HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Open Archive Toulouse Archive Ouverte (OATAO)

OATAO is an open access repository that collects the work of Toulouse researchers and makes it freely available over the web where possible.

This is an author-deposited version published in: <http://oatao.univ-toulouse.fr/>

Selected papers from the 29th SEGH Conference on Environmental Geochemistry and Health

**François De Vleeschouwer · Andrew Hursthouse ·
Gaël Le Roux · Dominik Weiss**

The 29th Conference on Environmental Geochemistry and Health took place in Toulouse (France) from 8 to 12 July 2013. It gathered 160 delegates from 35 countries around regular topics (Biogeochemistry and Health, Biogeochemistry and Ecotoxicology, Spatial and Temporal Records of Pollution including Catchment Studies), as well as special Sessions (Frontiers in Mercury Biogeochemistry, Bioaccessibility of Pollutants in Soils and Vegetables, Arsenic: Current Issues

of Speciation, Environmental Behaviour and Human Health Impacts).

This special issue represents a selected collection of studies presented during the conference. It covers a wide range of disciplines and approaches applied to the environmental and health impacts of contaminants.

On behalf of the Society for Environmental Geochemistry and Health, we would like to thank all the authors and reviewers who contributed to this special volume issue.
