HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Modeling interaction traces of an online panel

From raw interaction traces to actionable indicators: lessons learned

8th European Survey Research Association conference July 2019, Zagreb

Simon DELLAC

Elodie PETORIN

(both CDSP, Sciences Po)

doi:[10.5281/zenodo.3765240](https://doi.org/10.5281/zenodo.3765240)

— ELIPSS : Longitudinal Study by Internet for the Social Sciences

- Probability-based online panel
- Monthly questionnaires designed by researchers
- Device and internet access provided to panel member
- Around 2400 panel members in June 2019

Panel ELIPSS, bonjour

- Methodological corpus to standardize processes
- Different layers of processes over the years
- Recording of every interactions and/or actions
- Incident ticket tracking and follow up calls

Panel management system

- In-house tool
- ELIPSS identification
- Contact information
- Password modification

The screenshot displays a list of customer service tickets. Each ticket entry includes a status icon, the customer's name, a date, and a brief description of the issue. The tickets are as follows:

- Charlotte Montcharmont** (02 Nov 2017): Relance Phone Ticket : MR : (Phone icon)
- Élodie Pétorin** (30 Oct 2017): Tablette : Bonjour Mme Maho, Nous sommes conscients de certains signes de fatigue de notre matériel et nous excusons pour le désagrément. Nous pouvons bien sur vous changer le matériel contre une tablette neuve. Pouvez-vous nous confirmer que votre adresse postale est bien 82d, rue General de Gaulle 56 100 LORIENT ? Bien à vous. Elodie pour l'équipe ELIPSS (Envelope icon)
- ROSINE MOUGUE NGADEU** (29 Oct 2017): Tablette : Cette tablette est très désagréable dans son fonctionnement..elle est très lente (Envelope icon)
- Kevin Boudelle** (23 Nov 2016): Phone call in : elle appelle pour dire que l'enveloppe est ouverte mais que la tablette est bien dans le carton. Je lui dit d'accepter le colis (Phone icon)
- Geneviève MICHAUD** (09 Nov 2016): Lettre 3 Id lot 1 : Envois du courrier Lettre 3 Id lot 1 (Envelope icon)

Jours d'absences

23

- Absence period
- Acceptance date
- Unavailability reason
- How many days in the panel lifetime

Some indicators

as of March 2019

- 76 surveys
- 3 556 panelists (2400 still active)
- 25 000 phone calls
- 510 000 messages (sms, in app, push)
- 5 800 tickets
- 4 500 follow up letters
- 6 million survey paradata records

— Panel management: what impact on response behaviour

Our intuition: resources allocated for panel management have a large impact on response rate and panel attrition.

Stakes:

- Review the practices + tools developed for each need
- Cleanse our large / old database tables
- Publish an exploitable dataset
- Eventually learn from our design choices

— Interaction traces as a dataset

Our choice: produce two distinct atomic timelines:

- The set of events between a panelist and the panel management system
- The set of events between a panelist and the surveys

Event types

- 'Easy' to build: follow-ups, incidents, phone call motive, survey interactions...
- Hard to build: messages → laborious parsing

Panelist timeline

Survey timeline

From raw to derived traces

Combined together, enhanced with panelist demographics, raw data become meaningful

Questions:

- What parameters influence response rates/behaviors and how?
- Can we identify standard profiles that inform us on response behavior?
- Do we have more leverage on certain group of people?

— Work in progress

Regarding the publication of the dataset:

- Establishing which interactions to keep ✓
- Building a dataset based on the interactions corpus ✓
- Documentation ✗
- Integrating panelists socio-demographic data ✗

Lessons learned

- On general strategies
 - ◆ More A/B testing throughout the panel lifespan
- On a development/database perspective
 - ◆ change of people + change of practices → inhomogeneous data
- On in-app tools improvements
 - ◆ incident ticket tracking → missing information about the panelist contact mode

Thank you!
