HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

In the above article [1], equations (33) and (36) had a typing error. The correct equations are:

$$\frac{\partial q_D}{\partial v_d} = \left(\frac{\sigma}{n} - 1 \right) \frac{q_D}{q_D + 1}, \quad (33)$$

$$\frac{\partial q_S}{\partial v_s} = \left(\frac{\sigma}{n} - 1 \right) \frac{q_S}{q_S + 1}. \quad (36)$$

Equation (37) was incomplete. The complete equation is:

$$g_m = \frac{\partial i_d}{\partial v_g} = \frac{2}{nB} \left[q_S - q_D - i_d \frac{\theta}{4} \left(\frac{q_S}{1+q_S} + \frac{q_D}{1+q_D} \right) \right] \quad (37)$$

Equation (38) has a typing error. The correct equation is:

$$\frac{\partial i_{dsat}}{\partial v_x} = \frac{\partial i_{dsat}}{\partial q_S} \frac{\partial q_S}{\partial v_x} = 2 \frac{E}{D + \frac{\theta}{2} E} \frac{\partial q_S}{\partial v_x} \quad (38)$$

Equations (41) and (42) were incomplete. The complete equations are:

$$g_{m2} = \frac{\partial^2 i_d}{\partial v_g^2} = \frac{2}{n^2 B} \left[\frac{q_S}{1+q_S} - \frac{q_D}{1+q_D} \right. \\ \left. - \frac{\theta}{4} \left[2ng_m \left(\frac{q_S}{1+q_S} + \frac{q_D}{1+q_D} \right) \right. \right. \\ \left. \left. + i_d \left(\frac{q_S(1-2q_S)}{(1+q_S)^5} + \frac{q_D(1-2q_D)}{(1+q_D)^5} \right) \right] \right] \quad (41)$$

$$g_{m3} = \frac{\partial^3 i_d}{\partial v_g^3} = \frac{2}{n^3 B} \left[\frac{q_S}{(1+q_S)^3} \right. \\ \left. - \frac{q_D}{(1+q_D)^3} - \frac{\theta}{4} \left[3n^2 g_{m2} \left(\frac{q_S}{1+q_S} + \frac{q_D}{1+q_D} \right) \right. \right. \\ \left. \left. + 3ng_m \left(\frac{q_S}{(1+q_S)^3} + \frac{q_D}{(1+q_D)^3} \right) \right. \right. \\ \left. \left. + i_d \left(\frac{q_S(1-2q_S)}{(1+q_S)^5} + \frac{q_D(1-2q_D)}{(1+q_D)^5} \right) \right] \right] \quad (42)$$

The authors request this correction to provide the correct equations, as they may be useful to the community for future work on the subject.
