Submitted on 13 Oct 2022

HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Motion in speech and gesture in a CLIL context

Christina Piot, Julien Perrez, Maarten Lemmens

INTRODUCTION

BACKGROUND

MOTION EVENTS

Figure – Ground – Path – Manner

Self-propelled motion events (SPME)
Caused motion events
Caused location events
Location events

THE LINGUISTIC EXPRESSION OF MOTION EVENTS

Verb-framed languages vs. Satellite-framed languages

French vs. Dutch

L'oiseau **rentre** dans la cage **en volant**.
[The bird **enters** the cage **flying**.]
De vogel **vliegt** de kooi **binnen**.
[The bird **flies into** the cage.]

CO-SPEECH GESTURE

Communication process
Speech **production** & Speech **comprehension**
Universal and language-specific characteristics

The typological differences between V-languages and S-languages are reflected in co-speech gesture

(McNeill 1985, 2005; Kendon 1981, 1994; Alibali et al. 2000; Gullberg 2010; Graham & Argyle 1975; Rogers 1978 and Roseborough 1981 mentioned in Kendon 1994; Cassel et al. 1999; McNeill & Duncan 2000; Kita & Özyürek 2003; Brown & Chen 2013)

THINKING FOR SPEAKING

While acquiring their first language, children learn a specific way of thinking for speaking (Slobin 1991)

Through learning grammatical constructions and lexicon, Children are provided with “a framework for the expression of thoughts, events and feelings” (Stam 2010: 61);

Their expression is guided “as they engage in the online thinking process related to speaking” (Stam 2010: 61).

MOTION EVENTS – CO-SPEECH GESTURE - THINKING FOR SPEAKING

Different patterns of thinking for speaking in L1 and L2 = necessity to learn the L2 pattern to master the language (Stam 1998, mentioned in 2010)

Research on motion events to test the thinking for speaking hypothesis

First focusing on linguistic descriptions

Later also taking the multimodal expression into account

→ Learning/Acquisition of the L2 multimodal pattern
→ Gestures give information on thinking for speaking and on the shift from thinking for speaking in L1 to thinking for speaking in L2 (Stam 2010)

RESEARCH QUESTIONS

How do native French speakers and native Dutch speakers express motion events in both speech and gesture?

How do CLIL French-speaking learners of Dutch express motion events in both speech and gesture?

METHOD

PARTICIPANTS

11 native French speakers
9 native Dutch speakers
12 CLIL French-speaking learners of Dutch
(Proficiency level: ranging between CEFR A1 and B2)

TASK

Tweet Zoo divided into 15 fragments

ANALYSIS

Speech	
Verb	Neutral/Manner/Path/ Manner and path/ Manner and path (prefix)
Satellite	Manner/Path/Location/ Combination
Construction	e.g. MannerV + PathS
Boundary crossing	Yes/No

Co-speech gestures	
Type	Iconic/ Deictic/Metaphoric/ Pragmatic/Beat
Semantic components in deictic and iconic gestures	Manner/Path/ Ground /Location/Combination

Iconic gestures

Figure 1: Manner and Path

“Dan loopt de kat elke te ijsberen voor de kooi.” (DU4, ME26)
[Then the cat is briefly pacing up and down in front of the cage.]

Figure 2: Path

“Il fait des aller-retours en faisant *en réfléchissant.” (FR5, ME26)
[He is going back and forth doing *thinking.]

Figure 3: Manner

“En gaat daarmee naar de leeuwenkooi.” (DU11, ME33 + ME34)
[And goes with it to the tigers' cage.]

Figure 4: Ground

“En Grosminet is <> naast de *de huis.” (CLIL14, ME26)
[And Sylvester is <> next to the *the house.]

Figure 5: Deictic - Location

“Grosminet heeft niet gezien dat hij in water is nu.” (CLIL12, ME72)
[Sylvester has not seen that he is in the water now.]

Synchronization between iconic and deictic gestures and linguistic units
Multimodal Construction: semantic components in linguistic units and substantive gestures

(Levy & McNeill mentioned in McNeill 2006; Kendon 2004; Stam 2006; Woerfel 2019)

RESULTS

SPEECH

Types of event

	FR		DU2		DU		Total	
	n	%	n	%	n	%	n	%
Self-propelled motion	123	54%	84	48%	96	51%	303	51%
Caused motion	41	18%	19	11%	35	19%	95	16%
Caused location	5	2%	3	2%	3	2%	11	2%
Location	33	14%	17	10%	26	14%	76	13%
Action	27	12%	52	30%	28	15%	107	18%
Total	229	100%	175	100%	188	100%	592	100%

Constructions - SPME

FR	DU2	DU
PATH _v +PATH _s	PATH _v +PATH _s	MANNER _v +PATH _s
MANNER _v +PATH _s	MANNER _v	MANNERPATH _v (PREFIX)+PATH _s
PATH _v	MANNER _v +PATH _s	PATH _v +PATH _s

(1) En loopt ie naar het water. [And he runs to the water.] (DU1, ME95)
(2) De kat loopt weg uit de kooi. [The cat runs out of the cage.] (DU4, ME23)
(3) Il sort de l'enclos. [He leaves the pen.] (FR5, ME23)

GESTURE

Types of gesture

Semantic components in the gestures used to describe SPME

SPEECH & GESTURE

Multimodal Constructions - SPME

FR & DU2	DU
PATH _v +PATH _s +PATH _G	MANNERPATH _v (PREFIX)+PATH _s +PATH _G
MANNER _v +PATH _s +PATH _G	MANNER _v +PATH _s +PATH _G

Synchronization - PATH_GGESTURE

Synchronization between speech and co-speech gesture

DISCUSSION & CONCLUSION

- The most frequent construction used by L2 learners = same as in their L1.
- MANNERPATH_v(PREFIX): difficult for learners but still MANNER_v.
- More pragmatic gestures in L2 vs. in L1 (// Piot (2019))
- PATH_G:
 - Most frequent semantic component in both French and Dutch (// Alferink (2015)), a bit more frequent in French;
 - Most frequent semantic component in DU2 as well even though it is less prevailing.
- MANNER_G: more frequent in DU2: sometimes compensation gesture.
- Conflated gesture (MANNERPATH_G): not very frequent here and similar in the three groups.
- Most frequent multimodal construction in French and Dutch L2: same ones vs. Dutch L1.
- Synchronization: Verb: Dutch L1 > French L1 > Dutch L2.

FURTHER RESEARCH

- More data
- Boundary crossing gesture
- Conflated gesture vs. 2 gestures
- L2 learners' evolution
