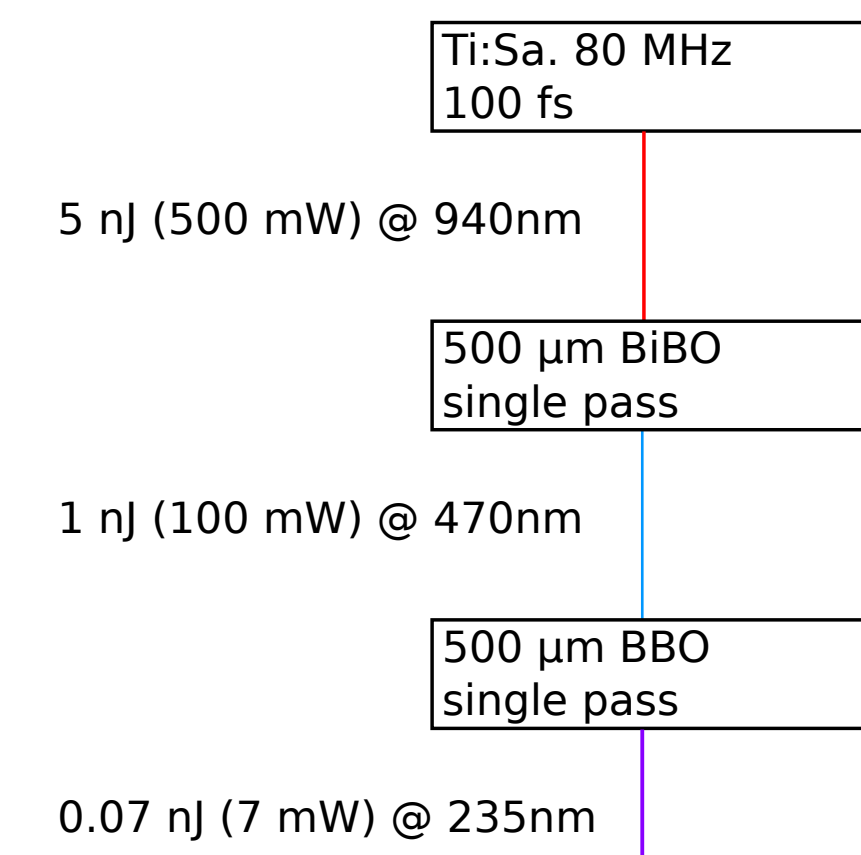

### Photoionization of Be

### $\text{Sr}^+$ cooling lasers and stabilization

### ${}^9\text{Be}$ photo-ionization

### ${}^{88}\text{Sr}$ photo-ionization

### Vacuum chamber

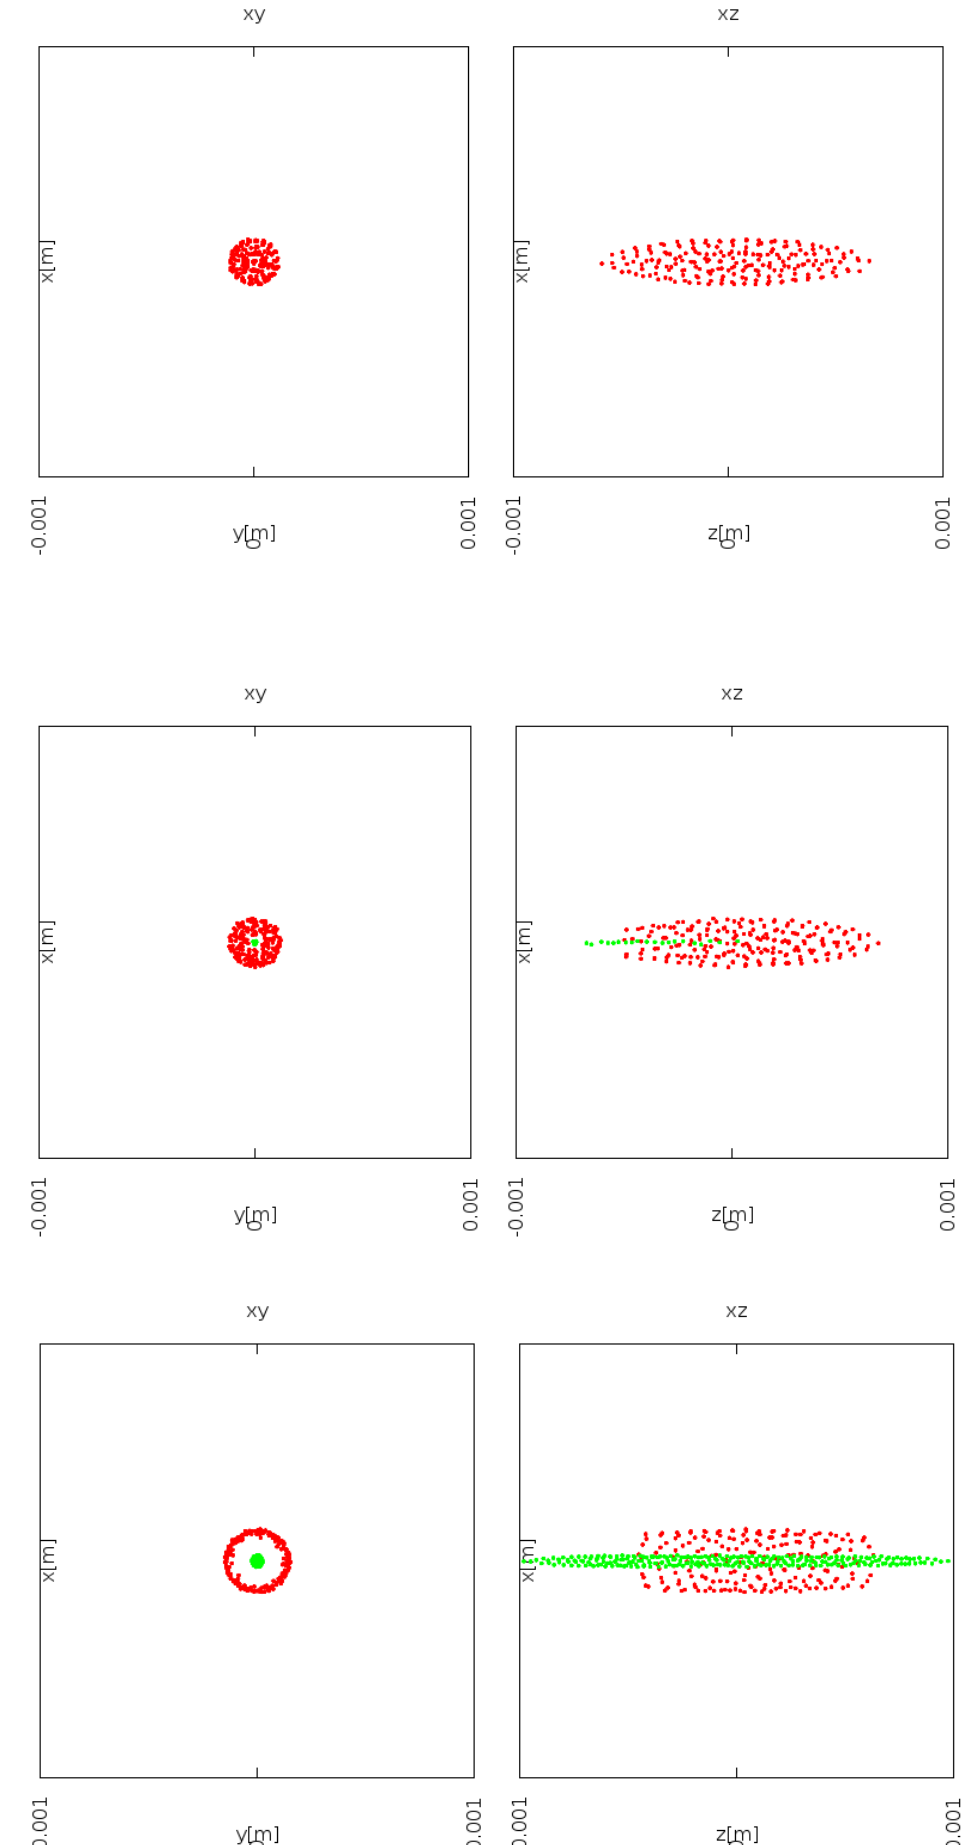

### $\text{Be}^+$ probing laser

## Preliminary results

### numerical simulations of steady-state

- qualitatively long ( $> 10$  s) cooling dynamics
- independent of loading order
- tickle confirmation of mass ratio

## Next steps

### ${}^{88}\text{Sr}^+$ isotope selection

### probing ${}^9\text{Be}^+$ for diagnostics

### study of sympathetic cooling dynamics
