## ABSTRACT

This article details a correction to: Queffelec, A., Fouéré, P. and Caverne, J.-B., 2021. A Database of Lapidary Artifacts in the Caribbean for the Ceramic Age. *Journal of Open Archaeology Data*, 9, p.2. DOI: <http://doi.org/10.5334/joad.74>

CORRESPONDING AUTHOR:

KEYWORDS:

Caribbean; Lapidary artifacts; Ceramic Age; Beads; Pendants; Raw materials

TO CITE THIS ARTICLE:

Queffelec A, Fouéré P, Caverne J-B 2021 Correction: A Database of Lapidary Artifacts in the Caribbean for the Ceramic Age. *Journal of Open Archaeology Data*, 9: 5, pp. 1–5. DOI: <https://doi.org/10.5334/joad.82>

## CORRECTION

The number of sites included in the database is mistakenly reported in the abstract as over 100 when the correct number is 88 [1]. Similarly, the total number of beads is quoted in the abstract as almost 5000 when the correct number is 7852. The same errors occur in the methods section.

*Table 2* in [1], including a summary of the site dataset, is missing fifteen rows. The correct table is published here.

This error was introduced during authors' revisions but was overlooked at the time of proof-reading. The authors noticed it after publication.

ISLAND	SITE	NB_ ARTIFACTS	PERIOD	CULTURE	REF_BIBLIO_1

**Table 2** Summary of the Site dataset.

The screenshot shows a web-based data entry application. At the top, there is a navigation bar with a search box labeled 'Recherche rapide' and a 'Total 7894' indicator. Below this, a header section contains filters for 'Site' (Morel), 'Island' (Guadeloupe), 'Date\_calibrated', 'Date\_BP', 'Period' (Early/Middle Ceramic), and 'Cultural component' (Cedrosan Saladoid/huecan). The main data entry section is organized into tabs: 'General', 'Advanced', and 'Island/Site'. The 'General' tab is active, showing fields for 'Object' (Pendant), 'Type' (Zoomorph), 'Progress' (Finished), 'State' (Complete), 'Weight' (79.4), 'Bead\_Length', 'Bead\_Dia\_max', 'Bead\_Dia\_min', 'Pend\_height' (49.2), 'Pend\_width' (41.6), 'Pend\_thickness' (28.1), 'Blank\_Length', 'Blank\_width', 'Blank\_Thickness', 'Nb\_Perforation' (2), 'Pos\_Perforation' (2 transversal), 'Shape\_perforation' (Tronconical), and 'Perfo\_Dia' (2.5). A 'Sous\_type' field is set to 'Frog'. A 'STRATI' section includes 'US' (hs), 'Square' (collier), 'Level' (plage), and 'Z'. Material and analysis fields include 'Gem\_material' (Paragonite), 'Colour' (Green), 'Mineral\_1', 'Mineral\_2', 'Mineral\_3', 'Other\_RawMat', 'Method\_carac' (Raman), and 'RawMat\_estim' (paragonite). Two image galleries are present: one showing a photograph of the artifact and another showing 3D digital reconstructions of the artifact from various angles.

**Figure 3** Screenshot of the online application.

An updated version of [Figure 3](#) [1], a screenshot of the application, is published here to reflect the correct number of records in the database and the content of each record.

Finally, Narganes Storde Y.M. [2] is referenced as published in 1995 when the correct publication date is 1999.
