**HAL** is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

**Key words.** solar wind – instrumentation: miscellaneous – errata, addenda.

The erratum concerns Fig. 9 entitled “Antenna radio-electrical properties” for which some of the parameters are not correct. The new figure with new parameters is provided in Fig. 1 of this corrigendum.

		Monopole	Dipole
Antenna capacitance $C_A$ (pF)	Physical length $L$ (m)	6.5	7.857 for V1V2 and V1V3 6.99 for V2V3
	radius $a$ (m)	0.015	0.015
	$C_A$ (pF) for $f \ll c/2\pi L$	71.30	41.54 for V1V2 and V1V3 37.80 for V2V3
Cstray (pF)	antenna Cstray ANT 1 / PZ ANT 2 / PY ANT 3 / MY	76.3 ± 4.0 78.9 ± 3.0 76.2 ± 2.7	
	mean	77.1 ± 3.2	
	preamplifier Cstray	33.0	
	Stud Cstray	0.0	
	Cstray	109.5 ± 3.2	54.7 ± 1.6
$\Gamma = C_A / (C_A + C_S)$	$\Gamma$ for $f \ll c/2\pi L$	0.394 ± 0.007	0.431 ± 0.007 for V1V2 and V1V3 0.408 ± 0.007 for V2V3
Leff (m)	min	3.83	5.48
	max	4.41	7.53
$\Gamma$ Leff (m) for $f \ll c/2\pi L$	min	1.48	2.20
	max	1.77	3.30

Fig. 1. Corrected Antenna radio-electrical properties.
