HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Meteorological considerations of grapevine damage due to temperature variations: the 2019 late spring frost and summer heat wave events in Burgundy

Department of Côte-d'Or

Hess-Brezowsky classification:

Northeast & East (NEA, NEZ, HFA, HFZ, HNFA, HNFZ), **South** (SWA, SWZ, SA, SZ, TB, TRW, SEA, SEZ), **West** (WA, WZ, WW, WS), **Northwest & North** (NWA, NWZ, NA, NZ, HNA, HNZ, HB, TRM), **Main high/low pressure area over Central Europe** (HM, BM, TM), **Unclassified** (U).

CHÂTILLON-SUR-SEINE (1951-2020): Proportion of May frost days for each Hess-Brezowsky major type

Hess-Brezowsky classification / Major types: Northeast & East (NE&E), South (S), West (W), Northwest & North (NW&N), Main high/low pressure area over Central Europe (CE), Unclassified (U).

CHÂTILLON-SUR-SEINE (1951-2020): Number of days with max. temp. ≥ 40°C and « HB » associated types

- 1983: 1 (07/28-31: BM)
- 2003: 4 (07/22-08/04: BM)
(08/05-13: HNA)
- 2012: 1 (08/16-18: HM)
(08/19-26: WZ)
- 2019: 2 (07/21-23: HM)
(07/24-26: HFA)
- 2020: 1 (07/29-31: HM)
