1 | Introduction of the Network, Employment, dEbt, Mobilities and Skills in India Survey 1 (NEEMISIS-1)

The Networks, Employment, dEbt, Mobilities and Skills in India Survey (NEEMISIS), conducted in 2016-17, is the second wave of a multi-topic survey covering 2696 individuals, 492 households and 10 villages in-between Cuddalore and Villupuram districts in rural Tamil Nadu (South India). Most of these households had been interviewed for the Rural Employment and Microfinance Survey (RUME) conducted in 2010 within the French Institute of Pondicherry, a project led by Isabelle Guérin (IRD, CESSMA), and a team of researchers and enumerators at the IFP (led by G. Venkatasubramanian). Hundred additional households within the same 10 villages have been interviewed for NEEMISIS, thereby constituting a two-year panel of households and individuals.

One of NEEMISIS's specificity is its timing: an external shock, a nation-wide demonetisation policy, announced by Modi government in November 2016, directly affected livelihoods in the course of the survey. NEEMISIS took advantage of this context to try to address its effects on rural households. Three-hour interviews in each household covered employment, migration, education, debt, financial practices, agriculture, marriage and schemes. Two-hour individual interviews in each household covered labour force participation, social networks, cognitive and non-cognitive questions.

NEEMISIS was conducted by a team of DIAL research unit (Développement, Institutions et Mondialisation, DIAL, Paris), under the French National Research Institute for Sustainable Development (IRD), coordinated by Dr. Christophe Jalil Nordman (IRD, DIAL) and Isabelle Guérin (IRD, CESSMA). This project was co-funded by Nopoor, a five year European project (2012-2017), the IRD, and the IMTFI of the University of California. It was implemented within the French Institute of Pondicherry (IFP) in cooperation with the IRD, and is part of the "Labour, sKills, Social networks and Mobilities in India (LAKSMI)" programme coordinated by C.J. Nordman and the "Labour, Finance and Social Dynamics" programme coordinated by I. Guérin, both constituting Axis 3. "Household Vulnerabilities, Labour and Socioeconomic Dynamics" of the IFP Social Sciences Department research agenda.

NEEMISIS survey aims at understanding the linkages between household and individuals'

labour, skills, social networks and social and spatial mobilities. This includes the investigation of various forces at play, spanning from the role of social structure (norms and institutions), the development and use of social networks, to the formation of cognitive and non-cognitive skills.
