HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Physical/Digital Spaces Collisions. So What?

Session 9 – Introduction

Thomas LEDUC¹,
Myriam SERVIÈRES²,
Vincent TOURRE³

In recent decades, the use of new technologies in mobility situations has fostered the emergence of new forms of society. The empirical and tangible world of proximity, of short distances, of small communities, backdrop of our traditionally recognized senses, has suddenly collided with a set of virtual, networked universes operating on a world scale, capable of interconnecting billions of humans and non-humans.

In an article from 1992, the American geographer H. Couclelis "begs the philosophical question of the most appropriate conceptualization of geographic space" in the context of a controversy between the "object" and "field" views of geographic space. She first notes that this question is "closely analogous" to the atomic-plenum debate in the philosophy of physics before exploring "the theoretical and practical implications of the plenum ontology for geographical modeling." In such an understanding of space, the latter is a continuous and ubiquitous field of potentials.

The question now arises as to the relevance of this model to the above-mentioned collision. How does physical/digital collision occur in urban space? What is the impact of this collision on our experience of space?

What are the impacts and consequences of these interaction on the perception of space, on urban ambiances, on the way of the city are design today and on the way the people can live and interact into these city?
