IFIP – The International Federation for Information Processing

IFIP was founded in 1960 under the auspices of UNESCO, following the first World Computer Congress held in Paris the previous year. A federation for societies working in information processing, IFIP's aim is two-fold: to support information processing in the countries of its members and to encourage technology transfer to developing nations. As its mission statement clearly states:

IFIP is the global non-profit federation of societies of ICT professionals that aims at achieving a worldwide professional and socially responsible development and application of information and communication technologies.

IFIP is a non-profit-making organization, run almost solely by 2500 volunteers. It operates through a number of technical committees and working groups, which organize events and publications. IFIP's events range from large international open conferences to working conferences and local seminars.

The flagship event is the IFIP World Computer Congress, at which both invited and contributed papers are presented. Contributed papers are rigorously refereed and the rejection rate is high.

As with the Congress, participation in the open conferences is open to all and papers may be invited or submitted. Again, submitted papers are stringently refereed.

The working conferences are structured differently. They are usually run by a working group and attendance is generally smaller and occasionally by invitation only. Their purpose is to create an atmosphere conducive to innovation and development. Refereeing is also rigorous and papers are subjected to extensive group discussion.

Publications arising from IFIP events vary. The papers presented at the IFIP World Computer Congress and at open conferences are published as conference proceedings, while the results of the working conferences are often published as collections of selected and edited papers.

IFIP distinguishes three types of institutional membership: Country Representative Members, Members at Large, and Associate Members. The type of organization that can apply for membership is a wide variety and includes national or international societies of individual computer scientists/ICT professionals, associations or federations of such societies, government institutions/government related organizations, national or international research institutes or consortia, universities, academies of sciences, companies, national or international associations or federations of companies.

Preface

The scientific and industrial relevance of the development of sustainable and resilient production systems lies in ensuring future-proof manufacturing and service systems, including their supply chains and logistics networks. “Sustainability” and “Resilience” are essential requirements for competitive manufacturing and service provisioning now and in the future. Industry 4.0 technologies, such as artificial intelligence; decision aid models; additive and hybrid manufacturing; augmented, virtual, and mixed reality; industrial, collaborative, mobile, and software robots; advanced simulations and digital twins; and smart sensors and intelligent industrial networks, are key enablers for building new digital and smart capabilities in emerging cyber-physical production systems in support of more efficient and effective operations planning and control. These allow manufacturers and service providers to explore more sustainable and resilient business and operating models. By making innovative use of the aforementioned technologies and their enabled capabilities, they can pursue the triple bottom line of economic, environmental, and social sustainability. Furthermore, industrial companies will be able to withstand and quickly recover from disruptions that pose threats to their operational continuity. This is in the face of disrupted, complex, turbulent, and uncertain business environments, like the one triggered by the COVID-19 pandemic, or environmental pressures calling for decoupling economic growth from resource use and emissions.

The International Conference on Advances in Production Management Systems 2021 (APMS 2021) in Nantes, France, brought together leading international experts on manufacturing, service, supply, and logistics systems from academia, industry, and government to discuss pressing issues and research opportunities mostly in smart manufacturing and cyber-physical production systems; service systems design, engineering, and management; digital lean operations management; and resilient supply chain management in the Industry 4.0 era, with particular focus on artificial intelligence-enabled solutions.

Under the influence of the COVID-19 pandemic, the event was organised as online conference sessions. A large international panel of experts (497 from 50 countries) reviewed all the submissions (with an average of 3.2 reviews per paper) and selected the best 377 papers (70% of the submitted contributions) to be included in these international conference proceedings. The topics of interest at APMS 2021 included artificial intelligence techniques, decision aid, and new and renewed paradigms for sustainable and resilient production systems at four-wall factory and value chain levels, comprising their associated models, frameworks, methods, tools, and technologies for smart and sustainable manufacturing and service systems, as well as resilient digital supply chains. As usual for the APMS conference, the Program Committee was particularly attentive to the cutting-edge problems in production management and the quality of the papers, especially with regard to the applicability of the contributions to industry and services.

The APMS 2021 conference proceedings are organized into five volumes covering a large spectre of research concerning the global topic of the conference: “Artificial Intelligence for Sustainable and Resilient Production Systems”.

The conference was supported by the International Federation of Information Processing (IFIP), which is celebrating its 60th Anniversary, and was co-organized by the IFIP Working Group 5.7 on Advances in Production Management Systems, IMT Atlantique (Campus Nantes) as well as the Centrale Nantes, University of Nantes, Rennes Business School, and Audecia Business School. It was also supported by three leading journals in the discipline: Production Planning & Control (PPC), the International Journal of Production Research (IJPR), and the International Journal of Product Lifecycle Management (IJPLM).

Special attention has been given to the International Journal of Production Research on the occasion of its 60th Anniversary. Since its foundation in 1961, IJPR has become one of the flagship journals of our profession. It was the first international journal to bring together papers on all aspects of production research: product/process engineering, production system design and management, operations management, and logistics. Many exceptional scientific results have been published in the journal.

We would like to thank all contributing authors for their high-quality work and for their willingness to share their research findings with the APMS community. We are also grateful to the members of the IFIP Working Group 5.7, the Program Committee, and the Scientific Committee, along with the Special Sessions organizers for their support in the organization of the conference program. Concerning the number of papers, special thanks must be given to the local colleagues who managed the reviewing process as well as the preparation of the conference program and proceedings, particularly Hicham Haddou Benderbal and Maria-Isabel Estrepo-Ruiz from IMT Atlantique.

Contents – Part V

Data-Driven Platforms and Applications in Production and Logistics: Digital Twins and AI for Sustainability

Assembly Line Worker Assignment and Balancing Problem with Positional Constraints	3
<i>Hyungjoon Yang, Je-Hun Lee, and Hyun-Jung Kim</i>	
Design and Implementation of Digital Twin-Based Application for Global Manufacturing Enterprises	12
<i>Jonghwan Choi, Jinho Yang, Joohee Lym, Sang Do Noh, Yong-Shin Kang, Yu La Joe, Sang Hyun Lee, Jeong Tae Kang, Jungmin Song, Dae Yub Lee, and Hyung Sun Kim</i>	
Exploring Economic, Environmental, and Social Sustainability Impact of Digital Twin-Based Services for Smart Production Logistics.	20
<i>Goo-Young Kim, Erik Flores-García, Magnus Wiktorsson, and Sang Do Noh</i>	
Applying Machine Learning for Adaptive Scheduling and Execution of Material Handling in Smart Production Logistics.	28
<i>Erik Flores-García, Yongkuk Jeong, and Magnus Wiktorsson</i>	
When Softbots Meet Digital Twins: Towards Supporting the Cognitive Operator 4.0.	37
<i>Ricardo J. Rabelo, David Romero, Saulo P. Zambiasi, and Luciano C. Magalhães</i>	

New Approaches for Routing Problem Solving

The Implementation of Eulerian Coverings of a Graph for Solving Routing Problems	51
<i>Tatiana A. Makarovskikh</i>	
An Exact Method for a Green Vehicle Routing Problem with Traffic Congestion	59
<i>Hongyuan Luo, Mahjoub Dridi, and Olivier Grunder</i>	
Investigating Alternative Routes for Employee Shuttle Services Arising in a Textile Company: A Comparative Study	68
<i>İbrahim Miraç Eligüzel, Nur Sena Yağbasan, and Eren Özceylan</i>	

Two Variants of Bi-objective Vehicle Routing Problem in Home (Health)-Care Fields	77
<i>Salma Hadj Taieb, Taicir Moalla Loukil, Abderrahman El Mhamedi, and Yasmina Hani</i>	
Inventory Routing Problem with Transshipment and Substitution for Blood Products Using the Case of the Belgian Blood Distribution	87
<i>Christine Di Martinelly, Nadine Meskens, Fouad Riane, and Imane Hssini</i>	
Improvement of Design and Operation of Manufacturing Systems	
Improving Manufacturing System Design by Instantiation of the Integrated Product, Process and Manufacturing System Development Reference Framework	99
<i>José Ramírez and Arturo Molina</i>	
A Formal Skill Model Facilitating the Design and Operation of Flexible Assembly Workstations	108
<i>Lauren Van De Ginste, Alexander De Cock, Axl Van Alboom, Yogang Singh, El-Houssaine Aghezzaf, and Johannes Cottyn</i>	
Multi-criteria Filtering Approach for Comparison and Analysis of Scheduling Alternative Scenarios: Case Study on an Open Pit Phosphate Mine	117
<i>Najoua Alaoui, Ahlam Azzamouri, Selwa ElFirdoussi, and Pierre Féliès</i>	
Evaluation of Complex Manufacturing Systems in the Context of Aggregated Operating Curves	127
<i>Ulf Bergmann, Matthias Heinicke, Gerd Wagenhaus, and Sascha Schmidt</i>	
Conceptual Maps of Reliability Analysis Applied in Reconfigurable Manufacturing System	136
<i>Tian Zhang, Lazhar Homri, Jean-yves Dantan, and Ali Siadat</i>	
Crossdock and Transportation Issues	
Berth Allocate Problem with Multi-entry Considering Marine Fish Freshness	149
<i>Jing Zhu, Wang Yan, and Xuehao Feng</i>	
Cross-Dock Location: An Airbus Helicopters Case Study	158
<i>David Arturo Pardo Melo, Vincent Bernier, Yannick Frein, and Bernard Penz</i>	

A Hierarchical Network Approach for Long-Haul Parcel Transportation	168
<i>Camille Gras, Van-Dat Cung, Nathalie Herr, and Alantha Newman</i>	
Assessment of MaaS (Mobility as a Service) Apps in Metropolitan Area of São Paulo, Brazil	179
<i>Gabriel Santos Rodrigues, João Gilberto Mendes dos Reis, Regis Cortez Bueno, Wilson Yoshio Tanaka, Adriano Maniçoba da Silva, and Sivanilza Teixeira Machado</i>	
Using Flexible Crossdock Schedules to Face Truck Arrivals Uncertainty	188
<i>Quentin Fabry, Lotte Berghman, and Cyril Briand</i>	
Maintenance Improvement and Lifecycle Management	
Asset Management, Industry 4.0 and Maintenance in Electrical Energy Distribution	199
<i>Sam Amelete, Raynald Vaillancourt, Georges Abdul-Nour, and François Gauthier</i>	
Perspectives on the Future of Maintenance Engineering Education	209
<i>Jon Bokrantz and Anders Skoogh</i>	
Wear and Tear: A Data Driven Analysis of the Operating Condition of Lubricant Oils.	217
<i>Roney Malaguti, Nuno Lourenço, and Cristovão Silva</i>	
A Periodic Inventory Model for Perishable Items with General Lifetime	226
<i>Fatma Ben Khalifa, Imen Safra, Chaaben Kouki, and Zied Jemai</i>	
Efficient Maintenance Planning: The MATISA Company Case Study	235
<i>Jean-Robert Compérat, Vincent Cliville, and Lamia Berrah</i>	
Understanding Schedule Progress Using Earned Value and Earned Schedule Techniques at Path-Level	244
<i>Christian Capone and Timur Narbaev</i>	
Health Indicator Modeling and Association Rule Mining for Stoppages Prediction in a Refinery Plant.	252
<i>Giovanni Mazzuto, Sara Antomarioni, Filippo Emanuele Ciarapica, and Maurizio Bevilacqua</i>	
Productivity Improvement in Manufacturing Systems Through TPM, OEE and Collaboration Between Maintenance and Production: A Case Study	261
<i>Rui Costa and Isabel Lopes</i>	

Stochastic Dynamic Programming for Earliness-Tardiness Single Machine Scheduling with Maintenance Considerations	269
<i>Sabri Abderrazzak, Allaoui Hamid, and Souissi Omar</i>	

An Assessment of Order Release Models in Hybrid MTO-MTS Flow Shop with Bottleneck.	277
<i>Federica Costa, Kaustav Kundu, and Alberto Portioli-Staudacher</i>	

Additive Manufacturing and Mass Customization

Impact of Failure Rate Uncertainties on the Implementation of Additive Manufacturing in Spare Parts Supply Chains	291
<i>Mirco Peron, Nils Knofius, Rob Basten, and Fabio Sgarbossa</i>	

Mass Customization: Customizing for the Human Aspect of Operations Management.	300
<i>Håkon Lund, Stine Sonen Tveit, and Lars Skjelstad</i>	

Impacts of Additive Manufacturing on Supply Chains: An Empirical Investigation.	309
<i>Albraa A. Noorwali, M. Zied Babai, and Yves Ducq</i>	

A Knowledge-Based Approach for Decision Support System in Additive Manufacturing	319
<i>Qussay Jarrar, Farouk Belkadi, and Alain Bernard</i>	

A Bibliometric Analysis Approach to Review Mass Customization Scientific Production	328
<i>Danijela Ciric, Bojan Lalic, Uglješa Marjanovic, Milena Savkovic, and Slavko Rakic</i>	

Frameworks and Conceptual Modelling for Systems and Services Efficiency

Framework of the Architecture of the Communication Process Within Industry 4.0 Oriented Production System	341
<i>Marek Fertsch, Michał Fertsch, and Agnieszka Stachowiak</i>	

A Fuzzy Accident Risk Analysis Approach for a Concurrent Engineering Platform.	351
<i>Mahmoud Shahrokhi and Alain Bernard</i>	

Service Capability Ontology	361
<i>David Görzig and Thomas Bauernhansl</i>	

Guideline to Develop Smart Service Business Models for Small and Medium Sized Enterprises	369
<i>Mike Freitag, Christian Schiller, and Oliver Hämmerle</i>	
Conceptual Approach to Product Development Process Based on Supply Chain Concepts.	376
<i>Joanine Facioli Urnau, Alda Yoshi Uemura Reche, Arthur Beltrame Canciglieri, Osiris Canciglieri Junior, and Anderson Luis Szejka</i>	
Optimization of Production and Transportation Systems	
Interactive Design Optimization of Layout Problems	387
<i>Xiaoxiao Song, Emilie Poirson, Yannick Ravaut, and Fouad Bennis</i>	
A Fast and Efficient Fluid Relaxation Algorithm for Large-Scale Re-entrant Flexible Job Shop Scheduling.	396
<i>Linshan Ding, Zailin Guan, and Zhengmin Zhang</i>	
Identification of Superior Improvement Trajectories for Production Lines via Simulation-Based Optimization with Reinforcement Learning	405
<i>Günther Schuh, Andreas Gützlaff, Matthias Schmidhuber, Jan Maetschke, Max Barkhausen, and Narendiran Sivanesan</i>	
Straight and U-Shaped Assembly Lines in Industry 4.0 Era: Factors Influencing Their Implementation	414
<i>Marco Simonetto and Fabio Sgarbossa</i>	
Optimization of Supply Chain Agility and Reconfigurability	
An Approach to Assess Risks Related to Information System in Supply Chain	425
<i>Selmen Boubaker, Samuel Dumondelle, and Parisa Dolatineghabadi</i>	
Supplier Selection by Using the Goal Programming Approach	435
<i>Mahmoud Shahrokhi, Zahra Sobhani, and Alain Bernard</i>	
Using an Auction-Based System in Cloud Manufacturing for Selecting Manufacturing-as-a-Service Providers	445
<i>Kelvin Sparr, Damian Drexel, and Ralph Hoch</i>	
Modularity Metric in Reconfigurable Supply Chain.	455
<i>Slim Zidi, Nadia Hamani, and Lyes Kermad</i>	

Heuristic Algorithm for the Safety Stock Placement Problem	465
<i>Abderrahim Bendadou, Rim Kalai, Zied Jemai, and Yacine Rekik</i>	

Advanced Modelling Approaches

An Empirical Examination of the Consistency Ratio in the Analytic Hierarchy Process (AHP)	477
<i>Valery Lukinskiy, Vladislav Lukinskiy, Boris Sokolov, and Darya Bazhina</i>	

Performance Indicators in Emergency Operating Theaters: A State of the Art	486
<i>Gustavo Santamaria-Acevedo, Oualid Jouini, Benjamin Legros, and Zied Jemai</i>	

Energy Transparency in Compound Feed Production	496
<i>M. T. Alvela Nieto, E. G. Nabati, and K.-D. Thoben</i>	

A Framework to Assess Risk of Illicit Trades Using Bayesian Belief Networks	504
<i>Rashid Anzoom, Rakesh Nagi, and Chrysafis Vogiatzis</i>	

Simulation and Optimization of Systems Performances

Multi-fidelity Simulation-Based Optimisation for Large-Scale Production Release Planning in Wafer Fabs	517
<i>Zhengmin Zhang, Zailin Guan, Yeming Gong, and Qian Shen</i>	

Toward a Simulation Model for Capacity Analysis of a New Port Terminal	526
<i>Erik Bergeron, Léo Gagnon, Jean-François Audy, Pascal Forget, and Amina Lamghari</i>	

Design of a Physics-Based and Data-Driven Hybrid Model for Predictive Maintenance	536
<i>Emiliano Traini, Giulia Bruno, and Franco Lombardi</i>	

Dynamic Bottleneck Starvation Control	544
<i>Gerd Wagenhaus, Niels Gürke, Werner Kurt, and Ulf Bergmann</i>	

Pricing Models for Data Products in the Industrial Food Production	553
<i>Calvin Rix, Jana Frank, Volker Stich, and Dennis Urban</i>	

AI-Based Approaches for Quality and Performance Improvement of Production Systems

A Neural Network Model for Quality Prediction in the Automotive Industry.	567
<i>Anders Risan, Mohamed Kais Msakni, and Peter Schütz</i>	
AI and BD in Process Industry: A Literature Review with an Operational Perspective	576
<i>Rosanna Fornasiero, David F. Nettleton, Lorenz Kiebler, Alicia Martinez de Yuso, and Chiara Eleonora De Marco</i>	
Implementing an Online Scheduling Approach for Production with Multi Agent Proximal Policy Optimization (MAPPO).	586
<i>Oliver Lohse, Noah Pütz, and Korbinian Hörmann</i>	
Operation Twins: Synchronized Production-Intralogistics for Industry 4.0 Manufacturing.	596
<i>Mingxing Li, Daqiang Guo, and George Q. Huang</i>	

Risk and Performance Management of Supply Chains

Sustainability Improvement of Coffee Farms in Valle del Cauca (Colombia) Through System Dynamics.	607
<i>Álvaro José Torres Penagos, Juan Carlos Osorio, and Carlos Julio Vidal-Holguín</i>	
A Study of the Relationships Between Quality of Management, Sustainable Supply Chain Management Practices and Performance Outcomes	618
<i>Dandutse Tanimu, Yahaya Yusuf, and Dan'Asabe Godwin Geyi</i>	
4.0 Transition Methodology for Sustainable Supply Chain Management.	626
<i>Ioana Deniaud, François Marmier, and Jean-Louis Michalak</i>	
Intuitionistic Fuzzy Cognitive Map Based Analysis of Supply Chain Risks	634
<i>Gülçin Büyüközkan, Celal Alpaya Havle, and Orhan Feyzioğlu</i>	
A Classification Tool for Circular Supply Chain Indicators.	644
<i>Asiye Kurt, Mario Cortes-Cornax, Van-Dat Cung, Agnès Front, and Fabien Mangione</i>	
Author Index	655
