Submitted on 9 Jul 2021

HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

The AgroLD project : A Knowledge Graph Database for plant functional genomics

Species available

AgroLD (www.agrold.org)

Quick search is based on keyword search and aids in understanding the underlying knowledge.

The **Explore Relationships** tool aids in exploring relationships between existing entities.

The **SPARQL Query Editor** provides an interactive environment to formulate SPARQL queries.

Data Sources and data types

AgroLD schema and ETL

RDF Transformation workflows

Networks and supports

The **Advanced Search** query form is based on the REST API suite, developed under the AgroLD project. The aim of this effort is to provide non-technical users with a tool to query the knowledge base.
