**HAL** is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

*South Asian Languages from the 16th century onwards* (2018), *Grammaire Latine Étendue, Two Portuguese missionary Tamil Arte (17th cent.)* (2020), *Mood and modality in 17th century missionary grammars of Tamil. The subjunctive and the imperative* (2018). On these topics and on the role played by the Portuguese language, she organized an International Conference in 2017 in collaboration with other partners: *The Companion Language of the Empire? Formal and informal spaces of the Portuguese language (16th-20th cent.)*.

Part of her research has also been devoted to the linguistic outcomes deriving from other contacts. The one in South India with the English language in a diachronic and a synchronic perspective for which she worked extensively on archival documents and carried out fieldwork in different areas of South India. Her results have been published in two different contributions, *A variety of Anglo-Indian: the Butler English* (2009) and *Mapping the spread of the English language in India. A linguistic ecology approach* (2018). Her other focus has been on the contact in the Mediterranean area in the Modern era the results of which are collected in a book she edited in 2016 and in other articles published later.

Her current interests also focus on Language Documentation and Linguistic Fieldwork and, in this regard, in 2022 she organised a *Summer School in Language Documentation* in collaboration with colleagues from Tuscia and other Universities.

She is currently preparing the translation of another early missionary grammar of Tamil and a survey of the main linguistic features characterizing the ‘Christian Tamil’ used among Jesuits.

## THE LINGUISTIC AND HISTORICAL CONTRIBUTION OF THE ARTE TAMULICA BY BALTASAR DA COSTA, S.J. (C. 1610-1673)

Annotated and commented Portuguese  
transcription and English translation  
from Portuguese and Tamil by Cristina Muru

Cristina Muru (b. 1978) received her PhD in Historical Linguistics at the University of Rome ‘La Sapienza’ in 2009. She is currently Researcher and Adjunct Professor of Sociolinguistics in the Department of linguistic-literary, historical-philosophical, and juridical studies (DISTU) of the University of Tuscia (Viterbo, Italy). Her main research interests lie in Missionary Linguistics, in History of Language Sciences, and in Contact Linguistics. In particular, she has studied the contact of the Portuguese and the British with South India during the 16th and 17th centuries. Focusing on the study of the early missionary grammars of the Tamil language composed by Jesuit missionaries, she has contributed both to the History of Language Science and to Tamil studies, recording forms and varieties of the Tamil language attested in the 17th century. She has published two books on this subject: *Portuguese missionaries in India in the 16th and 17th century: the Arte of the Tamil language. A comparative study of some manuscripts* (2010) and *Glimpses of the Tamil language* (2010) as well as various articles, the most recent being *Early Descriptors and Descriptions of*

## ***Premise***

This project has taken me a long time to complete, partly because I kept finding something more to add but also because in recent years, I obtained a new copy of what is the centre of this study: one of the Tamil grammars composed in the 17<sup>th</sup> century by a Portuguese Jesuit missionary. Therefore, after Muru (2010 and 2020b), I wanted to add this new copy to my comparison and I obtained its digitised version, corresponding to manuscript Sloane 3003, from the British Library in 2019. Consequently, every time I looked at the pictures of the five copies of the same manuscript of this Tamil grammar in existence today, I found something new, something that I believed deserved to be studied carefully, to be analysed and understood. This maniacal obsession has guided me over the years, until the world came to a standstill due to the pandemic, and I realised that I could no longer delay this publication, I could no longer continue to seek an impossible perfection.

It will remain an unsatisfactory study for some and for others it will lack the analysis of some important aspects; it will have some gaps but at least it will be available to those interested in these matters, and it will offer a perspective on a document which had such a great, if indirect, influence on Western studies of the Tamil language. Furthermore, I felt I deserved to see the work of many years finally published.

Therefore, despite the pandemic preventing me from visiting the British Library to see the physical manuscript and not just a digitised version, and from returning to the Goa Library to check the watermark of my manuscripts (if any), I decided to publish this book as it is, even without the complementary information I would have wished to add. I will leave it to others to complete the puzzle. For now, I do not wish to delay any further the disclosure of the contents of this Tamil *Arte* that was so relevant for the missionary community, both Catholic and Protestant and contributed so much to the description of the Tamil language that will be discussed below.

## ***Purpose and value of this book***

The scope of this book is to present the *Arte Tamul* by Baltasar da Costa<sup>1</sup> (ca. 1610-1673) in its contents, paying attention to his description of the Tamil language, highlighting the nature of the language the missionary was dealing with.

Therefore, my intention is to highlight any linguistic feature that could be relevant for the linguistic change of the Tamil language as well as for observing its sociolinguistic variation in a diachronic perspective. The relevance of this grammar concerns different domains.

First, despite being produced by a foreigner in India, it is one of the few documents belonging to the so-called early Modern period (Wilden 2018: 9-13) and contains specimens of the Tamil language. Second, it was an important document, which circulated widely within the religious community contributing to a growth in the knowledge of the Tamil language among Europeans. This is revealed by the fact that, as described in paragraph 2, to the best of my knowledge there are five copies of this manuscript which can be identified in three different libraries in three different parts of the world all of which were the result of the work of missionaries belonging to different orders. For example, among the copies available today,<sup>2</sup> one circulated among the Discalced Carmelites, while another in the Protestant *milieu* became the model of reference for the composition of the famous *Grammatica Damulica* by Bartholomäus Ziegenbalg (see Jeyaraj 2010; Israel 2011; Sweetman 2006, 2014, 2017). Third, it helps to identify those linguistic forms which are useful for a better understanding of Christian translations of religious books into Tamil such as the Catechism and Confession found at the end of some of these manuscript copies. Finally, Costa's five manuscripts are all composed in Portuguese, consequently they represent a precious source for the study of the Portuguese language as it was used in India among missionaries in the 17<sup>th</sup> century.<sup>3</sup>

---

<sup>1</sup> Also spelled as: Blathazar, Blathsar, Batlhassar, Baltassar, Baltessar. Following the suggestion of one of the revisor, who I thank, I have selected the Modern Portuguese spelling for Costa's name (Baltasar) in the same way I have done for Manuel Álvares.

<sup>2</sup> In reality, if Xavier Raj is also taken into consideration (1995: 63) this number would be six. See below, § 1.2.1 and fn. 30 for further details.

<sup>3</sup> For the most recent creolistic studies on the Portuguese language in India see Cardoso's projects (2013-2018; 2017-2019) and Pinharandas-Nunes and Cardoso (2019) as well as Cardoso (2014, 2016) and the excursus provided in Muru (2018: 9–12) along with the bibliographical references in the same article. For the role of the Portuguese language in India as well as for a perspective on the

The book is organized into three main sections. The first section, entitled *Introduction* includes four paragraphs. The first paragraph gives a short historical contextualisation of the author and of his *Arte*. The second describes the physical characteristics of the manuscript, the archives, and the collections where the manuscripts are to be found today. In an ideal world we would have a detailed reconstruction of the history of these collections, and therefore of the network behind the five manuscripts copies available today, but that would be beyond the scope of this publication which mainly concentrates on the linguistic aspects of the Tamil language found in Costa's *Arte*. Nevertheless, I will provide a brief reconstruction of how the manuscript entered the collection and I will propose a hypothesis regarding the history of its transmission which can be the starting point for further investigations. The third paragraph focuses on the comparison of the five different copies of Costa's grammar observed in this study. It highlights the differences existing in terms of contents, writings, order of topics, and linguistic variations both in Tamil and Portuguese. It then focuses on paratextual elements<sup>4</sup> and on palaeographic insights which are relevant for confirming the proposed chronological order of the manuscripts (cf. § 1.3). The last paragraph presents the criteria followed in the transcription and in the translation of Costa's grammar, both in its Portuguese version and in its English version also indicating the criteria behind the selection of the copy chosen to be transcribed and translated.

The second section (*Part 2* and *3*) is the core of the book, and it is the palaeographic transcription of the original manuscript in Portuguese along with its English translation that is as much as possible close to the Portuguese text. Both versions are commented with palaeographic or linguistic notes. The former has the aim of underlining the differences between the five copies of the manuscript, useful to the history of the Portuguese language as well as to the temporal contextualisation of the manuscript. This is the main reason why I decided neither to modernise and standardize the Portuguese language found in the manuscripts nor to translate the Portuguese footnotes into English being unnecessary for the scope of this book. The latter is useful for understanding the

---

Portuguese language as a language of grammaticisation in India, refer to the project Missionary and Colonial Linguistics under the Portuguese Patronage in Africa and Asia by Assunção and Fernandes (2017).

<sup>4</sup> The importance of paratexts in Tamil Christian manuscripts has been largely discussed in Muru (2020a). For general consideration on the importance of the study of paratexts in Indian manuscript refer to Wilden and Anandakichenin (2020) Ciotti and Franceschini (2016: 59–129), and Ancel (2016: 269–299) as well as the references provided in Muru (2020a: 618–621).

*stadium* of the Tamil language as it was found by Costa during his attempt to describe it as well as to understand as the Latinate categories were applied and extended in the description of the Tamil language.

The last part (*Part 4*) is also of great importance and is divided into two sections. The first one briefly comments the model of reference Costa used for composing his grammar. It also resumes the linguistic features of the Tamil language as it was known and described by Costa, already underlined in the linguistic footnotes. The second section provides data useful for Tamil language studies as well as for the History of Language Sciences, therefore representing the starting point for future research. It includes four appendices:

- *Appendix 1* (1.A, 1.B, 1.C) provides all the Tamil word forms and the Tamil examples found in the manuscripts along with all the technical labels used by Costa for describing Tamil.
- *Appendix 2* lists the Latinate categories used by Costa in his *Arte*.
- *Appendix 3* gives a schematic representation of the Tamil finite and nonfinite verb forms found in Costa's *Arte* all derived from the verb root *vicuvāci* 'to believe'.
- *Appendix 4* provides evidence of Tamil palaeography comparing the Tamil letters as they are listed in the manuscripts.

### ***Acknowledgments***

Shutting us in our homes, far from libraries and classrooms, the pandemic gave me the impulse to pursue this long-lasting project, but more than anything it was the encouragement received by colleagues and friends which spurred me on to finish the project.

A deep gratitude goes to Jean-Luc Chevillard for having pursued and motivated me in this task – not only this one – since when I met him for the first time in 2007. Then, I want to thank my friends and colleagues Gonçalo Fernandes (Universidade Trás-os-Montes e Alto Douro, UTAD) and Giovanni Ciotti (CSMC). The former, for the warm days spent with me in Vila Real, and the latter for the cold days together in the *Centre for the Study of Manuscript Cultures* (CSMC), sitting in front of Costa's manuscript. My gratitude also goes to Eva M. Wilden for her continued hospitality at the CSMC over the years, both physically and virtually, and for her support. Credits also go to Rolf Kemmler

and Carlos Assunção for the nice time we enjoyed in Vila Real and also for their help, the former for his precious cooperation in the puzzling task of looking at the handwriting used in the manuscripts, and the latter for the support and the hospitality.

I express my deepest gratitude to them all for their encouragement and the trust they placed in me and in my work. At this regard, I am also grateful to many others who contributed, each one in a different way, to the realization and completion of this project. I list them here in alphabetical order: E. Annamalai, Anand Amaladass, Victor B. D'Avella, Jonas Bucholz, C. T. Indra, Luca Lorenzetti, Erin McCann, Laura Mori, S. Ramakrishnan, P. R. Subramanian, Margherita Trento, Mariarosaria Zinzi.

I am also indebted to the three anonymous revisors for their precious suggestions and comments, as well as to *Centro de Estudos em Letras* (CEL) for having trusted in and published this editorial project realised both within the Project *Text surrounding Text* (ANR-DFG 2018, P.I. Eva M. Wilden and Emmanuel Francis) and the *CEL project*. I would like also to express my gratitude to the archives and libraries mentioned in my study who gave me the permission to consult the manuscripts and reproduce some of their sections. In particular, I express my thankfulness to the Krishnadas Shama Goa State Library in Panjim, to the British Library, to the Vatican Apostolic Library, to the *Archivum Romanum Societatis Iesu* (ARSI) in Rome and in Shembaganur, to the Propaganda Fide Historical Archive in Rome for allowing me to consult the manuscripts and for their precious guide during my visits.

Finally, special acknowledgments go to my family who encouraged me and tolerated my absences, and to my dear friend Ramakrishnan Seetharaman, better known as *Crea Ram*, for his ongoing-lasting help, encouragement, and friendship to whose memory I wish to dedicate this book.

It is obvious but important to say that I take the full responsibility for any mistake.

# **PART 1**

## **INTRODUCTION**

## 1.1 A short contextualization of the author

The history of the arrival of the first missionaries in India and their impact has already been narrated in many books and papers and from different angles and perspectives.<sup>1</sup> Therefore, I prefer to focus exclusively on the history and contextualization of the author of the grammar analysed here: the *pañāraswāmi* Baltasar da Costa (ca. 1610-1673). For a general contextualisation, it will suffice to say that the Portuguese power, which was wiped out by the late seventeenth century both by the Dutch and the British, took root in India in the fifteenth century when the Portuguese merchants guided by Vasco Da Gama (1469-1524) reached Kozhikode (Calicut) in 1498 via the Cape of Good Hope. They were the first Europeans to have reached India directly from Europe. Their first destination was the Malabar Coast, “which had the pepper producing area as its hinterland” (Karashima 2014: 230). Thus, the pepper was exported to Lisbon from Kochi which became the first Portuguese government settlement of India. However, Portuguese merchants did not remain alone in their enterprise in India, and they were swiftly joined by Jesuit missionaries in the 1540s. From this moment onwards, the Jesuit order continued to send missionaries to India – as well as other parts of the world – creating a network of Fathers who applied themselves to the understanding of the local customs and to the learning of the local languages with the aim of being more effective in their proselytism of the Christian faith.

Baltasar Da Costa, who was born in Aldeia Nova in the diocese of Guarda, in the North of Portugal in 1610, was one of the Jesuit missionaries who contributed a great deal to the study of the local language. Information about his life as a Jesuit in the mission in India is found in the catalogue of the Province of Cochin kept at the HARSÍ in

*Primus catalogus Patrum, fratrum q Provincia Cochinesis India Orientalis factus mense Desembris 1652*. (f. 84r).

Padre Balthazar da Costa Guardensis, bonis viribus, annorum 45, societatis 25, studiis absolutis, fuit Rector seminarÿ externorum per duos annos. Ad Theologiam docendam vocatus elegit missionem Madurensensem in qua duodecim annis mutata [?] Optimi callet linguam Tamulicam. Professus quattuor votorum (f. 91r). In Collegio Bengalensi. P. Balthazar, à Costa superior., P. Emmanuel Alvarez, P. Antonius de Proença, P. Estephanus de arey = [tutti] Pandaras...etc. (f. 94r).

*Primus catalogus Patrum, fratrum q Provincia Coccinensis India Orientalis factus mense Julii 1659*. (f. 95r). 13. Padre Balthazar da Costa Guardensis, bonis viribus, annorum 51, societatis 31, sutdiis

absolutis, fuit Rector seminarij externorum per duos annos. Versatus et versatur in Missione Madurensi 20 annis, optime callet linguam Tamulicam. Professus quattuor votorum. (f. 95v).

*Secundus catalogus Provincia Malabaricæ in India Orientali factus mense Julii 1659.* 13. Ingenium bonum, iudicium et prudentia bona. Experientia multa. Cholericus sanguineus. In litteris bene profecit. Ad societatis munia aptus est. (f. 101r).<sup>2</sup>

As the Catalogues point out, Costa applied himself to the study of the Tamil language in which he became particularly proficient. We know from the historical documents available today that, with the aim of producing tools which could also be useful to other missionaries (cf. Hovdhaugen 1996: 9-22), Costa composed a Portuguese-Tamil dictionary that was printed in Ambalacat in 1680 [no copies exist today, see *below*] and a grammar of the Tamil language [see *below*]. Indeed, Costa was a great connoisseur of the Tamil language, and his work, probably referring to both the grammar and the dictionary, was also mentioned by Hervás y Panduro in *Idea dell'Universo* (1785, tome XVIII: 92–93 and footnote a) p. 93):

“Arrivato in Roma cercai d’investigare attentamente la natura, ed affinità, o diversità di queste lingue, e principalmente di quelle, che io credeva dialetti della Malaya, e della Hindua, ed a questo fine non pochi discorsi feci con alcuni Alunni di Propaganda nati in que’ paesi: ma le ricerche riuscironmi inutili, finché non ebbi la sorte di vedere alcune grammatiche e dizionarij che di suddette lingue aveano acquistato l’erud. Monsignore Borgia, ed alcuni Exgesuiti.”

[On arriving in Rome, I tried to investigate carefully the nature, affinity, or diversity of these languages, and mainly of those, which I believed to be dialects of the *Malaya*, and of the *Hindua*, and to this end I had many discussions with some students from Propaganda who were born in those countries. However, the research was useless until I had the good fortune to see some

---

<sup>2</sup> The accents are rereproduced as they appear in the original manuscript. Apart from Goa 29, information about Costa and his studies can be also found in Besse (1914).

grammars and dictionaries which had been acquired by the erudite aforesaid Monsignor Borgia, and some Jesuits.]

### Specifying in the footnote that

“Il Sig. Ab. Don Antonio Diaz mi ha donata graziosamente una grammatica MS anonima dell’idioma Tamulico in Portoghese [...] questa grammatica è del Gesuita Costanzo Beschio Missionario del Madurè, poiché la sua letterale traduzione in Latino ho veduto stampata col nome del P. Beschio da’ Missionarij Danesi in Trangambaria l’anno 1738, donde l’avuto il prelodato Monsignor Borgia, che ancora mi ha favorito di due grammatiche Damuliche, l’una MS e l’altra (che è opera del Danese Bartolomeo Ziegenbalg) [...]. Lo stesso monsignore mi ha favorito colla grammatica MS. Tamulico-Portoghese del Gesuita Baldassare de Acosta Missionario del Madurè, e con un eccellente dizionario MS. Anonimo Malabarico-Portoghese in quarto con 214 pagine”.

[Mr. Ab. Don Antonio Diaz graciously gave me an anonymous manuscript grammar of the *Tamulic* language (written) in Portuguese [...] this grammar is from the Jesuit Costanzo Beschio Missionary of *Madurè* since its literal translation into Latin I saw printed with the name of Fr Beschio from the Danish missionaries in *Trangambaria* in the year 1738. They were obtained by Monsignor Borgia, who favored me with two *Damulic* grammars. One is manuscript and the other (which is the work of the Danish missionary *Bartolomeo Ziegenbalg*) [...]. Monsignor himself favored me with the *Tamulic-Portuguese* manuscript grammar by the Jesuit *Baldassare de Acosta* Missionary of *Madurè*, and with an excellent anonymous manuscript *Malabaric-Portuguese* dictionary in 214 quarto pages.]

Just like the other missionaries with whom Costa worked, he also recognised the importance of the knowledge of the local languages for missionaries in order to communicate with locals, and Costa stressed this awareness in the *Preface* of his translation from Tamil into Portuguese of Nobili’s *Catechism* (1661) as Chakravarti (2014: 155) underlines: “The

preface bespoke of Costa's ardent commitment to Madurai, the Tamil language and his mimetic practice there."

Costa entered the novitiate on 20<sup>th</sup> June 1627 in Lisbon. Before reaching India, he had studied Latin and Philosophy in Coimbra and despite his health, he asked to be sent to India when he was 25. When the list of missionaries for India came out in 1635, his name had not been included but he literally begged the Provincial and, despite the contrary opinion of doctors, he sailed on 13<sup>th</sup> April 1635 in the Jesuit party of Marcello Mastrilli (Županov 2006: 2).

He was 27 when he reached the *Costa da Pesqueria* [Fishery Coast], after having completed his studies and having taken four vows. Later on, he spent time in Vembar in 1639 and in Karur in 1640 to cultivate the caste of the *Paraiyans* (the low caste of drummers). Costa always offered to work among the lowest castes even though he faced many difficulties because of the effect the conversion of the lowest castes had on the conversion of the Brahman castes. To resolve this matter, in 1640, Manuel de Azevedo, Father Nobili, Manuel Martins, and Sebastião de Maya formally established a new mission in Madurai divided into two: *paṅṭāraswāmi* and *sanyassi*. The former was involved in the conversion of the lowest castes, the latter in the conversion of the highest castes. When Costa was in Karur he received his call to the Madurai Mission guided by the Italian Jesuit Roberto Nobili.

"The Provincial ... decided that he (Da Costa) should change his dress, i.e., his black cassock for the garb of a Paṅḍāram, which he did after getting his ears bored and putting on gilt earrings. He swathed his body in a loose yellowish tunic slightly darker than that of the Roman Sanyasi. A shawl was thrown round their shoulders, their long hair twisted into a knot on the top of the head which was protected from the fierce rays of the sun by a loose-fitting turban.... They wore sandals but were usually barefooted and carried a staff, a small bundle of spare clothing, and a water pot. Thus, was born the

Pandāraswāmi Mission which was otherwise called the Mission of the Yogis, 4<sup>th</sup> July 1640.” (Francis 1988: 322-323).<sup>3</sup>

In 1643 Costa joined F. Manuel Álvares so that in 1644 there were two Jesuit residences in Trichinopoly (Trichirapalli): one for *sanyassi* and one for *paṅṭāraswāmi* clearly separated so that one would not pollute the other. The situation and the political context in which the missionaries worked is described in Chakravarti (2014: 139):

“The Malabar province of the early seventeenth century was beset politically, economically and militarily by the Dutch, to whom the Portuguese temporal allies of the Jesuits were quickly losing ground, and riddled with controversy on the ecclesiastical front. On both coasts of southern India, the hegemony of the Jesuits was beginning to erode. In this landscape, the Madurai mission, in the shadow of burgeoning Nāyaka power, would prove an unlikely bright spot.”

Therefore, Costa was immersed in the *Nāyaka*<sup>4</sup> politics and ideology which greatly differed from the reality of Madurai as understood by Nobili. In particular, *Nāyaka* ideology was opposed to Nobili’s *accommodatio* based on Brahminical norms of purity, since the *Nāyaka* ideology of kinship and hierarchy was based on their proud identity as *Śudara* kings with deep links to trade and commerce. In this perspective, the Brahmins were unequivocally considered as servants of the king rather than the highest ones in accordance with the ideology of *dharmic* norms (Chakravarti 2014: 143–144). This feature implied that Costa, even though he conformed to Nobili’s *imitatio* and *accommodatio* by dressing

---

<sup>3</sup> This mimesis in clothes and lifestyle, also testified by Costa in a drawing of Nobili he reproduced in the translation of his Catechism mentioned above, also passed throughout the local languages.

<sup>4</sup> “For more than a century since the beginning of the thirteenth, south India had been divided politically into four states fighting each other [...] The establishment of Vijayanagar state changed this situation, consolidating almost the whole area south of the Tungabhadra River into one state for about three centuries from the middle of the fourteenth century” (Karashima 2014: 188).

The whole reign was divided into *Nāyakas*. During the sixteenth century, the three big *Nāyakas* of Senji (Gingee), Tanjavour, and Madurai, in the South, in the Tamil region, were almost independent after separating from the Vijayanagar empire when its rule ended in the middle of the seventeenth century.

like a *pañṭāraswāmi*, had to shape himself in a way which could be acceptable to the *Nāyaka* system as well as the European.<sup>5</sup> The efforts that Costa made in order to obtain benefits and to secure the missionaries from the Indians, as well as the difficulties that missionaries faced with the local authorities, are described in a letter sent by his colleague Antão De Proença (1625-1666) from Tiruchirappalli to the R. P. Govin Nickel, General of the Company of Jesus, in 1659 (Bertrand 1850: 56-57). Therefore, Costa had to manage to achieve the sympathy of the local authorities without compromising his activity before European eyes. Costa used to change his *pañṭāraswāmi* dress for the black cassock of the foreign priest when, and if, he needed to reach Madurai because the low caste *Pañṭāram* were not regarded in a favourable light, the *Nāyaka* being against the aforementioned hierarchization of society based on *dharmic* norms rather than on their proud origin of *Śudara* kings linked to merchant activities. As Chakravarti (2014) states, in Costa's Annual report dated 14.10.1646 (cited in Arumairaj 1988: 34), he gave a description of the traditional Indian classificatory system showing strong criticism of the first caste, the Brahmin, who sprang forth from the breast of Brahma and his sympathy toward the second caste, the core of the *Nāyaka* society: the trading castes. Subsequently, the *Komatīs* or *Cettīs* of the third caste, who emerged from Brahma's thighs, and the *Śudaras* from his feet. These were the castes among which Costa worked and that he baptized: *Chettīs*, *Vadugaru*, *Vellālas* as well as *Parias* and *Paien* (Francis 1988: 324). From the same report it is clear how much effort Costa made to understand and to describe these castes, even offering a description of the *Kottai Vellālas* women.<sup>6</sup> He also points out how many troubles he experienced during his time in India, having been imprisoned three times in Sathyamangalam, Tanjore, and in Trichinopoly respectively.

---

<sup>5</sup> For further discussion about the *Nāyaka* system see Karashima (2014: 194-198; 224-229). For a detailed analysis of Costa's mimesis consisting in a complex interplay between imitatio and accommodatio with the aim of being eligible to both *Nāyaka* and Europeans, see Chakravarti (2014) and Chakravarti (2018, 6<sup>th</sup> chapter).

<sup>6</sup> "They should not rear fowls or pigs lest when calling them their voice be heard by outsiders. Nor can they have fruit trees in their gardens for their hands might be seen when they raise them to pluck the fruit." (Arumairaj 1988: 34).

Consequently, letters and annual reports become precious sources not only for understanding the missionary activities and the perception missionaries had of Indian customs and society, but they are also important documents providing insight into political, sociological, and ethnographical information about South India in the 17<sup>th</sup> century. One of the many places where these documents can be found today is the Historical Archive of the Society of Jesus in Rome (henceforth HARSI) and the old Jesuit Archive in Shembaganur, Tamil Nadu (see *below* for the complete list). I had the chance to consult the annual reports from HARSI with no problems while I faced some difficulty accessing those in Shembaganur. However as far as I could glean from these documents, none, apart the catalogues found in HARSI, Goa 29, mentioned the work that Costa carried out in terms of producing a dictionary or grammar of the Tamil language.

For example, in the letter sent to the Fathers in Coimbra and Evora college (from Tanjaour, in 1653) reproduced in Bertrand (1850: 1–40), Costa informs them of all the difficulties missionaries faced in their mission and gives information about the Indo-Christians who were involved in the proselytizing process. Such assistants were highly sought after by the missionaries and Costa referred to them many times in his letters (Francis 1988: 325). This is probably the reason why Costa was one of the first missionaries to instruct Indians converted to the Christian religion as catechists. He gives notice in the letters sent between 1643 and 1648<sup>7</sup> where he mentions *Savéri-Ràyen/Pierre-Xavier*, *Yèsoupathen/Amator*, *Xavier*, *Dairiam/Constant*, *Yésou-Adien/Serviteur de Jésus*, *Hilaire*, *Maria Dessi*, *Gaudence*.<sup>8</sup> The most prominent

---

<sup>7</sup> The letters are listed at the end of this paragraph. In the letter dated 1648, Costa not only mentions the Nayras caste to which a woman from Cananor belonged, but also about the expedition that Nobili made to Jaffnapatão (Sri Lanka).

<sup>8</sup> The transliteration of these catechists' names follows Bertrand (1848 and 1850) being the main source consulted. However, some of these names are also reported in Neill (1984: 301-302) and Chakravarti (2014). Hence they are written like *Savarirayan* (*Peter Xavier*), *Dairiam*, *Jesupattan/Amator*, *Xavier* a Vellāla; *Vesuadiyan* one of the first Christians from Tiruchiarapalli. The one *paṅṭāram* is the faithful *Muttiudaiaya* who was the first Paraiyan baptized by Nobili. In the latter as follows: *Savery Rayan* for *Peter Xavier*, *Constatine* “with a particular trade in music who had been a yogi before his conversion”; *Glorioso* “a former paṅṭāram”. According to Chakravarti

catechists who helped Costa in the evangelisation of the Kingdom of Tanjore and of the province of Sathyamangalam were the high caste *Mouttioudeian* (known as Hilaire) in the church of Candalour and the *Paria's* Catechists *Maria-Dassi* and *Aroulanda* (known as Jean) who gave their service to the Gospel without a salary. Some of them, like *Maria-Dassi* were poets who composed remarkable works, such as *la vie du Saint roi Josaphat* or *la vie de Sainte Marguerite* (Bertrand 1850: 9). Missionaries were helped by Christianised Indians not only in the daily services but also in the production of their missionary tools (dictionaries, translations, and grammars). With this precious assistance, they could overcome the difficulties related to the language. These Indians were trained in missionary schools like the one run by Costa, attended by some *Paria* boys and a few of the other castes and to which he refers in his letter dated 16th October 1642 (Francis 1988: 326). However, as Neill (1984: 302-303) stresses, often it was clear that the Indians who helped the missionaries had undergone “no formal process of training. They seem to have been selected on the basis of tried devotion and of the respect in which they were held by their fellow Christians”. Furthermore, even though “one of the advantages of employing the “native” catechists in the Christianization of Asia was the issue of linguistic ability and translation” as Županov (2006: 7) underlines “the topazes and interpreters were, early on, considered as untrustworthy, and the learning of Asian languages became imperative for those who specialised in frontier missionary fields.” So, missionaries like Costa applied themselves to the study of the local language and to the redaction of linguistic tools which could also be useful to other missionaries.

As stated above, Costa belonged to and worked for the Mission of Madurai for twenty-seven years. However, as André Freire, missionary in Madurai, informs us, his regular residence was in Candelour until 1666 even though he had been assigned to the district of Tiruchirappalli. From there he travelled to the other residences of Tamil Nadu such as the Brahmin father's residence of Sathyamangalam – a place also mentioned

---

(2014: 152) Costa joyfully reported about the conversion of two hundred members of the Veļļāla caste in Sathyamangalam, through the intercession of a lowly Paraiyan.

in A. De Proença's dictionary (see *below*) or Touttiam, where his colleague Proença stayed and Costa arrived to offer his help at the time of Proença's death from illness, in December 1666.<sup>9</sup> From another letter written by the same father, dated 1676 and composed in Colei (Bertrand 1850: 247), A. Freire says that Costa left his apostolic work in order to carry out the printing of Nobili's work in Ambalacat, the same place where both his grammar and Proença's dictionary also seem to have been printed (James 2000). This task lasted one year. Freire not only wrote about Proença's death (see Muru 2010: 59-60) but also about Costa's death in a letter dated 1673. However, as Bertrand (1850: 247) states "cette letter de 1673 ne nous est point parvenue [...] il paraît qu'elles se perdirent au milieu des troubles et des ravages occasionnés sur les côtes de l'Inde par la guerre entre les Portugais et les Hollandais" [this 1673 letter has not reached us [...] it seems that it was lost in the midst of the disturbances and devastation caused on the coasts of India by the war between the Portuguese and the Dutch]. Bertrand goes on to say that the only thing which is certain is that Father Baltasar da Costa was named as Provincial of Malabar from 1667 to 1670 when he was elected as Procurator of the province of Rome in 1670. Once he ended his mission in Rome, he left Portugal again in 1673, heading to India with a reinforcement of six missionaries including Jean de Britto in 1673. However, Costa never returned to India because he died on the Coast of Guinea during the trip on the 21<sup>st</sup> of April 1673<sup>10</sup> after 30 years devoted to the Madurai mission (Bertrand 1850: 414).<sup>11</sup> "A violent epidemic fever broke out and da Costa himself was one of the victims. Britto, whose own health had been so frail as to make it uncertain whether he could be accepted as a missionary, somehow survived, and arrived in Goa in September 1673, considerably worn by the labours which he had endured on the voyage as medical attendant and spiritual healer" (Neill 1984: 305).

---

<sup>9</sup> Letter of A. Freire to R. P. Paul Oliva, from Candelour, in 1666 reproduced in Bertrand (1850: 201-246). Also found in HARSI, Goa 54, ff. 325r-352v.

<sup>10</sup> Rajamanickam (1972: 270) states that his death occurred on 11<sup>th</sup> April 1673.

<sup>11</sup> This information is also found in DHCI (2001: 975); HARSI, Goa 24, 29, 31; Streit (1929: 987, 1022); Streit and Dindinger (1965: 155); Besse (1914); Correia-Afonso (1997: 164-168).

***(a) List of letters and Annual report composed by Baltasar Da Costa***

1. Letter mentioned in Backer and Backer (1861: 101) and found translated into French in Bertrand's *La mission du Maduré, Paris, 1847-54*:

- Letter sent to the Provincial Father from Tirouchirapalli in 1643 [Bertrand 1848, T. II, p. 317-340];
- Letter sent to the R. F. Caraffa, General of the Company of Jesus, from Tirouchirapalli in 1644 [Bertrand 1848, T. II, p. 340-365];
- Letter sent to the R. F. Caraffa, General of the Company of Jesus, from Cochin in 1648 [Bertrand 1848, T. II, p. 365-393; also, in HARSI see *below*];
- Letter sent to the PP. et FF. of the College of Coimbra and Evora from Tanjore in 1652 [Bertrand 1850, T. III, p. 1-41].

2. Letter mentioned in Chakravarti (2014):

- Baltasar da Costa, August 1640, Doc. 420, Jesuit Madurai Mission Archives, Shembaganur.
- Baltasar da Costa, 1644, "Relazione del successo nella Missione de Maduré delli 8 di Iuglio 1643 insino a 29 d'outobre de 1644", Doc. 430, Jesuit Madurai Mission Archives, Shembaganur.
- Baltasar da Costa, 14<sup>th</sup> October 1646, "Relação Anua da Missão de Maduré desde Outubro de 644 até o de 646", Doc. 432, Jesuit Madurai Mission Archives, Shembaganur.
- Baltasar da Costa, 9<sup>th</sup> September 1653, "Anua da missam de Madurê", Doc. 446, Jesuit Madurai Mission Archives, Shembaganur.
- Baltasar da Costa, July 14<sup>th</sup> 1672, "Do que os Olandeses tem feito na India...", 50-V-37, fl. 365, Biblioteca da Ajuda, Lisbon.

- Baltasar da Costa, September 7<sup>th</sup> 1672, carta original do Jesuíta Balthazar da Costa..., Armário Jesuítico, maço 29, Doc. 14, ANTT, Lisbon.<sup>12</sup>
- Letter sent to Vitelleschi, from Trichy in 08.07.1643 [S.No. 425; doc. No. II-35].

### 3. Letters found and consulted at HARSI and Shembaganur Archive:

- Letter sent to the R. F. Caraffa, General of the Company of Jesus, from Cochin in 28.11.1648 [HARSI, Goa 56, ff. 536r-542v, 1<sup>o</sup> via; corresponding to Doc. 434 in Shembaganur Archive (O.C. II-43, N.C. Goa)];
- Letter sent to Nickel Goswino, from Cochin on 22.12.1655 [corresponding to Doc. 462 in Shembaganur Archive (O.C. VIII-61, N.C. Goa)]

## 1.2 Manuscript copies of Costa's *Arte*

The following subparagraphs aim to present the five manuscript copies of Costa's grammar located up until now in India and in Europe. Whenever possible, they also provide information about the library as well as the collection they are part of. They also provide some information about the network by which these manuscripts entered each specific collection. This information about the history of the manuscripts, not being one of the main scopes of this book, is not exhaustive but accurate enough to be useful in enabling other scholars to achieve the task of rebuilding the exact trajectory that each of these manuscript copies followed.

### 1.2.1 The Goan Manuscripts

The *Krishnadas Shama* Goa State Central Library in India holds the highest number of Costa's *Arte* manuscripts. This library is the oldest public library in India founded through the initiative of the Vice Roy Dom Manuel de Portugal e Castro who ordered its creation as *Pública Livraria* in 1832, with the purpose of serving the Goan Military

---

<sup>12</sup> This document is available online: <https://digitarq.arquivos.pt/details?id=4374909>.

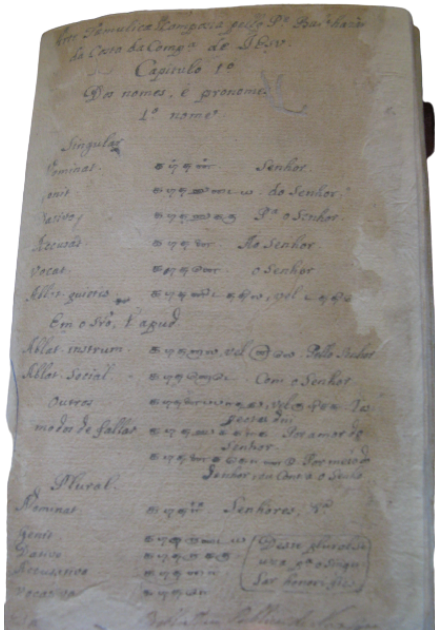

Academy, founded in 1817, to which it was originally annexed.<sup>13</sup> However, in 1836 it was renamed as *Public Library (Bibliotheca Pública)* and enriched with the deposit of manuscripts coming from the earliest libraries of the different religious orders like the College of St. Paul, the College of Rachol or the College of Holy Faith, as well as from the convents of the Old Goa religious orders which were all suppressed in 1834. As Ataíde Lobo (2011: 5) underlines, from this moment onwards, the library acquired a conservation function that was reinforced after 1841, when a new reform separated the library of the Military Academy from the Public Library. Furthermore, its collection increased with the annual income allocated from 1870 onwards for new acquisitions when the library was also renamed *Bibliotheca Publica da Nova Goa*. On February 15<sup>th</sup> 1897, the status of the library was raised to that of a National Library, and it was renamed as *Biblioteca Nacional de Nova Goa* (Rodrigues 1999: 478). During this time and before it was annexed to the academic and cultural institution Vasco da Gama – being redesignated as *Biblioteca Nacional Vasco Da Gama* – the library had two important curators who contributed a great deal to its collections: Ismael Garcia (1857-1919) and Octavianoo Guilherme Ferreira (1870-1954). The latter also published a catalogue of the library which was revised and updated until 1912. In this catalogue, entitled *Catalogo dos Livros, Opusculos e Manuscriptos pertencentes á Bibliotheca Nacional de Nova Goa (India portuguesa)* [Catalogue of Books, Opuscles, and Manuscripts belonging to the National Library of New Goa – Portuguese India, henceforth *Catalogue* (1907)], published for the first time in 1907, an evidence can be found of Costa's manuscripts as well as other works relevant to this study, suggesting that the manuscripts were all 'stamped'<sup>14</sup> with the label of *Bibliotheca Publica da Nova Goa* from 1836 onwards, while they must have entered the library through the acquisition of convent libraries deriving from the dissolution of the religious orders in

---

<sup>13</sup> The main sources for the history of this library are the Central library webpage, Ataíde Lobo (2011) and Rodrigues (1999).

<sup>14</sup> Even though manuscripts in the Goa library are not stamped at all but rather the fact of belonging to one library or another is marked by a handwritten label usually written on the first page of the manuscript, i.e., image in correspondence of letter A, I will use the word 'stamp/stamped' for the Goa manuscripts too.

1834. However, as Ferreira writes in the introduction (1907: 3-6), this *Catalogue* is to be considered no more than a short summary of the papers, works and books, some in better condition than others, rather than a detailed catalogue of what belonged to the Library.<sup>15</sup> Therefore, the descriptions provided do not specify detailed information about the manuscripts but they are still useful for identifying what was included in the Library at that time and how it was identified. Below is the list of manuscripts that are relevant for this study in the same order in which they appear in the *Catalogue* (1907) and I have assigned a letter to each one:

[courtesy of Krishnadas Shama Goa State Central Library]

**A. “Costa (Pe. Baltasar da) – Arte tamulico-lusitana. 1731, 1 vol. Ms” (1907: 56).**

Further details are given at the end of the *Catalogue* (1907) in the section *Manuscripts*, this document is described as follows:

“Arte tamulica-lusitana – composta pelo padre Balthazar da Costa, da Companhia de Jesus – 1731 – 1 vol. Em 8º de 49 paginas, faltando as 2 primeiras (o

frontespicio e o proemio). Avariado. A pagina 49 vem uma nota declarando pertencer ao padre Fr. Antonio das Chagas – Segue, desde a pagina 51 em diante: Cathecismo de doutrina christãã, escripto em tamul (provavelmente pelo dito padre Balthazar) e que vae até á pagina 87, faltando o fim. Authographo em portuguez e tamul – Letra do seculo” (1907: 245).<sup>16</sup>

<sup>15</sup> “Apenas uma breve resenha de peças, folhetos e livros, uns em bom estado e outros bastante velhos e avariados” (*Catalogue* 1907: 4).

<sup>16</sup> Tamil-Portuguese *Arte* – composed by Father Balthazar da Costa, from the Society of Jesus – 1731 – 1<sup>st</sup> vol. In octavo pages, 49 pages, the first 2 pages are missing (the title page and the

[courtesy of *Krishnadas Shama* Goa State Central Library]

**B. “Noronha (Padre Paulo Francisco de). – Grammatica inédita da língua tamul. Que á exposição industrial de Goa de 1890 envia Antonio Augusto Maria João de Gouveia e Noronha. 1 vol. Ms.” (1907: 152).<sup>17</sup>**

Further details are given in the final section *Manuscripts*:

“pelo Padre Francisco de Noronha, missionario que foi em Madrasta no ultimo quartel do seculo XVIII – 1 vo. Em 4º de 72 paginas, além de uma de appendice – Não está em mau estado. Escripita em portuguez e tamul – Caligraphia do seculo 18, regular e legivel – Offerecida á Exposição Industrial de Goa, de 1890, por Antonio Augusto Maria João de Gouveia e Noronha, natural de Ucassaim e sobrinho do auctor e enviado pelo governo a esta bibliotheca” (1907: 255).<sup>18</sup>

---

preface). Damaged. On page 49 there is a note declaring that it belonged to Fr. Antonio das Chagas – From page 51 onwards: Catechism of Christian doctrine, written in Tamil (probably by the aforementioned Father Balthazar) until page 87, the end is missing. It is an autograph in Portuguese and Tamil – Writing of the century, translation mine.

<sup>17</sup> The second Jesuit manuscript about the Tamil language mentioned in the *Catalogue* (1907: 249) is *Dictionarium Tamulico-Lusitanum (Vulgaris Tamulicæ linguæ) [...] Auctore P. Constantio Josepho Beschio, Societatis Jesu missionario A.D. MDCCXLIV* which I have not included in the above list for its lack of relevance to my discourse. In the list available before 2007 (cf. *infra*) this was catalogued as MS 12, while in 2016 it had become MS 13.

<sup>18</sup> By Father Francisco de Noronha, a missionary who was in Madras in the last quarter of the 18<sup>th</sup> century – Quartos. On 72 quarto, plus an appendix – Legible condition. Written in Portuguese and Tamul – Handwriting from the 18<sup>th</sup> century, regular and legible – Offered to the Industrial Exhibition of Goa in 1890 by Antonio Augusto Maria João de Gouveia e Noronha, born in Ucassaim and nephew of the author and sent by the government to this Library, translation mine.

Apart from another manuscript grammar of the Tamil language which seems to have disappeared,<sup>19</sup> one only finds bilingual dictionaries to some of which a grammar may be attached. The documents consisting of four Portuguese-Tamil dictionaries and three Tamil-Portuguese dictionaries are listed below:

**C. Vocabulario lusitano-tamulico**  
 acabado de escrever aos 19 de setembro de 1738 por Balthazar Esteves da Cruz indigno moço de muito rev(erend)o Sr. Padre Manoel de Jesus irmão aquem Deus Guarde muitos e felizes annos – segundo uma nota que se lê na ultima pagina do livro, onde consta igualmente ter elle pertencido a Fr. Francisco do Carmo – Começa pelo Vocabulo “A” primeira letra e acaba pelo vocabulo “Zuzir” – 1 vol. sem numeração escripto em boa caligraphia. Avariado (1907: 264).<sup>20</sup>

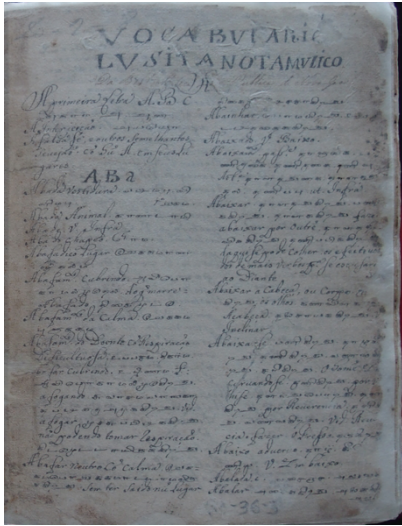

[courtesy of Krishnadas Shama Goa State Central Library]

<sup>19</sup> The following Jesuit manuscript about the Tamil language mentioned in the *Catalogue* (1907) is *Grammatica latino tamulica (A.M.D.G.) – ubi de vulgari tamulicæ linguæ idiomate dicto ad usum missionariorum societ. Jesu auctore P. Constancio Josepho Beschio ejusdem societ. In regno mandurensi missionario – A.D. 1728* – Escrita em Tranquebar, em latin – com vocabulos em tamul; e aprovado pelo bispo de Meliapur José, em 2 de novembro de 1737 – 1 vol. em 4º com 260 paginas, além de 4 do frontispicio e aprovações e 3 do indice. Crivado – Parece authographo (1907: 255-256) [Written in Tranquebar, in Latin – with words in Tamil; it was approved by the bishop of Meliapur José, on November 2<sup>nd</sup>, 1737 – 1 vol. in 260 quarto pages, in addition to 4 from the frontispiece and approvals and 3 from the index. Screened – It seems to be an autograph manuscript, translation mine].

I assume that it disappeared since it is not mentioned in later lists, and I was not able to trace it when I visited the library both in 2007 and in 2016.

<sup>20</sup> As specified in a note which can be read on the last page of the manuscript, it was written on September 19<sup>th</sup> 1738 by Balthazar Esteves da Cruz, a worthy young man of the much Reverend Father Manoel de Jesus. May God bless him with many happy years. In the same note it is also mentioned that the book belonged to Father Francisco do Carmo – It begins with the word “A” first letter and ends with the word “Zuzir” – 1 vol., not foliated, written in good handwriting. Damaged. Translation mine.

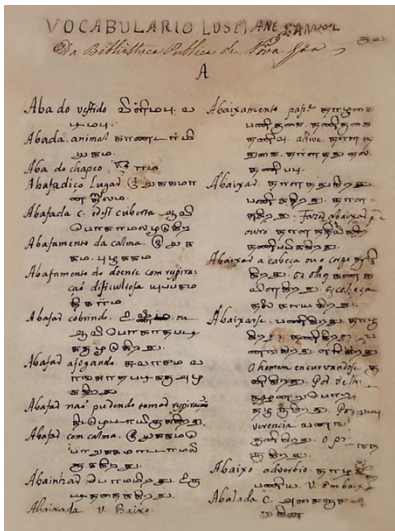

Balthazar Esteves also copied another dictionary, a Tamil-Portuguese one which is to be found in Shembaganur Archive, India. It is dated 1733 and its catalogue number was MS 222/2 in 2007. This seems to be a copy of Proença’s dictionary two more copies of which are in the National Library of France (MS Ind. 221 and MS Ind. 222).

### D. Vocabulario lusitano-tamulico

escrito em português e tamul – caligrafia do século 17, regular e legível – Começa pelo vocábulo “A” primeira letra e acaba pelo vocábulo “Zurzir”. A pagina 206 e a ultima apagadas. – 1 vol. Em 4º, corrupto e crivado (1907: 264).<sup>21</sup>

[courtesy of Krishnadas Shama Goa State Central Library]

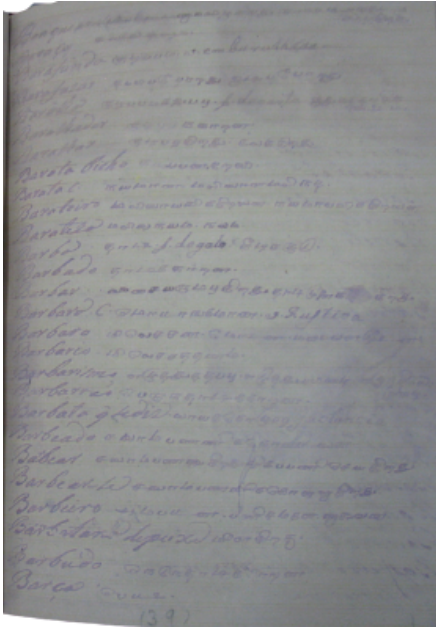

### E. Vocabulario lusitano-tamulico

escrito em português e tamul – Começa pelo vocábulo “Aba do Vestido” e acaba pela palavra “Zurzir” – Ingora-se o auctor, lugar e época de composição – Caligraphia do seculo 17, regular e legível. Parece ter pertencido a Fr. Gaspar de Santa Izabel. Provisor do bispado de São Thomé – 1 vol. em 4º, sem numeração corrupto e crivado (1907: 264).<sup>22</sup>

[courtesy of Krishnadas Shama Goa State Central Library]

<sup>21</sup> It is written in Portuguese and Tamil – 17<sup>th</sup> century calligraphy, regular and legible – It starts with the word “A” first letter and ends with the word “Zurzir”. 206 pages in total, the last one is deleted. – 1 vol. In quartos without foliation, riddled [by worms] and corrupted. Translation mine.

<sup>22</sup> It is written in Portuguese and Tamil – It starts with the word “Aba do Vestido” and ends with the word “Zurzir” – Unknown author, place and period of composition – Writing of the 17<sup>th</sup> century, regular and legible. It seems to have belonged to Father Gaspar de Santa Izabel, Provisor of the Bishop of São Thomé – 1 vol. in quartos, without foliation, riddled [by worms] and corrupted. Translation mine.

## F. Vocabulario lusitano-tamulico

escrito em portuguez e tamul seguido d'uma arte tamulica – Ignora-ce o auctor, logar e época de composição. Suppõe-se escrito pelo padre Henrique Henriques<sup>23</sup> chamado o Apostolo do Comorim e companheiro de S. Francisco Xavier cujas obras se encontram mencionadas na *Bibliotheca Lusitana* de Barbosa Machado – (Cunha Rivara Ensaio hist. Da lingua Concani – pagina 21). Falta o frontispicio; tem as primeiras paginas gastas e corruptas. Começa pelo vocabulo “aba da animal” e termina pelo vocabulo “Zurzir” – 1 vol. em 4° de 340 paginas crivadas – Tinta amarellada e quasi apagada em alguns logares (1907: 264).<sup>24</sup>

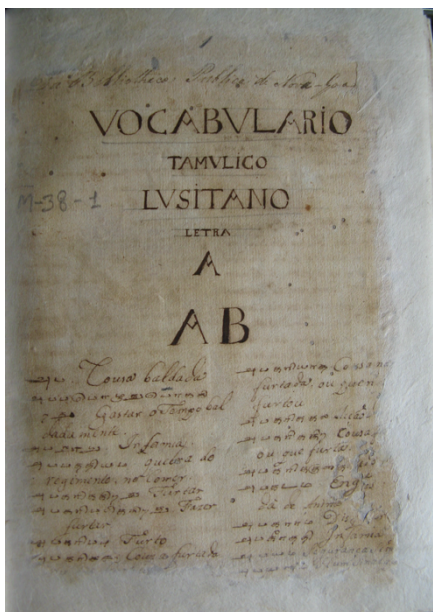

[courtesy of Krishnadas Shama Goa State Central Library]

---

<sup>23</sup> This is not possible for two reasons: because Henriques lived in the 16<sup>th</sup> century and the Portuguese writing conventions in this manuscript are not older than the 17<sup>th</sup> century; secondly an autograph manuscript by Henriques is available in Lisbon National Library and if compared to this text, it is evident that this is not Henrique's text. Another attempt of identification was made in 1995 by Xavier Raj who attributed this manuscript to Costa. See *below* for this discussion.

<sup>24</sup> It is written in Portuguese and Tamil and followed by a Tamil *Arte* – Unknown author, place and period of composition. It is supposedly written by Father Henrique Henriques, named the Apostle of Comorim and companion of St. Francis Xavier. His works are mentioned in the *Bibliotheca Lusitana* by Barbosa Machado – (Cunha Rivara Hist. Essay on the Concani Language – page 21). The title page is missing; the front pages are damaged and corrupted. It starts with the word “aba do animal” and ends with the word “Zurzir” – 1 vol. in 340 quarto pages riddled [by worm] - Yellowish ink and almost erased in some places. Translation mine.

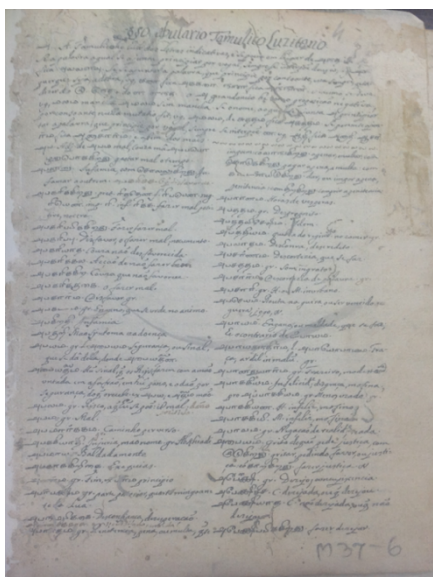

The reference to Machado is to his Volume II of *Bibliotheca Lusitana* (1747: 449-450).

### G.Vocabulario tamulico-lusitano

Ingora se o auctor, logar e época de composição. Escripto em tamul e portuguez – caligraphia do seculo 18 – 1 vol. em 4º de 240 paginas avariadas. Começa pela letra “A” e acaba na letra “X” – parece faltar a conclusão (1907: 264).<sup>25</sup>

[courtesy of *Krishnadas Shama* Goa State Central Library]

### H.Vocabulario tamulico-lusitano

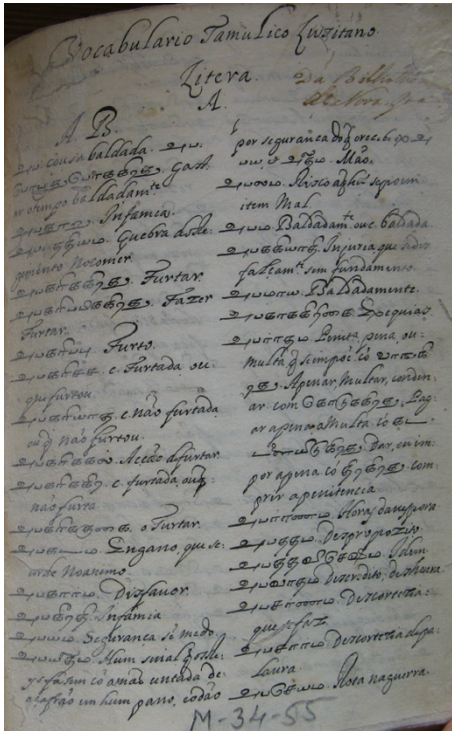

(ad M.D.G.) para uso dos missionarios da companhia de Jesus. Composto e augmentado pelo padre Domingos Madeyra da mesma companhia, missionario da missao de Madurey [...] (1907: 265).<sup>26</sup>

[courtesy of *Krishnadas Shama* Goa State Central Library]

<sup>25</sup> Unknown author, place and period of composition. Written in Tamil and Portuguese – writing from the 18<sup>th</sup> century– 1 vol. in 240 damaged quarto, pages. It starts with the letter "A" and ends with the letter "X" - the conclusion seems to be missing. Translation mine.

<sup>26</sup> Tamil-Portuguese Dictionary for use by missionaries of the company of Jesus. Composed and augmented by Father Domingos Madeyra of the same company, missionary of the Madurey mission. Translation mine.

**I. Vocabulario tamulico-lusitano** precedido d'uma arte abreviada em tamul e seguido de termos poeticos [...] Caligraphia do seculo 17 (1907: 265).<sup>27</sup>

[courtesy of Krishnadas Shama Goa State Central Library]

Much later than 1907, but before 2007, the library composed a list of the above items assigning them a catalogue number according to their order of appearance in the original *Catalogue* (1907). When I visited the library for the first time in 2007, even though most of the manuscripts in the above-mentioned list had maintained the same number, some of them had changed. However, the greatest change occurred when the library moved from the centre of Panjim to the current new building. The table below summarises and provides the correspondence between the original *Catalogue* manuscripts and the number assigned to the same documents over the years.

<sup>27</sup> Tamil-Portuguese Dictionary preceded by an abbreviated *Arte in Tamul* and followed by poetical terms [...] 17<sup>th</sup> century writing. Translation mine.

**Chart 1 - References to Costa's manuscript in Goa library over the years**

The first copy of Costa's *Arte* in Chart 1 corresponds to letter A. It was originally described in the *Catalogue* (1907) as an autograph (by Costa?), as being written/copied in 1731, as being composed in the "letras do seculo", and as being a manuscript belonging to Fr. Antonio das Chagas.<sup>34</sup> It is 17.5 cm high x 11.5 cm wide x 1.7 cm thick (18.5 cm x 12 cm x 2.3 cm with cover). It is a composite manuscript, including various texts written by the same hand in black ink and on brown paper:

<sup>28</sup> Number of order 7574 ("numero de ordem 7574" in Xavier Raj 1995: 63).

<sup>29</sup> Number of order 7573 ("numero de ordem 7573" in Xavier Raj 1995: 63).

<sup>30</sup> Xavier Raj (1995: 63) writes: "Cote M/35 "Vocabulario portuguez-tamul et arte tamulica de Balthazar da Costa", 340 pages. Sous la cote M/49 il existe une autre copie de cette grammaire seule de da Costa." If this grammar, which was no longer legible when I visited the library in 2007, is Costa's *Arte* thus, the number of copies in existence today would be six, rather than five. However, unless the final grammar is restored this will not be possible.

<sup>31</sup> According to Xavier Raj (1995: 63) this manuscript seems to be anterior to MS 33.

<sup>32</sup> Number of order 7578 ("numero de ordem 7578" in Xavier Raj 1995: 63).

<sup>33</sup> Compared to the list I have, today one of the Vocabulario Lusitano-tamulico is missing from the online catalogue. One possibility is that the manuscript 35, later 51, has been removed from the list for its illegibility.

<sup>34</sup> See Machado (1759: 30).

- 1) *Arte Tamulica composta pello P(adre)e Balthazar da Costa da Comp(anhi)a de Jesus* (ff. M-49-1 to M-49-63, original foliation ff. 3r–34v) [*Arte* of Tamil language composed by the Father Baltasar da Costa of the Company of Jesus]. The *Arte* is followed by:
  - Titulo 3° Daõ-se algumas regras pera preteritos, futuros, Imperativos, Infinitivos, e Pluraes* (ff. M-49- 64 to M-49-76, original foliation ff. 34v-40v) [wWerein some rules are given for preterites, futures, Imperatives, Infinitives, and Plurals];
  - Titulo 4° Regras de ortographia* (ff. M-49-76 to M-49-81, original foliation 40v-43r) [Spelling rules];
  - Titulo 5° Da collocação das letras Tamues pella ordem do nosso alfabeto* (ff. M-49-81 to M-49-89, original foliation ff.43r-47r) [Collocation of the Tamil letters following the order of our Alphabet];
  - Titulo 6° De alguns sinaes que neste vocabulário se observaõ* (ff. M-49-89 to M-49-91, original foliation ff. 47r-48r) [About some signs that are used in this dictionary];
- 2) Tamil letters (M-49-91 to M-49-93, original foliation ff. 48r-49r);
- 3) three unnumbered blank folios (ff. 49v- 50v);
- 4) *Doctrina Christaã* (M-49-94 to M-49-100, original foliation ff. 51r – 54r) [Christian Doctrine];
- 5) சின்ன உபதேசம் (M-49-100 to M-49-109, original foliation ff. 54r to 58v) [Small Sermon];
- 6) *Confessionario Tamulico. Dialogo entre o Confessor e o Penitente* (M-49-110 to M-49-169, original foliation ff. 59r to 88v) [Tamil Confession. Dialogue between the Confessor and the Penitent].

There is an original foliation on the upper right-hand side of each folio with a total of 88 folios. Then, as with the other manuscripts described below there is a later numeration written in pencil at the bottom of the page revealing the old catalogue number for a total of 167 pages followed by 2 blank pages. The sections following the *Arte* reveal that the grammar was attached to a dictionary and preceded by a first *Titulo*. On f. 49 r, in the last page of the *Arte*, there is a note, written in a brownish rather than black ink, mentioned in the *Catalogue* (1907): *Lettra e Arte Tamulica Luzitana per[tenceu ao] Pe. Fr. An.to. das Chagas* [Alphabet and Tamil-Portuguese *Arte*, belonging to Father Fr. (Antonio) das Chagas].

As already mentioned in footnote 23, Xavier Raj (1995: 63) attributed another manuscript from the same library to Costa which would make the number of Costa's copies six if counted: a Portuguese-Tamil Vocabulary identified as MS 35 (hence corresponding to the letter F in the Chart 1 and later to MS 51)<sup>35</sup> that was also printed in Ambalacat in 1680 – even though no copies of it seem to have survived (James 2000: 96). According to Xavier Raj (1995), at the end of this dictionary there was also a grammar. However, when I visited the library for the first time in 2007, I observed that this old manuscript of ca. 385 pages and written by the same hand, not only had the title of *Vocabulario Tamulico-Lusitano Precedido d'una Arte Abreviada em Tamul e Seguido de Termos poeticos* on its protective leaf [Tamil-Portuguese dictionary preceded by a short Tamil *Arte* and followed by poetical terms]<sup>36</sup> – rather than the other way round – but was also illegible and very damaged. Very few pages of the dictionary were still legible but the final grammar, if that is what it was, had completely disappeared. Despite this, I was able to compare its handwriting with Costa's handwriting available in the document preserved at HARSI (Lusitania 6, ff. 140-141) as well as in an autograph letter kept at the *Arquivo Nacional Torre do Tombo* (see footnote 12) and I can confirm almost certainly that it cannot be Costa's autograph as the following figure 1 highlights.<sup>37</sup>

---

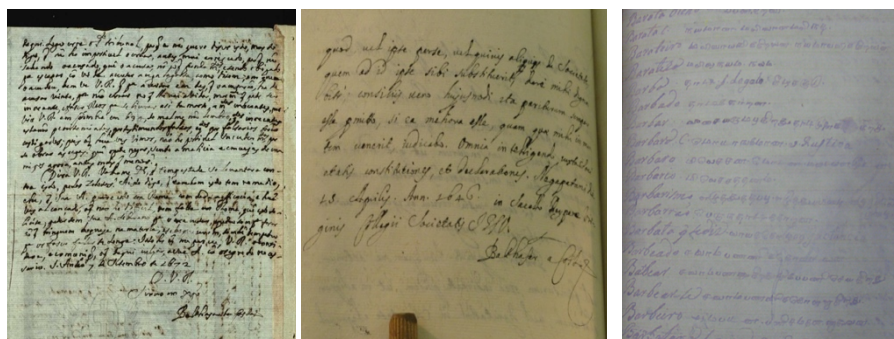

<sup>35</sup> The manuscript measures are: 19,5 cm high x 14,7 cm wide x 3,6 cm thick (the measure with the cover: 20,2 cm high x 15,4 cm wide x 4,3 thick).

<sup>36</sup> The same title is also found on the protective leaf of what was MS I in the *Catalogue* (1907) and later became MS 50 (ex MS 34).

<sup>37</sup> A possibility which needs to be further investigated by a specialist paleographer is that the hand that wrote MS 51 (ex MS 35) resembles the hand that copied, later than the 17<sup>th</sup> century, MS 47 (ex MS 42) or MS 53 (ex MS 36). The former resembles it in the Portuguese writing, the latter for the Tamil transcription as shown by letters *ḍ*, *ḡ*, *ḥ*. Furthermore, the fluent Tamil writing and the mistakes in the Portuguese forms seem to suggest that the person who copied MS 51 was Indian rather than Portuguese. However, the quality of MS 35 (now MS 51) does not allow us to reach a definitive conclusion and what is more scribes used a similar writing style, and it is very difficult to differentiate between two hands. Maybe a specialist in palaeography could achieve a better result even given the poor quality of the manuscript.

**Fig. 1 – Costa’s handwriting (a, b) compared to MS 51 (ex MS 35) (c)**

**a. Armário Jesuítico, maço 29, b. HARSÍ, Lusitânia 6, f. 141 c. MS 51 (ex MS 35), Goa**  
**Doc. 14, ANTT**

Furthermore, palaeographic evidence such as the *periya R* of MS 51 (ex MS 35) suggest that this manuscript was written later than the 17<sup>th</sup> century by an Indian, rather than a Portuguese hand. Indeed, the Tamil writing is fluid while the Portuguese writing shows several mistakes and compared to the other manuscript, displays an unfamiliarity with the European writing system. Finally, this manuscript seems to be a reduced version of another Portuguese-Tamil dictionary, i.e., MS 49 (ex MS 36). This other Portuguese-Tamil dictionary is preceded by three folios on which a total of 12 entries are organized in semantic fields in light ink, while on the third page there is also a paragraph entitled *Dos nomes e pronomes* [Of nouns and pronouns] where the single noun *Senhor* கந்தன [Lord], transliterated as *Carten*, *Cartenorea*, *Cartenea*, *Cartener(ai)*, *carten*, is inflected for nominative, genitive, dative, accusative, vocative, and ablative (*quietis, instrumentalis, sociat*) cases. These few items are also found in Costa’s *Arte*. The dictionary begins on the fourth page. The second level paratext suggests that this manuscript, as well as the others, was stamped no earlier than 1870, when the library assumed the name of *Bibliotheca Publica de Nova Goa* (cf. *above*). If the hand that composed this manuscript resembles only partially the hand of MS 51 (ex MS 35) (see fn. 37), I am sure that it is the same that that also composed two further manuscripts. One of them is kept in the same library and it is the above-mentioned *Arte* by Costa [MS 66 (ex MS 49), letter A], the other is

are fluid and decisive, revealing a hand which was familiar with this writing system, the loops of letters such as ன or னா are small and regular, the letter ஞ is fluidly written. In contrast, the Tamil writing system of manuscripts composed by Western scribes presents certain features, particularly with reference to the letters already mentioned as well as for letters such as ல, ட, ட, ட, which are very peculiar and mostly found among Western missionaries.<sup>40</sup>

The discussion concerning Costa's handwriting brings us to another manuscript kept in the same library, MS 50, previously catalogued as MS 38 and then MS 34 which I considered in Muru (2010) as a good candidate as being Costa's autograph, an idea of which I remain firmly convinced especially after having seen Costa's letter from ANTT (cf. Fig. 1.a) despite the reflections that the comparison between Costa's manuscripts arose (see § 1.3). It is erroneously catalogued as *Vocabulario Lusitano Tamulico Escripto em Portuguez e Tamul Seguido d'uma Arte Tamulica Pelo Antaõ de Proença, SJ*. Indeed, at present this dictionary is a Tamil-Portuguese dictionary, it is not followed but rather preceded by a Tamil *Arte*. On the protective leaf of the manuscript, the title changes once again. It becomes *Vocabulario Tamulico Luzitano precedido de uma arte abreviada em tamul e seguido de termos poeticos* – even though the poetical terms are not really included, at least not in the manuscript version in existence today. Indeed, according to the *Introduction*, the whole original work also included “Finalm(ent)e pomos algu(m)as erudicoẽs, e fabulas p(er)a os curiosos e intertinimento dofastio, as quais historias tirei, ou do que li em livros gentilicos, ondo que vulgarmente anda no co(m)mu(n) do povo”<sup>41</sup> [So we include some erudite texts, for the curious and for the bored'. I took these stories from the *gentile's* [Indian's] books, otherwise they are stories that are well known among the common people]. In 2016 the dictionary was displayed, protected by

---

<sup>40</sup> In this perspective, I offered other examples in Muru (2019) and in the presentation *Lingua, testo e paratesto: analisi di un manoscritto bilingue tamil-portoghese* given at the XLIV SIG Annual Conference, Naples 24-26.10.2019. See also the *Appendix 4*.

<sup>41</sup> This section at f. M-34-9, along with a previous subdivision of the *Introduction* into six different parts (*titulus*) is only found in the manuscript version of Proença's dictionary but not in its printed version.

glass, in the main manuscript room of the renovated library, along with other manuscripts belonging to the same collection. The information given incorrectly informed the visitors to the reading room of the attribution of this document to Henrique Henriques despite my having informed them of the mistake and even though this attribution was originally assigned to MS 35 now MS 51 in the *Catalogue* (1907). However, it contains a copy of Costa's grammar along with the manuscript copy of the Tamil-Portuguese dictionary<sup>42</sup> composed by the Jesuit Antão de Proença (1625-1666)<sup>43</sup> and published in Ambalacat one year before Costa's *Dictionary* (cf. James 2000 above). James (1991, 2000, 2009), Chevillard (2021),<sup>44</sup> Malten (1997), and Thani Nayagan (1964, 1966) have studied Proença's dictionary in detail.

The manuscript is 20.5 cm high, 15.5 cm wide and 3.8 cm thick (with the cover board 21.8 cm high, 16 cm wide and 4.8 cm thick). When the manuscript was restored, three protective leaves were added at the beginning and at the end of the dictionary. The grammar is written occupying the whole page apart from a few folios, up to page M-34-16, and is mainly written in two columns as in the dictionary. It was copied by the same hand that also copied the dictionary. The title page is missing and some of the first pages are in the wrong order. While the dictionary has an original foliation on the upper right side of the manuscript, the grammar does not. However, not all the folios in the dictionary are numbered. Indeed, it seems that the pages were cut on their upper side so that some folio numbers have disappeared. Therefore, f. 1r has the title of the dictionary along with the information that the manuscript was stamped when the library became *Bibliotheca Publica de Nova Goa*; f. 1v is blank; f. 2r-v is found at the beginning of the manuscript, but this is probably due to a mistake during the restoration of the document, since it

---

<sup>42</sup> The full title of the dictionary is *Vocabulario Tamulico com a significaçam Portugueza composto pello P. Antam de Proença da Companhia de Iesu Missionario de Madurey*.

<sup>43</sup> Proença was born in Ramela in the diocese of Guarda. He took his vows when he was 19 years old in 1643. He arrived in India in 1647 and he spent his whole life working for the Madurai mission. He died on 14<sup>th</sup> December 1666 in Tuttiam (see Machado 1741: 182, Vol. I and Backer 1872: 2175, Vol. II).

<sup>44</sup> Chevillard has also produced a digitalized version of this dictionary.

should follow f. 10v (modern numeration M-34-18). The original foliation in the dictionary begins at page M-34-57 with f. 2r and continues up to f. 15r-v (M-34-84). Therefore, pages M-34-85 and M-34-86 do not have any numeration. It starts again on the next folio with number 16 up to f. 37r-v. Then, there is another folio without numeration (M-34-131 and M-34-132) and foliation starts again at f. 38r-v (M-34-133). This alternation is constant throughout the manuscript.

There are a few notes in different handwriting and ink (lighter ink), such as the one on page M-34-19 stating: *entre a letra e pospondo(lhe #) அபடுபா he em lugar do praterito (# do futuro)* [between the letter e and placing அபடுபா after it, in the place of the preterit (# the future)]. On each page, even though almost illegible, in the same ink and calligraphy of the notes on page M-34-19, there are instructions on the letters followed by the entries of the dictionary written in Portuguese rather than in Tamil. The manuscript counts 253 folios r–v, the dictionary occupies 227 folios r–v.

Like Costa's dictionary, Proença's work was also printed in Ambalacat, a year earlier in 1679. The only copy in existence today is kept at the Vatican Library in Rome and it is catalogued as Borgiano Indiano 12. Today it is available online at [https://digi.vatlib.it/view/MSS\\_Borg.ind.12](https://digi.vatlib.it/view/MSS_Borg.ind.12). Thani Nayagam made a photostatic copy of it in 1966. It is important to mention this because it contains the third manuscript of Costa's *Arte* which is also the second oldest. Indeed, it was copied in Verapoly in 1685 by the Discalced Carmelite Paulo Francisco (cf. § 1.2.2). Since I will discuss it in the next subparagraph, I will now move onto the last copy of Costa's *Arte* preserved in the same library in Goa, which is also the most recent copy.

The manuscript is catalogued today as MS 16 but used to be MS-M-15. This is also a composite manuscript of a total of 152 pages in which two different hands can be identified. The page is 20.6 cm high x 13.7 cm wide x 1.5 cm thick, and with the cover is 22 cm high x 13.5 cm wide x 2 cm thick. The two main parts composing the manuscript also differ in the

paper used and in the ink. The first part is in black ink and is only a few pages long. It contains the title page (barely legible, ff. M-15-1 to M-15-2) and two prefatory pages (illegible, ff. M-15-3 to M-15-4). Even though the title page is very damaged, it is still partially legible. However, we can have a complete title through the *Catalogue* (1907): *Grammatica inedita da lingua tamul pelo Padre Paulo Francisco de Noronha missionario que foi em Madrasta no ultimo quartel do seculo XVIII oferecida á Exposição Industrial de Goa, de 1890, por Antonio Augusto Maria João de Gouveia e Noronha, natural de Ucassaim e sobrinho do auctor e enviado pelo governo a esta bibliotheca 1890* [Unpublished grammar of the Tamil language by Father Paulo Francisco de Noronha, missionary who was in Madras in the last quarter of the 18<sup>th</sup> century. It was offered at the Industrial Exhibition of Goa in 1890, by Antonio Augusto Maria João de Gouveia e Noronha, born in Ucassaim and nephew of the author and sent by the government to this library in 1890].<sup>45</sup> Despite the fact that the title page mentions the name of the Carmelite Noronha, the manuscript contains a copy of Costa's *Arte* (ff. M-15-14 to M-15-66) and is preceded by a list of Tamil letters (ff. M-15-5 to M-15-7) written in a brownish ink on yellow paper along with a section entitled *Arte Tamulica. Letras Tamulicas. Vogaes; Consonantes* [Tamil *Arte*. Tamil letters. Vowels; Consonants] (ff. M-15-8 to M-15-13) and followed by a glossary. Its palaeographic characteristics, such as the *periya Ra* written with a double loop and the writing conventions used for indicating long *e/o* – officially introduced by the Italian Jesuit Giuseppe Costantino Beschi in the first half of the 18<sup>th</sup> century – suggest that the manuscript was written after Costa's death. The final colophon confirms it (*infra*). At the bottom of page M-15-13, there are two pieces of writing, both scratched. However, one of the two is still legible: *J. a livraria Noronha de Cunha de Uccassim* [?. Noronha of Cunha library from Ucassim]. In the second section, *Arte Tamulica. Letras Tamulicas*, the intervention of a second hand is evident, writing the Tamil names of the Tamil letters in darker

---

<sup>45</sup> The title given in James (2000: 132, fn. 49) differs a little: [unpublished grammar of the Tamil language by the father Paulo Francisco de Noronha. Missionary in Madurai, native of Ucassaim, of the (parish) council of Bardez - 1890]. About the 'native' Goan missionary community see Županov's studies (2006) and Melo (1995, *non vidi*).

ink. This section, albeit similar to others found in the remaining manuscript copies, is exclusive to this manuscript. The third section is Costa's *Arte* (ff. M-15-14 to M-15-66) the title of which, appearing before the noun declension, is scratched,<sup>46</sup> although still legible: *Arte Tamulica eomposta pello P(adre)e Balthazar da Costa*. The *Arte* runs up to page M-15-66 ending with the Chapters also found in the other manuscripts. Then, *Titulo 3º Daõ se algumas regras pera preteritos, futuros, Imeprativos, Infinitivos, e Pluraes* (ff. M-15- 66 to M-15-76); *Titulo 4º Da collocação das letras Tamues pela ordem do nosso alfabeto* (ff. M-15-76 to M-15-81); *Titulo 6<sup>o</sup>47 De Alguns sinais que neste vocabulário se observaõ* (ff. M-15-81 to M-15-85); *Titulo 6º Regras da ortografia* (ff. M-15-85 to M-15-86).

The following sections are represented by:

- 1) *Confessionario Tamulico. Dialogo entre o Confessor e o Penitente* (ff. M-15-87 to M-15-131), [Tamil confession between a confessor and a penitent];
- 2) a blank page with a signature (?) (f. M-15-132);
- 3) *Significação de todas palavras que estaõ no Confessionario p(er)a mayor commodidade dos que começaõ aprender a lingoa* (ff. M-15-133 to M-15-148, where the colphon says *Acabei de copiar nos 3 de Março de 1794 பாத்ரி தூமிங்கு* [Finished copying on March 3<sup>rd</sup> 1794. Father Domingo]), [The meaning of all the words in the Confession, for the greater convenience of those who are beginning to learn the language]. According to James (2000: 96) the glossary contains 833 one-to-one equivalents from *a* to *c* [அ to ச],<sup>48</sup>
- 4) A few Tamil sentences transcribed in Roman characters along with their Portuguese translation (ff. M-15-148 to M-15-150). On

<sup>46</sup> The same title was restored later with blue ink.

<sup>47</sup> In the manuscript there is a mistake and this one is defined as the sixth title rather than the fifth.

<sup>48</sup> This section seems to correspond to what is given in the protective leaf of MS 50 (ex MS 34) (cf. *above*).

- page M-15-150 there is a statement that is difficult to read saying:  
*Depaortment sempordor* [?];  
5) again, Tamil letters (M-15-151 to M-15-152).

This manuscript is older than the others discussed above. This is confirmed not only by palaeographic evidence – see *above* – but also by the fact that on the first folio, where one can read the title *Arte Tamulica* at the bottom of the page, one can also read that the manuscript was stamped when the library had already become *Bibliotheca Publica de Nova Goa*.

### 1.2.2. *The Vatican Manuscript*

As already anticipated in the previous paragraph, the manuscript Borgiano Indiano 12 contains two different documents: a manuscript of Costa's *Arte* and a printed book which is Proença's dictionary (see *below*). Both these documents entered the Vatican Library in 1902, when the library of the Congregation of Propaganda Fide, which included both documents sent from India and other parts of the world as well as collections donated by single individuals, was purchased (see *below*).

It must first be said that the realization of this copy of Costa's *Arte* cannot be attributed to Jesuits but to another order: the Discalced Carmelites. This fact, in my opinion, confirms the great relevance of Costa's *Arte* as a reference tool, even outside the Jesuit community. Jesuits were not the only religious order to be involved in India and in the learning of local languages. Indeed, as Xavier and Županov (2015: 117-118) point out “chronologically [the Jesuits] were neither the first nor the last of the religious orders to arrive and labour in Asia under the Portuguese royal Padroado.” Before them, several dozens of Franciscans had reached India. When Jesuits arrived some decades later, there were already different orders active in Goa.<sup>49</sup> For example, there were two Franciscan provinces

---

<sup>49</sup> According to Xavier & Županov (2015: 117-118) “The last Padroado missionary order confirmed only in the early eighteenth century was *Congregação do Oratório de Santa Cruz dos*

in 1629, a number which would reach six hundred in 1635; Dominicans and Augustinians, who had arrived in India in 1547 and in 1572 respectively. Furthermore, the Propaganda Fide<sup>50</sup> regularly sent Discalced Carmelites, Capuchins, and Theatines who both cooperated and entered into competition with the Padroado missionaries.

The missionaries that PF sent to India were mostly Italian and French but also included missionaries recruited from various nationalities belonging to the Holy Roman Empire (*Germans*). However, in the northern part of Kerala, in the region of Malabar, the PF ruled some missions alongside

---

*Milagres*, staffed by the Catholic Brahmans from Goa who became both missionaries and precocious Orientalists in Sri Lanka.”

<sup>50</sup> As Pizzorusso (2007: 43-45) points out, the Sacred Congregation of Propaganda Fide (henceforth PF), also known as *Sacra Congregatio Christiano Nomini Propagando*, was officially founded on 6<sup>th</sup> January 1622 by Gregorio XV while the *Bolla Speculatores* of Clemente IX which established the dependence of missionaries on vicars dates back to 1669. Its task was to maintain the relationship between Rome and the Orient. It was able to re-establish under the control of Rome all the missions in the most remote countries which were led by a tight network of delegations, dioceses, vicariates, and prefectures. In fact, PF jurisdiction had been created with the aim of placing all mission activities under papal control. One of the major contributions of PF to the dissemination of knowledge about non-European languages was the Polyglot Typography, instituted with the aim of printing liturgical texts and catechisms in the different alphabet systems of several languages around the world. Another major contribution was the founding of the Collegio Urbano in 1627 by Urbano VIII as the general seminariate for all the missions, a kind of international school in which young missionaries could be trained. Since the missionaries could not keep what they collected when staying abroad, whatever they found all around the world became the property of the collection of PF first and to the Borgia Museum of Velletri later (Mastrangelo 2018: 27).

In around 1660 PF led many orders to different parts of the world, such as Eastern Asia, including Discalced Carmelites and Jesuits. This is the main reason for which its Archive contained (and still contains) so many documents relating to many different orders, despite the conflicts that arose after the foundation of the PF among the them, in particular, with the Jesuits (Pizzorusso 2007: 44-45; see also fn. 18-19 for bibliographical references.)

Indeed, despite the long reflection carried out by representatives of different orders, including the Jesuits and the Carmelites, all of whom were convinced of the need for a central organization directly connected with the Pope, PF frequently caused disagreements among different orders. The Jesuits entered in contrast with PF more than other orders because of the privileges they received from Innocenzo X, the general Vincenzo Carafa, and Francesco Piccolomini. In fact, Jesuits maintained a degree of autonomy from Propaganda in sending, moving, or recalling religious men but above all on the fourth vow which directly depended on the Pope. The Jesuits were the only ones to vow chastity, poverty, and obedience but also the fourth vow corresponding to their obedience to the Pope regarding their mission. Therefore, the main consequence of this autonomy from PF was that Jesuits did not send as many documents and information to PF as the other orders, like the Capuchins or the Discalced Carmelites. Furthermore, the conflict between Jesuits and PF developed on both a central and local level provoking disputes between Jesuits and Apostolic Vicars directly delegated by PF which manifested in secular issues such as the *Malabaric rites* (Pizzorusso 2007: 53-59).

the Portuguese *Padroado* with its own jurisdiction in Cochin and Cranagore (Mastrangelo 2018: 26). They used to set up their missions in territories far away from the Portuguese official settlements such as Patna, Surat, Tibet, Verapoly, and Madras (see Xavier & Županov 2015: 118, fn. 6). When the Discalced Carmelites joined the mission, there were still many controversies, one in particular being between the *Padroado* and the PF (Mastrangelo 2018: 23). However, many orders arrived after the expulsion of Jesuits profiting directly from the knowledge they had collected in different fields among which the local languages. For example, the Discalced Carmelite library in Verapoly preserved some of the precious Jesuit works and collections, among which the manuscript Borgiano Indiano 12 MS which was sent from Verapoly to Rome by the Discalced Carmelite Pietro Paolo Francisco on 25<sup>th</sup> June 1685 (see *below*).<sup>51</sup>

As stated above, the handwritten and printed library of the PF became part of the Vatican Library in 1902 when the Barberini Library, which had rivalled the Vatican library in importance during the seventeenth century, was also purchased.<sup>52</sup> With the annexation of the PF library, the manuscripts collected from the Near and Far East by Cardinal Stefano Borgia (1731-1804) also entered the Vatican Library constituting the *fondo* Borgiano Indiano.<sup>53</sup> Stefano Borgia, who had been named secretary of PF in 1770 by Pope Clemente XIII, had collected many manuscripts thanks to the missionaries' activities and the Velletri museum. He had made his collection available to many scholars among whom the Discalced Carmelite Paolino Bartholomeo who described his Indian

---

<sup>51</sup> Another important document preserved in the same library was the Sanskrit grammar by Johann Ernst Hanxleden (1681-1732) published and translated by Van Hal and Vielle (2013).

<sup>52</sup> The Barberini library included approximately 11,000 volumes (Latin, Greek, and Oriental manuscripts) and over 36,000 printed documents representing a notable increase for the Vatican Library. For further details and information about the Vatican library history see <https://www.vaticanlibrary.va/it/la-biblioteca/la-storia-della-BAV.html>.

<sup>53</sup> The Borgiano Indiano fund is digitized and available here: <https://digi.vatlib.it/mss/Borg.ind>.

collection mentioning both Proença's Tamil-Portuguese dictionary and Costa's *Arte* as the following paragraph demonstrates:<sup>54</sup>

Num. XII. *Vocabulario Tamulico com a significaçam Portugueza composto pello P. Antam de Proença da Companhia de Iesu Missionario de Madurey*. Liber editus anno 1679. 30 Iulii in oppido Ambalacatta in Malabaria per Ignatium *Aichamoni* indigenam Malabarensis qui characteres Tamulicos in lignum incisos curantibus PP. Societatis tunc Ambalacatae missionariis primus protulit atque hoc vocabularium Tamulicum impressit. Vocabularium hoc suo calculo approbavere P. Antonius Pereira, P. Valerianus Cataneus, P. Ioannes de Maya aliique missionarii. Concinnatum fuit ex scriptis P. Ignatii Bruno, P. Roberti Nobili, P. Emanuelis Martins, ex opusculo *Flos Sanctorum* inscripto in ora Piscaria impresso, ex vocabulario Tamulico in urbe *Iafanapatam* in insula Ceylan confecto per P. Bruno, atque ex scriptis P. Roberti Nobili vocabulis Samscredamicis refertis. Vide praefationem auctoris in qua multa tradit de imperfectione characterum & linguae Tamulicae. Ex. gr. vocabulum *Cayam* legi potest *Gayam*, & utrumque apud Tamulicos iisdem litteris scribitur, primum tamen significat *corpus*, alterum *vulnus* &c. Ad calcem operis exstat grammatica Tamulica inscripta, *Arte Tamulica composta pello P. Baltesar da Costa Missionario de Madure*. Haec descripta fuit Verapoli anno 1685. 25. Iunii a R. P. Petro Paulo a S. Francisco

---

<sup>54</sup> Extracted from the § IV. *Libri Grammatici Chartacei in Examen historico-criticum codicum indecorum. Bibliothecae Sacrae Congregationis de Propaganda Fide. Auctore P. Paulino A. S. Bartholomaeo. Carmelita Discalceato Malabariae ex-missionario academiae volsorum veliternae socio. In collegio Missionum Romae ad Sanctum Pancratium linguarum orientalium Praelectore*. Roma MDCCXCII. Ex Typographia Sacrae Congregationis de Propaganda Fide. Praesidium adprobatione, pp. 56-57. It is also mentioned in *India Orientalis Christiana continens Fundationes Ecclesiarum, Seriem Episcoporum, Missiones, Schismata, Persecutiones, Reges, Viros illustres. Auctore P. Paulino A. S. Bartholomaeo Carmelita Discalceato Malabariae Ex-Missionario, Acad. Veliternae Socio, in collegio Missionum S. Pancratii linguarum Orientalium Praelectore, Arc. Rom. Romae. Typis Salomonianis Anno Dom. MDCCXCII*, p. 182.

In the footnote Bartholomaeus also refers to Henriques' *Flos Sanctorum*: "Flos Sanctorum de quo heic mentio, typis Tamulicis editus fuit characteres Tamulicos curante & scalpente R. P. Ioanne Faria S. I. in ora Piscaria Missionario anno 1578. Anno praecedenti 1577. Ioannes Gansalvez Hispanus laicus S.I. iam alios Indicos characteres scalpserat, quibus prima, christiana catechesis in India vulgata fuit. Vide librum inscriptum: *Oriente conquistado a I.C.* auctore P. Francisco a Sousa. *Lisboa anno 1708*."

This information, as well as the information in the footnote, is repeated in Machado (1741: 182, Vol I) and Backer (1872: 2175, Vol. II).

Carmelita Discalceato olim missionario Malabariae, deinde Archiepiscopo Ancyrano & Vicario Apostolico regnorum magni Mogolis. Character est nitidus & correctus. Vocabularium R. P. Antonii a Proença de quo supra, elegancia vocum, nitore & correctione linguae praestat, sed characteres, utpote in lignum incisi, luridi sunt & indistincti, haec tamen fatis demonstrant linguarum Indicarum studium & impressionem codicum Indicorum a missionariis catholicis primo caepisse, ac proinde criminationes, quas nonnulli Angli & Galli in eos iniiciunt, falsas & flocci faciendas esse.

After Borgia's death, the biblical manuscripts were donated to PF and later entered the Vatican Library.

As stated above, Costa's *Arte* is included in MS Borgiano Indiano 12. The paratexts of first and second level found in the manuscripts, already discussed in Muru (2020b), trace the history of transmission of this document giving information on where, when, and by whom the manuscript was copied. Indeed, as already stated above, in the final colophon at the end of the short introductory preface one reads that in 1685 the Discalced Carmelite Pietro Paolo Francisco copied Costa's *Arte* in Verapoly and sent it to PF in Rome. The grammar was accompanied not only by Proença's Dictionary but also by a workbook and some drawings of Indian customs as stated in the report written by Giovanni Pastrizio (Ivan Paštrić) (1636–1708) who worked for the Urban College of PF as a lecturer in theology in 1659 and later, from 1669 until March 1700.<sup>55</sup>

The Dictionary has a printed foliation on the upper right-hand side of each folio<sup>56</sup> and the 29 folios of *Arte* display a handwritten foliation on the same side. The *Arte* is split into two sections which are attached to

---

<sup>55</sup> For further details on this report see Muru (2021c: 116–119). The report is contained in Borgiano Latino 747, ff. 235r-248v and it is available online at: [https://digi.vatlib.it/view/MSS\\_Borg.lat.747](https://digi.vatlib.it/view/MSS_Borg.lat.747).

<sup>56</sup> In the dictionary the foliation is incorrect: the pages are sometimes in the wrong order and some are missing. For detailed descriptions about this document see Thani Nayagam (1956, 1966), James (2009), and Chevillard (2015, 2017, 2021).

Proença's printed dictionary in the wrong order. The first section includes 18 folios and following the dictionary foliation, it goes from f. 225r to f. 243v, its contents corresponding to the second part of Costa's grammar. The second section runs from f. 249r to f. 259v, and it includes 11 folios containing the first section of Costa's grammar. The grammar is written in Portuguese with evident interferences from the copyist's mother tongue, Italian.

### 1.2.3 *The Sloane Manuscript*

A further copy of Costa's *Arte* was discovered at the British Library as part of the Sloane collection<sup>57</sup> by Jeyaraj in 2010 (Jeyaraj 2010: 20).<sup>58</sup> MS Sloane 3003 entered the British library through the British Museum and, as its name suggests, it belonged to the collection formed by the physician, naturalist, and collector Sir Hans Sloane Bart (1660-1753), also Secretary and President of the Royal Society. Sloane's desire was that all his possessions, which included roughly 45,000 printed books, 4,000 manuscripts, prints, drawings, herbaria, coins, medals, antiquities, and other treasures kept initially at his home in Bloomsbury, and later at the manor house in Chelsea, be offered to the nation so that they could be available to the public for free. His wishes were realised through the Act of Parliament that, upon his death in 1753, bought his entire collection for £ 20,000 creating the British Museum where the old Royal Library and the private libraries of the Cotton and Harley families also converged. Sloane's collection therefore constituted the original nucleus of the British Museum fulfilling his desire that it be visible and useful to everybody and today it is one of the foundation collections of the British Library.

---

<sup>57</sup> See *The Sloane Collection of Manuscripts* (1953), Hunt (2012: 190-207), Walker (2018), the *Sloane Letters Project* available at <http://sloaneletters.com/about/>, <https://reconstructingsloane.org/sloanes-library-and-printed-books/> and <https://www.britishmuseum.org/about-us/british-museum-story/sir-hans-sloane> available through the British Museum web page. Those interested in reading more about the *circulation of knowledge* in the 17<sup>th</sup> century may refer to the following two links: [http://ckcc.huygens.knaw.nl/?page\\_id=51](http://ckcc.huygens.knaw.nl/?page_id=51) & <http://digitalarkproject.blogspot.com>.

<sup>58</sup> I purchased the digitised version of this *Arte* that Jeyaraj (2010: 20) defines incomplete, in 2019 from the British library. Therefore, I have not seen the original manuscript with its physical features (i.e., size, paper, watermarks, etc.).

Sloane had assembled his collection in the decades after his stay in Jamaica<sup>59</sup> (1686-1687) as personal physician to the Duke of Albemarle, through different channels. He was able to collect documents on a variety of subjects which were all catalogued.<sup>60</sup> One of these channels was to absorb complete collections made by others, often friends, like William Charlton (1642-1702), James Petiver (d. 1718), Nicholas Joseph Foucault (1643-1721), or Engelbert Kämpfer (1651-1716).<sup>61</sup>

Another way he obtained objects for his collection was to receive them from the network of contacts he had with various kinds of people. For example, fellow travellers, as was the case for the Physician to the East India Factory at Chusan in China who described a consignment on 12<sup>th</sup> February 1703:

“In the foresaid Box there’s for yourself a Chinese Common Prayer Book, which I procur’d from the Bonzes at Pũ-tó, the Lords Prayer Belief & 10 Commandments translated into Chinese by the Jesuits [...]”<sup>62</sup>

Another example is the correspondence Sloane had with librarians like Abbé Jean Paul Bignon (1662-1743) of the King’s Library in Paris which testifies “the informal network for the exchange of scholarly information

---

<sup>59</sup> “In 1687 Hans Sloane travelled to Jamaica as physician to the English governor. On his return, he married an heiress to sugar plantations in Jamaica which were worked by enslaved people. The profits from these plantations contributed substantially to Sloane’s income and financed his collecting.” Most of the manuscripts from this collection have Sloane numbers from 1 to 4100. Two further groups of manuscripts are from Sloane’s collection but bear Additional MS numbers. These are Add MS 5018-5027 and Add MS 5214-5308.” [Information available on the British Library website: <https://www.bl.uk/collection-guides/sloane-manuscripts>].

<sup>60</sup> Sloane’s own catalogues of books and manuscripts are Sloane MSS 3995, 3972C, and 3972B to D kept in the Department of Manuscripts of the British Library. See below in the text. Later catalogues describing Sloane’s manuscripts collection are: Ayscough (1782) and Scott (1904).

<sup>61</sup> Sloane purchased Kämpfer’s literary legacy in 1723-25, it is the Japanese material in his collection. Kämpfer was in fact a famous German physician and traveller to the Middle East and Asia, particularly Japan. He was employed by the *Dutch East India Company* as physician at Isfahan and Hormuz in the Persian Gulf and later travelled via India to Batavia (Java). He sailed, via Malabar, Ceylon, and Sumatra, to Batavia. When Sloane heard about his death, he was able to arrange to purchase his collection with his widow and nephew. For further details about the Kämpfer-Sloane connection see Gray (1953) and the following link [www.britishmuseum.org/collection/term/BIOG11220](http://www.britishmuseum.org/collection/term/BIOG11220) accessible through the British Museum web page.

<sup>62</sup> Quoted in *The Sloane Collection of Manuscripts* (1953: 7).

and new publications that provided unifying links of knowledge in Anglo-French intellectual life during the eighteenth century” (Clarke 1980: 475).<sup>63</sup>

Additional examples are illustrated by Sloane’s close relationships with Dutchmen like Nicolaes Witsen, Frederik Ruysch, Levinus Vincent, Albertus Seba, Maria Sibylla Merian, and Herman Boerhaave, “who all became involved in correspondence with Sloane and his agent James Petiver”, with whom he expanded his network and obtained books, prints, information and objects (Jorink 2012: 58-60).<sup>64</sup> Indeed, “Sloane was very aware of the importance of the Netherlands as a source [...] while the Dutch saw contacts with the British in terms of outreach and prestige” (Jorink 2012: 69).

Even though the huge task of understanding the history of the manuscript transmission is beyond the scope of this publication, I nevertheless managed to gain a reasonable understanding of *when* and *how* Costa’s manuscript entered the Sloane collection.

Firstly, it should be stressed that the presence of Costa’s *Arte* in Sloane’s collection not only underlines Sloane’s voracity as a collector but, also, how relevant the work was in the circles of that time. As discussed in more detail below, this manuscript represented the base from which a missionary belonging to the Protestant mission, Bartholomäus Ziegenbalg (1682-1719), composed his *Grammatica Damulica* published in Halle in 1716 (see *below*).

---

<sup>63</sup> Clarke (1980: 476) informs us about the fact that Sloane stayed in Paris in 1708 and he actively participated in French intellectual life as an associate of the Académie des sciences of which Abbé Jean Paul Bignon was named presiding officer. While Bas Martín (2018: 196) states that Sloane’s collection “included approximately eight hundred booksellers’ catalogues from various European countries” and that he was “an habitué of many book auctions that took place in London” during which he purchased, for example, the Bibliotheca Hookiana of Robert Hooke (1635-1703).

<sup>64</sup> Among these Dutchmen, Witsen (1641-1717) was particularly “fascinated by geography and exotic languages” [...] “he possessed an enormous and truly universal collection of books” and “generously shared his information and possession with other citizens of the Republic of Letters” (Jorink 2012: 61).

As a collector, Sloane differed from his previous bibliophile colleagues in making catalogues of his collections and it is through these catalogues that we can define the period in which Costa's *Arte* entered in Sloane's library.

Credit for the pioneering deciphering of Sloane's catalogues goes to Nickson (1988) who made great efforts to understand his systematic approach in documenting his library collection. She also shed light on the many 'amanuenses' who helped Sloane in shaping his catalogues. This task has been further detailed by Blakeway (2011) who has identified further 'amanuenses' and clarified their contribution to the composition of Sloane's catalogue. These two studies helped a great deal both in deciphering the second level paratexts (cf. Muru 2020a) found on the protective leaf of MS Sloane 3003 as well as in understanding when Sloane came into possession of Costa's grammar.

Sloane's own catalogues of books and manuscripts are Sloane MSS 3995, 3972C, and 3972B to D kept in the Department of Manuscripts.<sup>65</sup> MSS 3995 is the earliest catalogue that lists the printed books and a few manuscripts that Sloane collected over the period 1685 to 1687. MS 3972B, C "first began to take its present form about 1693 although it includes the books and manuscripts which had been acquired earlier"

---

<sup>65</sup> These catalogues have been digitised within the *Reconstructing Sloane project* that is a valuable source of information from which to start to understand how Sloane's collection was assembled. It is accessible here: <https://reconstructingsloane.org/about/>. The Sloane catalogues, in particular 3972B and 3972C, vol. vi, are available at <https://reconstructingsloane.org/enlightenmentarchitectures/2020/01/02/digitised-catalogues-2/>, while Sloane's printed books, which also contains Ziegenbalg's *Grammatica Damulica* (1716) see <https://www.bl.uk/catalogues/sloane/Home.aspx>.

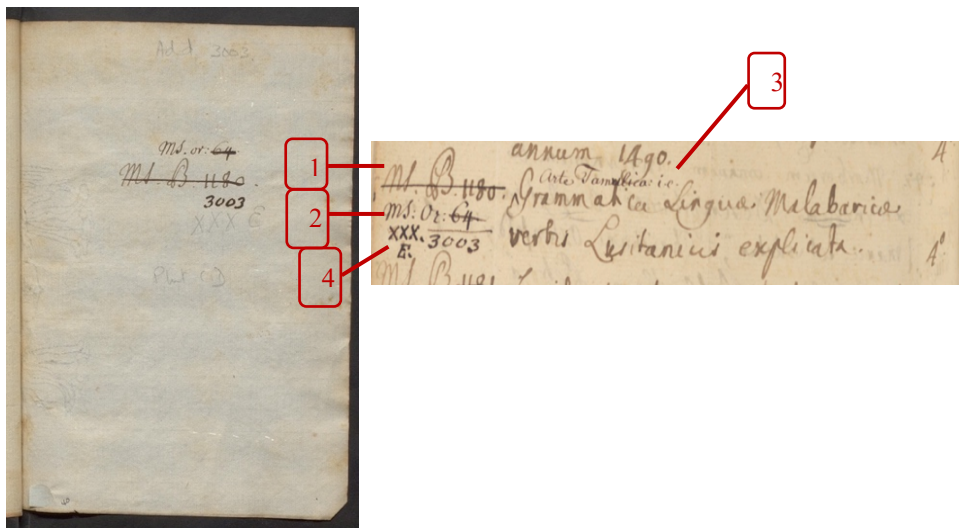

The digital scholarly edition of Sloane's manuscript catalogues has been produced as part of the Leverhulme Trust funded research project *Enlightenment Architectures: Sir Hans Sloane's catalogues of his collections*, a grant held at the British Museum in association with the Department of Information Studies and Centre for Digital Humanities University College London. Further information about Sir Hans Sloane's collections and catalogues across the British Museum, the British Library and the Natural History Museum, London can be found on the *Reconstructing Sloane* website: [www.reconstructingsloane.org](http://www.reconstructingsloane.org).

For further details about these catalogues see Nickson (1988: 52-89) and the bibliographical references listed at <https://reconstructingsloane.org/about/> and at <https://www.bl.uk/catalogues/sloane/References.aspx>.

(Nickson 1988: 53). It includes all the items that Sloane acquired before his death in 1753.

Looking at the protective leaf of MS Sloane 3003, one can identify four different press marks or cataloguing references. They are also found in Sloane's catalogue (MS 3972B p. 361/p. 2430, Sloane's numeration) but in a different order, as shown in figure 3 (courtesy of British Library):<sup>66</sup>

**Fig. 3 – Correspondence between references on the MS protective leaf and Sloane's catalogue**

Even though the reference to Costa's manuscript showed in Fig. 3 is taken from MS 3972B where it is described as *Grammatica Lingua Malabarica verbis Lusitanius explicata*, it originally belonged to the 6<sup>th</sup> volume of Sloane's catalogue (MS 3972C)<sup>67</sup> which was deprived of all the folios containing references to manuscripts. Indeed, after Sloane's death in 1753, the Trustee gave the order to separate Sloane's manuscripts from Sloane's printed books in 1755. It is probably for this reason that later, in

<sup>66</sup> The full page from which this extract is taken is available here: [https://enlightenmentarchitectures.reconstructingsloane.org/catalogueMS3972B/#doc=1&page=Sloane\\_MS\\_3972\\_B\\_687](https://enlightenmentarchitectures.reconstructingsloane.org/catalogueMS3972B/#doc=1&page=Sloane_MS_3972_B_687).

<sup>67</sup> This is a bound manuscript volume held at the British Library containing numbered entries that list and describe a substantial selection of the books and printed ephemera collected by Sir Hans Sloane (1660-1753) between the 1680s and the 1750s.

1758, the Trustee ordered that the folios in Sloane's catalogue (in this case MS 3972C, Vol. vi) containing manuscript entries should be removed from Sloane's library catalogue and rebound in a new volume, creating what is now Sloane MS 3972B.

This is confirmed not only by a comparison between the two digitized versions of these manuscript catalogues which clearly displays how Sloane's missing folios in catalogue C are found in catalogue B with a continuous numeration with C, but also by comparing the handwriting found on the page containing the reference to MS Sloane 3003 with that of Sloane's catalogue compilers that have been collected and listed in Blakeway (2011: 35, fig. 11). Indeed, this handwriting corresponds to Johann Gaspar Scheuchzer's (1702-1729) hand. This amanuensis started to work for Sloane when he arrived in London in 1727 and remained with him until his death in Sloane's house on 10<sup>th</sup> April 1729. His main innovation in Sloane's manuscript collection was its reorganization by size of the whole collection: both new and old acquisitions were provided with new numbers and with 'A' for folios, 'B' for quartos and 'C' for octavos. This typical press mark is n. 1 in figure 3 above, which suggests that the manuscript of Costa's *Arte* entered Sloane's collections in the same period in which Scheuchzer worked as a librarian for him, therefore between 1727 and 1729. This period of time is also confirmed by the preceding and subsequent items found in the catalogues for which the date of entry is clearly stated. Indeed, as Nickson (1988) states, entries in Sloane's catalogue appeared in chronological order based on the date of their acquisition. Consequently, navigating the catalogue beginning to end, and starting from the certain date of entry for some items, it is possible to work out an approximate period of entry for those items for which no information is provided. In this case, the items preceding MS Sloane 3003 were mainly purchased between 1725 and 1726 in Paris or in London and this confirms that Costa's grammar entered Sloane's collection no earlier than 1727, as we will see below. This remains true, even though one can observe a reference mark n. 2 corresponding to Ms. Or. which is one of the innovations introduced in 1719 by another

amanuensis identified as ‘Hand 4’<sup>68</sup> by Blakeway (2011: 29-33). Firstly, the fact that this paratext is placed below press mark n. 1 in the catalogue, and having been crossed out, leads us to believe it is a later addition occurring after 1727, presumably carried out by one of the librarians who succeeded Scheuchzer, either Cromwell Mortimer (1693-1752) or Thomas Stack (died 1756). Indeed, during their time working for Sloane, they had the task not only of keeping the list of new entries in Sloane’s collection updated but also of checking and reorganizing Sloane’s existing books.<sup>69</sup> Secondly, comparing them with the handwriting of the two librarians provided in Blakeway (2011: 37, fig. 13), it is possible to identify Stack’s hand in this addition. Therefore, press marks n. 2 and n. 3 in figure n. 3 above should be considered as two examples of later additions that these librarians made to the existing collection.

The press mark n. 4 (Fig. 3) is the last catalogue number introduced at a later stage by Samuel Ayscough (1782: 3027, Vol. II)<sup>70</sup> when he composed his catalogue describing the manuscripts kept at the British Library. Indeed, in his preface, he writes:

“Those manuscripts numbered from 1 to 4100 were collected by Sir Hans Sloane Bart, and were part of his museum, purchased by parliament (agreeably to his will) for the public use. In this part, I have, as much as possible, retained the numbers which had been made use of in Sir Hans Sloane’s own Ms catalogue; so that whatever references may have been made to any of these MSS. They will in general answer the present numbers; but as the old Catalogue was numbered before the volumes, *it frequently happened*, that those articles which had several numbers affixed to them were bound together, and only one number given to the volume and from the MS Catalogue of MSS. And printed books being written indiscriminately, *it sometimes occasioned* numbers to be given to printed books as though they had been MSS on which account, there will appear a deficiency in the numbers: to remedy

---

<sup>68</sup> This amanuensis worked for Sloane between 1715 and 1719 (Blakeway 2011).

<sup>69</sup> Mortimer worked for Sloane from 1729 until 1740, while Stack worked as librarian from 1733 until 1740.

<sup>70</sup> Cf. footnote 60.

which I have altered the numbers of about 150 volumes, which as they had not been found entered in the original MS Catalogue were added to it, and the numbers placed in [Crochets;] and to prevent any inconvenience from this alteration, I have added after the index of numbers, a table of the former numbers with the numbers they now bear; but this has not been quite sufficient to fill up all the deficiencies, and there will yet appear a defect of some numbers, and consequently *deest* will appear against them in the Index.”

Other second level paratexts<sup>71</sup> useful for understanding the transmission history of MS Sloane 3003 are represented by the two stamps found in the first folio recto of the manuscript and in the last folio verso, reproduced in figure 4 below.

**Fig. 4 – Stamps in MS Sloane 3003**

The oldest (on the right) of the two is the octagonal ‘Museum Britannicum’ stamp that was intended to be stamped with black ink on Sloane’s books alone. Other colours were used for purchased or donated material, and for the Royal collection. The more recent one (on the left), consisting of round stamps containing the royal arms but no lion or unicorn, belongs to Type 3 stamps that were in use from 1929 to 1973. Considering that the British Library came into existence in 1973, and that the use of the stamp on the left was discontinued in the same year and that there no other stamps found on the manuscript, it is reasonable to say that it entered the British library in the year of its foundation.<sup>72</sup>

---

<sup>71</sup> Another important paratext is the watermark visible at the center of the protective leaf. The fact that it is only partially visible and that I could not consult the physical manuscript prevented me from being able to identify it.

<sup>72</sup> For further detail about British library stamps see Harris (2009) and Pearson (1994).

As far as the second key question is concerned, i.e. *how*, therefore through which network Costa's *Arte* came to be in Sloane's collection, the first thing to be said is that "Sloane received many [manuscripts] for having been Secretary of the Royal Society".<sup>73</sup> Another aspect to be pointed out is that Sloane's collection also includes manuscripts and printed books about the Tamil language and the Malabar dimension which are correlated to B. Ziegenbalg and the Dutch Company. Therefore, a first possibility is that these additions to Sloane's collection occurred through the aforementioned Dutch network. As Jorink (2012: 58) states: "few people know that the provenance of many objects, drawings, and books now in the Natural History Museum, the British Library and the British Museum goes back to Sloane's Dutch contacts [...] Many of the objects in Sloane's collection were either gifts from Dutch collectors, were bought by Sloane himself or entered his collection via agents". However, the main candidate among the Dutchmen would be Kämpfer – rather than Witsen –<sup>74</sup> for having passed through Malabar and Ceylon, the date in which his collection entered Sloane's library.

Another possible source would be Sloane's friendship and exchanges with Abbé Jan Paul Bignon of the *Bibliothèque Royal* (Clarke 1980: 475-482). Indeed, Abbé Bignon, who worked as librarian for the King's Library, was the person responsible for enriching the current Indian collection held at the National Library of France (BNF). Is it thus possible that this manuscript was one that the two friends exchanged between them? It is a fascinating hypothesis which could also be corroborated by the fact that the items preceding the MS Sloane 3003 in the catalogue were purchased in Paris. However, the fact that Hans Sloane was in Paris in the first decade of 1700 and, above all, some internal peculiarities of the manuscript itself lead me to exclude this possibility. In fact, MS Sloane 3003 was copied with some omissions – i.e., the author's name in the title or internal references to the Portuguese language or to the Jesuit enclave – see § 1.2.3 for further details – which indicates an intention to hide his Jesuit provenance. This evidence brings me to another much more

---

<sup>73</sup> *The Sloane Collection of Manuscripts* (1953: 7). Insertion into square brackets mine.

<sup>74</sup> Cf. footnotes 61 and 64.

valuable hypothesis for the provenance of MS Sloane 3003 even if not completely exhaustive: B. Ziegenbalg.

As Jeyaraj (2010: 22-23) states, on 5<sup>th</sup> February 1715, Ziegenbalg wrote to the Orientalist Michaelis in Halle about his intention of drafting “the indispensable grammatical principles” of the Tamil language, while in Volume I of Halle Reports (p. 652) it says that “Ziegenbalg’s report, written in Halle on 27<sup>th</sup> October 1715, mentions that for the benefit of Europeans he began writing his grammar (*Grammatica Latino-Damulica*) on 15<sup>th</sup> February 1715 and completed it before the ship reached the Ascension Island, 1,600 km away from the East Coast of Africa ” (quoted in Jeyaraj 2010: 23). Considering that he relied a great deal on Costa’s *Arte* in composing his grammar, and that Ziegenbalg’s *Grammatica Latino-Damulica* was printed in Halle when Ziegenbalg would have been there, it is probable that Ziegenbalg had Costa’s copy with him on his voyage from Tranquebar to London. We learn from Jeyaraj (2010: 23) that Ziegenbalg’s Latin manuscript of his Tamil grammar reached Halle and from there it went to Berlin, while Ziegenbalg stayed in Copenhagen anxiously waiting for his grammar to be printed in Halle where he arrived on 17<sup>th</sup> October 1715 and married Maria Doroteha Salzman (Jeyaraj 2010: 24). With his wife and Peter Malaiyappan, Ziegenbalg left Halle and “hurried via Amsterdam to London hoping to board the English ship leaving for India on 4 January 1716” (Jeyaraj 2010: 25) even though the ship did not set sail until March 1716. During this time Ziegenbalg promoted his work in London where roughly fifty copies of his printed Latin-Tamil grammar were sent. As anticipated above, Jeyaraj (2010: 26) concludes that one possibility is that “After his Latin-Tamil Grammar was printed [in Halle in 1716] and its copies were distributed in London [...] After Ziegenbalg had visited his patrons in London and before he had boarded the ship to Madras, he might have left the paper manuscript of Da Costa’s *Arte Tamulica* with one of his friends. Gradually, it found its way into the British Library”. This is a strong possibility, since we know from Sloane’s catalogue that some of the items preceding Sloane 3003 in his Catalogue were purchased in London at the time this manuscript entered his collection.

However, there is another possibility which could explain how this manuscript entered Sloane's collection which is also the explanation of how Ziegenbalg's *Bibliotheca Malabarica* entered the same collection. Sweetman & Ilakkuvan (2012), write that Costa's *Arte* belonged to the library possessed by Ziegenbalg even though, as Jeyaraj (2010: 7 and fn. 12) states, not only did Ziegenbalg never acknowledge Costa's work in his grammar but neither did he mention it when in 1708 he reviewed "the content of 19 works written by Roman Catholic missionaries in Tamil country". Ziegenbalg possessed these works to make use of them when he reached India, since he had not studied anything of what was available about India and its languages in Europe before being sent to the Halle mission. When he reached the mission, he had Indian Christians make copies of many Roman Catholic manuscripts composed by Christian missionaries. Some of these works were copied on palm leaves, others on paper, until the Dutch introduced the press in India again (Sweetman & Ilakkuvan 2012: 5-6). For this purpose, "Ziegenbalg maintained six Tamil scribes in his household and would thus have been able to acquire copies of all of these works [...] by having the schoolmaster dictate them to the scribes" (cf. Ziegenbalg to Lütken, Tranquebar, 22 August 1708, cited in Sweetman & Ilakkuvan, 2012: 32).

Furthermore, he collected them two months after his arrival in India, including "some grammatical precepts [written] in the Portuguese language, drawn up by a missionary of the King of France" (Sweetman 2006: 802-803).

Ziegenbalg gave details of all these activities in his correspondence dated 22.09.1707:

"we also obtained various books written by the Catholics in the Malabarian [i.e., Tamil] language which, although full of dangerous errors, nonetheless contributed a great deal to my learning of this language, so that from them I was able to adopt a proper Christian style". Furthermore, "in a catalogue of Tamil books in his possession ... Ziegenbalg lists twenty-one such Catholic books, noting that they had belonged to a Jesuit in Tanjavur "who went

about among the heathen in the dress of Brahman”. During a time of “severe persecution” of Christians in Tanjavur, when all wanted to save their lives had had to flee to the European coastal settlement, this Jesuit had left his library for safe-keeping in Tranquebar, where it had long remained hidden, until “it was wonderfully arranged” that Ziegenbalg should come upon it.” (Sweetman 2006: 803)

However, one thing is for sure that “while underway [to Europe in 1714], he [Ziegenbalg] set down in Latin a grammar of Tamil, closely following a Tamil accidence, the *Arte Tamulica*, written by Baltasar da Costa SJ, and printed (?) at Ambalakad around 1680, which he had been given by Hassius in 1707” (Sweetman & Ilakkuvan 2012: 8).<sup>75</sup> Hence, Sweetman concludes that, despite the reference to a ‘missionary of the King of France’ the grammar that Ziegenbalg followed was the printed or unprinted version of the one composed by Costa. According to Sweetman & Ilakkuvan (2012: 10), Ziegenbalg received his library, and therefore Costa’s *Arte*, seven months after his arrival in Tranquebar in July 1706, thus at the beginning of 1707. The full library that Ziegenbalg acquired belonged to a Jesuit who used to dress as a *sanyassi* and was forced to abandon the library during a time of severe persecution of Christians in Tanjore, the most recent persecution having been in 1701 under Shahji II. Sweetman & Ilakkuvan (2012: 10) believes that it is possible that the library reached Ziegenbalg through Hassius who also gave him Costa’s Tamil grammar.

Later, Ziegenbalg’s library reached the British Library through a purchase made by “Hans Sloane at auction in Copenhagen in 1726, from the library of Fredrik Rostgard, a collector.”<sup>76</sup> It consists only of the first 112 entries of the third section of the Bibliotheca Malabarica, entitled “Verzeichnis

---

<sup>75</sup> Sweetman and Ilakkuvan (2012: 8) state that a reference to Costa’s *Arte* as the model for Ziegenbalg is also found in Rajamanickam who wrote that Ziegenbalg “follows rather closely...the grammatical treatise incorporated in the Introduction” to the Jesuit Antão de Proença’s Tamil-Portuguese dictionary which, as seen in §§ 1.2.1 and 1.3, corresponds to Costa’s *Arte*.

<sup>76</sup> At the auction, Hans Gram bought more than 1,000 volumes from Rostgaard’s collection. He also bought volumes for the English bibliophile Hans Sloane (Larsen 1970: 111).

der Malabarischen Bücher”. Rostgaard’s manuscript is likely to have been copied from the version of the *Bibliotheca Malabarica* sent by Ziegenbalg to Franz Julius Lütkens, the court preacher in Copenhagen. The manuscript was translated by Albertine Gaur” (Sweetman & Ilakkuvan 2012: 23).

Looking at the entry for *Bibliotheca Malabarica* found in MS 3972B, p. 363 and p. 2432 in Sloane’s numeration reproduced in Fig. 5 below, it is clear that this is the same hand that also registered the entry for Sloane 3003 seen in Fig. 3 above.

[Ms. B. 4494 / 3014 XXII.C. Verzeichnus der Malabarischen Bü: chern. Est Catalog is Lingua Germani:ca à Missionarijs Evangelicis in write]<sup>77</sup>

**Fig. 5 – *Bibliotheca Malabarica* in Sloane’s Catalogue**

Therefore, despite the distance between Sloane 3003 (Costa’s grammar) and Sloane 3014 (Ziegenbalg’s *Bibliotheca*), considering that the entries were written by the same hand, Scheuchzer’s hand, it is more than reasonable to consider MS Sloane 30003 as a manuscript purchased at the same auction where Sloane purchased Ziegenbalg’s *Bibliotheca*. In conclusion, Sloane 3003 entered Sloane’s collection in 1727. I am more inclined to support this hypothesis rather than consider the possibility that Sloane 3003 entered the collection in the same way as other documents belonging to the Danish mission and Tranquebar did. For example, as stated in Ayscough’s catalogue (1789), Sloane received other Danish works from his friend Dr. Henry Halden. An example of these are the

<sup>77</sup> Courtesy of British Library and credits for encoding to: Alexandra Ortolja-Baird (BM), Julianne Nyhan (UCL), Andreas Vlachidis (UCL), Hui Xiong (UCL MA). *Bibliotheca Malabarica* corresponds to Sloane 3014 and the whole page of the manuscript where it is mentioned is available here: [https://enlightenmentarchitectures.reconstructingsloane.org/catalogueMS3972B/#doc=1&page=Sloane\\_MS\\_3972\\_B\\_691](https://enlightenmentarchitectures.reconstructingsloane.org/catalogueMS3972B/#doc=1&page=Sloane_MS_3972_B_691).

documents belonging to the Protestant preacher Philippus Baldaeus (1632-1672) which clearly entered Sloane's library earlier than 1727. In fact, the hand that composed this entry in the catalogue corresponds to that of amanuensis 'hand 4' who, as already mentioned above, worked for Sloane between 1715 and 1719.<sup>78</sup> Furthermore, the hypothesis about the auction in Copenhagen in 1726 as the main source for MS Sloane 3003 is also reasonable because Copenhagen was the place where Ziegenbalg stopped before reaching Halle in 1715 where his *Grammatica Damulica* was printed in 1716.

### 1.3 Costa's manuscripts: a general overview

The previous paragraphs have provided information about the features of each of the manuscripts of Costa's *Arte*, historical information about libraries and collections where each manuscript is found, and, whenever possible, the trajectory the manuscript followed and when it ended up in that collection.

This paragraph aims to offer a general overview on the five manuscript copies of Costa's *Arte* gathering together the information relating to time and place in which each manuscript was written or copied and adding information relating to similarities and differences among the five copies in terms of writing systems, linguistic variants, contents and order of contents. Firstly, it is necessary to define a unique criterion of reference for these five documents from this point onwards. In Muru (2020a) I used a system of abbreviation that included the manuscript catalogue number preceded by the acronym specifying the library where it is kept today (i.e. KSCLG\_MS50 (ex MS 34) corresponds to *Krishnadas Shama Central Library, Goa State*, number of catalogue: 50; old catalogue number: 34).<sup>79</sup> However, following the suggestion provided by one of the anonymous revisor who I thank, in this context, I preferred to use abbreviated forms

---

<sup>78</sup> It is possible to compare the handwriting for this catalogue entry here: [https://enlightenmentarchitectures.reconstructingsloane.org/catalogueMS3972B/#doc=1&page=Sloane\\_MS\\_3972\\_B\\_893m](https://enlightenmentarchitectures.reconstructingsloane.org/catalogueMS3972B/#doc=1&page=Sloane_MS_3972_B_893m) with 'Hand 4' in Blakeway (2011: 29-33). Cf. footnote 68.

<sup>79</sup> As with the manuscripts in the Goa library I will follow the most recent catalogue number as I found it in 2016, followed by the previous one found in 2007.

in order to make easier the comparison between the different manuscripts, above all in *Part 2*. The following table summarises the number of references used in this book for each manuscript and also provides the date found in the colophon (if present), the library where it is kept, and the presumed date on which it entered the library.

<b>Manuscript</b>	<b>Date of composition</b>	<b>Catalogue Number</b>	<b>Library</b>	<b>Manuscript Reference Number used in this book</b>
Composite manuscript: TA-PT dictionary + <i>Arte</i>	1670  [presumed date of addition to the library: 1834-1836]	MS 50	Krishnadas Shama Goa State Central Library, Panjim, IN	GL1  (Corresponding to KSCLG_MS50 (ex MS 34) in Muru 2020a)
Composite manuscript: printed TA-PT dictionary + manuscript <i>Arte</i>	1685 <sup>80</sup>  [presumed date of addition to the library: 1902]	Borgiano Indiano 12	Vatican Library, Rome, IT	VL  (Corresponding to VL_Borg.Ind.12 in Muru 2020a)
Single manuscript: <i>Tamil Arte</i>	ca. 1707  [presumed date of addition to the Sloane collection: 1726-1727; entered the British Museum in 1753; entered the British library in 1973]	Sloane 3003	British Library, London, UK	BL  (Corresponding to BL_Sloane 3003 in Muru 2020a)
Composite manuscript: <i>Tamil Arte</i> + <i>Catechism</i> + <i>Confession Manual</i>	1731  [presumed date of addition to the library: probably 1834]	MS 66	Krishnadas Shama Goa State Central Library, Panjim, IN	GL2  (Corresponding to KSCLG_MS66 (ex MS 49) 3003 in Muru 2020a)

<sup>80</sup> The date here refers exclusively to the *Arte*.

Composite manuscript: <i>Tamil Arte</i> + <i>Catechism</i> + <i>Confession</i> <i>Manual</i>	1794  [presumed date of addition to the library: 1890]	MS 16	Krishnadas Shama Goa State Central Library, Panjim, IN	GL3  (Corresponding to KSCLG_MS16 (ex MS 15) 3003 in Muru 2020a)
--	--	-------	--	--

**Chart 2 - Costa's manuscript copies: date, library, catalogue number, reference number used in the book**

The following Chart 3 compares the contents of the manuscripts and their order of appearance. Indeed, in almost every manuscript, apart from the *Arte*, there are also some appendices giving specific information about features of the Tamil language (i.e., how to form the past tense, the future, the imperative or the plural) and provide information about a dictionary that must have been complementary to this grammar. The question is: which dictionary? Is it Costa's Portuguese-Tamil dictionary? Or is it Proença's dictionary? Considering that the reference in the manuscript is to *Vocabulario Luzitano Tamulico* it must be the former because Costa's dictionary was Portuguese-Tamil. Therefore, one should take its explanation of *Tamil* letters according to the order of our alphabet as an attempt to explain how the Tamil letters should be pronounced, as it is at the beginning of Sloane\_3003. However, if one looks for a dictionary combined with this *Arte*, the only one to be found today is the Tamil-Portuguese dictionary composed by Antaõ de Proença. And this is the reason why in Muru (2010) I considered Costa's *Arte* as being complementary to Proença's Dictionary. Furthermore, if we consider the second option to be correct, one could also assume that at least the other copies of Costa's grammar were based on Proença's manuscript composed before 1679 on which the printed version is based and corresponding to GL1. This seems to find support in the statement found in the 5<sup>th</sup> *Titulo* (chapter) both of GL1 and GL2 which, however, is missing in the other copy of Costa's grammar, manuscript GL3:

- (1) Demos no prologo razaõ porque deixando a ordem do Alfabeto Tamulico seguimos a do Lusitano (GL1, f. M-34-50; GL2, f. M-49-81)<sup>81</sup>

The following Chart 3 clearly highlights differences and similarities in terms of sections, order, and contents in the five copies of the manuscript.

GL1, GL2, and GL3 partially differ from both VL and BL. Similarities and differences depend on the number and order of what in Portuguese are defined *Titulos*, therefore on the number of parts which constitute the manuscript. Both GL1 and GL3 have a total of six sections each (cf. Chart 3). Despite the fact that the first section differs between the two manuscripts – it is *1º figuras das letras e seu valor nas pronuncias Arte Tamulica* in GL1 and *Letras Tamulicas. Vogaes. Consonantes* in GL3 – and it is not found in GL2, we know that there was also a *first title* in the original manuscript from which each of these manuscripts was copied, because it is referred to in the other copies:

- (2) [...] porque tem a pronuncia maiz longe da nossa, do q(ue) o *ør* como vimos no primeiro título (GL1, f. M-34-51, R, lines 14-16; GL2, f. M-49-84; GL3, f. M-15-78)

GL1	VL	BL	GL2	GL3
<i>Da ordem que se guarda neste vocabulário</i> (ff. M-34-5 to M-34-9)	<i>Da ordem que se guarda neste vocabulário</i> (ff. 6v-8r)	<i>Letras Tamul pella ordem do nosso alphabeto</i> (ff. 1r-3v)	—	—
<b><i>Título Primeiro</i></b> <i>Da Fig(ur)a, Valor e Pronuncia dos caracteres Tamvlicos. Das letras vogaes; das consoantes; da</i>	<i>Da Figura, Valor e Pronuncia dos caracteres Tamvlicos. Das letras vogaes; das consoantes</i> (ff. 8r-10r) <sup>82</sup>		—	<b><i>Arte Tamulica.</i></b> <i>Letras Tamulicas. Vogaes Consonantes</i> (ff. M-15-8 to M-15-13)

<sup>81</sup> In GL2 one finds *rezaõ* rather than *razaõ* and *Luzitano* instead of *Lusitano*, otherwise the statement is identical.

<i>composição de consoante co(m) vogaes</i> (ff. M-34-9 to M-34-15)				
<b>Titulo 2º em que se põem a recopilação da Arte Tamulica composta pello P(adre)e Balthazar da Costa da Comp(anhi)a de Jesus</b> (ff. <b>Titulo 3º Daõ se algumas regras pera preteritos, Futuros, Imperativos e plurais dos preteritos</b>  <i>Dos preteritos</i> (ff. M-34-42 to M-34-44); <i>Dos Futuros</i> (M-34-44 to M-34-45); <i>Dos Imperativos</i> (M-34-45); <i>Dos Infinitos</i> (M-34-45 to M-34-46); <i>Dos Plurais</i> (M-34-46 to M-34-47)	<b>Appendix<sup>83</sup></b> <i>Daõ se alguãs Regras pera Preteritos, Futuros, Imperativos, Infinitos, e plurais</i> (ff. 238v–242v)	<b>Appendix</b> <i>Daõse alguãs Regras p(er)a Preteritos, Futuros, Imperativos, Infinitivos, e plurais</i>  <i>Dos preteritos</i> (ff. 31v–33r) <i>Dos Futuros</i> (ff. 33v–34r) <i>Dos Imperativos</i> (f. 34r) <i>Dos infinitivos</i> (ff. 34r-35r) <i>Dos Pluraes</i> (ff. 35r-v)	<b>Titulo 3º</b> <i>Daõ-se algumas regras pera preteritos, futuros, Imeprativos, Infinitivos, e Pluraes</i> (ff. M-49- 64 to M-49-76)	<b>Titulo 3º</b> <i>Daõ se algumas regras pera preteritos, futuros, Imeprativos, Infinitivos, e Pluraes</i> (ff. M-15- 66 to M-15-76)
<b>Titulo 4º</b> <i>Regras de Ortografia</i>	—		<b>Titulo 4º</b> <i>Regras de orthographia</i>	<b>Titulo 4º</b> <i>Da collocação das letra</i>

<sup>82</sup> This section and the previous one differ from Costa's texts and they both precede the dictionary (See Thani Nayagam 1966: 13–20).

<sup>83</sup> This part is attached to the *Arte* and it is handwritten.

(ff. M-34-47 to M-34-49)			(ff. M-49-76 to M-49-81)	<i>Tamues pela ordem do nosso alfabeto</i> (ff. M-15-76 to M-15-81)
<b>Titulo 5º</b> <i>Da collocação das letras Tamuis pella ordem do nosso Alfabeto</i> (ff. M-34-49 to M-34-54)	—	It is found at the beginning of the text in a reduced version	<b>Titulo 5º</b> <i>Da collocação das letras Tamues pella ordem do nosso alfabeto</i> (ff. M-49-81 to M-49-89)	<b>Titulo 6º</b> <i>De Alguns sinais que neste vocabulário se observaõ</i> (ff. M-15-81 to M-15-85)
<b>Titulo 6º</b> <i>De alguns sinais que neste Vocabulario se observaõ</i> (f. M-34-54)	—		<b>Titulo 6º</b> <i>De alguns sinaes que neste vocabulário se observaõ</i> (ff. M-49-89 to M-49-91)	<b>Titulo 6º</b> <i>Regras da ortografia</i> <sup>84</sup> (ff. M-15-85 to M-15-86)

**Chart 3 - Comparison of Costa's manuscript copies**

As for VL, i.e., the printed text by Proença containing a manuscript copy of Costa's *Arte*, similarities can be found only with GL1, with which it shares part of the prologue to the reader preceding the dictionary<sup>85</sup> which is not to be found in the other manuscripts. However, the remaining sections up to the paragraphs about vowels and consonants, are almost the same. The only difference is that from the printed version of Proença's dictionary found in VL, any reference to Costa's grammar as well as to other sections of the manuscript (i.e., the *Titulos* listed in Chart 3) have been removed. Considering that GL1 dates back to 1670, can we take it as a 'draft' for the printed version of VL? I believe this to be a reasonable explanation, even though VL appears to have been reduced in content in the sections which were part of the manuscript version as the chart above has illustrated, as well as in the headwords of the dictionary which appear reduced in terms of information, especially those related to local religion.

<sup>84</sup> In manuscript GL3 the order is inverted between these last two titles, and they are both enumerated as the 6<sup>th</sup>.

<sup>85</sup> GL1 has only part of the *Prologue to the reader* found in Proença (1679) because the initial pages have been lost.

Finally, as for BL it is clear how much this manuscript differs from all the others and not only in terms of sections. Indeed, it is the only manuscript where Costa's name is not mentioned at all in the title and there are some omissions about the internal references to the Portuguese language, to the Jesuit missionary Aguilar (see *below*), and to the dictionary. The following examples are representative of the deleted passages in MS BL compared to the other manuscripts:

- (3) He materia esta assâs embaraçada e co(n)fuza para os Principiantes porq(ue) pella variedade dos preteritos se não pode todos reduzir a regras geraes, se bem depois de poucos annos de exerciçios se vem a cair sem se [sentir] tanto, [nesta matéria] q(ue) em nenhu(m) ou poucos preteritos se erra. Nos p(er)a q(ue) nella digamos alguá cousa e por evitar por todos os preteritos, no vocabulario, formaremos algumas regras gerais, ou quase gerais Remettendo os preteritos que nella senão co(m)prenderem, ao vocabulario, e deixando muitas particularidades ao uzo por não cauzar confuzaõ aos principiantes.  
(GL1, f. M-34-42, L, lines 12-28)
- (4) No .L. poremos os tres ll q(ue) o Tamul tem, e no p(rimeir)ro lugar ω, porq(ue) he conatural ao nosso .l., no 2º lugar ω, no 3º lugar porque tem a pronuncia mais longe da nossa do q(ue) ω como vimos no primeiro titulo.  
(GL1, f. M-34-51, R, lines 10-16)
- (5) ... porem como esta letra se nomea raramente no nosso Alfabeto, e ao Portuguese he peregrina ...  
(GL1, f. M-34-52, R, lines 8-11)

In my opinion, considering the origin of BL (§ 1.2.3), these features should be interpreted as the intention of the copyist to make this manuscript appear as if it were produced in a non-Roman Catholic context. This is also confirmed not only by the omission of the final appendices in which there were more references to the Portuguese language, but also by the fact that references to the grammar of another Jesuit missionary, Gaspar de Aguilar (1588-?), found three times in almost all the other manuscripts, are also omitted as shown by the following examples.

The first omission is found in the paragraph devoted to the *Relative pronoun* where Aguilar's name found in all the other manuscripts (example 6) is substituted by an anonymous *someone* (example 7):

- (6) Do Relativo  
Não hã nesta lingoa Relativo qui, quæ, quod e ainda quando P. Aguilar<sup>86</sup> na sua Arte diga que என்ன o hé, emganouse [...]  
(GL1, fol M-34-18, R, lines 26-30; GL2, f. M-49-12; GL3, f. M-15-23; VL, f. 253v)
- (7) Naõ nã nesta lingoa relativo qui quæ quod e ainda q[ue] algũ digaõ que என்ன o hè enganaõ se p[or]q[ue] என்ன naõ hé se naõ ~~perguntando~~ quis vel quod, nẽ se acharã se naõ perguntando.  
(BL, f. 10v)

The second mention of Aguilar is found in the paragraph devoted to *Prepositions/Postpositions*. The other manuscripts mention his name (examples 8-10) except for MS BL but, quite surprisingly, also MS GL1 (examples 11-12):

- (8) cazos, como mostrarã o uzo, e no vocabolario se põem alguns; e quem quizer a serie destas propocições pospositivas || das quaes sô aqi falamos || veja a Arte do P[adr]e Gaspâr de Aguilâr.  
(GL2, M-49-61)
- (9) cazos, como mostrarã o uzo, e no vocabolario se põem alguns; e quem quizer a serie destas propoziçoens pospositivas || das quaes sô aqi falamos || veja a Arte do P[adr]e Gaspar de Aguiyar.  
(GL3, f. M-15-64)
- (10) uso e no vocabulario se poem algúns, e quem quiser serie destas posposiçoens veja a Arte do Padre Gaspare de Aguilar.  
(VL, f. 237r)
- (11) como mostrarã o uso e no vocabulario se podẽ alguns  
(BL, f. 30v)
- (12) Podem tanbe' diversos casos como mostrarã o uso.  
(GL1, f. M-34-40, R/L, lines 30-31)

---

<sup>86</sup> In MS GL3 it is written *Aguiyar*.

The same is true even for the last reference: Aguilar's work is mentioned in the paragraph about the *Adverbs* in all the manuscripts (examples 13-15) except for MS BL and MS GL1 (examples 16-17):

- (13) A serie dos adverbios he maiz do Vocabulario que da Arte [quem] tiver a do P[adre]e Aguilar os pode ver diffuza(ment)e.  
(GL2, M-49-62)
- (14) A serie dos adverbios he maiz do Vocabulario que da Arte [quem] tiver a do P[adre]e Aguiyar os pode ver diffuza(ment)e.  
(GL3, f. M-15-64)
- (15) A serie dos adverbios he maiz do Vocabulario que da Arte [quem] tiver a do P[adre]e Aguilar os pode ver diffuza(ment)e.  
(VL, f. 237v)
- (16) A serie dos adverbios he mais do Vocabulario que da Arte.  
(GL1, f. M-34-41, L, lines 27-29)
- (17) Os adverbios q(eu) começaõ por *uñ* semnificaõ prezença do lugar ou da pessoa, ou da cousa...  
(BL, f. 30v).

If there is a reason why Aguilar's name is omitted from BL, it is unclear why his work was omitted from GL1 and only twice, while it is found three times in all the other texts. One reason could be that the scribe wanted to omit all references, but he missed one or he simply failed to copy it in the other two contexts, i.e. as he omitted to copy the word *Infinitivo* in the 3<sup>rd</sup> Title (cf. Chart 3). However, this would mean that either GL1 should not be considered the basic version from which the other texts were copied or that these texts should not be considered to be interconnected.

Another reason might be that GL1 is not the oldest manuscript. But rather GL2 should be considered as the oldest text, being the only manuscript without a colophon and whose date has been established on the basis of what is written in the *Catalogue* (1907). This might also explain some

graphic features of this manuscript revealing archaic Portuguese linguistic forms such as the ones listed in Chart 4 (i.e. desinence of the second plural person and the plural nouns in *-aes* rather than in *-ais* [*vos estavaes, geraes*]; the occurrence of *-y-* rather than *-i-* [*muyto, deyxa*]; the occurrence of the auxiliary *haver* with etymological *h-* [*haja*]; the diphthong in the present, first singular [*creio*]). For example, if one looks at the paradigm of the verb *crer* ‘to believe’ graphic differences can be noted (i.e., *creio, creyo, creo*) suggesting that the form with the diphthong *-io-* is older than the form without the diphthong or with the semivowel *-y-*. However, GL3 is evidence of how this criterion cannot be truly reliable. Indeed, it shares many archaic linguistic features of the Portuguese with GL2, although the colophon suggests that it was not copied earlier than 1734, while GL1 was composed in 1670 and displays innovative characteristics compared to these two manuscripts. Another reason as already suggested above, could be that GL2 was copied by a native speaker from an earlier manuscript and re-copied by Father Domingo later in 1734 in GL3. Since these conservative features are not constant in the two manuscripts, they could be taken as interferences from a variety of Portuguese known among natives. In conclusion, these hypotheses must be investigated further through a systematic comparison of all the Portuguese linguistic variants between the two manuscripts since, as suggested above (cf. § 1.2.1). Comparing the handwritings, GL2 should be considered as a copy produced by the same scribe who also copied MS Ind. 223 which was included in one of the six parcels of books sent to Paris by the Jesuit missionaries between 1729 and 1735 (Colas 2012: 74). Therefore, as I will explain in the next paragraph, I maintain the selection of GL1 as my first choice for the transcription of Costa’s *Arte* and its translation.

Another difference between the five manuscript copies relating to contents, which does not appear in Chart 3, refers to the prefatory text opening Costa’s *Arte* between f. M-34-15, lines 11-30 and f. M-34-16, lines 1-4 of the transcribed text (cf. *Part 2* of the book). Therefore, apart

from the transcribed copy, this text is only found in MS VL<sup>87</sup> and in BL. However, it differs between the manuscripts, being longer in the former, because it adds the following paragraph (example 18), and shorter in the latter whose preface only consists of example (19) also found in MS VL:

- (18) I warn those learning this language of the importance of learning it in its own script. Without that diligence one will never achieve the exercise of this language in a way that is understood by the locals without difficulty and conversely knowing how to read this language in its own script is conducive to learning many words, easily to pronounce naturally, to facilitate the tongue in order to speak quickly, given that, most of all happens in the sentence that one has to pronounce and in the modes of speaking in this language which is, perhaps, the most difficult thing. Lastly, I warn that there is no *Arte* without master, therefore a good one should be procured, with whose help the pupil will be ready in three or four months, the pupil will be able to navigate autonomously and never without him.

(translation mine)

[Advirto aos q(ue) aprendem esta lingoa a {impo}rtancia q{ue ha} em aprender # nos proprios ca{racte}rs sem a qual diligencia nunca se alcançará o exercicio desta lingoa de sorte q(ue) venha a ser entendido dos naturais sem difficuld(ade) e pello contrario de saber ler esta lingoa em seus caracteres proprios se segue aprender com facilid(ade) m(uita) copia, pronunciar natural(men)te, facilitar-se a lingoa p(er)a falar de pressado, sobre tudo vense a cair na fraze e modo de falar nesta lingoa, q(ue) he p(or) ventura o mais difficultoso della. No último lugar advirto q(ue) não hà *Arte* sem mestre p(er)o q(ue) deve este buscarse bom, com ajuda do qual em três, ou quatro mezes ficará o discipulo apto p(er)a remar por sej, e sem elle nunca.] (VL, f. 249v, lines 6-19)

- (19) I shall divide this *Arte* into six chapters. In the First I shall state all that pertains to nouns and voices. In the Second, I shall conjugate a verb providing all the modes of speaking there are in this language, and because most of these are made by supplementation I shall note in the margin where they are formed, so that they can be easily used in all verbs. In the third I shall say how the passive voice is formed. In the

---

<sup>87</sup> In a letter dated March 5<sup>th</sup>, 1693 and found in MS Borgiano Latino 747 [ff. 235-254, (ff.239-244 e ff. 246-248 blank), 17<sup>th</sup>-18<sup>th</sup> cent., ff. 393] one can read that the *Arte*, along with Proença's Dictionary and some drawings and exercises, were sent to Pastrizio, Giovanni by Father Pietro Paolo di S. Francesco, Olim duke of S. Elia, Neapolitan, Discalced Carmelite, missionary in the Malabar.

fourth I shall deal with the composition of verbs. In the fifth we shall conjugate the substantive verb and some irregular ones. The Sixth will deal with the other parts of the phrase.

(translation mine)

[Dividerei esta Arte em 6 capitulos. No 1º direi o q(ue) pertence aos nomens e vozes. 2º conjugarei hu(m) verbo pondo nelle todos os modos de fallar q(ue) nesta lingoa hà e p(or)q(ue) os mais delles se faze(m) p(or) suplem(em)to porei os lugares donde se fromaõ p(er)a q(ue) facilm(ent)e se possa uzar delles em todos os verbos. no 3º direj o q(ue) serve p(ar)a formar a voz passiva. No 4º trattareirei da composiçaõ dos verbos. No 5º se conjugará o verbo substantivo e algu(n)s irregulares. No 6º se tratará das mais partes da oraçaõ.] (BL, fol 4.r, lines 1-11)

Finally, GL2 and GL3 have other features in common which are not found in the other manuscripts. Specifically, they share the same palaeographic evidence mainly regarding the Portuguese language and the order in which some Tamil verbal forms are presented within the paradigms. For example, whenever there is a noun declension, the *pulli* is found only on the first word in the nominative form both in GL2 (i.e. ) and GL3 and it is not regularly used. In BL no *pulli* is found, while in GL1 it is not regularly used. Therefore, the *pulli* has been transcribed in the Portuguese version whenever it also appears in the original. In both GL2 and GL3 the Portuguese word for ‘substantive’ is always written *substantivo* rather than *sustantivo*; whenever there is a list with numbers and the corresponding Tamil forms are explained in the text, both in GL2 and GL3 they are preceded by the article *o*; in the explanation of the *Causative mode* both these manuscripts also add the title *item os modos seguintes* before the ten Tamil forms given for this mood. Compared to GL1, they both follow the order 1, 3, 2 for the first three forms while the remaining forms do not differ from GL1, and they both add the title *Negativo* before the last forms from 8 to 10 (cf. *Part 2*). However, while in GL2 the subsequent explanation of the Tamil forms ignores the inverted order and follows the contents as they are listed in GL1, GL3 adapts the explanations to the new order provided, thus 1, 3, 2.<sup>88</sup> Furthermore, both manuscripts display the use of <z> rather than <s>

---

<sup>88</sup> For this concrete example refer to footnote 706 in the Portuguese transcription of GL1 (*Part 2*).

for the representation of the voiced intervocalic sibilant in the Portuguese language as it is found in GL1, in VL, and in BL. Therefore, one finds variants such as *vozes*, *cazos*, *uzo*, *couza*, *maiz*, *prezente*, *dizemos*, *diz* etc. instead of *vos*, *casos*, *uso*, *cousa*, *mais*, *presente*, *dissemos*, *dis*, etc. (see Castro 1991, 2006).<sup>89</sup>

Further variants in the manuscripts are listed below in Chart 4. They also include the innovative verbal morphology of the final ending of the second plural person in *-ais* rather than in *-aes* – the latter because of the syncope of the intervocalic Latin *-D-* (Martins 2016: 14-15); the conservative occurrence of the auxiliary *(h)aver* in composed tense along with the occurrence of the innovative *ter* (i.e. *(h)aver de crer*, *(h)aver de ser* vs. *ter crido*, *ter vindo*, *ter sido*).

**Chart 4 – Some Portuguese linguistic variants in the manuscripts**

As for the Tamil palaeography, there are three elements of writing conventions that should be pointed out: how the *periya R* is represented, if the long [r] differs from the long [ā], and if *ē* and *ō* differ from *e* and *o*.

As for the *Periya Ra* one may notice that:

- it is transcribed with a single loop  in GL1 and with a single and half loop  in GL2 confirming what we suggested above: that these manuscripts are probably older than the others and/or copied by an Indian native. In fact, both ways of writing it, as well as the other Tamil letters, reveal a certain familiarity with the Tamil script, therefore indicating an experienced hand. Finally, the *periya R* in GL2 is rather unusual and therefore easy to identify as being written by the same hand that also wrote the above-mentioned Portuguese-Tamil dictionary kept in the same library under the catalogue number MS 49 (ex MS 36) as well as the Portuguese-Tamil dictionary held at the French National Library under the catalogue number MS Indien 223. This confirms that this cannot be considered an autograph by Costa despite the linguistic peculiarities of the Portuguese language (see *above*) which place the composition of the manuscript between the end of the 16<sup>th</sup> and the beginning of the 17<sup>th</sup> century. It also suggests that the proposed date in the *Catalogue* (1907) of 1731 is reasonable, since it corresponds to the period in which many manuscripts were copied and sent to the King Library of France even though this would question its antiquity compared to the manuscript mentioned below;
- the *periya R* is written with a double loop both in BL  and GL3  revealing not only a later stage of both these manuscripts but also the inexperienced hand of the scribe who copied them. Furthermore, in GL3 the *periya R* resembles the *cinna ra* followed by a long *ā* when it occurs with *ā*, as in VL (*below*);
- the *periya R* is something in between the two previous ones in VL.

Indeed, sometimes it has a single and half loop , sometimes it is written with a double loop  and at other times it resembles the *cinna ra* (*ṛ*) followed by long *ā*: . In any case, the script here also reveals an inexperienced hand with the Tamil script.

As for [ā] and [r] there is no differentiation in all five manuscripts apart from when one finds double dots used as a diacritic above the Tamil symbol for <r> to mark it as a single consonant not followed by *ā*. However, they are only used in GL1 and in GL2 as shown in the following figure taken from the verb paradigm of the *Indicative Actual Present* in GL2.

**Fig. 6 – Diacritics used to mark the single *r***

Finally, in all the manuscripts there is no Modern differentiation between *ē/e* and *ō/o* apart from in GL3 which has the double loop in the *kombo* in the initial list of Tamil letters, but not within the manuscript. In GL1 and GL2 the vowel length is often but not always marked with a diacritic corresponding to a horizontal stroke above the single loop *kombo*.

Another feature that should be considered refers to BL. In Fig. 7 we can observe that the Tamil forms seem to be added to the Portuguese glosses at a second stage and in a different ink. Furthermore, in the whole manuscript it is possible to spot some errors in the matching of the Tamil with the Portuguese glosses, and some blank spaces in correspondence with the gloss for the Tamil form or, in correspondence of the Portuguese form which needed to be translated into Tamil. From a palaeographic point of view, BL shows the *periya Ra* with double loop and the same ligature for consonant plus *ai*.

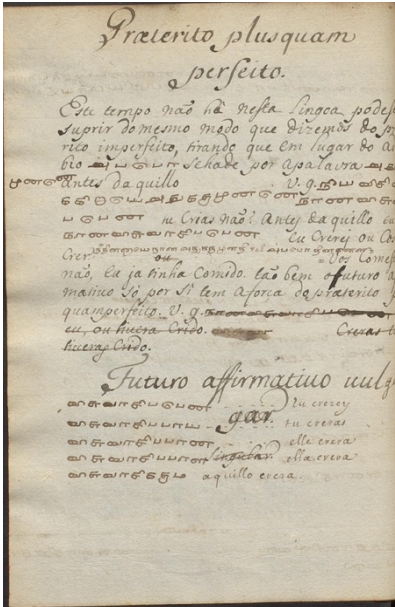

Fig. 7 – Example of later addition of Tamil forms to the Portuguese glosses in BL, f. 13v

#### 1.4 Criteria for selection and transcription of the Portuguese manuscript

The first issue to be explained is the criteria that guided me in the selection of the copy to be used in the transcription of the manuscript. Indeed, as described in the above paragraphs, since there are five (legible) copies of this manuscript, it was necessary to select one of them. In my selection I simply adopted the historical criteria and chose the one which appeared to be the oldest, i.e., the copy of Costa's grammar included in the manuscript copy of Proença's dictionary (GL1). Although internal evidence (see *above*) made me doubt its antiquity when compared to GL2, I have maintained it as my selection not only because the scribe of this manuscript seems to be the same who copied MS Ind. 223, but also for another key reason. I thought it might be useful to have this manuscript version translated into English so that it could be compared with the prefatory texts published in Proença's dictionary printed in 1679 in Amblacat and much later translated into English by Thani Nayagam in 1966. However, any variations found in Costa's other copies have been

pointed out in the footnotes of the Portuguese transcription of the manuscript (cf. *Part 2*).

Secondly, I should explain the criteria of transcription adopted. In transcribing the manuscript, I have been more conservative in the reproduction of the Portuguese version while I have modernised it in its English translation and the reasons for this are twofold: firstly, I believed that the Portuguese text should appear in its original form as much as possible so that its reproduction can be useful not only for discovering how the missionaries described the Tamil language, but also for scholars interested in both the history of the Portuguese language and the Portuguese language as a metalanguage used in the Indian context for the *grammaticisation* of non-European languages; secondly, to have a modernised English translation would be advantageous since the aim of this project is to reveal how the Tamil language was described by this *linguist avant la lettre* in the *lingua franca* used in the academic world today.

Therefore, in my Portuguese transcription, I have limited my intervention on the Portuguese language to the spelling of some basic abbreviations such as the following which were in brackets:

- q' → q(ue);
- p<sup>a</sup> → p(ar)a; p<sup>a</sup>q' → p(ar)a q(ue);
- S.M. → Sua Mercede; V.M. → Vossa Mercede, etc.;
- ...m<sup>te/to</sup> → ...mente, mento
- P<sup>ro/ra</sup> → p(rimei)ro, p(rimei)ra
- nu'qua → nunca
- co'fuzaõ → confuzaõ

I have also differentiated between [u] and [v] usually represented by <v> in the selected manuscripts. On the other hand, I have not modernised the Portuguese representation of sibilants or the transcription of *tilde* for nasalisation which always occurs in the final sound.

As far as the transcription conventions used for the representation of the

Tamil language are concerned, despite the intention of providing the most palaeographic transcription of the original manuscript, I have modernised some representations such as the diphthong (e.g.  $\text{ஔ}$ ) or the *perya Ra* ( $\text{ṙ}$ ) which in the manuscript are represented by the old cluster of Tamil writing (the former) and by a single loop (the latter), at least in the oldest manuscripts dating back to the 17<sup>th</sup> century and early 18<sup>th</sup> century. Conversely, I maintained the long or short *e/o* as they are reproduced in the manuscript. Therefore, if Costa uses the diacritic created for marking [ē] and [ō] which is a horizontal line above the *kombo*, then I used the modern double *kombo*. However, when he has not marked it, I have maintained the short vowel even though one might expect the long one which is, however, correctly restored in the English translation. The same criteria have been applied to the reproduction of *pulli* which appears only if it is in the manuscript. Even in the English translation of the manuscript it has not been restored in the Tamil examples, but it is considered along with the vowel lengths in the transliteration of the Tamil examples into Latin characters following the writing conventions of the *Madras Tamil Lexicon* (MTL). Finally, for differentiating the long [ā] after C from the single [r] I have followed Costa's criteria whenever possible. Therefore, [r], represented by Costa with double dots above the symbol for <r> ṙ, has been reproduced as {ṙṙ} while I have used the modern way of differentiating <ra> from <ā>, hence ṙ for [ra] and ṙā for the long [ā] even though in the manuscript a single symbol (ṙ) marks both.

Regarding the meaning of the brackets used in the Portuguese text:<sup>90</sup>

- **round brackets** mark the resolved abbreviations, i.e., q(ue) as well as portion of text that are difficult to read or that are uncertain;
- variations found in the other manuscripts are always given in footnotes. **Square brackets** mark variations that involve more

---

<sup>90</sup> Information about the criteria for transcription adopted in the English translation are given in footnote 1. For example, **double curly brackets** have been used to mark additions in *Part 3* made in order to disambiguate the meaning or for maintaining a proper syntactic construction in English.

than one single word, i.e. if [nesta materia] is found in the transcribed manuscript means that this specific portion of text is not found in another manuscript or that it is written in another way, for example as *nesta materia*. As stated above, whatever the case, the specific information about the variation is given in the footnote;

- **double square brackets** mark additions made on the basis of the other manuscript copies;
- **curly brackets** may mark both Costa's diacritic {řř} (to be read as [r], see *above*) or a damaged portion of text the transcription of which was possible through another copy of the same manuscript. Curly brackets are also used for indicating the number line of the text.

Finally, the symbol # is used for marking totally illegible portions of text not found or illegible in other manuscripts.

**PART 2**

**ARTE TAMUL COMPOSTA PELLO PADRE BALTASAR  
DA COSTA DA COMPANHIA DE JESUS**

[f. M-34-15]<sup>1</sup>

{29} os mais delles se faze(m) por suplemento porei a [marge(m)]<sup>11</sup> os lugares

<sup>1</sup> The entire manuscript MS GL1 is written in two columns with the sole exception of the portion of text corresponding to what must have been the *Titulo 1º (First Title)* in the original text which is incomplete here but is reproduced at the end of the grammar. Furthermore, as already stated in § 1.2.1, the first part of the manuscript, therefore the grammar, does not have original foliation. For this reason, in addressing each folio, I have adopted the later numeration added at the bottom of each page in pencil that is found in the manuscript. This numeration is formed by the letter M which stands for manuscript, the number 34 which refers to the old catalogue number for this manuscript, and the number of the page. The letters L and R are added following Chevillard's annotation system (Chevillard 2015: 121, footnote 2) and stand for *Left* and *Right* column respectively. The line number of the text is given in curly brackets.

<sup>36</sup> MS GL2: *Tambem uzaõ do plural seguinte கந்தாகககள*. The same paragraph is found in MS GL3 at the end of the paradigm. While next to the singular paradigm, a rectangle on the right side of the page contains the following statement: *Deste plural uza se pera o singular honorifico*. [This part is not found in MS VL].

<sup>37</sup> MS GL2 and MS GL3 give only the Portuguese gloss for the first-person singular in the nominative. MS GL3 also gives the Portuguese gloss for the first-person plural.

<sup>38</sup> This form is missing in MS BL and the Portuguese gloss is *a respeito da Victoria*.

<sup>39</sup> MS BL: the Portuguese gloss is *por amor da Victoria*.

<sup>40</sup> MS GL2 and MS GL3: *Outros modos de fallar*. MS BL: the Portuguese gloss is *p(e)la Victoria*.

<sup>41</sup> MS VL: *Plurale*.

<sup>42</sup> MS GL2 and MS GL3 there are no Portuguese glosses apart from the Nominative singular. MS GL3 gives the case to which the Tamil forms belong: *Ablative quietis, Abl. Instrumentalis, abl. Social* while the remaining are included in *outros modos de falar*.

## [f. MS-34-17B]

L

- {1} {como se estiveraõ dez pessoas e [cinco]}<sup>73</sup>

<sup>66</sup> MS VL: does not gives the Portuguese glosses for the last three forms.

<sup>67</sup> MS BL: this section follows the Singular form and the title is *Ego honorifico*.

<sup>68</sup> MS BL and MS VL: *minha merce*. MS GL3: the Portuguese glosses overlap only partially with MS GL2. They are: *nos ou minha merce; de nossos, ou de minha merce; pera nos ou pera minha merce; em mim, ou nos, ou minha merce; pera mim, etc; comigo ou com minha merce; por amor de nos; pera nos, pera minha merce, ou contra nos*. MS GL2: *nos, ou minha merce; Nossos, nossas, ou minha merce; P.a nos, p.a minha merce; Em mim, ou em minha merce, ou nos, ou minha merce; Por mim, ou [?] o que se segue; Por mim, ou por minha merce; Cómigo, ou com minha merce, em nos, ou minhas; Por amor de mim; Por amor de nos; Por nos ou por minha merce, ou contra nos*.

<sup>69</sup> MS BL: *ou de minha merce*. [Not in MS VL].

<sup>70</sup> See footnote 6, Part 3.

<sup>71</sup> MS GL2 and MS GL3: *diz*.

<sup>72</sup> MS BL and MS VL: *demais*.

<sup>73</sup> MS VL: *sinco*.

<sup>74</sup> MS VL: பொங்கொள.

<sup>75</sup> MS VL: usa.

<sup>76</sup> MS GL2 and MS GL3: place this paragraph at the beginning of the section on *Pronouns*, immediately after the title. It is slightly different: *Advirtase, q(ue) nos dous pluraes seguintes há esta diferença; que நாங்கள dis aparte dos presentes e tem sempre respeito aos demais, sobre os quaes cai [MS GL3= cahe] o நாங்கள v.g. Como se estiverem 10 [MS GL3, dez] pessoas, e dicerem [MS GL3, dissessem] p.a os outras = ide vós, nos ficaremos = vem o நாங்கள e fica நீங்களபொங்கொள நாங்களிருக்கிறொம்: porém se o nos cair [MS GL3, cahir] sobre todos, entã se uza நாம் [MS M-49-5].*

MS BL: this paragraph is as follows – *ad virtase que nestas duas palavras நாம் e நாங்கள há esta diferença que நாங்கள so parte dos presentes e sempre respeita aos demais sobre os quaes caia நங்கள como se estiverem des pessoas e sinco disserem outros sinco ide vos, nos ficaremos நீங்களபொங்கொளநாங்களிருக்கிறொம் porem se a palavra nos cahe sobre todos os dez entã se usa நாம் .நாம்பொன்னொம்.*

<sup>77</sup> MS BL and MS VL: நீய. உனக்காக.

<sup>78</sup> MS GL2: does not give the Portuguese glosses apart from the Nominative and it has உனக்காக, உனைக்கொண்டு.

<sup>79</sup> MS GL3: gives only the first singular and plural glosses.

<sup>80</sup> 'n' is written in the line spacing by a different hand and with a light brown ink.

MS BL: உனைப்பாதது para ti, உனக்காக por amor etc, உனைக்கொண்டு para ti.

{24}	உங்களிடத்திலெ vel உங்களி	Em Vos
{25}	லெ	
{26}	உங்களாலெ	Por Vos

{14}	னிலெ	Nelle
{15}	Instr. அவனாலெ	por elle

<sup>81</sup> In the line spacing, written by another hand and with a light brown ink, there is a partial correction which marks the length of the vowel with a short line above the *kombo*. While in the line spacing below the same hand writes *unkaloṭe*.

MS GL2, MS VL, and MS GL3: உங்களொடெ.

<sup>82</sup> In the line spacing one reads: உங்களெக்காக.

<sup>83</sup> MS GL2 and MS GL3: உங்களைப்பாத்து, vel குறிச்சு, உங்களுக்காக, உங்களைக்கொண்டு.

<sup>84</sup> MS BL: this form occurs after the singular.

<sup>85</sup> See footnote 6, *Part 3*.

<sup>86</sup> One dot above *r* which stands for [ra].

<sup>87</sup> MS GL2 and MS GL3: also adds உமக்காக, உமமைக்கொண்டு.

MS VL: உமமைக்குறிச்சு. MS GL3: only gives the Portuguese glosses for some forms.

<sup>88</sup> MS BL adds: *hé taõ bem honorifico*.

<sup>89</sup> MS GL3: this is the only gloss.

<sup>90</sup> See footnote 6, *Part 3*.

{5} O plural hé	அவ {ர்} கள் etc.	

<sup>91</sup> MS GL2, MS BL, and MS GL3 add: அவனைப்பாதது, vel குறிச்சு; அவனுக்காக; அவனைக்கொண்டு. In this context MS BL does not list these forms in the Ablative as with the previous pronouns.

<sup>92</sup> MS GL3: has only this gloss.

<sup>93</sup> MS BL: also adds அவர்களைப்பாதது, அவர்களுக்காக, அவர்களைக்கொண்டு.

<sup>94</sup> MS GL2 and MS GL3: also add sociolinguistic information stating that: *Os Bramanes fazem este plural em அவள அவாளுடைய* also suggesting that the grammar is not based on this dialect.

<sup>95</sup> MS BL: *Ille honorifico*.

<sup>96</sup> MS GL3: the word is always written *merçe*. The glosses here are provided for the whole paradigm of the *outro singular honorifico*. MS BL: *elle, Senhor*.

<sup>97</sup> MS BL: *d'elle Senhor*.

<sup>98</sup> Both here and in the previous form (line 31), the <r> is written with a single dot above it.

<sup>99</sup> MS GL2: also அவனைப்பாதது *A respeito de sua merce*; அவனாககுறிச்சு *O mesmo*; அவருக்காக *Por amor de V(ossa) merce*; அவரைக்கொண்டு *Por meio de sua merce ou contra sua merce*. *O plural he o mesmo* அவர்கள். [with double dots above r̄]. MS VL: அவர்களுக்க *pera amor de Sua Merced*. MS BL: அவனைப்பாதது *em respeito*; அவருக்காக *Por amor*; அவரைக்கொண்டு.

{24}	தமக்கு	p(er)a sua M(er)ce mesmo

<sup>106</sup> MS GL2 and MS BL: one also finds the form அதுகளைக்கொண்டு but the Portuguese glosses are given only for the first Nominative.

<sup>107</sup> MS VL: the initial <இ> is always realised with the glide <ய>. MS BL: does not give the three Tamil forms.

<sup>108</sup> MS GL2: one reads *vem a ser o seguinte* and *como os de sima*. The remaining text is the same. MS BL: ends with *ille, illa, illud* which occur after the word *sima*. MS VL: *dassima ille, illa, illud*. MS GL3: *de sima*.

<sup>109</sup> MS GL2 and MS GL3: the title is *Do pronome Ipse, Ipsa, Ipsum*.

<sup>110</sup> MS GL3: gives only this first gloss and only the first form has the long *ã*.

<sup>111</sup> MS VL: *pera si mesmo*.

<sup>112</sup> MS GL2, MS VL, and MS BL: with the sole exception of the Nominative, all the forms have a short vowel after 't'. MS VL: *a si mesmo*.

<sup>113</sup> This variant is not found in MS GL2 and MS GL3 while it is also found in MS BL.

<sup>114</sup> MS GL2: provides the Portuguese gloss only for the Nominative form. MS BL: adds the form with கொண்டு. MS VL: *por amor de si mesmo*.

<sup>115</sup> MS GL3: gives only the first gloss.

<sup>116</sup> MS GL3: தாங்களுக்ககு.

<sup>117</sup> MS VL: adds தங்களை etc. *os outros casos Ab qui*. தன்னிலை, vel தன்னிடத்திலை *em si mesmo*; Abl. Instr. தன்னாலெ *pera si mesmo*; Abl. Soc. தன்னொடெ *consigo mesmo*; தனக்காக *por amor de si mesmo*.

 {6} adiectivos]<sup>130</sup> விசுவசிககிற விச  
 {7} வசி{தத} etc. v.g. விசுவசிதத, ம  
 {8} னு{ஷன}, o home(m) q(uem) creo.<sup>131</sup> 2°. [Sup  
 {9} resse suppondo a letra எ co(m) o prono  
 {10} me அவன as 3<sup>as</sup> pessoas de qual

<sup>118</sup> MS GL2: does not include the word mesmo in the Portuguese gloss. It also gives the accusative தமமை and the sociative தமமொடெ along with the following statement which concludes the paragraph: *Cujo plural he como o de sima* தாங்கள. The same happens in MS GL3 where there are also the two forms in பாத்து and க்காக. MS BL: only gives the Portuguese glosses for the nominative, one also finds the other forms with பாத்து, க்காக, கொண்டு.

<sup>119</sup> MS GL3: *Aguilar*.

<sup>120</sup> MS VL: *engannouse*.

<sup>121</sup> MS GL3: *naõ*.

<sup>122</sup> MS BL: does not mention Father Aguilar’s name but rather one reads: *Naõ nã nesta lingoa relativo qui quæ quod e ainda q(ue) algũ digaõ que எனன o hẽ enganaõ se p[or]q(ue) எனன naõ hẽ se naõ perguntando quis vel quod, nẽ se acharã se naõ perguntando*. MS VL: *perguntando*.

<sup>123</sup> MS VL, MS BL, MS GL3: do not have circumflex accent on this word.

<sup>124</sup> MS VL: *refire*.

<sup>125</sup> MS VL: *substantivo*.

<sup>126</sup> [MS BL: this portion is missing].

<sup>127</sup> MS GL2 and MS GL3: *Supprese*.

<sup>128</sup> MS GL2: *porẽm*.

<sup>129</sup> MS VL: *pelos*.

<sup>130</sup> [MS BL: *Supra se esta falta cõ dois modos, por meiro (sic!) ponto participios adiectivos*. MS GL3: *participios adiectivos*.

<sup>131</sup> MS GL2: *Homen, que creo*.

- {11} quer verbo em qualquer tempo,  
 {12} ou numero, ut விசுவசிககிறா  
 {13} என அவன கரையெ {று} வான]<sup>132</sup>  
 {14} [aquelle<sup>133</sup> que cré, salvarse há<sup>134</sup> o pro  
 {15} nome<sup>135</sup> terá masculino, ou femin  
 {16} ino conforme a oração pedir.]<sup>136</sup>  
 {17} **Dos adjectivos**<sup>137</sup>  
 {18} [Naõ ha nesta lingoa falta de adj  
 {19} ectivos,<sup>138</sup> como muitos querem, antes  
 {20} saõ innumeraveis e se poderá [isto aqui  
 {21} mostrar]<sup>139</sup> se naõ fora proprio do Voca  
 {22} bulário, so advirto o q(ue) he proprio da  
 {23} Arte. Seja pois]<sup>140</sup> a p(rimei)ra advertência<sup>141</sup>,  
 {24} [nesta materia,]<sup>142</sup> què todos os adjectivos  
 {25} desta lingoa saõ indeclináveis 2<sup>a</sup>  
 {26} q(ue) todos saõ de huma só forma p(er)a  
 {27} os tres generos 3<sup>a</sup> q(ue) todos se antepoem  
 {28} sempre ao seu sustantivo,<sup>143</sup> tirado al  
 {29} gũs informes como<sup>144</sup> எலலாம  
 {30} சேர் அடங்கலும் சகல்லரும  
 {31} ச {று} வரும<sup>145</sup> ainda q(ue) estes saõ mais

<sup>132</sup> MS BL: *segundo sempre se suppondo a letra எ com o pronome அவன as terceiras de qualquer verbo e qualquer tempo ou numero. Por exemplo விசுவசிககிறவனெனகரையெருவான aquelle que salvarse ha: o pronome serà masculino, feminino, ou neutro, conforma a oracão.*

<sup>133</sup> MS VL: *aquillo.*

<sup>134</sup> MS VL: *há.*

<sup>135</sup> MS VL: *ou.*

<sup>136</sup> MS GL2 and MS GL3 [*creo*]: *aquelle que cree, salvarse ha. O pronome ou terá masculino, ou feminino, conforme a oração pedir.*

<sup>137</sup> MS VL and MS BL: *adiectivos.*

<sup>138</sup> MS VL: *adiectivos.*

<sup>139</sup> [In the other manuscripts the order is inverted: *mostrar isto aqui*].

<sup>140</sup> MS BL: [all this portion has been removed]. It starts the paragraph with *A 1<sup>o</sup> advertencia nesta materia seja que...*

<sup>141</sup> MS VL and the others have a circumflex accent on the final <a>. MS GL2: *advertência.*

<sup>142</sup> [Not in MS GL3].

<sup>143</sup> The same order in listing the rules is found in MS BL, while in the other manuscripts the order is inverted, hence the first warning is that all adjectives have one single form for all the three genders, the second one is that all the adjectives are indeclinable, and the third warning is that they always precede their substantive.

<sup>144</sup> MS GL3: *se vé.*

<sup>145</sup> MS GL3: *சறுரும.* MS VL: *சறுவரும.*

L

- {1} **Presente**<sup>221</sup> **actual do indi**  
 {2} **cativo**  
 {3} நான விசுவசிக்கிறென<sup>222</sup> Eu creio<sup>223</sup>  
 {4} நீ விசுவசிக்கிறாய tu cres  
 {5} அவன விசுவசிக்கிறான elle cre  
 {6} அவள விசுவசிக்கிறாள ella cre  
 {7} அது விசுவசிககுது<sup>224</sup> aquillo cre  
 {8} நாங்கள் விசுவசிக்கிறோம் nos<sup>225</sup>  
 {9} cremos<sup>226</sup>  
 {10} நீங்கள் விசுவசிக்கிறீர்கள்  
 {11} vos credes  
 {12} அவர்கள் விசுவசிக்கிறார்கள்

<sup>212</sup> MS BL: *que como finalmente vem a cair nelles se não pello uso não serve se não pera embarçar e emfadar*

<sup>213</sup> MS VL: *no mismo uso*. MS GL3: *ao mesmo uzo*.

<sup>214</sup> MS GL2, MS GL3, MS BL: *nessa*.

<sup>215</sup> MS GL2: *quaes*.

<sup>216</sup> MS GL2: *demaiz*.

<sup>217</sup> MS BL and MS VL: *deste*.

<sup>218</sup> MS GL3 and MS GL2: *conjugarmos*.

<sup>219</sup> [Not in MS VL].

<sup>220</sup> MS GL2: *maiz*.

<sup>221</sup> MS GL2 and MS GL3: *Prezente*; MS BL: *Indicat. praesente*.

<sup>222</sup> MS VL: has விசுவதி rather than விசுவசி only in the first, the second, and the third (feminine and neuter) person singular of the verb base.

<sup>223</sup> MS GL2: *eu creio*. MS GL3: *eu creyo*.

<sup>224</sup> MS GL2 and MS GL3: விசுவசிக்கிது. MS GL2: the original form transcribed was later modified [with a light brownish ink] in விசுவசிககுது. Furthermore, in both manuscripts two more forms are provided: விசுவசிக்கிறது, விசுவசிககுது, demonstrating how the correction is useless, the last form being different from the first. The same form is also found in MS VL where கு is later corrected and overwritten with கிற.

<sup>225</sup> The first plural is not in MS BL which follows with Singular honorifico placing the following forms: நாம் விசுவாசிக்கிறோம் *nos ou V. M.e cre*; நீர் விசுவாசிக்கிறீர் *V.a M.e cre*; அவர் விசுவாசிக்கிறார் *sua M.e cre*.

<sup>226</sup> MS GL2 and MS GL3: add the title *Plural*.

{30}	விசுவசித்தொம்	Minha m(ercê) cre <sup>254</sup>
{31}	விசுவசித்தீ {ர்}	V(ossa) M(erce) cre <sup>255</sup> ~,~,~

#### [f. M-34-20]

L

{1}	விசுவசித்தா {ர்}	sua M(ercê) cre <sup>256</sup>
{2}	[விசுவசிசொம்] <sup>257</sup> etc. [O Preterito <sup>258</sup>	

Even though this part is not found in MS GL1, written on the top-right margin of f. M-34-19 in a light ink is: (### a let. E pospondo (#####) அபபொ / r he em lugar do preterito [se faz] do futuro.

<sup>243</sup> MS VL: the whole paradigm is with the verb base in தி rather than சி: விசுவதி.

<sup>244</sup> This variant, which is diastatically marked (cf. § 4.4), is absent in MS GL2, MS GL3, and MS VL while it is found in MS BL where the second vowel in the verb stem is always long: *vicuvāci*.

<sup>245</sup> MS BL: *vel சசாய*.

<sup>246</sup> MS BL: *tu cri*.

<sup>247</sup> [Not in MS BL].

<sup>248</sup> MS GL2: *விசுவசித்து*.

<sup>249</sup> MS BL: *Aquello cre. Plural...*

<sup>250</sup> MS VL: *விசுவதித்து*.

<sup>251</sup> MS GL2: the Portuguese glosses stop at the second person singular.

<sup>252</sup> [Not found in MS GL2 and in MS BL where it is included directly in the paradigm]. MS VL: follows with *விசுவசிசரகள். O preterito se fas negativo pospondo a qualquer pessoa யிலலை ut விசுவதித்தெனிலலை. Eu naõ cri*.

<sup>253</sup> MS GL2 and MS GL3: *Preterito honorifico*. MS GL3: writes it on the right margin of the page. MS BL: *Præterito perfeito honorifico*.

<sup>254</sup> MS GL2 and MS VL: *creo*. MS BL: *nos o m(inh) a m(er)ce creo*.

<sup>255</sup> MS GL2: *creo*.

<sup>256</sup> MS BL: *V(ossa) m(er)ce creo*. MS VL ends here.

<sup>257</sup> [Not in MS BL].

- {3} se fas neg(ativ)o pospondo a qualquer  
 {4} das p(esso)as இலலை<sup>259</sup> ut விசுவசித்தெனி  
 {5} லலை. Eu não cri etc.<sup>a]</sup><sup>260</sup>  
 {6} **Preterito plusquamperfeito**  
 {7} Este tempo não há nesta lingoa  
 {8} podese suprir do mesmo modo<sup>261</sup> que  
 {9} [dissemos do]<sup>262</sup> imperfeito, tirando que  
 {10} em lugar do adverbio அப்பொ se  
 {11} há de por a palavra அதுக்குமு  
 {12} னனெ<sup>263</sup> v.g. நீவிசுவசிக்கிறாயெ அதுக்குமுன்னெ நான  
 {13} விசுவசிப்பென, quando tu crias,  
 {14} ja eu tinha crido.<sup>264</sup> Tambem<sup>265</sup> o futu  
 {15} ro afirmativo<sup>266</sup> só per si<sup>267</sup> tem força  
 {16} deste tempo<sup>268</sup> v.g. நான விசுவசிப  
 {17} பென crera eu, ou tinha crido, etc.  
 {18} **Futuro afirmativo vulgar**<sup>269</sup>  
 {19} **singular**  
 {20} விசுவசிப்பென Eu crerei ou cos

<sup>258</sup> MS BL: *perfeito*.

<sup>259</sup> MS BL: *யிலலை assim como...*

<sup>260</sup> MS GL2 and MS GL3: *se se ajuntar a este preterito taõ honorifico, como não honorifico a palavra இலலை faz significaçãõ negativa de sorte, q(ue) se disse assim no prezente, ut நான விசுவசித்தெனிலலை: eu não cri, etc.* MS BL: *விசுவாசித்தானிலலை elle não creõ விசுவாசித்தாவிலலை tu não creste.*

<sup>261</sup> MS GL2: *naõ hã tambem este tempo nesta lingoa: supprese porẽm da mesma sorte.* MS GL3: *Naõ ha nesta lingoa taõbem este tempo: suprese porem de mesma sorte que dissemos do imperfeito.*

<sup>262</sup> MS BL: *dizemos do prãeterito imperfeito.* This paragraph support what I declare in § 1.3: the possibility that GL1 is not the oldest copy of Costa's *Arte* but rather a later reproduction from a manuscript where the paragraph on the imperfect was also included and that the scribe of GL1 missed to copy. See also footnote 53, *Part 3*.

<sup>263</sup> MS BL: *antes daquillo.* Then there is a blank space before the example.

<sup>264</sup> MS BL: there is a difference in the Portuguese gloss: *tu crias naõ? Antes daquillo eu [cria].* நான விசுவாசிப்பென *eu crerej ou costume crer.* நீ தினனாயெ நான அதுக்குமய்னதில vel அப்பொ தினனென *vos comeste naõ, eu ja tinha comido.*

MS GL3: *quando tu creas ja eu tinha crido.*

<sup>265</sup> MS BL: *Taõ bem.*

<sup>266</sup> MS GL2: *do prezente.*

<sup>267</sup> MS VL: *sy.*

<sup>268</sup> MS GL2 and MS GL3: *por si sõ tem força deste tempo, como dissemos do imperfeito.* MS BL: *so por si tem a força do prãeterito plusquamperfeito.* v.g. நான விசுவாசிப்பென *creo eu, ou tivera crido.*

Then, there is a blank space and another scratched Portuguese gloss: *crearas tu, tiveras crido.*

<sup>269</sup> MS GL2: *vulgãr.*

{21}		tumo crer <sup>270</sup>
{22}	விசுவசிப்பாய	tu creras
{23}	விசுவசிப்பான	elle crerâ
{24}	விசுவசிப்பாள	ella crerâ
{25}	விசுவசிககும்	aquille crerâ <sup>271</sup>
{26}		<b>Plural</b>
{27}	விசுவசிப்பொம்	nos creremos
{28}	விசுவசிப்பீர்ர்கள	vos crereis <sup>272</sup>
{29}	விசுவசிப்பார்கள	elles, ellas creraõ
{30}	விசுவசிககும்	aquelas c(ousas) crerã <sup>273</sup> .~.

## R

- {1} [Tem também<sup>274</sup> este futuro signi  
 {2} ficaçã<sup>275</sup> de presente<sup>276</sup> habitual eu  
 {3} costume crer, nos costumamos  
 {4} crer; [e assim nos de mais pessoas.]<sup>277</sup> O<sup>278</sup>  
 {5} futuro விசுவசிககப்பொறென  
 {6} direita(men)te responde ao futuro Lati  
 {7} no; formase do infinito absoluto  
 {8} com o verbo பொறது conjugan  
 {9} dose este no tempo prezente e fican  
 {10} do o infinito imvariavel<sup>279</sup> ut<sup>280</sup>  
 {11} செயயப்பொறென eu farei

<sup>270</sup> As we have already seen in other paradigms, MS GL2 and MS GL3 only give Portuguese glosses for the first form. MS BL: *eu crerey*.

<sup>271</sup> MS BL: once again on this page it is evident how the Tamil forms were added at a later stage, even though it seems to be by the same hand. Not only does the handwriting appear in a more brownish ink, but, as in this folio, the text overlaps the title. For example, here the paradigm of the verb forms is written over the title of the Vulgar Affirmative Future and Singular.

<sup>272</sup> MS BL: *crerey*.

<sup>273</sup> This Portuguese gloss is not in MS BL which adds: *Este futuro tem força de presente* [blank space] *ou futuro*.

<sup>274</sup> MS VL: *Tambem* is written after the word *significação*. MS GL3: *Tem este futuro significação e força de prezente habitual*.

<sup>275</sup> MS GL2: this paragraph is placed after the Singular honorifico. It has the following variants: *significação e força*.

<sup>276</sup> MS GL2 and MS GL3: *prezente*.

<sup>277</sup> [Not in MS GL2 and MS GL3].

<sup>278</sup> MS VL and MS GL3: *segundo*. MS GL2 is: 2°.

<sup>279</sup> MS GL2 and MS GL3: *imudavel*. MS VL: *emvariavel ut செயயப்பமொறீர v(ossa) m(erce) farã*. The mistake in which 'm' is written instead of 'p' is evident.

<sup>280</sup> [This portion is not included in MS BL. It is found in the section of the Negative future. cf. footnote 292].

{12}	செய்யப்பொறாய	Tu farás etc.
{13}	செய்யப்பொறீர் <sup>281</sup>	v(ossa) m(erce) farâ etc. <sup>282</sup>
{14}	<b>Singular honorífico</b> <sup>283</sup>	
{15}	விசுவசிப்பொம	nos cremos
{16}		ou costumamos crer, <sup>284</sup>
{17}	விசுவசிப்பீர்{ர்}	V(ossa) M(erce) crerâ
{18}	விசுவசிப்பா{ர்}	sua m(erce) crerá,
{19}		sua Merce costuma crer.
{20}	<b>Futuro negativo</b>	
{21}	<b>singular</b>	
{22}	விசுவசியென	Eu não crerei <sup>285</sup> ou eu
{23}		naõ costume crer
{24}	விசுவசியாய	tu não crerâs <sup>286</sup>
{25}	விசுவசியான	elle não crerâ
{26}	விசுவசியாள	ella não crerâ
{27}	விசுவசியாது	aquillo não crerâ <sup>287</sup>
{28}	<b>Plural</b>	
{29}	விசுவசியொம	nos não cremos <sup>288</sup>
{30}		[ou não costumamos crer] <sup>289</sup>
{31}	விசுவசியி{ர்}கள் <sup>290</sup>	vos não crereis

### [f. M-34-21]

#### L

{1}	விசுவசியா{ர்}கள்	elles, ellas
{2}		naõ creraõ

<sup>281</sup> MS GL2: *ř* has double dots above it.

<sup>282</sup> MS BL: lacks forms given at lines 11-13 and makes the paradigm of the verb to believe, thus: விசுவாசிக்கப்பொறென *eu crerey*, விசுவாசிக்கப்பொறாய *tu creres*, விசுவாசிக்கப்பொனான *elle crera*.

<sup>283</sup> MS GL2: the Singular honorífico is placed next to the Fut. Aff. Vulg. Sing. and Plu. in a rectangle. The Tamil forms are the same, only the first Portuguese gloss differs from MS GL1: *Minha merce Crerâ*. MS BL: *futuro honorífico afirmativo*. Singular and the Tamil forms are the same but the Portuguese glosses differ: *nos o m(inh)a m(erc)e crera*; *v(ossa) m(erc)e crera*; *sua m(erc)e crera*. MS GL3: places the Singular honorífico after the negative future.

<sup>284</sup> MS GL3: the Portuguese gloss differs, and it is: *minha merce naõ crera*.

<sup>285</sup> MS BL: *crerey*.

<sup>286</sup> MS GL2: *creraz*. MS BL: *creras*. MS GL3: the glosses end here and they start again in the plural forms.

<sup>287</sup> MS GL2: lacks the last three Portuguese glosses.

<sup>288</sup> MS GL2: *creremos*.

<sup>289</sup> [Not in MS GL2].

<sup>290</sup> MS GL2: விசுவசியீர்ர்கள்.

- {3} விசுவசியாது Aq(uel)las c(ousas)<sup>291</sup> naõ creraõ<sup>292</sup>  
 {4} Formase<sup>293</sup> o futuro negativo do pr  
 {5} ezente mudando o *cren* ou *gren*  
 {6} em *yen*.<sup>294</sup> Ita பிடிக்கிறென fica  
 {7} பிடியென Eu naõ pegarei<sup>295</sup> etc.<sup>a</sup>  
 {8} Os q(ue) antes de *cren*, ou *gren* tem, [V]  
 {9} perdemno passando o *cren*, ou *gren*  
 {10} a *en* ut பொறுக்கிறென<sup>296</sup> fica  
 {11} பொறென eu naõ perdoarei<sup>297</sup> de<sup>298</sup> சொ  
 {12} லலுகிறென<sup>299</sup> fica சொல்லெ  
 {13} ன<sup>300</sup> eu naõ direi. Os q(ue) antes do *cren*<sup>301</sup>  
 {14} tem *a*<sup>302</sup> [ante este *a* co(m) *e*' se mite<sup>303</sup> v  
 {15} consoante vg. de]<sup>304</sup> நடக்கிறென  
 {16} {fica} நடவென eu naõ andarei<sup>305</sup>

<sup>291</sup> MS GL2: *couzas*.

<sup>292</sup> MS BL: differs in all the Portuguese glosses for these Tamil forms: *nos o m(inh)a m(erce) e naõ crera; v(ossa) m(erce) naõ crera, s(u)a m(erce) e naõ crera, aquillo naõ crera*. After the paradigm there is a paragraph about the Vulgar future: *O futuro vulgar affirmativo tem taõ bem forma do presente habitual, eu crejo ou costume crerer, assim nas da mais pessoas tem outro 2º futuro, a saber. விசுவாசிக்கப்பொறென porem o qual responde diretamente ao futuro latino e se forma do infinito absoluto como præsente do verbo பொறுது gr. o qual ultimo verbo se conjugao outro ficando invariavel செய்யப்பொறென eu faço பாற்கப்பொறாய tu olharas வாப்பொறான elle virà*. MS VL and MS GL3: follow with Singular honorifico. விசுவசியென *minha merced naõ crerà*, விசுவசியீர் *v(ossa) m(erce) naõ crerà*; விசுவசியார். MS GL3: also adds: *crer tendo sempre (sic) a negaçãõ do presente habitual*.

<sup>293</sup> MS GL2 and MS GL3: *este*. MS BL: *O futuro negativo se forma do presente mudando க்கிறென ou கிறென em என. பிடிக்கிறது: பிடியென eu naõ aprenderej படிக்க (#): படியென e naõ pegarei mas os verbos que antes do க்கிறென ou கிறென tem உ perdem aquello e todo o que segue, em cujo lugar se poẽ என பொறுக்கிறென eu perdoõ, fica பபொறெ? [blank space] Naõ perdoarei சொல்லுகிறென eu digo se fas சொல்லென eu naõ digo. Verbos autem que antes de க்கிறென tem muda aquelle க்கிறென em வென ut நடக்கிறென eu procedo se faz நடவென eu naõ procederej*.

<sup>294</sup> MS GL2: விசுவசிக்கிறென *fica* விசுவசியென = பிடிக்கிறென *fica* பிடியென *eu naõ pegarei*.

<sup>295</sup> MS VL: *pagueri*.

<sup>296</sup> MS GL2: *eu perdoõ*.

<sup>297</sup> MS GL2: *perdoarey*.

<sup>298</sup> MS VL: *chollugren*.

<sup>299</sup> MS GL2: *eu digo*.

<sup>300</sup> MS VL: சொல்லென.

<sup>301</sup> MS GL2 and MS GL3: *gren* ou *cren*.

<sup>302</sup> MS GL2: *perdem no passando o cren a vem*. MS GL3: *tem =a= naõ perdem no passando o =cren= a =ven=*.

<sup>303</sup> MS VL: *mette*.

<sup>304</sup> [Not in MS GL2 and MS GL3].

<sup>305</sup> MS VL: *andarej*.

- {17} [de பறக்கிறென eu Voo fica பற  
 {18} {வென} eu não voarei.]<sup>306</sup>  
 {19} [Singular honorifico  
 {20} விசுவசியாம                    minha (merce) ñoã crerâ

 {22} விசுவசியா{ர்ர்}                sua m(erce) ñoã crerâ  
 {23}                                        ou sua M(erc)ê ñoã costuma(va) crer  
 {24}                                        tendo sempre a negação do presente  
 {25}                                        habitual. ~.~.~.~.~.~.~.~.~.]<sup>307</sup>  
 {26}

### Imperativo absoluto

- {27}                    singular  
 {28} 1. விசுவசீ.<sup>308</sup> ..... > Cré tu<sup>309</sup>  
 {29} 2. விசுவசிப்பாயாக >  
 {30} 3. விசுவசியும்..... > Crea v(ossa) m(erce)<sup>310</sup>  
 {31} 4. விசுவசிப்பீராக.....<sup>311</sup> >

## R

- {1} விசுவசிக்க<sup>312</sup>                    crea V(ossa) M(ercê) .5  
 {2} விசுவசிக்கட்டு                creya elle<sup>313</sup> .6  
 {3}                    Plural  
 {4} விசுவசிப்பொம                creamos nos<sup>314</sup> .7  
 {5} விசுவசியுங்கொள<sup>315</sup>                crede vos .8  
 {6} விசுவசிக்கட்டு<sup>316</sup>..... > creaõ elles .9  
 {7} விசுவசிக்கக்கடவா{ர்ர்}கள 317 >

<sup>306</sup> [Not in MS GL2, in MS BL, and in MS GL3]. MS VL: *voarej ou costume voar*.

<sup>307</sup> MS GL2 and MS GL3, as well as in MS VL (cf. footnote 292), it occurs after the paradigm of the negative future while in MS BL it occurs neither there nor here.

<sup>308</sup> In the line spacing there is also this form: *விசுவரிந்துக{ரொ}* written by another hand. MS GL2, MS GL3, and MS VL: the 'i' is short. MS GL2: also adds the form *விசுவசித்தக்கொ*.

MS BL: the verb form is preceded by the second singular pronoun நீ, the vowel of the verb root is long while the final vowel is short, hence: *vicuvāci*.

<sup>309</sup> MS GL2: gives the following Portuguese glosses for the same Tamil verb form: *cre tu; tu creras, hay de crer, absolutamente; creia V(ossa) M(erc)e; creia elle, dixá o crer; creiamos nos, creremos; விசுவசியுங்கொ credovoz; விசுவசிக்கட்டுங்கொள vos o deixai o crer; creiaõ elles*. MS BL: *cre tu: crea V(ossa) m(erce); deixé crer; creamos; crede vos; creaõ elles; deixo crer*.

<sup>310</sup> MS GL2: *creia*. MS VL: *creya*. Furthermore, the Tamil verb forms are enumerated from 1 to 9.

<sup>311</sup> MS BL: these two forms are inverted.

<sup>312</sup> MS GL3: overwritten on *விசுவசிப்பொம*.

<sup>313</sup> MS GL3: adds *deixa o crer*.

<sup>314</sup> MS GL3: adds *creremos*.

<sup>315</sup> MS GL3: *விசுவசியுங்கொ. Crede vos*.

<sup>316</sup> MS GL3: *விசுவசிக்கட்டுங்கொள. Nos o deixar crer*.

- {8} A primeira figura<sup>318</sup> se forma<sup>319</sup> do  
 {9} presente<sup>320</sup> tirandolhe<sup>321</sup> o *cren* ou *gren*,<sup>322</sup>

 {16} விசுவசியாததினபடியெ  
 {17} விசுவசியாதிருககுமாபபொலெ<sup>566</sup>  
 {18} como eu naõ cri, creste etc. [serve in=  
 {19} declinavel p(er)a todas as pessoas e n(umer)os]<sup>567</sup>  
 {20} O P(ri)meiro [negativo]<sup>568</sup> se forma do infi  
 {21} nito negativo adjectivado co(m) படி  
 {22} யெ. O 2º do genitivo do mesmo  
 {23} infinito neg(ativ)o<sup>569</sup> [assi como tu etc<sup>a</sup>]<sup>570</sup> sus  
 {24} tantivado.<sup>571</sup> O 3º do dativo do mēs  
 {25} mo infinito negativo<sup>572</sup> ita நீயிடறாத

<sup>559</sup> As stated in footnote 545 MS BL provides another form here described as follows: *O 1º serve indeclinavelmente pera todas as pessoas e numeros do preterito conforme o pronome e se forma do genitivo do participio do preterito em lhe acrecentando படியெ vel படி.*

<sup>560</sup> MS BL: this is the sixth form and it says *do participio presente, com as particulas sobre dittas.*

<sup>561</sup> This is the seventh rule in MS BL which more correctly says: *se forma da 3º pessoa do neutro do futuro accrescentando அ e taõ bem a particula பொலெ.*

<sup>562</sup> MS GL2: *faço.*

<sup>563</sup> MS VL and MS GL3: *கறபிககுமாபபொலெ como V(ossa) M(erce) manda, ou mandou.*

<sup>564</sup> MS GL2: *O 6º formase do preterito assim como o 2º.* MS GL3: *O 6º formase do preterito com as (#) particulas படியெ ou படி.* MS BL also provides rules for the other forms. Therefore, one reads: *O 3º se forma do participio do preterito ajuntandolhe படியெ vel படி serve pera o preterito como o 1º. O 4º se forma do participio do preterito em lhe ajuntandolhe பொலெ* [this is the 2<sup>nd</sup> form in MS GL1 – vicuvacittäppöle]. *O 5º se forma do genitivo do participio presezente ajuntandolhe as particulas படியெ vel படி.* [this is the 7<sup>th</sup> form in MS GL1 – vicuvacittatīnapāṭiyē]. MS VL one also finds: *விசுவசிததினபடியெ, விசுவசிததபடி vel. படியெ como eu, tu creste. Serve indeclinavelmente pera todas as pessoas e numeros do preterito conforme o pronome que se antepuser. Formaoe do preterito, assim como o 1º. 2º. 3º do presente.*

<sup>565</sup> MS BL: *Os modos negativos destes conjunctivos seraõ estes.*

<sup>566</sup> *ru* written over *tu*. MS BL and MS VL: *விசுவாசியாததுககுமாபபொலெ como eu, tu naõ creyo.*

<sup>567</sup> [Not in MS BL].

<sup>568</sup> [Not in MS VL].

<sup>569</sup> MS GL2 and MS GL3 continue with: *O 2º do genitivo do mesmo infinito negativo com படியெ.*

<sup>570</sup> [Not in MS VL and MS GL3].

<sup>571</sup> MS GL2: *O 2º do genitivo do mesmo infinito negativo com படியெ.* MS VL: *substantivado.*

- {20} 7. விசுவசித்ததுககு வெண்டி n(umer)os do
- {21} 8. விசுவசியாத்துககாக presente<sup>709</sup>
- {22} 9. விசுவசியாததைககண்டு para tod
- {23} 10. விசுவசியாத்துககு வெண்டி<sup>710</sup> as as
- {24} do pretérito, por eu não ter crido etc.<sup>a711</sup>
- {25} [Os modos seguintes se formão]<sup>712</sup> 1<sup>o</sup>
- {26} do infinito ab(solut)o com கொ
- {27} ளள [ita இருக்ககொளள
- {28} por estar].<sup>713</sup> 2<sup>o714</sup> 5<sup>o</sup> et 9<sup>o</sup> saõ accusa
- {29} tivos<sup>715</sup> do infinito sust(anti)vo<sup>716</sup> co(m) கண்டு

<sup>705</sup> MS VL: deletes this form and overwrites எனகிறென. It also adds: *item os modos seguintes*.

<sup>706</sup> MS GL2, as well as in MS GL3, the word *sustantivo* is always written as *substantivo*, and in front of each number there is the article *o*. They also add the title *item os modos seguintes* before the forms given between the numbers 1 to 10 in the following order: 1, 3, 2 for the first three, and the same order for the remaining forms. Furthermore, before the last forms (from 8 to 10) one finds the title *Negativo*. MS BL [this portion] is: *conjugando os amobos verbos conforme os tempos numeros e pessoas e metendo (###) dous என்று gerundio do verbo ஆகிறென. Taõ bem se usaõ os modos seguintes*:

<sup>707</sup> MS VL: adds the final length vowel above.

<sup>708</sup> MS VL: *pera eu ter crido etc.* is the Portuguese gloss for forms 4 to 8. *Por eu naõ ter crido* is the Portuguese gloss for forms 9-10.

<sup>709</sup> MS GL2: *porêm o 5<sup>o</sup>, 6<sup>o</sup> e 7<sup>o</sup> saõ p(er)a todos os numeros, e pessoas do preterito*.

<sup>710</sup> MS GL3 after the 7<sup>th</sup> form follows with: *Indeclinavelmente pera todos os números e pessoas do presente, poreu o 6 e 7<sup>o</sup> saõ pera todos os numeros, e pessoas do preterito*. Hence, one finds the title for *Negative* and in the following folio it provides the remaining forms, from the 8<sup>th</sup> to 10<sup>th</sup>.

<sup>711</sup> MS BL: the Portuguese glosses are not legible because of the binding of the manuscript. It follows here with: *Indeclinaveis pera todas as pessoas e numeros*.

<sup>712</sup> MS VL: *Formaose o 1<sup>o</sup>...* [Not in MS GL3 which has: *O 1<sup>o</sup> se forma*].

<sup>713</sup> [Not in MS BL].

<sup>714</sup> MS GL2: even though the order of the provided forms is inverted, thus the form corresponding to the second one is *vicuvācikkīratukkāka* rather than *vicuvācikkīrataikkōṇṭu*, once the explanation about their derivation is provided, the order followed is the one given in MS GL1. Hence, *vicuvācikkīratukkāka* is explained as the accusative of the substantive infinitive which in reality corresponds to the third form corresponding to *vicuvacikkīrataikkōṇṭu*. On the contrary, MS GL3, which has the same inverted order found in MS GL2 addresses the correct number in the paragraph devoted to the explanation of forms as the following paragraph shows: *O 3<sup>o</sup>. 5<sup>o</sup> e 9<sup>o</sup>. Saõ accusativos do infinito substantivo com கண்டு gerundio de காணாகிறது. Ver.*

<sup>715</sup> MS VL: *accusativos*.

- {30} gerundio de காண்கிறது ver, [ite  
 {31} வாறதைக்கண்டு por vir]<sup>717</sup> O 3<sup>o</sup><sup>718</sup>.6°.

## R

 {16} விசுவசியாதவண்ணம்<sup>725</sup> eu, tu, etc.  
 {17} [1° he]<sup>726</sup> o dat(iv)o do infinito sust(antiv)o,<sup>727</sup>  
 {18} [2°]<sup>728</sup> a 3<sup>a</sup> pessoa neutra do futuro af:  
 {19} firmativo com படிக்கு ite பொ  
 {20} கும்படிக்கு p(er)a que vâ. O 3° he  
 {21} o infinito abs(olut)o com வெண்டி.

<sup>716</sup> MS GL2 and MS BL: *substantivo*.

<sup>717</sup> [Not in MS BL].

<sup>718</sup> MS GL2: the number 3° is crossed out and correctly substituted with the number 2 – see footnote 714 – the number 2 seems to be written in the same hand. MS GL3: one finds directly the number 2.

<sup>719</sup> [Not in MS BL].

<sup>720</sup> This is overwritten on the word que while in MS GL2 and MS VL the title is *P(ar)a q(ue)* and in MS BL is *Causativos p(ar)a que*. In MS GL3 the title is *Para que*.

<sup>721</sup> MS BL: the first form is விசுவாசிக்கிறதுக்காக.

<sup>722</sup> MS GL2: *creia*. MS VL: *creyo*.

<sup>723</sup> Before these three forms in MS GL2 and MS GL3 there is the title *Negativo*.

<sup>724</sup> MS GL2: *creia*.

<sup>725</sup> All these forms in MS GL3 are enumerated before, they go from 1 to 8.

<sup>726</sup> MS BL: [*o 1° destes modos hê*]. MS VL: *Formaoese o 1° do*. MS GL2 and MS GL3: the number is always preceded by the article *O*.

<sup>727</sup> MS BL, MS GL3, and MS GL2: *substantivo*.

<sup>728</sup> MS BL: [*O 1° hê a*]. It repeats 1° rather than 2°.

- {22} O 4° o infinito abs(olut)o somente<sup>729</sup>. O 5°  
 {23} o mesmo com தககதாக. O 6° o<sup>730</sup> dat(iv)

## R

<sup>940</sup> MS GL2: *couzas foraõ*.

<sup>941</sup> MS BL: all the forms included in the preterit are without Portuguese glosses. MS VL: there is also the singular honorific of the preterit, ஆனொம *minha merce foi*, ஆனீர் *V(ossa) merce foi ஆனார sua merce foi*.

<sup>942</sup> MS GL2: *serârs*. MS GL3: *seras* only.

<sup>943</sup> MS VL: places the honorific after the plural future.

<sup>944</sup> MS GL2 and MS GL3: *couzas*.

<sup>945</sup> MS BL: there is only the first form, ஆகென.

<sup>946</sup> MS GL3: does not have the paradigm for *fazer* but only for *ser*.

{1}	[ஆகாள	Ella ño <sup>947</sup>
{2}	ஆகாது	aquillo ño será .~.~.

<sup>1532</sup> MS GL2 and MS GL3: *e em outras materias o uzo declararâ tudo*.

<sup>1533</sup> MS BL: *materia*.

<sup>1534</sup> This *Titulo* is not included in MS BL and MS VL: *regra*. However, in MS VL, in the printed version of Proença's dictionary there are two paragraphs which are similar to what is found in Costa's *Arte*. The first one is entitled *Da ordem, qve se gvarda neste vocabylario* where Proença explains the reason why he decided to follow the order of the Portuguese alphabet, rather than the Tamil alphabet. The second is entitled: *Da figura, valor, e pronuncia dos caracteres tamvlicos. Das letras vogaes. Das consoantes* where, like Costa, Proença explains the main features of the Tamil letters. For a translation into English of these portions of Proença's paragraphs see Thani & Xavier (1966: 13-20).

MS GL3: the 4<sup>th</sup> *Title* is *Da collocação das lestras Tamues pela ordem do nosso alfabeto* that corresponds to the 5<sup>th</sup> *Title* in MS GL2.

<sup>1535</sup> MS GL2: *ortographia*.

**PART 3**

**TAMIL ARTE COMPOSED BY FATHER BALTASAR DA  
COSTA OF THE COMPANY OF JESUS**

[f. M-34-15]

{11}

{12-13}

{14}

{15}

***The second Title***  
***which includes the recapitulation of the Arte Tamulica,***  
***composed by Father Balthazar da Costa***  
***of the Company of Jesus***<sup>1</sup>

<sup>1</sup> In the English translation a partial modernisation of linguistic terms seemed necessary in some contexts in order to avoid misleading interpretations of specific categories. Furthermore, sometimes words in double curly brackets ({{ }}) have been added when necessary to disambiguate the meaning or for maintaining a proper syntactic construction in English. As it occurred for the Portuguese transcription of the manuscript, apart from the double curly brackets to mark added portions of text for the sake of a better comprehension, the single curly brackets within the text have been used to mark ligatures or words which are difficult to read.

Even though at the time in which Costa's *Arte* was presumably composed (supposedly the beginning of the 17<sup>th</sup> century) the English language was still undergoing some linguistic changes for which it was still possible to find both *thou, thee, and ye, you* for the second person singular and plural respectively, or termination like *-eth, th* along with *-es, -s* for the 3<sup>rd</sup> person singular in verbal declension (Francovich Onesti and Digilio 2004: 71-80), I have chosen the Modern English grammatical forms (e.g. *you, -ed, etc.*) and lexicon while maintaining as faithfully as possible the syntax and the style used in the Portuguese text, similar to the elaborate hypotaxis of 16<sup>th</sup>-17<sup>th</sup> cent. English.

As for the Tamil words, I have preferred to maintain the original transcription as found in the Portuguese manuscript for the sake of the originality of the text. However, as a help for those who are not familiar with the Tamil script but who are interested in the general topic of 'Latin grammars of non-European languages', I have transliterated the Tamil examples following the *Madras Tamil Lexicon* (henceforth MTL) conventions. Consequently, I have added – in round brackets – a transliteration next to each Tamil example in order to provide the correct transcription of Tamil forms. Therefore, in transliteration, I have disambiguated between the long and short *e/o*, the long *ā* and the *ra*, I have added *pulli* and vowel length where required (i.e. the verb 'to believe' always written as விசுவசி = *vicuvaci* in the manuscript has been transliterated as *vicuvāci*). The translation of each Tamil nominal and verbal form is based on the Portuguese gloss provided in the transcribed manuscript – in *italic*. If no gloss was provided in the transcribed manuscript, I used the other copies of Costa's *Arte* and the main secondary source such as Proença's dictionary, for being contemporaneous to Costa's *Arte*. In this case the gloss in *italics* is included into double square brackets.

Whenever necessary and possible, further or more correct translations of the Tamil forms have been provided in footnotes. Whenever Proença's dictionary could not help, I used two other main sources: the *Dravidian Etymological Dictionary* by T. Burrow and M. B. Emeneau (1961, 1968, henceforth DED) and the *Combined Tamil dictionaries Search. Digital Dictionaries of South Asia* (CTDS) generated by dsal@chicago.edu and available at the URL: <https://dsal.uchicago.edu/dictionaries/tamil/>. The latter retrieves information from Johann Philipp Fabricius' *J. P. Fabricius's Tamil and English dictionary* (1972<sup>4</sup> [1770]); Na. Kadirvelu Pillai's *N. Kathiraiver Pillai's Tamil Moli Akarathi: Tamil-Tamil dictionary* (1928); David W. McAlpin's *A core vocabulary for Tamil* (1981); Pavoorchatram Rajagopal Subramanian's *Kriyavin tarkalat Tamil akarati: Tamil-Tamil-Ankilam* (1992); *Tarkalat Tamil maraputtotar akarati: Tamil-Tamil-Ankilam* (1997); University of Madras. *Tamil lexicon* (1982 [1924-1936, 1939]; henceforth MTL); and Miron Winslow's *A comprehensive Tamil and English dictionary of high and low Tamil* (1862). The exact source from which data has been taken are always detailed.

Last, but not least, the lexicon of grammatical terms and categories has not been modernized, unless necessary for a better comprehension: my attempt has been to respect Costa's terminology

{16} As those who come to learn the Tamil language do so after eight  
 {17} or ten years of tedious studies, since it already takes so long to know  
 it by heart, it is certain that the abundance  
 {18} of rules and exceptions, which some Tamil grammars are full of,  
 {19} cause them impatience and annoyance, the barbaric nature  
 {20} of this language being already so dissonant and foreign to  
 Europeans. It seems to me that  
 {21} to overcome these inconveniences it would be helpful to recompile  
 in  
 {22} very clear brevity what seems to me necessary  
 {23} to learn this language in a short time, leaving the essential and  
 leaving out anything which may cause  
 {24} confusion and tedium as unnecessary for beginners,  
 {25} as well for experts. [All the rest] can be experienced by practice  
 {26} To this end, I will divide this Recapitulation into six chapters. In the  
 First,  
 {27} I will state all that pertains to nouns and pronouns. In the Second, I  
 will conjugate a verb providing all the modes of speaking<sup>2</sup> there  
 are in this language and, because  
 {28} most of these are made by supplementation,<sup>3</sup> I will note in the

---

as much as possible. For this reason, for translating the technical terms, I have referred to the English Grammars dated presumably from the same period, such as *The Preface in, A Dictionary of the English Language: in which the Words are Deduced from their Originals, Explained in their Different Meanings, and Authorized by the Names of the Writers in whose Works they are found. Abstracted from the Folio Edition By the Author Samuel Johnson... To which is prefixed, a Grammar of the English Language. In Two Volumes, 1828, by Johnson Samuel 1709-1784.* However, any time I have modernized or opted for a specific choice which differs in some way from the original Portuguese manuscript, I have provided clarifying footnotes.

Furthermore, I preferred to maintain the original title and not provide a translation of it since I could not find a correct equivalent of it. The choice of the term *accidence* (see James 2000) would have been in my opinion limitative and arbitrary. Indeed, the term can either refer to the exclusive inflection of noun or the rudiments of grammar, and this is not the case for Costa's work, or to the first principles or elementary stage of a subject. Even though Costa specifies that his aim is to state in his *Arte* only what is strictly necessary for learning the Tamil language (cf. f.-M-34-15, line 22), he never defines his *Arte* as incomplete as Henrique Henriques (1520-1600) does in the manuscript copy found in Lisbon (Cod. 3141) or as Philippus Baldaeus (1632-1672) states in its copy of Aguilar's *Arte* (Cod. Orient. 283).

To summarise, the principle adopted was to find a reasonable compromise between making the text accessible to a wider public without sacrificing the original style and terminology of the text.

<sup>2</sup> Since Costa here refers both to what today we would call *moods*, as well as to different linguistic strategies employed for marking emphasis and focus or for quoting, I have preferred to translate the Portuguese expression *os modos de fallar* with the *modes of speaking* instead of '[verbal] moods'.

<sup>3</sup> *Supplementation* should be intended as *suffixation*.

In VL (f. 249v) the copyist adds a further passage. See example 18 in *Part 1*.

margin the places in  
 {29} {{which}} they are formed so that they can be easily used in all  
 verbs.

**[f. M-34-16]**

{1} In the third, I will state how to form the passive voice. In the fourth, I  
 {2} will deal with the composition of verbs. In the fifth, the substantive  
 verb and some irregular

{3} verbs will be conjugated. The Sixth will deal with the other parts  
 {4} of speech.

{5}

**First Chapter**

{6}

**Of Nouns, and Pronouns**

{7} As with Latin grammar, the diversity of declensions is collected  
 according to the

{8} different terminations of the oblique cases, and in this Tamil language

{9} all noun endings are the same: assuming there is but one declension  
 in this language,

{10} I will decline only four types of nouns that in this

{11} language show some variation; so that the knowledge of these  
 makes

{12} the declension of others much easier and clearer.

**LEFT SIDE OF THE PAGE (henceforth L)**

{13}

**First Noun**

{14}

**Singular**

{15} N(ominative)	கந்தன்	(kartan)	Lord
{16} Gen(itive)	கந்தனுடைய	(kartanūtaiya)	Of the Lord
{17} Dat(ive)	கந்தனுக்கு	(kartanukku)	For the Lord
{18} Acc(usative)	கந்தனை	(kartanai)	To the Lord
{19} Voc(ative)	கந்தனெ	(kartanē)	Oh Lord
{20} Abl(ative)	<i>quietis</i> கந்தனிடத்தில <sup>4</sup>	(kartanittil) or ட	
{21}	{ததி} <sup>5</sup> லெ <sup>6</sup>	(tattile)	In the Lord

<sup>4</sup> The *Ablative quietis* that Costa describes is represented by the postposition *itam* (DEDR 434: place) in the oblique form ending in *-it-* followed by the locative case *-il*, the latter obtained by grammaticalization of the word *il* meaning ‘home, place’ (DEDR 494). This locative marker is used in Standard Modern Tamil for nouns marked as [+human] while in Spoken Tamil the correspondent form is *kiṭṭe*. However, one can notice that Costa also records the simple locative *-il*, as a second option, even for the noun *kartan* despite being [+human]. The optionality is inverted in the other noun forms which are [-human]. (cf. footnote 12 below).

{22}	Instrumental/causal Abl(ative)	கந்தனால (kartanāl) or னாலெ (nāle)	
{23}			<i>By the Lord</i>
{24}	Sociative Abl(ative)	கந்தனொடெ (kartanōṭe) <sup>7</sup>	<i>With the Lord</i>
{25}	Other cases	கந்தனைப்பாதது <sup>8</sup> (kartanai.p pāttu) or	
{26}	and modes of speaking	குறிச்சு <sup>9</sup> (kuriccu)	<i>In regards to the Lord</i>
{27}		கறதனுக்காக (kartanukkāka)	<i>For the love of the Lord</i>
{28}		கந்தனைக்கொண்டு <sup>10</sup> (kartanai.k koṇṭu)	<i>By the Lord</i>
{29}			<i>or through the Lord</i>
{30}			

### Plural

### RIGHT SIDE OF THE PAGE (henceforth R)

{14}	N(ominative)	கந்த{ர்}	<sup>11</sup> (kartar) <i>Lords, etc.</i>
{15}	Gen(itive)	கந்தருடைய	(kartarutaiya)
{16}	Dat(ive)	கந்தருக்கு	(kartarukku)
{17}	Acc(usative)	கந்தரை	(kartarai)

<sup>5</sup> The curly brackets here indicate that there is a ligature in the manuscript for ததி (*titi*). I am indebted to Giovanni Ciotti for the interpretation of this ligature which is not constantly used since Costa often prefers the extensive Tamil form ததி. However, the same ligature is widely used in the manuscript version of Proença's dictionary.

<sup>6</sup> The ending in e of the ablative and instrumental case below is considered to be a feature typical of Spoken Tamil. Schiffman (1999: 31) states that "many traditional grammarians prefer to think of *le(e)* as derived from இல் with an additional emphatic *ee* ஏ added. [...] in final position all long vowels tend to become short". See also Andronov (1989) and Asher (1985).

<sup>7</sup> Costa describes three ablatives, each with a morphologically distinct function: stative (*-iṭṭil*), instrumental (*-āl*), and sociative (*-oṭe*). Further details in Muru (2010: 99-105) and James (2019: 1-20).

<sup>8</sup> As seen in the Portuguese transcription of Costa's *Arte* (cf. *Part 2*) this form alternates in being with or without a long *ā*. In any case it can be taken as the spoken variant of the *viṇaiyeccam* of the verb *pār* 'to see' grammaticalised into the postposition *pārttu* (LT) and *pāttu* (ST) meaning 'towards'. See Lehmann (1989: 129), Schiffman (1999:30), and Steever (2005: 232).

<sup>9</sup> Proença (GL1, f. 329, L, line 25) provides the following translation for குறிச்சு: *p(ro)p(ter) com acc(u)sat(iv)o* [on account of, with accusative]. *kuriccu* should be considered as the Spoken Tamil variant of the *viṇaiyeccam* *kurittu* of the verb *kuṛi-ttal* in Proença's dictionary (GL1, f. 329, 235r, original foliation, R, lines 7-8) meaning *assinalar, determinar, aprestar, ite' tanger busio* [to mark, determine, set and furthermore, to blow a conch].

<sup>10</sup> In Standard Modern Tamil the forms to which Costa refers under the label *Other cases and modes of speaking* are bound postpositions governing an accusative (see Lehmann 1989: 129-131). Therefore, the spoken variant of *kurittu* (*kuriccu* discussed in footnote 9), the *viṇaiyeccam* *koṇṭu* with a meaning of instrumental, the *viṇaiyeccam* *pārttu* with the meaning 'towards' (see footnote 8) governing the accusative case, and *āka*, the infinitive of the verb *ā(ku)-tal* 'to become', which is a bound postposition governing the dative case *-ukku* with a meaning of benefactive. For further details, see Muru (2010: 105-108) and James (2019: 1-20).

<sup>11</sup> In Proença (GL1, f. M-34-289, R, line 7), கந்த{ர்} (*kartar*) is taken as a variant of the singular, rather than a plural and it is specified (lines 27-30) that the plural regularly used is *kartakkal*, while *kartar* is used as Singular honorific.

{18}	Voc(ative)	கந்தரெ	(kartarē)
{19}	Abl(ative) <i>quietis</i>	கந்தரிடத்தில	(kartariṭattil) or கறத
{20}		ரிடத்திலெ	(kartariṭattile)
{21}	Instrumental/causal Abl(ative)	கந்தராலெ	(kartarāle) or கறதரால
		(kartarāl)	
{22}	Sociative Abl(ative)	கந்தரொடெ	(kartarōṭe)
{23}		கந்தரைப்பாதது	(kartarai.p pāttu) or
	கற்தரைக		
{24}		குறிசுசு	(kartarai.k kuriccu)
{25}		கற்தருக்காக	(kartarukkāka)
{26}		கற்தரைக்கொண்டு	(kartarai.k koṇṭu) <i>For the Lord</i>
{27}		This plural is always used for	
{29}		the Singular honorific (or for)	
{29}		the plural is regularly used	
{30}		கற்தாக்கள	(kartākkaḷ).~.~.~

#### [f. M-34-17]

#### L

{1}	<b>Singular</b>		<b>2<sup>nd</sup> Noun</b>	
{2}	Nominative	செயம	(ceyam)	<i>Victory</i>
{3}	Gen(itive)	செய{த்தி}னுடைய	(ceyattinūṭaiya)	<i>Of the victory</i>
{4}	Dat(ive)	செயத்துக்கு	(ceyattukku)	<i>For the victory</i>
{5}	Acc(usative)	செயத்தை	(ceyattai)	<i>The victories (sic)</i>
{6}	Voc(ative)	செயமெ	(ceyamē)	<i>Oh victory</i>
{7}	Abl(ative) <i>quietis</i>	செயத்திலெ <sup>12</sup>	(ceyattile)	<i>In the victory</i>
{8}	instrumental/causal Abl(ative)	செயத்தினால	(ceyattināl)	<i>By the victory</i>
{9}	Sociative Abl.	செயத்தொடெ	(ceyattōṭe)	<i>With the victory</i>
{10}		செயத்தைப்பாதது	(ceyattai.p pāttu) or குறிசுசு	(kuriccu)
{11}		செயத்துக்காக	(ceyattukkāka)	
{12}		செயத்தைக்கொண்டு	(ceyattai.k koṇṭu)	
{13}			<b>Plural</b>	
{14}	Nominative	செயங்கள	(ceyaṅkaḷ)	<i>Victories</i>
{15}	Gen(itive)	செயங்களுடைய	(ceyaṅkaḷūṭaiya)	<i>Of the victories</i>
{16}	Dat(ive)	செயங்களுக்கு	(ceyaṅkaḷukku)	<i>For the victories</i>
{17}	Acc(usative)	செயங்களை	(ceyaṅkaḷai)	<i>The victories</i>

<sup>12</sup> In this case the only locative case is the one used for nouns marked as [-human] in Spoken Tamil, therefore locative *-il* + final *-e* (see Schiffman 1999: 31).

{18}	Voc(ative) செயங்களெ (ceyaṅkaḷē)	<i>Oh victories</i>
{19}	செயங்களிலெ (ceyaṅkaḷile)	<i>In the victories</i>
{20}	செயங்களினாலெ (ceyaṅkaḷiṅāle)	<i>By the victories</i>
{21}	செயங்களொடெ (ceyaṅkaḷōṭē)	<i>With the victories</i>
{22}	செயங்களைப்பதது ( <i>sic!</i> ) (ceyaṅkaḷai.p pāttu) or குறிச்சு (kuriccu)	

{23}	செயங்களுக்காக (ceyaṅkaḷukkāka)	
{24}	செயங்களைக்கொண்டு (ceyaṅkaḷai.k koṇṭu)	

{25} **3<sup>rd</sup> Noun**

{26} Of those ending in டு (tu) and doubling

{27} ட (t) in oblique cases of the singular.

{28} **Singular**

{29}	Nom(inative) வீடு (vīṭu)	<i>House</i>
{30}	வீடுனுடைய (vīṭunuḷaiya)	<i>Of the house</i>
{31}	வீடுக்கு (vīṭukku)	<i>For the house</i>
{32}	வீட்டை (vīṭtai)	<i>The house</i>

**R**

{1}	Voc(ative) வீடெ (vīṭ[t]ē)	<i>Oh house</i>
{2}	Abl(ative) <i>quietis</i> வீட்டிலெ (vīṭṭile) <sup>13</sup>	<i>In the house</i>
{3}	Instrumental Abl(ative) வீட்டினாலெ (vīṭṭiṅāle)	<i>By the house</i>
{4}	Sociative Abl(ative) வீட்டொடெ (vīṭṭōṭe)	<i>With the house</i>
{5}	வீட்டைப்பாதது (vīṭṭai.p pāttu) or குறிச்சு	
{6}	வீட்டுக்காக (vīṭṭukkāka)	
{7}	வீட்டைக்கொண்டு (vīṭṭai.k koṇṭu)	

{8} **Plural**

{9}	வீடுகளை (vīṭukaḷai)	<i>Houses</i>
{10}	வீடுகளுடைய (vīṭukaḷuṭaiya)	<i>Of the houses</i>
{11}	வீடுகளுக்கு (vīṭukaḷukku)	<i>For the houses</i>
{12}	வீடுகளை (vīṭukaḷai)	<i>The houses</i>
{13}	வீடுகளெ (vīṭukaḷē)	<i>Oh houses</i>
{14}	வீடுகளிலெ (vīṭukaḷile)	<i>In the houses</i>
{15}	வீடுகளினாலெ (vīṭukaḷiṅāle)	<i>By the houses</i>
{16}	வீடுகளொடெ (vīṭukaḷōṭe)	<i>With the houses</i>
{17}	வீடுகளைப்பாது (vīṭukaḷaip. pāttu) and குறிச்சு (kuriccu)	
{18}	வீடுகளுக்காக (vīṭukaḷukkāka)	

<sup>13</sup> As in the previous paradigm, here also, the locative case is the one used for [-human] nouns.

{19}	வீடுகளைக்கொண்டு (vīṭukaḷai.k koṇṭu)		
{20}	<b>4<sup>th</sup> Noun</b>		
{21}	Of nouns ending in று (ru)		
{22}	and doubling the ற (r) in oblique cases

{26}	Sociative Abl(ative)	என்னொடெ (ennōṭe)	<i>with me</i>
{27}		எனனைப்பபாதது (ennai.p pāttu) or குறிசுசு (kuriccu)	
{28}		எனக்காக (enakkāka)	<i>For my love</i> <sup>14</sup>
{29}		எனனைக்கொண்டு (ennai.k koṇṭu)	<i>By means of myself</i>
{30}			<i>or against myself</i>
{31}			

### Plural

### R

{1}	நாங்கள	(nāṅkaḷ)	<i>We</i>
{2}	எங்களு[டைய]	(eṅkaḷuṭaiya)	<i>ours</i>
{3}	எங்களுக்க	(eṅkaḷukku)	<i>For us</i>
{4}	எங்களை	(eṅkaḷai)	<i>to us</i>
{5}	எங்களிடததிலெ	(eṅkaḷiṭattile)	<i>In us</i>
{6}	எங்களாலெ	(eṅkaḷāle)	<i>By us</i>
{7}	என்னொடெ	(eṅkaḷōṭe)	<i>With us</i>
{8}	எங்களைப்பபாதது	(eṅkaḷai.p pāttu) or குறிசுசு (kuriccu)	
{9}			<i>with respect to us</i>
{10}	எங்களுக்காக	(eṅkaḷukkāka)	<i>For our love</i>
{11}	எங்களைக்கொண்டு	(eṅkaḷai.k koṇṭu)	<i>By means of us or</i>
{12}			<i>against us</i>
{13}			Other plural and honorific
{14}			<b>Singular</b>
{15}	Nom(inative)	நாம (nām)	<i>we (or My mercy)</i>
{16}	Gen(itive)	நமமு{டைய} (nammuṭaiya)	<i>Our</i>
{17}	Dat(itive)	நமக்கு (namakku)	<i>for us or for my mercy</i>
{18}	Acc(usative)	நமமை (nammai)	<i>to us or to me</i>
{19}	Abl(ative) <i>quetis</i>	நமமுடையயிட{ததி}லெ (nammuṭaiya.y iṭattile)	
{20}	Instr(umental) Abl.	நமமாலெ (nammāle)	
{21}	Sociative Abl.	நமமொடெ (nammōṭe)	
{22}		நமமைப்பபாதது (nammai.p pāttu) or குறிசுசு (kuriccu)	
{23}		நமக்காக (namakkāka)	<i>for our love</i> <sup>15</sup>
{24}		நமமைக்கொண்டு (nammai.k koṇṭu)	<i>for us</i>

<sup>14</sup> The literal translation of this form would be *for the sake of me* rather than *for my love*.

<sup>15</sup> The correct gloss here should be *for our benefit*.

- {25} or for me (hon) or against  
 {26} us  
 {27} Be warned that between these two words நாம (nām)  
 {28} and நாங்கள் (nāṅkaḷ) there is the difference  
 {29} that நாங்கள் (nāṅkaḷ) concerns only part of those [persons]  
 {30} present and always with respect to those  
 {31} which are referred with நீங்கள் (nīṅkaḷ) <sup>16</sup>

#### [f. MS-34-17B]

#### L

- {1} {as if there were ten persons and five  
 {2} say to the other five, *you go, we will*  
 {3} *stay*, the நாங்கள் (nāṅkaḷ) occurs and be-  
 {4} comes நீங்களெப்பாங்கொள (nīṅkaḷ pōṅkaḷ),<sup>17</sup> நா  
 {5} {ங்கள்} {ருக்கிறொட (nāṅkaḷ irukkīrōm)}. However, if the *we*  
 {6} refers to all ten {{persons}} then we use  
 {7} நாம (nām).

#### {8} Pronoun You {9} Singular

{10} N(ominative)	நீ (nī)	<i>You</i>
{11} Gen(itive)	உன்னுடைய (unṇuṭaiya)	<i>Yours</i>
{12} Dat(ive)	உனக்கு (uṇakku)	<i>For you</i>
{13} Acc(usative)	உனை (uṇnai)	<i>To you</i>
{14} Abl(ative) <i>quietis</i>	உனனிட {ததி} லெ (uṇṇiṭattile) or உனனி	

<sup>16</sup> Costa explains the difference between the two Tamil pronouns for the first-person plural with the use of an example. Therefore, he does not omit to differentiate between the *inclusive* (nām) and *exclusive* (nāṅkaḷ) pronoun. However, he does name it, nor does he select a label for it.

<sup>17</sup> This form is the second person plural pronoun of the imperative also attested in Beschi (1738 [1728]: 61, § IV, par. 69; Mahon 1848: 52, Section IV, par. 69) who considers it as a polite form. The same form is also found in Andronov (1989: 228) where the suffix *-umkool* is reported as being the second person plural suffix of the Imperative in Literary Tamil even though the only forms given in Andronov (1989: 172-173) in discussing the imperative are *uṅkaḷ* and *um*. In Costa's *Arte* this termination occurs in other three contexts: when he describes the *Imperative*, in particular the *absolute*, the *permissive*, and the *prohibitive*. However, *poṅkaḷ* could also be considered as a dialectal variant of the Spoken Tamil *pōṅkaḷ*. Indeed, the suffix marker *-nkaḷ* has been recorded as being one of the finite verb terminations in Colloquial Tamil by Zvelebil (1963b: 109-118). Zvelebil states that "the paradigm of finite verb forms is one of the proofs of the existence of a distinct speech-form of Tamil which may be called STANDARD COLLOQUIAL TAMIL (SCT) and which is different from the local dialects as well as from the literary language [...] This type of speech seems to me to be based on the speech of middle-class non-Brahmin (specially *Vellāla*) urban population of the communicative centres like Madurai, Tiruchirappalli and Madras" (Zvelebil 1963b: 109-110). As underlined in the *Introduction*, Costa worked with the *Vellāla* community and in the areas listed in Zvelebil (ibid.)

{15}	லெ (unnilē)	<i>In you</i>
{16}	உன்னாலெ (unnāle)	<i>By you</i>
{17}	உன்னொடெ (unnōṭe)	<i>With you</i>
{18}	உன்னைப்பாத்து (unnai.p pāttu) or குறிச்சு (kuriccu)

{31}	உம{மு}டைய (ummuṭaiya)	<i>Of your mercy</i>
{32}	உமக்கு (umakku)	<i>For your mercy</i>

## R

{1}	Acc(usative)	உமமை (ummai)	<i>Your mercy</i>
{2}	Abl(ative)	<i>quietis</i> உமமுடையயிட{த்தி}லெ (ummuṭai.y iṭattile)	<i>In your mercy</i>
{3}	Instrumental Abl(ative)	உமமாலெ (ummāle)	<i>By your mercy</i>
{4}	Sociative Abl(ative)	உமமொடெ (ummōṭe)	<i>With your mercy</i>
{5}	உமமைப்பாத்து (ummaippāttu) or குறிச்சு (kuriccu)		
{6}	<b>The Plural</b> நீங்கள் (nīṅkaḷ) as above.		
{7}	<b>Pronoun he (ille)</b>		
{8}	<b>Singular</b> <sup>20</sup>		
{9}	Nom(inative)	அவன (avaṇ)	<i>He</i>
{10}	Gen(itive)	அவனுடைய (avaṇuṭaiya)	<i>His</i>
{11}	Dat(ive)	அவனுக்கு (avaṇukku)	<i>For him</i>

<sup>18</sup> This is obviously an error of the copyist who wrote *le* instead of *lo*.

<sup>19</sup> Today, the Portuguese language also distinguishes between honorific (*você/Sua senhoria*) and non-honorific pronouns (*tu/vos*), while in the English language the distinction survived only until Middle English (cf. footnote 1 above). However, following the criteria stated in footnote 1 I have modernised the pronoun forms to Modern English.

<sup>20</sup> Costa only provides a paradigm for the distal singular pronoun: *he, that man* even though he specifies the proximate form (*ivāṇ*) at the end of the paragraph on pronouns.

{12}	Acc(usative)	அவனை (avaṇai)	To him
{13}	Abl(ative)	அவனிட{ததி}லெ (avaṇiṭattile) or அவனி	
{14}		லெ (avaṇile)	In him
{15}	Instrumental	அவனாலெ (avaṇāle)	By him
{16}	Sociative	அவனொடெ (avaṇōṭe)	With him
{17}		<b>Plural</b>	
{18}		அவர்கள் (avarkaḷ)	They
{19}		அவர்களுடைய (avarkaḷuṭaiya)	Theirs
{20}		அவர்களுக்கு (avarkaḷukku)	For them
{21}		அவர்களை (avarkaḷai)	To them
{22}		அவர்களிட{ததி}லெ (avarkaḷiṭattile)	In them
{23}		அவர்களாலெ (avarkaḷāle)	By them
{24}		அவர்களொடெ (avarkaḷōṭe)	With them
{25}		<b>Another Singular [that is] honorific<sup>21</sup></b>	
{26}		<b>Singular</b>	
{27}	Nom(inative)	அவ{ர்ர்} (avar)	his/her mercy
{28}	Gen(itive)	அவருடைய (avaruṭaiya)	of his/her mercy
{29}	Dat(itive)	அவருக்கு (avarukku)	for his/her mercy
{30}	Acc(usative)	அவரை (avarai)	to his/her mercy (sic!)
{31}	Abl(ative)	quietis அவரிடததிலெ (avariṭattile)	in his/her mercy
{32}	Instrumental Abl(ative)	அவராலெ (avarāle)	by his/her mercy

#### [f. M-34-18]

#### L

{1}	Sociative Abl(ative)	அவரொடெ <sup>22</sup> (avarōṭe)	with his/her mercy
{2}		அவரைக்குறிச்சு (avaraikkuriṅcu)	for respect
{3}			of his/her mercy
{4}	அவருக்காக (avarukkāka)		for the love of his/her mercy
{5}		the Plural is அவ{ர்ர்}கள் <sup>23</sup> (avarkaḷ)	see above
{6}		<b>Pronoun She</b>	
{7}		<b>Singular</b>	

<sup>21</sup> Typical of the Standard Modern language is to use the epicene pronouns as honorific singular forms, otherwise *avar* should be taken as the variant of *avarkaḷ* for the third pronoun *they, those persons*.

<sup>22</sup> In the manuscript there is a dot above the letter <r> in order to disambiguate it from the following symbol which is part of the kombo for [o]. Costa explains these orthographic conventions in the 6<sup>th</sup> Title. The same diacritics is used at line 5 where it is rendered with {ர்ர்}.

<sup>23</sup> This form is frequently used following proper names and designation for the expression of a special degree of respect (Andronov 1989: 102) and it is not used in the Classical language.

{8}	Nom(inative)	அவள	(aval)	<i>She</i>
{9}	Gen(itive)	அவளுடைய	(avaluṭaiya)	<i>Her</i>
{10}	Dat(ive)	அவளுக்கு	(avalukku)	<i>For her</i>
{11}	Acc(usative)	அவளை	(avalaṭai)	<i>To her</i>
{12}	Abl(ative) <i>quietis</i>	அவளிடத்திலே	(avalitattilē)	<i>In her</i>
{13}	Instrumental	அவளாலே	(avalaṭāle)	<i>By her</i>
{14}	Sociative	அவளொடெ	(avalaṭōṭe)	<i>With her</i>
{15}	Plural	அவ{ர்}கள்	(avarkal)	like the
{16}				masculine
{17}		<b>Neutral Pronoun That [<i>illud</i>]</b>		
{18}		<b>Singular</b>		
{19}	Nom(inative)	அ[து]	(atu)	<i>That</i>
{20}	Gen(itive)	அதினுடைய	(atinuṭaiya)	<i>Of that</i>
{21}	Dat(ive)	அதுக்கு	(atukku)	<i>For that</i>
{22}	Acc(usative)	அதை vel அதை	(atai or attai)	<i>To that</i>
{23}	Abl(ative) <i>quietis</i>	அதிலே	(atile)	<i>In that</i>
{24}	Instrumental Abl(ative)	அதினாலே	(atināle) or அததலே ( <i>sic</i> )	
		(attāle)	<i>By that</i>	
{25}	Sociative Abl.	அதொடெ or அததொடெ	(atōṭe or attōṭe) <sup>24</sup>	<i>With that</i>
{26}		அதுக்காக	(atukkāka)	
{27}		<b>Plural</b>		
{28}		அதுகள்	(atukal)	<i>those things</i>
{29}		அதுகளுடைய	(atukaluṭaiya)	<i>Of those things</i>
{30}		அதுகளுக்கு	(atukalukku)	<i>For those things</i>
{31}		அதுகளை	(atukalaṭai)	<i>those things</i>
{32}		அதுகளிலே	(atukalile)	<i>In those things</i>
{33}		அதுகளாலே	(atukalaṭāle)	<i>By those things</i>

## R

- {1} அதுகளொடெ (atukalaṭōṭe) *With those things*
- {2} அதுகளுக்காக (atukalukkāka) *{for love of those things}*
- {3} The pronouns this {{man}} (*iste*), this {{woman}} (*ista*), this {{thing}} (*istud*)
- {4} become இவன (ivan), இவள (ivaṭ), இது (itu) declined
- {5} as those above.
- {6} **Pronoun Himself (*Ipse*)<sup>25</sup>**

<sup>24</sup> Neuter pronoun of the colloquial language and in particular those of the Eastern dialects frequently join the case suffix by means of the euphonic increment *-it-* (Andronov 1989: 107).

{7}		<b>Singular</b>	
{8}	தான	(tāṇ)	<i>Himself</i>
{9}	தானனுடைய ( <i>sic</i> )	(taṇṇuṭaiya) <sup>26</sup>	<i>Of himself</i>
{10}	தானககு ( <i>sic</i> )	(taṇakku)	<i>For himself</i>
{11}	தானனை ( <i>sic</i> )	(taṇṇai)	<i>To himself</i>
{12}	தன்னிலெ	(taṇṇile) or தன்னிடத்திலெ (taṇṇittille)	<i>in himself</i>
{13}	தன்னாலெ	(taṇṇāle)	<i>By himself</i>
{14}	தன்னொடெ	(taṇṇōṭe)	<i>With himself</i>
{16}		<b>Plural</b>	
{17}			
{18}	தாங்கள	(tāṅkaḷ)	<i>Oneselves</i>
{19}	தாங்களுடைய ( <i>sic</i> )	(tāṅkaḷuṭaiya)	<i>Of oneselves</i>
{20}	தங்களுககு ( <i>sic</i> )	(tāṅkaḷukku)	<i>etc.</i>
{21}		<b>Singular honorific</b>	
{22}	தாம	(tām)	<i>his/her own mercy</i>
{23}	தமமுடைய	(tammuṭaiya)	<i>of his/her own mercy</i>
{24}	தமககு	(tamakku)	<i>for his/her own mercy</i>
{25}		<b>Plural</b> தாங்கள (tāṅkaḷ) etc. and above.	
{26}		<b>Of the Relative</b> <sup>27</sup>	
{27}	There is no Relative <i>who</i> ,		
{28}	<i>what, which (qui, quæ, quod)</i> and when F. Aguilar		
{29}	in his <i>Arte</i> says that என்ன (eṇṇa) is (the relative pronoun),		
{30}	he is mistaken because என்ன (eṇṇa) is nothing more than		
{31}	who ( <i>quis</i> ), or what ( <i>quid</i> ), nor		

<sup>25</sup> This paragraph illustrates the three reflexive pronouns of the Tamil language: *tāṇ* (whose base is *taṇ*), *tām* (whose base is *tam*), *tāṅkaḷ* (whose base is *taṅkaḷ*) even though Costa underlines the anaphoric function of this pronoun. See § 4.4.2 in *Conclusion*.

<sup>26</sup> One would have expected, as in the other forms of the paradigm, the oblique form *taṇ* – as it appears in the transliteration, rather than *tāṇ* – as it appears in the Tamil transcription.

<sup>27</sup> Costa recognizes that the Latin relative pronoun does not exist in Tamil, therefore the relative construction differs from his language of reference. However, despite this fact, the relative clause is still possible, and it is realized through two specific linguistic features of the language: the use of adjectival participles and the use of clitics. As I discussed in my presentation at ICHoLS XVI (2021) Costa does not look for a categorial form in Tamil corresponding to the relative pronoun – as he accuses Aguilar to have done – but rather, he looks for a structure which may be semantically compared to the meaning provided by the relative pronoun in Latin. In doing so he is guided by a conceptual transfer, rather than by a categorial one – despite starting from the latter. He finds two different ways to convey a relative sense in Tamil: the first is to make use of the adjectival participle (*peyareccam*), the second refers to a structure where a finite clause is embedded with the clause final clitic *-ē* before a noun phrase as complement to that Noun Phrase. The head Noun Phrase always consists of a remote demonstrative Noun Phrase as in the example provided by Costa.

- {32} could it be found except in asking e.g. என்னமனு  
 {33} ஷன (enna maṇuṣaṇ)? *what man?* and never

**[f. M-34-not numbered, a – misplaced at the beginning of the manuscript]**

**L**

- {1} will it mean the man who or the man that, so that it  
 {2} refers to the substantive which must be the  
 {3} relative.  
 {4} This lack can be made up for  
 {5} in two ways, first by the adjectival participles  
 {6} விசுவசிக்கிற (vicuvācikkira) விசு  
 {7} வசி{தத} (vicuvācitta) etc. e.g. விசுவசிதத, ம  
 {8} னுஷன (vicuvācitta maṇuṣaṇ), *the man who believed*. Second,  
 {9} by adding the letter எ<sup>28</sup> (ē) to the pronoun  
 {10} அவன (avan) to the third person of any  
 {11} verb in any time  
 {12} or number, as in விசுவசிக்கிறா  
 {13} னெ அவன கரையெ {று} வான (vicuvācikkirāṇē avan  
     karaiyē(r)ruvāṇ)  
 {14} *that one who believes* (emph), *that one will be saved*, the Pro {noun}  
 {15} will be masculine or femini {ne}  
 {16} according to the clause.  
 {17} **Of Adjectives**  
 {18} There is no lack of adjectives in this language,  
 {19} as many would wish [to sustain], on the contrary,  
 {20} they are innumerable, and we can show here  
 {21} whatever does not pertain to the voca-  
 {22} bulary. I advise here only on what pertains to the  
 {23} Arte. Let the first warning  
 {24} regarding this matter be that that all the adjectives  
 {25} in this language are indeclinable; 2<sup>nd</sup>  
 {26} they all have a single form for  
 {27} the three genders; 3<sup>rd</sup> that they are all prefixed  
 {28} to their substantive, except  
 {29} for some misformed<sup>29</sup> ones such as எல்லாம (ellām)

<sup>28</sup> Among its functions, the clitic -ē is used as an emphatic marking the prominence of a specific part of the sentence.

- {30} சே{ர்ர்} (cēr)<sup>30</sup> அடங்கலும் (aṭaṅkalum)<sup>31</sup> சகலரும் (cakalarum)  
 {31} ச{று}வரும் (caruvarum),<sup>32</sup> although these are more

## R

- {1} substantives than adjectives, all meaning  
 {2} *everything*, and *everyone*. Also  
 {3} those formed from numeral nouns,  
 {4} which are called cardinals; e.g. ஒரு (oru)  
 {5} இரண்டு (iraṇṭu) etc. *one*, *two*, etc. should be postponed  
 {6} when the particle or conjunction உம் (um)  
 {7} is added to them as in நாளெ  
 {8} மும் (nāl eḷum); *all seven days* etc.  
 {9} The adjectives are formed in three  
 {10} ways. First, from the third persons of the  
 {11} Present, Preterit<sup>33</sup> and negative Future.  
 {12} In the present and the preterit, losing  
 {13} the last ன (ṇ) and reducing the long ஆ (ā)  
 {14} into short அ (a), விசுவசிக்கிறான (viccuvācikkirāṇ)  
 {15} *he believes*, becomes விசுவசிக்கிற (vicuvācikkira), from  
 {16} விசுவசித்தான (viccuvācittāṇ), becomes விசுவசித்த (viccuvācitta).

### Thing

- {17} *that believed*. In the negative future it loses  
 {18} the ன (ṇ), but not the *long a*, as in விசு  
 {19} வசியான (viccuvāciyāṇ) விசுவசியா (viccuvāciyā) or விசு

<sup>29</sup> The Portuguese word *informes* should be understood as ‘which does not possess the same nature’. I have rendered it as ‘misformed’ on the suggestion of Erin McCann (CSMC Hamburg) to whom I am indebted.

<sup>30</sup> Proença’s dictionary (GL1, f. M-34-471, R, line 30) states the meaning *as omnis, doī (as any kind of, all)*. In Winslow’s (1862: 415-416) and Fabricius (1972 [1770]: 447) dictionaries it is considered a verb that is used adverbially meaning *wholly*.

<sup>31</sup> Proença’s dictionary (GL1, f. M-34-86, L, lines 7-8) states the meaning *as tudo posponse item todos* ‘whole’, it is placed after such as ‘all’. It is an adverb meaning *all*.

<sup>32</sup> As Giovanni Ciotti suggests, these are Sanskrit words. Hence, *caruvarum* from *sarva* means ‘everything, each’ and *cakalarum* derived from *sakala* means ‘whole, all, everyone’.

<sup>33</sup> Even though the Portuguese word *Preterito* finds a correspondent in the English word *Preterit*, the two words encode different meanings in the two languages. It refers to a verbal tense in Portuguese, while it expresses aspectuality in English. However, in this context, I have used the English *Preterit* instead of *Past*, so as not to alter the original grammatical terminology and not to modernise it. Indeed, *Preterit* was the common word for expressing the category of past tense in English Grammars of the 17<sup>th</sup> century, as found in Samuel Johnson (refer to footnote 1 above). The same criteria has been adopted in the translation of the Portuguese *neutro* for which I have chosen *neutral* rather than *netuer*.

- {20} வசியாத (viccuvāciyāta) in which ...*da*... is added in place  
 {21} of [ன] (ṇ)] *the thing in which I do not believe*,  
 {22} or *did not believe*. 2<sup>nd</sup>, they are formed from any  
 {23} substantive to which will be added உள  
 {24} ள (uḷḷa) participle of the verb உணடு (uṇṭu);  
 {25} or ஆன (āṇa) participle of the verb ஆ  
 {26} கிறென (ākīrēṇ); or இல்லாத (illāta) negative participle of  
 {27} the verb இலலை (illai), or {ஆகா (ākā) or }  
 {28} ஆகாத (ākāta) negative of ஆகிறென (ākīrēṇ)<sup>34</sup>  
 {29} e.g. from மகிமை (makimai) *greatness* மகிமை  
 {30} யுள (makimai.y uḷḷa) *large thing*, கடி  
 {31} {னம் (kaṭiṇam) *difficulty* கடினமான (kaṭiṇamāṇa)

**[f. M-34-not numbered, b – misplaced at the beginning of the manuscript]**

**L**

- {1} *difficult thing*,} from சுத்தம் (cuttam)<sup>35</sup> *cleanliness*  
 {2} சுத்தமான (cuttamāṇa) *clean thing*, சுத்த  
 {3} மிலலா (cuttam illā) [*impureness*], or சுத்தமில்லாத (cuttam illāta)  
 {4} *impure thing*. Third, they are formed from any  
 {5} noun ending in *am*, we remove  
 {6} the *m* e.g. of கடினம் (kaṭiṇam), *harshness*  
 {7} கடின (kaṭiṇa) *harsh thing*, from சுத்தம் (cuttam)  
 {8} *cleanliness* சுத்த (cutta) *clean thing*, from  
 {9} அலப்பம் (alappam) *insignificance* அலப்ப (alappa)  
 {10} *insignificant thing*. etc. Fourth, whenever  
 {11} two substantives are added one to the other,  
 {12} the first is constructed as an adjective  
 {13} e.g. குளி{ர்} காற்று (kuḷir kārru) *cold*  
 {14} *wind* வெள்ளைசீலை (vellai.c cīlai) *white cloth*,  
 {15} where குளி{ர்} (kuḷir) and வெள  
 {16} ளை (vellai) are substantives, the first  
 {17} meaning *cold*, and the 2<sup>nd</sup> *whiteness*.  
 {18} **Of Genders**

<sup>34</sup> Costa lists here the different *peyareccam* and verbal forms that have undergone grammaticalisation becoming adjectival suffixes: *il-tal*, *uḷ-tal*, *āku-tal*.

<sup>35</sup> The Sanskrit for it is *shudhadham* which means ‘pure’. Thanks to Giovanni Ciotti for the suggestion.

- {19} The masculine gender is called *Pu*  
 {20} *lingam* புலிங்கம, the feminine  
 {21} *strilingam* {ஸ்த} துறிலிங்கம the  
 {22} neutral நடபுஞ்சகலிங்கம *Nabu{nsa*  
 {23} *galin}gam*.<sup>36</sup> Doctrine on this matter  
 {24} {is very easy,} because, as  
 {25} {the adjectives are} of a single form  
 {26} {and indeclinables,} there is no  
 {27} doubt, except in the conjugation of  
 {28} verbs. Indeed, the only thing one must be  
 {29} warned of is that: only names of God  
 {30} and of men are masculine;  
 {31} only those of women are feminine;

## R

- {1} {those of the angels are found to be masculine}  
 {2} and neutral; all the rest are neutral.  
 {3} This word பிள்ளை (*pillai*) *boy*  
 {4} is neutral. However, all names  
 {5} of human beings can be made elegant  
 {6} and honorifics. [Also] the 2<sup>nd</sup> person  
 {7} honorific and the neutral [of the]  
 {8} verbs, as in தெவரீ{ர்} {சொ}லலித  
 {9} து (*tēvarī collitatu* or either *collittu*) *Your Mercy spoke.~.~.~.*  
 {10} **Second Chapter**  
 {11} **Of the Conjugation of**  
 {12} **Verbs**  
 {13} As all doctrine in this  
 {14} matter consists in shedding light  
 {15} so that the conjugation of verbs in this  
 {16} language is made easy, in this  
 {17} chapter we state only that which is common to all.  
 {18} It [corresponds] to what, without embarrassment, can help  
 {19} Beginners, leaving the  
 {20} diversity of conjugations and Rules that  
 {21} in this matter can be applied  
 {22} to preterits [which one

<sup>36</sup> The terminology is from Sanskrit where the masculine gender is *napuṃliṅka* while the neuter is *napuṃsakaliṅga*.

{23} will discover through  
 {24} use, since they serve for nothing more than to bore  
 {25} and bother]. Hence, leaving  
 {26} [all the modes] to the use [of them], I will only conjugate a single  
 {27} verb, placing under this all the modes  
 {28} which exist in this language, and which are  
 {29} common to the other verbs. And from  
 {30-31} the one we can conjugate the others.~.~.~.

[f. M-34-19]

L

{1-2}	<b>Indicative Actual Present</b>		
{3}	நான (nāṇ) விசுவசிக்கிறேன்	(vicuvācikkirēṇ)	<i>I believe</i>
{4}	நீ (nī) விசுவசிக்கிறாய்	(vicuvācikkirāy)	<i>You believe</i>
{5}	அவன் (avaṇ) விசுவசிக்கிறான்	(vicuvācikkirāṇ)	<i>He believes</i>
{6}	அவள் (avaḷ) விசுவசிக்கிறாள்	(vicuvācikkirāḷ)	<i>She believes</i>
{7}	அது (atu) விசுவசிக்கிறது	(vicuvācikkutu)	<i>It believes</i>
{8-9}	நாங்கள் (nāṅkaḷ) விசுவசிக்கிறோம்	(vicuvācikkirōm)	<i>We believe</i>
{10-11}	நீங்கள் (nīṅkaḷ) விசுவசிக்கிறீர்கள்	(vicuvācikkirīrkaḷ)	<i>You believe</i>
{12}	அவர்கள் (avarkaḷ) விசுவசிக்கிறார்கள்	(vicuvācikkirārkaḷ)	
{13}			<i>They [both masc + fem] Believe</i>
{14}	அதுகள் (atukaḷ) விசுவசிக்கிறது	(vicuvācikkutu)	
{15}			<i>Those things believe</i>
{16}	<b>Singular honorific</b>		
{17-18}	நாம (nām) விசுவசிக்கிறோம்	(vicuvācikkirōm)	<i>My mercy believe</i>
{19}	நீர் (nīr) விசுவசிக்கிறீர்	(vicuvācikkirīr)	<i>Your mercy believe</i>
{20}	அவர் (avar) விசுவசிக்கிறார்	(vicuvācikkirār)	<i>His/Her mercy believes</i>
{21}			
{22}	The present above is called		
{23}	actual because it is used in		
{24}	the actions which are currently being performed.		
{25}	<b>Negative singular</b>		
{26}	1. விசுவசிக்கவில்லை	(vicuvācikkavillai) <sup>37</sup>	
{27}	2. விசுவசிக்கிறதில்லை	(vicuvācikkirat*illai) <sup>38</sup>	<i>I, you, etc. do not</i>

<sup>37</sup> Here Costa respects the construction used to express the past and present negativity through the auxiliary verb *il-tal* 'be not'. Historically the form *illai* is the 3<sup>rd</sup> neuter plural of the defective verb *il-tal* which is added to the infinitive in the Modern Tamil (Krishnamurti 2003: 355).

<sup>38</sup> Costa gives here the negative form of the present verbal noun followed by the negative verb *illai*.

- believe,*  
 {28} 3. விசுவசித்ததிலலை (vicuvācittat\*illai)<sup>39</sup> *I, you, he, did not believe,*  
 {29} according to the preceding pronoun  
 {30} they also add  
 {31} the இலலை (illai) to all persons which form

## R

- {1} the negative, as in நான விசுவசிக்கி  
 {2} நெனிலலை (nāṇ vicuvācikkirēṇ illai) *I do not believe,* நீ விச  
 {3} வசிக்கி{றா}யிலலை (nī vicuvācikkirāy illai)<sup>40</sup> *you do not believe,* etc.  
 {4} **Forms of the negative**  
 {5} The 1<sup>st</sup> fi(gu)re<sup>41</sup> is formed from the infinite with  
 {6} இலலை (illai), as in நான காணவிலலை (nāṇ kāṇavillai)  
 {7} *I do not see* அவன வர்விலலை (avaṇ varavillai)  
 {8} *he does not come.* The 2<sup>nd</sup> {{figure is formed from}} the present participle<sup>42</sup>  
 {9} with the same இலலை (illai) as in (ப)  
 {10} ண்ணுகிறதிலலை (paṇṇukkīrat<sup>u</sup> illai) *I do not do* and  
 {11} சொல்லுகிறதிலலை<sup>43</sup> (collukīrat<sup>u</sup> illai) *I do not say.* The  
 {12} 3<sup>rd</sup> {{figure is formed from}} the preterit participle<sup>44</sup> as in  
 {13} நிகுடுததிலலை (ni kuṭuttat<sup>u</sup> illai) *you did not give* etc.  
 {14} and the others can be formed in this way.  
 {15} **Preterit perfect [Past perfect tense]**<sup>45</sup>

<sup>39</sup> Costa gives here the negative form of the past verbal noun followed by the negative verb *illai*.

<sup>40</sup> These forms are unexpected while the verbal nouns followed by *illai*, like the forms above, are typical of the Old Tamil. Indeed, according to Krishnamurti (2003: 355) “negation in the non-past is rendered by adding *illai* to the nominalized verb in non-past, e.g. *varu-kir-atu illai* [COME-DUR. SUFFIX-3NEU SG NOT] ‘(one) does not come’, *varu-v-atu illai* [COME-NON-PST-3NEU SG NOT] ‘(one) will not come’”.

<sup>41</sup> The term *figure* was used in the Latin grammatical tradition, as a grammatical word for referring to what we would address today as ‘forms’.

<sup>42</sup> Here Costa uses the technical term *participle* but the corresponding Tamil form is a *verbal noun* that Costa describes later as being an *Infinitive Substantive* (see f. M-34-29).

<sup>43</sup> For the forms listed in lines 10, 11, and 13 see footnote 40.

<sup>44</sup> Cf. footnote 42.

<sup>45</sup> In all the other manuscript copies, this paragraph is preceded by the following paragraph:

### Preterimperfect [Imperfect tense]

This tense does not exist in this language. This is made up for in the following way by adding to any of the persons of the present the letter எ and placing the adverb அப்பொ (appō) after it. Second, if it is the preterit using the language of the imperfect preterit, as in நீய விசுவகிக்கிறாயெ அப்பொ நான விசுவசித்ததென (nīya vicuvācikkirāyē appō nāṇ vicuvācittēṇ) *when you believed, I believed;*

{16}

### Singular

{17-18} விசுவசித்தென like விசுவசிசசென<sup>46</sup>(vicuvācittēṅ like vicuvāciccēṅ) *I believed*

{19} விசுவசித்தாய (vicuvācittāy) *you believed*

{20} விசுவசித்தான (vicuvācittāṅ) *he believed*

{21} விசுவசித்தாள (vicuvācittāl) *she believed*

{22} விசுவசித்தது (vicuvācittutu) *it believed*

{23} விசுவசித்தொம் (vicuvācittōm) *we believed*

{24} விசுவசித்தீ{ர்}கள் (vicuvācittīrkaḷ) *you believed*

{25} விசுவசித்தா{ர்}கள் (vicuvācittārkaḷ) *they will believe* [masc. + fem.] (*sic*)

{26} விசுவசித்தது (vicuvācittutu) *they will believe* [*neutral*] (*sic*)<sup>47</sup>

{27} Likewise putting சச (cc)

{28} instead of தத (tt), as in விசுவசிசசொம் (vicuvāciccōm).<sup>48</sup>

{29} **Singular honorific**

{30} விசுவசித்தொம் (vicuvācittōm) *My mercy believe* (*sic*)

{31} விசுவசித்தீ{ர்} (vicuvācittīr) *Your mercy believe* (*sic*)<sup>49</sup>

### [f. M-34-20]

L

{1} விசுவசித்தா{ர்} (vicuvācittār) *His Mercy believed*

{2} விசுவசிசசொம் (vicuvāciccōm) etc. The preterit

{3} is made negative by placing after to any

{4} of the persons இலலை (illai) as in விசுவசித்தெனி

{5} லலை (vicuvācittēṅ illai)<sup>50</sup> *I did not believe*, etc.

---

நீயவிசுவசிக்கிறாயெஅப்பொஅவனவிசுவசித்தான (nī vicuvācikkirāyē appō avāṅ vicuvatittāṅ), *when you believed, he believed, etc.*

However, it is better to use the future instead of the preterit, as in நீயவிசுவசிக்கிறாயெஅப்பொநானவிசிப்பென (nīya vicuvācikkirāyē appō nāṅ vicippēṅ), *when you believed, I believed*. Finally the same future absolutely serves as preterit imperfect [past imperfect], as in மி[வனசிவபிள்ளையாயிருக்கிறபொது விசுவசிப்பான்] (ivaṅ civapiḷḷaiyā irukkīrapōtu vicuvācippāṅ) *this one when (he) was a child, (this one) believed*, etc. (For the Portuguese version see footnote 242 in *Part 2*).

<sup>46</sup> Here Costa provides both the Standard Modern Tamil form (vicuvācittēṅ) and the Spoken Tamil variant (vicuvāciccēṅ).

<sup>47</sup> The Portuguese gloss here and in the previous line is unexpected. Indeed, they are both in the future tense while they should have been in the past tense.

<sup>48</sup> The palatalization of the past tense marker is a typical feature of the Spoken Tamil register.

<sup>49</sup> The Portuguese gloss here and in the previous line is unexpected. Indeed, they are both in the present tense while they should have been in the past tense. However, looking into the other manuscript copies, one finds the correct form (cf. footnotes 252 and 254 in *Part 2*).

<sup>50</sup> See footnote 40.

- {6} **Preterpluperfect**<sup>51</sup> [Past perfect tense]  
 {7} This tense does not exist in this language.  
 {8} It can be made up for in the same way as  
 {9} we stated for the imperfect,<sup>52</sup> except that  
 {10} in place of the adverb அப்பொ<sup>53</sup> (appō) we  
 {11} must add the word அதுககுமு  
 {12} னனெ (atukkumunṅē) e.g. நீ விசுவசிக்கிறாயெஅதுககுமுனனெ நான  
 {13} விசுவசிப்பென, (nī vicuvācikkirāyē atukkumunṅē nān  
 vicuvācippēn) *when you*  
 {14} *believed, I had already believed.* Also, the affirmative  
 {15} future has the same strength alone,  
 {16} [and it expresses] this tense as in நான விசுவசி  
 {17} பபென (nān vicuvācippēn) *I believed, or I had believed, etc.*  
 {18} **Ordinary Affirmative Future**  
 {19} **Singular**  
 {20} விசுவசிப்பென (vicuvācippēn) *I will believe*  
 {21} *or usually believe*  
 {22} விசுவசிப்பாய (vicuvācippāy) *You will believe*  
 {23} விசுவசிப்பான (vicuvācippān) *He will believe*  
 {24} விசுவசிப்பாள் (vicuvācippāl) *She will believe*  
 {25} விசுவசிக்கும் (vicuvācikkum) *It will believe*  
 {26} **Plural**  
 {27} விசுவசிப்பொம் (vicuvācippōm) *We will believe*  
 {28} விசுவசிப்பீர்கள (vicuvācippīrkaḷ) *You will believe*  
 {29} விசுவசிப்பா{ர்}கள (vicuvācippārkaḷ) *They [masc. + fem.] will*  
*believe*  
 {30} விசுவசிக்கும் (vicuvācikkum) *Those things will believe*

## R

- {1} This future can also  
 {2} be used to signify the habitual present.<sup>54</sup>

<sup>51</sup> Categories like *imperfect* or *pluperfect* are not found in Tamil. However, Costa finds a periphrastic construction which may achieve the same meaning of the Latin category that he was aiming to describe. Hence, Costa combines the Tamil past tense and the adverbial phrase: *before that time*. For further details see Muru (2011).

<sup>52</sup> Typical of the spoken variety it is the contraction of *appōlūtu* into *appō* (MTL, S043).

<sup>53</sup> It should be noted that, even though the paragraph on the *Preterit Imperfective* is missing here, it is attested here as being part of the original manuscript. This suggests that manuscript GL1 also should not be considered an autograph, unless one does not imagine that Costa was copying it along with Proença's dictionary.

- {3} *I usually believe, we usually*  
 {4} *believe* and in this same way for the other persons. The  
 {5} future விசுவசிக்கப்பொறென (vicuvācikka.p pōrēṅ),  
 {6} directly corresponds to the Latin future.  
 {7} It is formed from the infinite absolute  
 {8} with the verb பொறது<sup>55</sup> (pōratu) conjuga-  
 {9} ting this in the present tense  
 {10} remaining the infinite invariable as in  
 {11} செய்ப்பொறென (ceyya.p pōrēṅ) *I will do*  
 {12} செய்ப்பொறாய (ceyya.p pōrāy) *you will do*  
 {13} செய்ப்பொறீர (ceyya.p pōrīr) *your mercy will do, etc.*  
 {14} **Singular Honorific**  
 {15} விசுவசிப்பொம் (vicuvācippōm) *we believe*  
 {16} *or usually believe,*  
 {17} விசுவசிப்பீர் (vicuvācippīr) *your mercy will believe*  
 {18} விசுவசிப்பார் (vicuvācippār) *His mercy will believe*  
 {19} *or usually believes.*  
 {20} **Negative future**<sup>56</sup>

<sup>54</sup> The differentiation in three tenses is a later innovation in Tamil. The present tense, derived from the grammaticalization of an early auxiliary construction, is a later innovation in Tamil which started to appear approximately from the *bakhti* time onwards (Wilden 2018). Therefore, the Old Tamil verbal system was based on “a dual distinction that is better described as aspectual than as temporal” (Wilden 2018: 76) and the basic dichotomy was imperfective and perfective. This still reflects on the feature that tenses such as the future in Tamil “expresses rather various modalities than referring definitely to future time” (Lehmann 1989: 67). In fact, “the future tense besides expressing future actions may frequently express habitual or recurrent actions in the present or in the past” (Andronov 1989: 174). As such, habituality is one of the modalities underlined by Costa in this passage devoted to the description of the future tense.

<sup>55</sup> *pōratu* is the spoken form of *pōkiratu* of the verb *pō-tal* ‘to go’ where there is the declension of intervocalic *k* (phonetically [h], Schiffman 1999: 11). If it is added to an infinitive main verb, this auxiliary expresses 1) intention or 2) prediction. Among the auxiliaries in existence in Tamil today, *pō* is also found in earlier stages of the language. According to Krishnamurti (2003: 373-375) auxiliaries already existed in Old Tamil even though the ancient grammar of Tamil *Tolkāppiyam* (ca. 1<sup>st</sup>-3<sup>rd</sup> cent. A.D.) does not mention them. For Proto-South Dravidian Krishnamurti (2003: 374) reconstructs the ‘valency-preserving’ auxiliary *pō* which is, however, used with the verbal participle rather than with the infinitive as occurs in Modern Tamil. Indeed, even today, if *pō* is used after a verbal participle rather than an infinitive, it marks a change of state – that has taken place or will definitely occur (Schiffman 1999: 92), usually an unforeseen or undesirable event. However, the example that Costa provides displays the verb *cey* ‘to do’ followed by the verb *pō* corresponding to the situation described in Cre-A: Tamil dictionary in correspondence with the second headword for *pō*: “(used after the verb ‘to do’ (*cey*)) to indicate that the action the verb refers to is likely to occur sooner or later”. Consequently, the clarification made by Costa, that only this construction effectively corresponds to the Latin tense form used to talk about events that one expects to take place in the future, highlights what has already been underlined in footnote 54.

- {21} **singular**  
 {22} விசுவசியென (vicuvāciyēṅ) *I will not believe* or  
 {23} *I do not usually believe*  
 {24} விசுவசியாய (vicuvāciyāy) *You will not believe*  
 {25} விசுவசியான (vicuvāciyāṅ) *He will not believe*  
 {26} விசுவசியாள (vicuvāciyāl) *She will not believe*  
 {27} விசுவசியாது (vicuvāciyātu) *It [that thing] will not believe*  
 {28} **Plural**  
 {29} விசுவசியொம் (vicuvāciyōm) *We will not believe* or  
 {30} *we do not usually believe*  
 {31} விசுவசியி {ர்ர்} கள (vicuvāciyīrkaḷ) *You will not believe*

[f. M-34-21]

L

- {1} விசுவசியா {ர்ர்} கள (vicuvāciyārkaḷ) *They*  
 {2} *will not believe*  
 {3} விசுவசியாது (vicuvāciyātu) *Those things (fem) will not believe*  
 {4} The negative future is formed from the  
 {5} present by changing the *cren* or *gren*  
 {6} into *yen* as in பிடிக்கிறது (piṭikkiratu) becomes  
 {7} பிடியென (piṭiyēṅ) *I will not catch* etc.  
 {8} Those which before *cren*, or *gren* have *V*,  
 {9} lose it passing *cren* or *gren*  
 {10} in *en* as in பொறுக்கிறென (pōrukkiṛēṅ) becomes  
 {11} பொறென (pōṛēṅ) *I will not forgive*. From சொ  
 {12} லலுகிறென (collukirēṅ) becomes சொலலெ  
 {13} ன (collēṅ) *I will not say*. Those that before *cren*  
 {14} have *A*, before this *A*, as well as [before] *é* [they] add the consonant  
*.V*.  
 {15} as in நடக்கிறென (naṭakkirēṅ)  
 {16} [that becomes] நடவென (naṭavēṅ) *I will not walk*,  
 {17} from பறக்கிறென (paraṭakkirēṅ) *I fly* becomes பற  
 {18} {வென} (paraṭavēṅ) *I will not fly*.

<sup>56</sup> In Old Tamil, the negation was signalled by zero when followed by personal suffixes beginning with vowels. Hence, “-∅- and -ā- functioned as negative allomorphs in non-past conjugation in complementary environment, -∅- before personal suffixes beginning with vowel and -ā- before a consonant or zero” (Krishnamurti 2003: 349). The paradigm provided by Costa displays the ∅ morph. Therefore, this paradigm can be considered as the relic of the archaic tenseless Old Tamil negative which later also continued in the Modern Tamil (Schiffman 1999: 149).

- {19} **Singular honorific**
- {20} விசுவசியொம் (vicuvāciyōm) *my mercy will not believe*
- {21} விசுவசியீர் (vicuvāciyīr) *your mercy will not believe*
- {22} விசுவசியார் (vicuvāciyār) *his mercy will not believe*
- {23} *or his mercy did not usually believe*
- {24} always having the negation of the
- {25} habitual present.~.~.~.~.~.~.
- {26} **Imperative Absolute**
- {27} **Singular**
- {28} 1. விசுவசீ (sic) (vicuvāci). > .....Believe (you)
- {29} 2. விசுவசிப்பாயாக (vicuvācippāy āka)<sup>57</sup> >
- {30} 3. விசுவசியும் (vicuvāciyum)<sup>58</sup> > believe (Your mercy)
- {31} 4. விசுவசிப்பீராக (vicuvācuppīr āka)<sup>59</sup> >

## R

- {1} விசுவசிக்க<sup>60</sup> (vicuvācikka) *believe (your mercy)* 5.
- {2} விசுவசிக்கட்டு<sup>61</sup> (vicuvācikkaṭṭu) *believe (he)* 6.
- {3} **Plural**
- {4} விசுவசிப்பொம்<sup>62</sup> (vicuvācippōm) *let us believe, we will believe* 7.

<sup>57</sup> According to Andronov (1989: 177-178) in Literary Tamil the imperative singular is also denoted by the suffix *-āy* added to the primary stem of the verb. However, in this example the suffix *-āy* is not added to the verb stem but rather, as Costa explains later, to the future tense marker. Furthermore, the verb form is followed by *āka*, the infinitive of the verb *āku-tal* ‘to become, to be’, representative of the optative form used after the finite verb and also typical of the Old Tamil (Krishnamurti 2003: 361). A better translation for this form would be: *be you, the one who will believe*.

<sup>58</sup> This form can be either the adjectival future participle, the habitual future, or the optative.

<sup>59</sup> Cf. footnote 57.

<sup>60</sup> This form is formally identical to the infinitive of the verb stem *vicuvāci* which, if used as predicate of a simple clause can express the optative mood. However, I would also be inclined to reflect on the possibility of considering it as the verb stem followed by the optative suffix *-ka*. Indeed, its translation would fit with the general meaning according to which Costa is grouping all the verbal forms under the category of *Imperative absolute*.

<sup>61</sup> The form *kaṭṭu* attached to the verb base could be taken as the துணை வினை (*tuṇai viṇai*, auxiliary verb) used “to indicate that the action expressed by the main verb will be carried out forcefully and with determination” (Cre-A:), however one would have expected to have it after a வினையெச்சம் (*viṇaiyeccam*, verbal participle) rather than a verb base. Therefore, I am inclined to interpret this form as an infinitive followed by the reduced form *-ṭtu* of the verb *oṭṭu-tal* ‘agree’. As seen later, it may be followed by the inflectional suffix *-um* as described in Paramasivam (1979: 129) and also in Lehmann (1989: 214-215). This form, typical of the very Literary Tamil, expresses the modalities of (i) the hortative or optative, or (ii) desideration (Lehmann 1989: 215). Schiffman (1999: 78) and Andronov (1989: 182) segment this modal auxiliary verb differently: as *aṭṭum* ‘let, may’ rather than *-ṭtum*.

<sup>62</sup> This is the first-person plural. In Tamil it also has an exhortative value.

- {5} விசுவசியுங்கொள<sup>63</sup> (vicuvāciyuṅkol) *believe (you (plu))* 8.  
 {6} விசுவசிக்கடடு (vicuvācikkaṭṭu) .....*Believe (they)*9.  
 {7} விசுவசிக்கககடவாரகள<sup>64</sup> (vicuvācikka.k kaṭavārkaḷ)  
 {8} The first figure is formed from the  
 {9} present by removing *cren* or *gren*,  
 {10} as from பொறுக்கிறென<sup>65</sup> (porukkirēṅ) *I wait*  
 {11} பொறு (poru) *wait* {from} வாசிக்கிறெ  
 {12} ன (vācikkirēṅ) *I read*, வாசி (vāci) *read*. The 2<sup>nd</sup>  
 {13} figure is formed from the 2<sup>nd</sup> person of the future  
 {14} with ஆக (āka) infinite of the verb ஆ  
 {15} கிறென (ākirēṅ),<sup>66</sup> as in நினைப்பாயாக<sup>67</sup> (niṅaiṅppāy āka)  
 {16} *remember வருவாயாக*<sup>68</sup> (varuvāy āka) *come*, etc.  
 {17} The 3<sup>rd</sup> as the first adding யும (y-um)<sup>69</sup> as in  
 {18} இரும (irum)<sup>70</sup> *sit your mercy வாசியும* (vāciyum)  
 {19} *read your mercy*. The 4<sup>th</sup> as the second  
 {20} taking the honorific person. The 5<sup>th</sup>6<sup>th</sup>  
 {21} is the infinite absolute<sup>71</sup> with the imperative  
 {22} ஒட்டு (oṭṭu) from the verb ஒட்டுகிற  
 {23} து (oṭṭukiratu) (which is) pronounced as if the *ó*  
 {24} ஒ is lost<sup>72</sup> as in வர்ட்டு (varaṭṭu) *come பொ*  
 {25} கட்டு (pōkaṭṭu) *go*. The 6<sup>th</sup>7<sup>th</sup> is the first person  
 {26} of the future affirmative (in the) plural,  
 {27} as in பொவொம (pōvōm) *let us go*. ஒடு

<sup>63</sup> See footnote 17.

<sup>64</sup> The verb form is *kaṭavatu*, an auxiliary of obligatory mode attested from the Middle Tamil (inscriptional AD 900-1050, cf. Krishnamurti 2003: 375). It is described in Beschi (1738 [1728]: 101, § III, par. 114; Mahon 1848: 83, Section III, par. 114) in the chapter devoted to syntax encompassed under the label *Optative*. Indeed, this verb form has grammaticalized into an optative form ‘let that be so’ in Modern Tamil (cf. Cre-A: 2020: 308). (cf. footnote 74 for further details and another description in previous Cre-A: 1992).

<sup>65</sup> In the previous occurrence of this verb form, Costa gives the meaning as ‘to forgive’, here it means ‘to wait’. These two meanings are also found in Proença’s dictionary (GL1, f. M-34-266, L, lines 11-14).

<sup>66</sup> Costa gives the optative mood here. See footnote 57.

<sup>67</sup> A more correct translation would be: *be you, the one who will think*.

<sup>68</sup> A more correct translation would be: *be you, the one who will come*.

<sup>69</sup> Costa is considering here the exhortative function of the suffix *-um*.

<sup>70</sup> In Costa, as well as in Proença’s dictionary (GL1, f. MS-34-133, R, lines 10-11), the primary meaning for *iru* is *estar assentado* ‘to be seated’, while the secondary meaning that Proença gives is *estar* ‘to be’.

<sup>71</sup> On this category see footnotes 179 and 181 in *Part 3*.

<sup>72</sup> In Winslow (1862: 198) *oṭṭu* is a verb form meaning ‘to be suitable or appropriate’.

- {28} *வொம* (ōṭuvōm) *let us run*. The 7<sup>th</sup> 8<sup>th</sup> (*sic*)<sup>73</sup> is the 3<sup>rd</sup>  
 {29} adding a short *கொள* (kol)  
 {30} to make the plural. The 8<sup>th</sup> is the  
 {31} infinite absolute of the verb *கடவது* (kaṭavatu)<sup>74</sup>

[f. M-34-22]

L

- {1} a defective [verb] that is used only to make  
 {2} similar imperatives. ~.~.~.  
 {3} **Permissive Imperative**<sup>75</sup>  
 {4} *விசுவசிக்ககட்டு* (vicuvācikkaṭṭu)<sup>76</sup> *let you, he, she*  
 {5} *it believe*  
 {6} *விசுவசிக்ககட்டும* (vicuvācikkaṭṭum)<sup>77</sup> *let your mercy believe.*  
 {7} *விசுவசிக்ககட்ட* (vicuvācikkaṭṭa)  
 {8} *விசுவசிக்ககட்டுங்கொள* (vicuvācikkaṭṭuṅkol) *let*  
 {9} *you others believe.*  
 {10} All are formed from the infinite  
 {11} absolute with the imperative forms of the verb  
 {12} *ஒட்டுகிறது* (oṭṭukiraṭu) according to number,  
 {13} or the honorific mode of speaking.  
 {14-15} **Prohibitive Imperative**

<sup>73</sup> It should have been the 9<sup>th</sup> which is equivalent to the 6<sup>th</sup> form.

<sup>74</sup> *kaṭavatu* a form already introduced in footnote 64. It is recorded in Winslow (1862), Fabricius (1972 [1770]) as well as in Cre-A: (1992) where it is described as a defective verb expressing *duty* as well as *desire* or the *optative*. As already emphasized in discussing the *imperfect* and *pluperfect*, here also, Costa is applying the same strategy. Therefore, the latinized category which he needs to describe is the *loci* where different Tamil constructions are ‘reduced’. The main criteria guiding Costa while extending the verb mood taxonomy is not only morphological but also semantic. Indeed, if one observes the total form included under the category of the imperative, one may notice how this mood is the *loci* where Costa includes not only the proper Tamil imperative, but also other forms such as defective, interrogative, auxiliaries, optative (see below in the text), etc. as representative of “a continuum along which the degree of the intensity in the ‘command strength’ expressed by the imperative of the verb *vicuvāci* followed by an ‘x element’ varies” (Muru 2021a: 248). For a detailed discussion on the extension of the Imperative mood in Costa see Muru (2021a: 241-248).

<sup>75</sup> The label *permissive* is typically Alvaesian. Indeed, as I suggested in Muru (2020b) and I discuss in the *Conclusion* (cf. *Part 4*), Emmanuel Álvares’ abridged grammar (1573) should be considered as the best candidate for being the model of reference that Costa followed while composing his Tamil grammar.

<sup>76</sup> Cf. footnote 61.

<sup>77</sup> *-ttum* expresses permission and optative in the (Standard) Common Tamil (see Asher 1985: 166 and 170 and Schiffman 1999: 78).

- {16} 1. விசுவசியாதெ<sup>78</sup> (vicuvāciyātē)  
 {17} 2. விசுவசியாமல<sup>79</sup> (vicuvāciyāmal) ————— do not believe (you)  
 {18} 3. விசுவசிக்கவெண்டாம<sup>80</sup> (vicuvācikka vēṇṭām)  
 {19} விசுவசியாதெயும்<sup>81</sup> (vicuvāciyāteyum) do not believe your mercy  
 {20} விசுவசியாதெயும்பிள்ளாய்<sup>82</sup> (vicuvāciyāteyum piḷḷāy)  
 {21} do not believe your mercy among equals  
 {22} விசுவசியாதெயுங்கொள (vicuvāciyāteyunkoḷ)  
 {23} do not believe you others  
 {24} நாங்களவிசுவசிக்கதெவை  
 {25} யிலலை (nāṅkaḷ vicuvācikka.t tēvai.y<sup>83</sup> illai) let us not believe.  
 {26} This serves for the remaining numbers and persons according to  
 {27} the preceding pronoun, as in  
 {28} விசயசிக்கதெவையலை (vicuvācikka.t tēvai.y illai) do not  
 {29} believe (you). It is formed from the infinite  
 {30} absolute with தெவையிலலை (tēvai.y illai), as in அவள  
 {31} பொகதெவையிலலை (avaḷ pōka.t tēvai.y illai)<sup>84</sup> do not go (she).

## R

- {1} The first figure above is formed from the neutral person  
 {2} of the negative future by changing {the உ (u) to}  
 {3} a எ (e), as in நடவாது (naṭavātu) {{that becomes}} நடவாதெ  
 (naṭavātē)<sup>85</sup>  
 {4} do not walk (you) [plural]. The 2<sup>nd</sup> in the same way  
 {5} by changing the து (tu) to a மல (mal), as in நடவாது (naṭavātu)<sup>86</sup>

<sup>78</sup> This form is the negative singular imperative formed by the verb stem + the negative allomorph -āt + euphonic suffix ē. For details on Tamil clitics see Arokianathan (1981).

<sup>79</sup> This form is a negative *viṇaiyeccam* (verbal participle, see footnote 185).

<sup>80</sup> This form is derived from the infinitive followed by the nonfinite verb வேண்டாம் (vēṇṭām) in the negative form. This kind of verb is already attested in Old Tamil – even though not clearly described in the *Tolkāppiyam* (Krishmanurti 2003: 376-377), and it is one of the modal auxiliaries which do not change the valency of the main verb. In fact, vēṇṭām is an auxiliary with defective morphology and expresses the negative obligation of ‘not needed’ (cf. Asher 1985: 167).

<sup>81</sup> This form is the negative singular imperative. The same form also occurs as negative *peyareccam* followed by the clitic -um.

<sup>82</sup> Literally this example should be translated as *Oh boy! May you not believe!* Where the noun *piḷḷai* ending in the diphthong form of the vocative in -āy and it is followed by the negative form.

<sup>83</sup> *tēvai* in Proença’s dictionary is translated as ‘necessity’ (GL1, f. M-34-369, R, lines 29-31), the same meaning is also found in DED 3469. If literally translated, this example would be: *our need of believing is not.*

<sup>84</sup> Literally the translation of this example is: *her need of going is not.*

<sup>85</sup> Again, the emphatic particle -ē is used for topicalization.

- {6} {{that}} becomes நடவாமல (naṭavāmal) and பண்ணு  
 {7} கிறது (paṇṇukiraṭu) {{that}} becomes பண்ணாமல (paṇṇāmal) *do not*  
 {8} *do* [plural]. The 3<sup>rd</sup> {{figure is formed}} from the infinite  
 {9} absolute with வெண்டாம (vēṇṭām) as in செய்ய  
 {10} வெண்டாம (ceyya vēṇṭām) *do not do you*, etc. This  
 {11} serves for plural, singular  
 {12} ordinary honorific.  
 {13} **Imperative with plea**  
 {14} **or familiarity**  
 {15} This mode consists of nothing more than  
 {16} adding a என (ēṇ)<sup>87</sup> to any  
 {17} of the modes aforementioned  
 {18} e.g. விசுவசி,என? (vicuvāci ēṇ?) becoming a  
 {19} more urbane and familiar mode and as someone who  
 {20} pleases, and does not command. It is also said  
 {21} விசுவசிக்கவெண்டாமொ (vicuvācikka vēṇṭāmō)<sup>88</sup> or  
 {22} விசுவசிக்கதெவையிலலை  
 {23} யொ? (vicuvācikkat<sup>#</sup> tēvai.y-illai.y-ō),<sup>89</sup> all interrogatives.  
 {24} Others say விசுவசியுங்காணும (vicuvāci.y-uṅ<sup>m</sup> kāṇ-um)<sup>90</sup>  
 {25} from the imperative honorific and  
 {26} also from the imperative, also honorific,  
 {27} of the verb காண்கிறது (kāṇkiraṭu) *to see*.  
 {28} **Optative mode**<sup>91</sup> [**Optative mood**]  
 {29} Properly speaking, this mode does not  
 {30} exist in this language, but can be made up for  
 {31} by the following modes.<sup>92</sup> 1<sup>st</sup> by

<sup>86</sup> Here Costa suggests that the negative *viṇaiyeccam* is formed by suffixing *-mal* to the negative form of the verbal noun ending with the negative allomorph *-ā* that is the same segmentation given in Lehmann (1989: 73).

<sup>87</sup> *ēṇ* is the interrogative *why*. In modern Tamil when this interrogative is suffixed to an imperative form the command or request expressed by the imperative is changed into a suggestion. Indeed, Costa places it under an *Imperative* labelled as *with plea or familiarity*.

<sup>88</sup> The construction proposed here by Costa is the infinitive of the verb 'to believe' followed by the negative modal defective *vēṇṭām* (also found below, cf. footnote 96) to which the interrogative dubitative particle *-ō* is added.

<sup>89</sup> The literal translation being: *it isn't the desire of believing, is it?*

<sup>90</sup> Here there is the conjunction *-um* which is added to both the imperative forms: *believe and see!*

<sup>91</sup> In Lily's (c.1468 - c.1523) grammar, rather than *mood* one finds *mode*.

<sup>92</sup> Costa here fails to identify the optative in Tamil but rather he provides other constructions which semantically relate to the *optative*.

[f. M-34-23]

L

- {1} the negative future adding to it  
{2} the interjection *O*, (as in) நான விசுவசி  
{3} யெனொ (nāṇ vicuvāciyēṇō)<sup>93</sup> *hopefully I [had] believed*, or  
{4} *I had not believed*<sup>94</sup> நீ விசுவசியாயொ (nī vicuvāciy-āy-ō)  
{5} *you had not believed*.<sup>95</sup> The 2<sup>nd</sup> with the infinite  
{6} absolute adding வெ  
{7} ணடாமொ<sup>96</sup> (vēṇṭāmō) as in விசுவசி[கக]  
{8} வெண்டாமொ, (vicuvācikka vēṇṭāmō) *hopefully I (had) believed*  
{9} or *I had not believed*. It serves for all  
{10} numbers and genders of persons in accordance with the  
{11} pronoun that precedes it. To these modes  
{12} we can place the interjection before  
{13} அயயொ (ayyō)<sup>97</sup> which means *ay:iō* as in  
{14} அயயொநானவிசுவசியெ  
{15} னொ<sup>98</sup> (ayyō nāṇ vicuvāciyēṇ-ō) *Alas! I had believed*. அய[யொ]  
{16} நீவிசுவசிக்கவெண்டாமொ (ayyō nī vicuvācikka vēṇṭām-ō).<sup>99</sup>  
{17} *Alas! May you not believe*, 3<sup>rd</sup> by adding  
{18} to these same infinites the word  
{19} கடவது (kaṭavatu)<sup>100</sup> or கடவதாக<sup>101</sup> (kaṭavat<sup>#</sup> āka), as in நா  
{20} னவிசுவசிக்கககடவது (nāṇ vicuvācikka.k kaṭavatu)  
{21} or கடவதாக (kaṭavat<sup>#</sup>āka)<sup>102</sup> *may it please God, that I believe*.<sup>103</sup>  
{22} The same in cursing  
{23} சாகககடவாய (cākka.k kaṭavāy) *may it please God*  
{24} *that you die*. Also in imploring  
{25} someone badly or sometimes well,

<sup>93</sup> The given form is the negative Old Tamil form followed by the dubitative marker *ō*.

<sup>94</sup> The correct translation would be: *I will not believe, will I? or whether I will believe*.

<sup>95</sup> The correct translation would be: *you will not believe, will you?*

<sup>96</sup> Once again Costa gives here the negative defective *vēṇṭām* followed by the dubitative marker *-ō*.

<sup>97</sup> This is an interjection in Tamil.

<sup>98</sup> The interjection *alas* is followed by the construction already discussed in footnote 93.

<sup>99</sup> A better translation for the last form would be: *Alas! I will not believe, will I? and Alas! You will not believe, will you?* respectively.

<sup>100</sup> See footnotes 64 and 74.

<sup>101</sup> The optative *āka*, already discussed in footnote 57.

<sup>102</sup> *kaṭavatu* has already been discussed in footnotes 64 and 74. It is a form meaning *that should be done; duty*. It is grammaticalised into the optative form 'let that be so'. In this context it is followed by the *peyareccam* of *āku-tal* which has been grammaticalised into the optative mode.

<sup>103</sup> The Portuguese gloss underlines that the imposition above the subject is external.

- {26} they say the following சாவாய (cāvāy)  
 {27} *may it please God that you die* நானசாவெ  
 {28} னாக (nāṇ cāvēṇāka) *may it please God that I die.*<sup>104</sup>  
 {29} **Conjunctive mode with cum**<sup>105</sup>  
 {30} 1. விசுவசிக்கச்செ<sup>106</sup> (vicuvācikka-cc-ē)  
 {31} 2. விசுவசிக்கச்செய்தெ<sup>107</sup> (vicuvācikka.c ceyat-ē)

## R

- {1} 3. விசுவசிக்கையிலெ<sup>108</sup> (vicuvācikkai.y-il-ē)  
 {2} 4. விசுவசிக்கிறபொது<sup>109</sup> (vicuvācikkira pōtu)  
 {3} 5. விசுவசிக்கிறபொழுது<sup>110</sup> (vicuvācikkira poḷutu)  
 {4} 6. விசுவசிக்குமிட {ததி} ல<sup>111</sup> (vicuvācikkum-iṭatt-il)  
 {5} 7. விசுவசிக்கும்பொது<sup>112</sup> (vicuvācikkum pōtu)  
 {6} 8. விசுவசித்தபொது<sup>113</sup> (vicuvācitta pōtu) or பொழுது (poḷutu)  
 {7} *when I believe, believed, etc. Or believing*  
 {8} [*I, you, he*], *they [masc. and fem.]*, etc, according  
 {9} to the pronoun. The last is only for  
 {10} the preterit *I believed, he believed, they will believe* etc.

<sup>104</sup> The verb forms between lines 22-28 are all in the future tense formed with the suffix -v-.

<sup>105</sup> Here, Costa starts his taxonomy of the paradigm of what he defines as the Tamil *conjunctive* [subjunctive]. He makes use of the Latin subordinate conjunctions for labelling different kinds of this mood. He also uses other categories which directly translate the meaning of the linguistic Tamil item under focus. The first conjunctive is labelled using the *narrative cum* of the Latin language whose value is causal-temporal. Since in Latin this is followed by the subjunctive it is defined in this way in his *Arte*. However, this paragraph includes both verbal nouns, and adjectival participles of Tamil as well as noun and verb forms followed by postpositions or adverbs. The translation of the Latin construction in Portuguese, as well as in Italian, would correspond to the use of the gerundive construction with a temporal (*poḷudu* or *pōdu* or *ittile* - although the latter refers to location in a place) or causal (*ai* or *ce*). Furthermore, it could also be translated with ‘when’ (*pōdu* or *poḷudu*). In the whole paradigm of the subjunctive Costa uses the same strategy already observed in the Imperative. For further details see Muru (2021a: 249-256).

<sup>106</sup> Infinitive form followed by the spoken variant of the past *peyareccam* of *āku*, then followed by the emphatic clitic *ē*.

<sup>107</sup> Infinitive form followed by the *வினைப்பெயர்* (*viṇai.p peyar*, verbal noun) of *cey-tal* ‘to do’ suffixed with the emphatic clitic *ē*.

<sup>108</sup> This is the (de)verbal noun that Costa defines *verbal* formed through the suffix *-kai* added to the verb stem followed by the locative case and the emphatic particle *-ē*.

<sup>109</sup> Present *peyareccam* followed by the shortened variant of the Spoken Tamil *pōtu* ‘time’.

<sup>110</sup> Present *peyareccam* followed by the variant of the Standard Tamil *poḷutu* ‘time’.

<sup>111</sup> About *-itti*, see footnote 5.

*vicuvācikkum* can be taken as future *peyareccam* as well as 3<sup>rd</sup> singular neuter future. In this case the *peyareccam* should be considered as governing the following noun *iṭam* occurring in its oblique base and followed by the locative marker *-il*.

<sup>112</sup> Costa addresses here *vicuvācikkum* as a *neuter future affirmative*.

<sup>113</sup> Past *peyareccam* followed by the noun *pōtu* ‘time’.

- {11} These figures are formed (in the following way). The 1<sup>st</sup>  
 {12} from the infinite absolute with the particle  
 {13} செ (ce). The 2<sup>nd</sup> with the particle செய்தெ (ceyatē)  
 {14} as in நானடிககசசெ (nāṇ aṭikk[ā]ccē) *beating I*<sup>114</sup>  
 {15} நீயொடசசெயாத<sup>115</sup> (nī.y oṭa.c ceyāta) *when you did not*  
 {16} *run*. The 3<sup>rd</sup> is the ablative  
 {17} of the verbal விசுவசிககை (vicuvācikkai) *the belief*  
 {18} as in நீங்களிருக்கையிலெ (nīṅkaḷ irukkaiyilē) *when*  
 {19} *you (plural) were*. The 4<sup>th</sup>  
 {20} and the 5<sup>th</sup> from the adjectival  
 {21} participle of the present with பொது (pōtu) or பொ  
 {22} முது (poḷutu). As in நீரவருகிறபொது (nīr varukira pōtu)<sup>116</sup> *coming*  
*your mercy*  
 {23} or *when your mercy came* அ  
 {24} வளதிரும்புகிறபொது (avaḷ tirumpukira pōtu)<sup>117</sup> *when*  
 {25} *she returns*, etc. The 7<sup>th</sup> from the future  
 {26} affirmative neutral with the same  
 {27} particles பொது (pōtu) or பொழு  
 {28} து (poḷutu). The 6<sup>th</sup> with இடததில (iṭattil)<sup>118</sup> as in ஆ  
 {29} ஞம்பொழுது (āḷum poḷutu) அழுமபொது (aḷum pōtu)<sup>119</sup>  
 {30} *when I, you etc. ruled*. அழு  
 {31} மபொழுது (aḷum poḷutu) *when I, you etc. cried*.<sup>120</sup>

#### [f. M-34-24]

L

- {1} The 8<sup>th</sup> {{figure is}} from the adjectival participle of the

<sup>114</sup> According to MTL *aṭi-ttal* is a transitive verb used with the meaning of ‘to beat’ in the spoken form of the language. The English glosses has the subject-verb order inverted in order to be coherent with the Portuguese gloss in the original manuscript.

<sup>115</sup> Infinitive of *ōtu-tal* ‘to run’.

<sup>116</sup> Present *peyareccam*. The literal translation of this example would be: *the time in which you (hon) came*.

<sup>117</sup> Another example of subordinate where the shortened variant *pōtu* ‘time’ follows the present *peyareccam* of the verb *tirumpu-tal* ‘to turn’.

<sup>118</sup> Bound postposition derived from the grammaticalization of the word *iṭam* ‘space’ followed by the locative case *il*. It is the locative case used for [+human].

<sup>119</sup> Here Costa is confused by the similarities between the two verbs. Indeed he considers both *āḷum pōḷutu* and *aḷum pōtu* as the verb ‘to rule’, even though in the following line he translates *aḷu-tal* as ‘to cry, to weep’.

<sup>120</sup> Considering the translation given by Costa for which this verbal form is valid for all the pronouns, one should consider *aḷum* as the future *peyareccam* of the verb *aḷu-tal* ‘to cry, to weep’.

- {2} Preterit with the same பொது (pōtu)  
 {3} or பொழுது (poḷutu) as in நீகொபிச்சு  
 {4} பொது<sup>121</sup> (nī kōpicca pōtu) *when you got angry*  
 {5} அவளபெசினபொழுது<sup>122</sup> (avaḷ pēciṇa poḷutu)  
 {6} *when she spoke.*  
 {7} **Negative of the preceded modes**  
 {8} விசுவசியாதசெ (vicuvāciyāt<sup>a</sup>[āc]cē) *when I, you,*  
 {9} விசுவசியாதசெயதெ (vicuvāciyāta ceyat<sup>u</sup>e) *not believe*  
 {10} விசுவசியாதபொது (vicuvāciyāta pōtu) *or not believing I, [or]*  
 {11} விசுவசியாதபொழுது<sup>123</sup> (vicuvāciyāta poḷutu) *he does not believe*  
 {12} for all tenses,  
 {13} numbers and persons.  
 {14} It is formed from the adjectival participle  
 {15} of the negative future with the particles  
 {16} stated above for the affirmatives, as in  
 {17} அறியாதசெ (ariyāta[āc]cē) *not knowing I, or நீ*  
 {18} நினையாதபொது (nī niṇaiyāta pōtu), *when you do not remember about us.*  
 {19} **Conjunctive *dis que* [one says that/they say that]**<sup>124</sup>  
 {20}  
 {21} விசுவசிக்கிறெனாம (vicuvācikkirēn-ām) *he says or they say that I believe*  
 {22}  
 {23} விசுவசிக்கிறாயாம (vicuvācikkirāy-ām) *he says or they say that you believe etc.*  
 {24}

<sup>121</sup> *kōpicca* ‘which becomes angry, indignant, offended’ is the spoken variant of the past *peyareccam kōpitta* of the verb *kōpi-tal*.

<sup>122</sup> *pēciṇa* ‘which spoke’ is the past *peyareccam* of the verb *pēcu-tal* ‘to speak’.

<sup>123</sup> All these forms are negative *peyareccam*, each one followed by a specific linguistic item: *-ce* is taken here as the reduced form of the spoken variant of *āyirru* which is *āccu*. In Modern Tamil when it is suffixed to a *viṇaiyēccam*, rather than a *peyareccam*, it expresses a completive meaning (see Asher 1985: 164). *-ceyatu* is the third netuer singular while the latter two forms are already found above and both mean *time*.

<sup>124</sup> This is the second *conjunctive*. Here Costa directly uses a Portuguese gloss *diz/dizem que* which translates the Tamil form analysed in this paragraph. Indeed, Costa discusses here what is nowadays named as *reportive marker* that is “added to various constituents to indicate that the speaker does not claim responsibility for the veracity of the statement, but merely reports something. It is translated into English as ‘they say’ or ‘apparently’ or ‘allegedly’ or ‘it seems that’ or ‘supposedly’ etc.” (Schiffman, 1999: 151). According to Lehmann (1989: 162) *-ām* is the reduced form of *ākum*, the third person neuter of the verb *āku-tal*. It occurs at the end of the sentence to show that the statement expressed by the sentence is only reported by the speaker and it is possible to indicate a certain lack of authority for the assertion (Asher 1985: 172).

The Portuguese expression *diz/dizem que* takes the present indicative but it is used in infinitive or impersonal clauses.

- {25} And so on for all tenses, numbers and persons
- {26} by adding to the verb the particle
- {27} ஆம (ām).
- {28} It is formed from any person according
- {29} to the manner of speaking that they wish to use
- {30} with the neutral affirmative future of ஆ
- {31} கிறென (ākīrēn) as in நீயெழுதினாயாம் (nī.y eḷutiṇāyām)

## R

- {1} *they say that you wrote* [or in] கண
- {2} டாயாம் (kaṇṭāy-ām) *they say that you saw* etc. [or in]
- {3} விசுவசிக்கிறதாம் (vicuvācikkīrat<sup>+</sup>-ām)<sup>125</sup> *they say*
- {4} *that I believe* etc. This mode can be used
- {5} undeclined for all numbers and persons.
- {6} It is formed from the
- {7} neutral present participle with the same
- {8} ஆம (ām), as in அவன சலிக்கிறதாம் (avan calikkīrat<sup>+</sup>-ām)<sup>126</sup>
- {9} *they say that he gets annoyed*, [or] நீ{ர்}சகிக
- {10} கிறதாம் (nīr cakikkīrat<sup>+</sup>-ām) *they say that your mercy suffers*,<sup>127</sup>  
however
- {11} this mode can only be used for the present [while]
- {12} விசுவசித்ததாம்<sup>128</sup> (vicuvācittat<sup>+</sup>-ām) *one says or they say that I  
believed*,
- {13} *you believed* etc. can be used for all
- {14} persons and numbers of the preterit.
- {15} விசுவசிகுமாம்<sup>129</sup> (vicuvācikkum-āka) *one says or they say*
- {16} *that your mercy has to believe or it*
- {17} *has to believe or usually believes*. These two are formed
- {18} like the present changing the
- {19} participle into the preterit or

<sup>125</sup> Here, the same particle follows a verbal noun. For this reason, we would expect a different gloss such *they say that one believes*.

<sup>126</sup> Once again, the reportive marker -ām follows a verbal noun here, therefore we would have expected the gloss *they say that one gets angry*.

<sup>127</sup> *caki-ttal* is not found in Proença's dictionary, while it is found in Fabricius (1972 [1770]: 324) and Winslow (1862: 386). In Fabricius the meaning found is the same given by Costa: *to suffer* while in Winslow it is 'to bear affliction with patience'. Observing later dictionaries only in Cre-A: the given meaning is 'to bear, tolerate, put up with'.

<sup>128</sup> We should have another gloss such as *they say that it believed*.

<sup>129</sup> Considering the translations given by Costa we can take this form both as future *peyareccam* or as a finite form in the future tense.

{20} the future.

{21}

### Negative

{22} 1. விசுவசிக்கவிலையாம<sup>130</sup> (vicuvācikka.v-illai.y-ām)

{23} 2. விசுவ[சு]ககிறதிலையாம<sup>131</sup> (*sic!*) (vicuv[āci]kkirat\*illai.y-ām)

{24} *one says or they say that I do not believe, etc.*

{25} 3. விசுவசித்ததிலையாம<sup>132</sup> (vicuvācittat\* illai.y-ām) *one says*

{26} *or they say that I did not believe, etc.* It is used

{27} for all persons and numbers

{28} according to the pronoun. The first for all

{29} the tenses, the second for the pronoun,

{30} the 3<sup>rd</sup> (for) the preterit and also for all

{31} numbers and persons. It is used for

### [f. M-34-25]

#### L

{1} the following future.

{2} 4<sup>o</sup> [வி]சுவசிக்கப்பொறதிலையாம<sup>133</sup> (vicuvācikka.p-pōrat\* illai.y-ām)

{3} *they say that I will not believe, or you will not believe, etc.*

{4} விசுவசியாதெயாம (vicuvāciyāt\*-ē.y-ām)

{5} விசுவசியாமலாம<sup>134</sup> (vicuvāciyāmal-ām), *they say*

{6} *or one says*

{7} *that I do not believe.* This is used for

{8} for all persons, numbers and tenses according to the pronoun

{9} that will be preceded.~.~.~.

{10} The 1<sup>st</sup> is formed from the infinite absolute

{11} with இலை (illai) with ஆம் (ām) as in இதுசா

{12} கவிலையாம (itu cākavillai.y-ām) *they say that this does not*

{13} *die, the 2<sup>nd</sup> from the present participle*

<sup>130</sup> This is the syntactical negation formed by the infinitive followed by the verb *il-tal* and the reportive marker *-ām*.

<sup>131</sup> This form is the present verbal noun followed by the verb *il-tal* and the reportive marker *-ām*.

<sup>132</sup> This form is the past verbal noun followed by the verb *il-tal* and the reportive marker *-ām*.

<sup>133</sup> This form is the infinitive followed by the verbal noun of the auxiliary *pō-tal*, followed by the negation *il* and the reportive marker *-ām*. “*pō* occurs after a main verb in the infinitive form to express (i) intention and (ii) prediction” (Lehmann 1989: 217). As already discussed in footnote 124.

<sup>134</sup> The first of these forms is the negative imperative (line 4), the second is the negative *viñaiyeccam* of the verb *vicuvāci-ttal* (line 5). They are both followed by the reportive marker *-ām*. Costa refers to them as *prohibitive* since he addresses the previous paradigm which includes them: the *prohibitive imperative*.

- {14} with the two particles stated  
 {15} as in நீ பேசுகிறதிலையாம (nī pecukirat<sup>u</sup>-illai.y-ām) *they say*  
 {16} *that you do not speak*. The 3<sup>rd</sup> [from the]  
 {17} present participle with the same  
 {18} particles அவ{ர்}களபொன  
 {19} திலையாம (avarkaḷ pōnat<sup>u</sup>-illai.y-ām) *they say that they* [masc.]  
*did not*  
 {20} *go*. The 4<sup>th</sup> by adding to  
 {21} the infinite absolute of the verb,  
 {22} the present participle of the verb பொறது (pōratu)  
 {23} with the same particles as in அ  
 {24} வள[வா]ங்கபபொறதிலையாம (avaḷ vaṅga.p-pōrat-illai.y-ām)  
 {25} *they say that he will not receive*. The  
 {26} other three<sup>135</sup> are prohibitives and are formed  
 {27} from the imperatives with ஆம (ām).  
 {28} Another mode of speaking [expressing] *saying that*  
 {29} is formed from the verb எனகிறது<sup>136</sup> (eṅkiṛatu) that  
 {30} means *to say*, so that we can  
 {31} conjugate the persons of one or another

## R

- {1} verb without any difficulty and according to the  
 {2} manner of speaking that I wish to use as in விசுவசிக்கி  
 {3} நெனெனகிறான<sup>137</sup> (vicuvācikkirēṅ eṅkiṛāṅ) *he says that I believe* [or]  
 {4} விசுவசிக்கிறாயெனகிறான<sup>138</sup> (vicuvācikkirāy eṅkiṛāḷ) *she says*  
 {5} *that you believe* etc. Also, the same manner of speaking  
 {6} is formed by putting beside the letter  
 {7} everything விசுவசிக்கிறெனென்று  
 {8} சொல்லுகிற{ர்}கள<sup>139</sup> (vicuvācikkirēṅ eṅru collukirārkaḷ) *they say*

<sup>135</sup> It is not clear why three and not two since the remaining forms are the negative imperative and the negative *viṅaiyēccam*.

<sup>136</sup> This form is the verbal noun of the verb *eṅ(ṅu)-tal* ‘to say’ which is used as a quotative particle for reporting uttered speech (by someone else). See below footnote 139.

<sup>137</sup> In these examples one finds the finite verbal forms of the verb ‘to say’ (*eṅ*) which follows the tensed conjugated verb for PNG ‘to believe’ (*vicuvāci*) suggesting that this was originally a complex construction, and this example is part of it.

<sup>138</sup> Cf. footnote 137 and 139.

<sup>139</sup> In this example the *viṅaiyēccam eṅru* of the verb *eṅ(ṅu)-tal* functions as *quotative marker*. Indeed, it works as a complementizer before the verbal utterance *collukirārkaḷ*. In Spoken Tamil the corresponding form for *eṅru* is *-ṅnu* and it may be used as a *quotative marker*. The reason why it is used depends on the fact that there is not a clear cut distinction in Tamil between direct and

that

{9} *I believe* according to the manner of speaking I

{10} wish to speak.

{11} **Conditional Conjunctive**

{12} **If**<sup>40</sup>

{13} 1. நான விசுவசித்தெனானால்<sup>141</sup> (nāṇ vicuvācittēṇ āṇāl)

{14} *if I believe, believed, or if I believe;*

{15} நீ விசுவசித்தாயானால் (nī vicuvācittāy āṇāl)

{16} *If you believe.* And so forth by adding

{17} to the preterit tense — because they do not use the present,

{18} although they speak in the present —

{19} the particle

{20} ஆனால் (āṇāl).

{21} 2. நான விசுவசித்தால்<sup>142</sup> (nāṇ vicuvācittāl) *if I believe*

{22} நீ விசுவசித்தால் (nī vicuvācittāl) *if you believe,*

{23} and so forth undeclined in all

{24} the persons and numbers according to the pronoun

{25} that precedes it.

{26} 3. விசுவசித்தானால்<sup>143</sup> (vicuvācitt\*āṇāl), *if I believe*

{27} விசுவசித்ததெயானால்<sup>144</sup> (vicuvācittat\*ē.y āṇāl) *you, etc*

{28} It is also indeclinable for

{29} all tenses, numbers and persons according

{30} to the pronoun that precedes it

{31} விசுவசித்ததெயுண்டானால்<sup>145</sup> (vicuvācittat\*ē.y uṇḍāṇāl)

---

indirect speech (see Asher 1985: 1-3 and 182-183; also Schiffman 1999: 151-152; Lehmann 1989: 373-375). Therefore, the use of the quotative *-enru/-ṇnu* is the main device for reporting speech. If in Modern Spoken Tamil today the status of *en* as a full verb is in doubt, the previous two examples that Costa provides show how this status still existed at his time while the example under analysis here displays the grammaticalization of the verb form: it follows the reported speech and it is followed by a *verba dicendi* in the matrix sentence.

<sup>140</sup> The third conjunctive takes the Latin conditional subordinate conjunction *si*.

<sup>141</sup> The form *āṇāl* ‘but, however, therefore’, is derived from the verb *āku-tal* ‘become’ in the past tense followed by the conditional suffix *-āl*. This is one of the verb forms that has been syntactically reanalysed in Modern Tamil as a verbal connective (Lehmann 1989: 138-139). It also functions as a coordinating conjunction. Hence, the example provided by Costa would be better translated as: *I believed, however; you believed, however*. See also footnote 147.

<sup>142</sup> This form is the Tamil conditional formed with the verb in the past tense followed by the suffix *-āl* (cf. Asher 1985: 44-46).

<sup>143</sup> This form is the *vinaiyeccam* followed by *-āṇal*.

<sup>144</sup> This form is the verbal noun followed by the emphatic particle *-ē* and *-āṇal*.

<sup>145</sup> This form is the verbal noun *the belief* followed by the conditional form of the verb *uḷ-tal* ‘to exist’ literally translated as *if the belief exists*.

[f. M-34-26]

L

- {1} விசுவசித்ததெயுண்டானாக  
{2} கால<sup>146</sup> (vicuvācittat<sup>ē</sup>.y uṇḍāṇ ākkāl) *if I, you etc. believe* also  
{3} indeclinable for all numbers and persons  
{4} according to the pronoun.  
{5} The 1<sup>st</sup> is formed from the preterit according  
{6} to the person and number required by the manner of speaking  
{7} with ஆனால (ānāl) as in தப்பினாரகளா  
{8} னால (tappiṇārkaḷ ānāl) *if they escaped*. Instead of  
{9} ஆனால (ānāl) the following particles  
{10} can also be added ஆனா  
{11} ககால (ānākkāl) ஆகில (ākil) எனகில (eṇkil)<sup>147</sup> என  
{12} றால<sup>148</sup> (eṇṇāl) of which ஆனால<sup>149</sup> (ānāl) அனாககால (āṇakkāl)  
{13} are the most commonly used. The 2<sup>nd</sup> is formed  
{14} from the preterit changing the என (eṇ) into  
{15} ஆல (āl) also from பொனென (pōṇēṇ) becomes  
{16} பொனால (pōṇāl) *if he goes* நீ பொககடிச  
{17} சால<sup>150</sup> (pōkkaṭiccāl) *if you lose*. The 3<sup>rd</sup> is formed  
{18} from the neutral participle of the preterit either  
{19} without change or changing the உ (u)

<sup>146</sup> This example is part of a more complex sentence where the past verbal noun of the verb ‘to believe’ is followed by the 3<sup>rd</sup> singular masculine form of the verb *uḷ-tal* ‘to exist’ (*uṇḍāṇ*). Therefore, it is followed by the verb *āku-tal* suffixed with *kkāl* which Fabricius (1972 [1770]) and Winslow (1862) recognise to be a வினைச்ச விருதி (*viṇai vikuti*) which is an ending of the verbal participle meaning ‘if provided, while, when’.

<sup>147</sup> The forms ending in *-il* are described as conditional if in Beschi (1738 [1728]: 102-104, § III, par. 115-118; Mahon 1848: 85-86, Section III, par. 115-118). *āṇal* and *ākil* “from the verb *ākīratu*, if it be not joined to another verb, signifies, *if it be* [...] But if it is put after the word of another verb, it signifies simply, *if*” (Beschi 1738 [1728]: 104, § III, par. 117; Mahon 1848: 86, Section III, par. 117). According to Krishnamurti (2003: 335) the conditional form in Old Tamil adds *-iṇ* to the bare stem of weak verbs, and to the non-past stem in *-kk-/-pp-* of the strong verbs, while the concessive is formed by adding the conjunctive particle *-um*. Only later, the Tamil conditional is obtained by adding *-ēl/-āl* to the past stem. Apart from these morphs, Wilden also (2018: 139) registers, for the *Caṅkam* Tamil, constructions such as verbal root + *-il/-ēl* and finite verb + *ākil*, plus other forms exclusively used in embedding. Furthermore, the suffixes *-il/-kil* are also attested for the conditional in Old Malayalam (Krishnamurti 2003: 335). Even if most of the forms listed here have not survived in Modern Tamil at least a couple of them are in direct continuity with the Old Tamil, like *ākil* and *āṇāl*. The latter already discussed in footnote 141, the former found from the *bakhti* literature onwards attached to a finite for embedding (cf. Wilden 2018: 138-139).

<sup>148</sup> The past tense of the verb *eṇ(ṇu)-tal* ‘to say’ inflected in the conditional mood.

<sup>149</sup> The past of *āku-tal* followed by the conditional marker *-āl*.

<sup>150</sup> This is the spoken form of the past tense of the verb *pōkkaṭi-ttal* ‘to lose’.

- {20} into எ (e); and instead of அனால் (aṇāl), the particles  
 {21} stated can be used அனாக:  
 {22} கால (aṇakkāl), is also common.  
 {23} (For) the 4<sup>th</sup> mode after having changed the உ (u)  
 {24} into எ (e), as above, add உண்டா:  
 {25} னால் (uṇṭāṇāl) or உண்டானாககால (uṇṭāṇākkāl).

### Negative

- {26}  
 {27} விசுவசியாதெயிருந்தால்<sup>151</sup> (vicuvāciyātē.y iruntāl)  
 {28} விசுவசியாதிருந்தால்<sup>152</sup> (vicuvāciyāt<sup>+</sup> iruntāl)  
 {29} விசுவசியாதெபொனால்<sup>153</sup> (vicuvāciyāte pōṇāl) *If I, you,*  
 {30} *etc. do not believe, etc.* are indeclinable modes  
 {31} for all numbers and persons, the 1<sup>st</sup> mode

### R

- {1} without synaloepha and the 2<sup>nd</sup> with it.  
 {2} விசுவசியாமலிருந்தால்<sup>154</sup> (vicuvāciyāmal iruntāl)  
 {3} *If I, you etc. do not believe* also for all  
 {4} persons, numbers.  
 {5} The negative is formed from the  
 {6} prohibitive imperative with இருந்தால் (iruntāl),  
 {7} conditional conjunctive of the verb இரு  
 {8} ககிறது (irukkīratu) to be with பொனால் (pōṇāl)  
 {9} conditional of the verb பொறது (pōratu) *to go*  
 {10} also வார்தெபொனால் (vārāte pōṇāl) i.e. வார்திருந்  
 {11} தால் (vārat<sup>+</sup>-iruntāl) *if one does not come.*  
 {12} The negative of this mode is also formed  
 {13} by placing after the preterit neutral participle  
 {14} the negative (verb) இல்  
 {15} லை (illai) and after any of the  
 {16} particles stated ஆனால் (āṇāl) etc. as in the  
 {17} formation of the first figure as in விசுவ

<sup>151</sup> The negative imperative (vicuvāciyātē) followed by the conditional form of the verb *iru-ttal*. The literal translation of the form given by Costa is: *if it is that, do not believe!*

<sup>152</sup> This form has synaloepha so it should be considered as a negative *viṇaiyeccam* followed by the conditional of the verb *iru-ttal*. In fact, this is also confirmed by Costa who underlines that the negative is formed by the prohibitive imperative that we have seen to correspond to the negative Tamil imperative and to the negative *viṇaiyeccam*.

<sup>153</sup> The negative imperative followed by the conditional of the verb *pō(ku)-tal*.

<sup>154</sup> Once again Costa provides the negative *viṇaiyeccam* followed by the conditional for the verb *iru-ttal*.

- {18} சித்ததிலலையாகில (vicuvācittat\* illai.y ākil) விசுவசித்த  
 {19} திலலையானால (vicuvāciyāttat\* illai.y ānāl) விசுவசித்ததி  
 {20} லலையெனகில<sup>155</sup> (vicuvācittat\* illai.y-eṇ-ākil) *if I do not believe, if*  
 {21} *you do not believe, etc. for all*  
 {22} numbers persons and tenses, according to the  
 {23} noun that precedes the verb,  
 {24} also they say விசுவசியாவி[ட்டா]ல<sup>156</sup> (vicuvāciyāvittāl)  
 {25} *if one does not believe for all persons and numbers,*  
 {26} formed from the negative adjective  
 {27} விசுவசியா (vicuvāciyā) *thing that does not believe with*  
 {28} the conditional of விடுகிறது (viṭukiratu), also  
 {29} காணாவிட்டால (kāṇā vittāl) *if one does not see*  
 {30} பொகவிட்டால (pōkā vittāl) *if one does not go*  
 {31} செய்யாவிட்டால (ceyyā vittāl) *if one does not do.*

[f. M-34-27]

L

- {1} **Conjunctive *quamvis***<sup>157</sup>  
 {2} நான விசுவசித்தாலும் (nāṇ vicuvācittālum) *given*  
 {3} *that I believe*  
 {4} நீய விசுவசித்தாலும்<sup>158</sup> (nīya vicuvācittālum) *even if you*  
 {5} *believe etc. for all tenses, numbers and persons.*  
 {6} (These are) indeclinable.  
 {7} It is formed from the 2<sup>nd</sup> conditional conjunctive  
 {8} stated above adding to it

<sup>155</sup> The forms in 18-20 are past verbal nouns followed by the negative *illai* and the conditional *ākil*, *ānāl*, and *eṇākil* respectively that Costa glosses as *if I, you, etc. do not believe*.

<sup>156</sup> This form is the negative conditional. It is a periphrastic construction formed by the negative *-ā* added to the verb stem and followed by *vittāl*, the conditional of the auxiliary *viṭu* (Lehmann 1989: 74). In this regard it is interesting to notice that Costa defines the verbal participle formed by adding *-ā* as an adjective. Indeed, as Steever (2005: 70) states, “this form is a contraction of an auxiliary verb construction in Middle Tamil, in which a now extinct negative form [ending in *-ā*] combined with the conditional of *viṭa* ‘leave’” [what is in the square brackets it is my addition].

<sup>157</sup> The fourth conjunctive described by Costa is labelled with the Latin concessive subordinate conjunction *quamvis* which in Latin requires the subjunctive mood. Indeed, Costa describes here the concessive of Tamil which is formed by adding the clitic *-um* to the conditional in *-āl* that is translated into English with “even if...”, “it doesn’t matter if...”, “even conceding (x)...”. Since in Portuguese, as well as in Latin the concessive construction would require the subjunctive mood, and in Latin it would be introduced by the particle *quamvis*, Costa decides to address this form as *Conjunctivo quamvis*. For a more detailed discussion see Muru (2021a).

<sup>158</sup> These are the same forms discussed in footnote 142 and 155 followed by *-um* to form a concessive.

- {9} உம (um) as in அவ{ர்ர்}களசெதாலு
- {10} ம (avarka| cettālum) *despite the fact that they die, even if or given*
- {11} *that they die.*
- {12} In addition, the conditionals mentioned above
- {13} take this manner of speaking by
- {14} adding the same உம (um) as in விசுவ
- {15} சிதததானாலும (vicuvācittat<sup>a</sup>ñālum) or விசுவசிதத
- {16} தெயுண்டானாலும<sup>159</sup> (vicuvācittat<sup>e</sup>.y uṇṭāñālum) *given that one believes*
- {17} etc. (This mode of speaking<sup>160</sup> can also be made) from the gerund<sup>161</sup> of the verb also with
- {18} இருந்தாலும (iruntālum)
- {19} நீ{ர்ர்} விசுவசிசுகிருந்தாலு (*sic*)
- {20} ம<sup>162</sup> (nīr vicuvācikkiruntālum) *even if your mercy believes* etc. By adding
- {21} some interrogative particle to
- {22} this mode, it takes the sense of: *anyone*
- {23} *who*, as in நான எந்தசசத்தியம வி
- {24} சுவசிததாலும<sup>163</sup> (nāñ enta.c cattiyam vicuvācittālum) *any truth*
- {25} *that I believe* etc. according to the pronoun.
- {26} **Conjunctive *sicut***<sup>164</sup>
- {27} 1. விசுவசிககிறாபபொலெ (vicuvācikkirā.p pōlē)
- {28} *as I believe*
- {29} நீவிசுவசிககிறாபபொலெ (nī vicuvācikkirā.p pōlē) *as*

<sup>159</sup> The forms in lines 15 and 16 are both verbal nouns followed by *-āñālum* and *-ūṇṭālum* respectively.

<sup>160</sup> The label that Costa selects – *this mode of speaking / esta lingoagem* in Portuguese – underlines the criteria behind Costa’s taxonomy of Tamil verbs which is based on the semantic of the different forms all expressing the same *mode of speaking* rather than on the formal criteria, therefore on the form they have or how they are formed.

<sup>161</sup> *Gerund* is the label that Costa uses for referring to what the Tamil grammatical tradition defines as *viñaiyeccam*. Cf. footnote 185.

<sup>162</sup> This form, which is intended to be the *viñaiyeccam* of the verb *vicuvāci-ttal* occurs in the spoken Tamil with the past suffix *-cc-* rather than *-tt-*.

<sup>163</sup> When *-um* is added to the conditional, its interpretation depends on the tense of the main verb. Costa provides here a clause where the *conditional* + *-um* is a predicate containing an unspecified element in the form of an interrogative expression giving form to an indefinite concessive clause.

<sup>164</sup> In this subjunctive as well as in the previous one, Costa places some Tamil forms that he needs to label but that cannot find a correct correspondence with the latinized category of the subjunctive. Therefore, as I have already emphasized in Muru (2021a), Costa is obliged to extend the Latin category by adding new subjunctives named according to the semantic value that they have, therefore he invents *the subjunctive dis que* – discussed at footnote 124 – and the *subjunctive sicut*.

{30} *you believe* indeclinable for all  
{31} numbers and persons of the present.~.~.

## R

- {1} 2. நான விசுவசிததாபபொலெ (nāṅ vicuvācittā pōlē)  
{2} *as I believed*  
{3} நீ விசுவசிததாபபொலெ<sup>165</sup> (nī vicuvācittā pōlē) *as*  
{4} *you believed* indeclinable for all  
{5} persons, numbers of the preterit and the future  
{6} according to the pronoun.  
{7} 3. விசுவிககிறதினபடியெ<sup>166</sup> (vicuvācikkirat<sup>#</sup>-in paṭiyē)

<sup>165</sup> Here Costa uses the infinitive *pōla* from the verb *pōl-tal* ‘to seem, to resemble’ followed by the emphatic particle *-ē*. When in the next paragraph he explains how this form is obtained, he clearly states that the first three forms are adjectival participles, in the present and past tense respectively, where the final *-a* has been lengthened to *-ā* before being suffixed by *pōlē*. Later, at the end of the paragraph he identifies the suffix *-māppole*. Furthermore, the same form is also described when Costa explains how to obtain adjectives in Tamil (GL1, f. m-34-not numbered, a, R, line 17-18). However, looking at the forms listed in lines 1-4 by Costa, this *particle* works as such only in the last two examples. Indeed, in the remaining forms, the linguistic elements which have been identified are: 1. nonfinite verb form, either a *peyareccam* or a *verbal noun*; 2. the long *-ā*; 3. the postposition *pōla* for equative sentences. Among these three elements, what is *-ā*? There are different speculations which might be made. Firstly, one could hypothesise it to be the negative marker for the verb form that Costa defines as an *adjectival participle*, therefore *peyareccam*. But this would contrast with the Portuguese gloss that the missionary gives. Secondly, another possibility would be to take *-ā* as the interrogative particle for *yes-no* questions whose unmarked position is at the end of the sentence usually on the finite verb. But it can also occur on any other constituent for focused *yes-no* questions. However, differently from *-ō*, it cannot occur on noun modifiers, thus adjectival clauses (cf. Krishnamurti 2003: 448; Lehmann 1989: 232-233; Asher 1985: 4-5; 98). Thirdly, a more reasonable interpretation would be to consider that Costa was wrong when he considered those verb forms as adjectival particles. But rather they are finite verb forms in the third neuter plural, thus marked by *-ā* (Andronov 1989: 203). However, even this solution would not be entirely satisfactory and would create problems, since the 5<sup>th</sup> form would remain without an explanation. Finally, looking at the Modern Tamil language, one could consider that the complement *pōla* embeds a kind of tensed conditional clause whose status, according to Lehmann (1989: 338), is unclear. Indeed, the complementizing verb form *pōla* occurs as a bound form after this peculiar type of conditional form where the final *-l* of the conditional suffix *-āl* changes into *-ṛ* (ibid.) in Modern Standard Tamil, while in Spoken Tamil what precedes *பலெ ple* [the reduced form of *pōla*] is *ஆ aa* (cf. Schiffman 1999: 183). In conclusion, it is necessary to investigate these forms further.

<sup>166</sup> The form *paṭi* is a noun meaning ‘manner, mode’ (DED 3851) occurring here after a verbal noun – that Costa names *infinite absolute* (cf. footnote 170) – inflected with the suffix *-in* which in the *Caṅkam* corpus (Wilden 2018: 33) represented the oblique case and was listed as being the fifth case in the *Tolkāppiyam*. Indeed, in Old Tamil it was used as an ablative of separation, instrumental, as well as for marking the object of an equation ‘like, as’, thus comparative, the latter being its main function (see Lehmann 1998: 80-81; Krishnamurti 2003: 237). In Modern Standard Tamil it occurs as a postposition which expresses ‘according to’ (Lehmann 1989: 123). In this context it occurs after a verbal noun in the oblique form, therefore the literal translation of this form could be *in the manner of the believing* – that Costa renders as *as I, you, he, she, etc. believe*.

- {8} or படி (paṭi) as *I, you believe* etc.  
 {9} 4. விசுவசிககிறபடி<sup>167</sup> (vicuvācikkira paṭi) or படியெ (paṭiyē)  
 {10} idem.  
 {11} 5° விசுவசிககுமாப்பொலெ<sup>168</sup> (vicuvācikkumā.p pōlē)  
 {12} or பொல (pōla) as *you, I believe*.  
 {13} They are used for all numbers and persons of the present  
 {14} according to the pronoun added.  
 {15} {{They}} can also be used for the future.  
 {16} விசுவசிகத்தினபடியெ<sup>169</sup> (vicuvācittat<sup>u</sup>ṇ paṭiyē)  
 {17} விசுவசிகதபடி (vicuvācitta paṭi) or படியெ (paṭiyē)  
 {18} as *I, you believed* etc. as indeclinable  
 {19} for all persons and numbers of the  
 {20} preterit according to the preceding pronoun .  
 {21} They are formed from the preterit.  
 {22} in the same way as the 1<sup>st</sup>, 2<sup>nd</sup>, 3<sup>rd</sup> of the present  
 {23} The first is formed from the adjectival participle  
 {24} of present with பொலெ (pōlē) பொல (pōla)  
 {25} by changing the last அ (a) of the participle  
 {26} into ஆ (ā), as in வருகிறாப்பொலெ (varukirā.p pōlē) as  
 {27} *he comes*. The 2<sup>nd</sup> from the participle of the same  
 {28} manner அவனிருக்கிறாப்பொ.  
 {29} லெ (avaṇ irukkirā.p pōlē) as *he is* இவன சொ  
 {30} லலுகிறாப்பொலெ (ivaṇ collukirā.p pōlē) as *this one/he says*.  
 {31} The 3<sup>rd</sup> is formed from the genitive of the infinite

#### [f. M-34-28]

L

- {1} absolute<sup>170</sup> with the particles படி or

<sup>167</sup> The form *paṭi*, already discussed in the previous footnote 166, if used after the relative participle in Standard Modern Tamil, has the meaning of ‘as’, ‘in the manner of’, ‘in the way of’ while after a noun or pronoun is used in the sense of ‘as per’, ‘according to’ (cf. Lehmann 1989: 345).

<sup>168</sup> Costa considers this form as the 3<sup>rd</sup> person neutral of the future affirmative to which he adds two different suffixes: the already discussed *pōle* (cf. footnote 165) and the dubious *-ā*.

<sup>169</sup> This is the same form commented in footnote 166.

<sup>170</sup> Here Costa refers to the genitive because when the suffix *-iṇ* is added to a noun and followed by another noun it establishes an adnominal relation between the two. Furthermore, the reference to *infinite absolute* rather than to *substantive* as we would expect and as it occurs in three of the other copies of this manuscript (cf. footnote 557 in *Part 2*) should be considered a mistake of the author/copyist since on ff. M-34-28 and M-34-29 this manuscript also differentiates between the

- {2} படியெ (paṭiyē), also நீநடககிறதினபடி  
 {3} யெ (nī natakkirat\*in paṭiyē) as you walk நாங்கள  
 {4} கெடகிறதினபடியெ (nānkaḷ kēṭkirat\*in paṭiyē) as we  
 {5} hear, or ask. The 4<sup>th</sup> is formed  
 {6} from the adjectival participle with  
 {7} the same particles. The 5<sup>th</sup> from the 3<sup>rd</sup>  
 {8} neutral person of the future affirmative  
 {9} with மாப்பொலெ (māppōlē)<sup>171</sup> or பொல (pōla) as in  
 {10} நானசெய்யுமமாப்பொலெ (nāṇ ceyyumā.p pōlē)  
 {11} as I do நீ{ர்} கல்பிககுமப்பொலெ (nīr kalapikkum-ā.p pōlē), as  
 Your mercy  
 {12} orders, or  
 {13} orders.  
 {14} **Negative**  
 {15} விசுவசியாதபடியெ (vicuvāciyāta paṭiyē)  
 {16} விசுவசியாததினபடியெ (vicuvāciyāta\*in paṭiyē)  
 {17} விசுவசியாதிருககுமாப்பொலெ (vicuvāciyāt[t\*]-irukkum-ā.p pōlē)  
 {18} as I did not believe, you believed, etc. It is used  
 {19} undeclined for all persons and numbers.  
 {20} The 1<sup>st</sup> negative is formed from the negative  
 {21} infinite [that is] adjectivated with படி  
 {22} யெ (paṭiyē).<sup>172</sup> The 2<sup>nd</sup> [is formed from] the genitive  
 {24} of the same negative substantivated infinite<sup>173</sup> — as you etc. —  
 {24} The 3<sup>rd</sup> form is from the dative of the same  
 {25} negative infinite as in நீயிடறாத  
 {26} துககுமாப்பொலெ<sup>174</sup> (nī.y iṭarātattukkum-ā.p pōlē) as you

---

two infinitives providing these forms: *vicuvācikka* for the *infinite absolute* and *vicuvācikkiratu* for the *infinite substantive* which is the same form occurring in this example.

<sup>171</sup> This is the form *-māppole* to which I have already referred in footnotes 165 and 168.

<sup>172</sup> As with the Tamil form provided in line 15 (*vicuvāciyāta paṭiyē*) Costa deals here with the negative *peyareccam*. However, he refers to this form with the label *infinite* which he defines as adjectivated. It is not clear if this feature is an inherent quality of the Tamil form or if it has been acquired through the addition of the particle *paṭiyē*. Being the only context where the form *vicuvāciyāta* is referred to as an infinitive since it clearly appears in the passage devoted to the description of *participles* (cf. f. M-34-29, R, line 15) and it is described as a negative adjectival participle in another passage (cf. f. M-34-32, L, line 5) – also referred to as negative adjectivated form of the participle (cf. f. M-34-32, R, lines 24-27) – I am inclined to consider this label as a mistake that is partially recovered by the addition of the word *adjectivated*.

<sup>173</sup> The second form described as *genitive of the same negative substantivated infinite* is the negative verbal noun suffixed in the oblique *-in* (cf. footnote 166).

- {27} *do not stumble*.~.~.~.~.  
 {28} The manner of speaking in *sicut*  
 {29} is also made by placing after the infinite substantive  
 {30} the particles ஆக (āka) or ஆய (āy)<sup>175</sup> the 1<sup>st</sup>  
 {31} is the infinite, the 2<sup>nd</sup> is the gerund of the verb

## R

- {1} ஆகிறென (ākīrēṇ) as in e.g. நான விசுவ:  
 {2} சிககிறதாக (nāṇ vicuvācikkīrat-āka) as *I believe*, or நீ வி  
 {3} சுவசிககிறதாக (nī vicuvācikkīrat-āka) as *you believe* or  
 {4} *you will believe* நான விசுவசித்த  
 {5} தாக<sup>176</sup> (nāṇ vicuvācivacittatāka) as *if I had believed* or as  
 {6} *I believed* and so forth for the other numbers and  
 {7} persons using the preterit or present  
 {8} according to the manner of speaking. This mode  
 {9} also admits the pas(sive)  
 {10} meaning அதுவிசுவசிககிறதாக (atu vicuvācikkīratāka)  
 {11} as *if that were believed*.  
 {12} Another mode of expressing the *sicut*  
 {13} is by adding the particles பொலெ (pōlē)  
 {14} or பொல (pōla) to the masculine or feminine  
 {15} substantivated participles,<sup>177</sup>  
 {16} according to the person as in விசுவசிககிறவன  
 {17} பொலெ (vicuvācikkīraṇṇ pōlē) as *the one who believes* or as  
 {18} *one who believes*. விசுவசிககிறவள  
 {19} பொலெ (vicuvācikkīraṇṇ pōlē) as *the one (fem) who believes*, or  
 {20} as *that who (fem) believes*. In the preterit விசு

<sup>174</sup> Here again, the Tamil form is a negative verbal noun of the verb *iṭaru-tal* ‘to stumble’ in the dative case, literally translated as *for that also which stumble*. It is followed by the particle *-um*, the negative *ā*, the infinitive *pōla* of the verb *pōl-tal* ‘seem’, and the *emphatic -ē*.

<sup>175</sup> These forms are the peyareccam (*āka*) and the viṇaiyccam (*āy*) the verb *āku-tal*. They grammaticalised as bound forms that, once added to nouns transform it into an adverb. However, this is not the only function they have. For this reason, as discussed in Lehmann (1989: 140-146) and in Annamalai (1969), their categorial status cannot be limited to adverbial markers and it is not yet clarified. In this context however, considering that Costa is discussing the *conjunctive sicut*, we can consider them as assimilable to *pōla*, hence as expressing the concept of ‘like’.

<sup>176</sup> In the Tamil forms included between lines 1-5 the suffix *-āka* is suffixed to present and past verbal nouns. In Modern Tamil “the infinitive form *āka* embeds a nominalized clause into a sentence and occurs thereby as bound form” (Lehmann 1989: 331).

<sup>177</sup> The *substantivated participle* corresponds to those nonfinite forms addressed as participial nouns today, as the following examples, which Costa provides, also demonstrate.

- {21} வசித்தவன்பொலெ (vicuvācittavaṇ pōlē) *as the one* (masc)  
 {22} *who believed*, etc. The negative of this is made by using  
 {23} the negative participle in the same manner  
 {24} e.g. வசவசியாத[வன]பொ  
 {25} லெ<sup>178</sup> (vicuvāciyātavaṇ pōlē) *as one who does not believe*.  
 {26} **Infinitive Absolute Mo**  
 {27} **de**  
 {28} விசவசிக்க (vicuvācikka) *believe or to believe*, also  
 {29} *believing*. It can also signify  
 {30} the ablative absolute,<sup>179</sup> as in அ

<sup>178</sup> This is the negative participial noun. In conclusion, Costa has included under the same label – *conjunctivo sicut* ‘like, as’ – all the Tamil forms with this semantic property, many of which do not find a place under any other Latin label. What these forms have in common is not only the semantic value but also the formal characteristic of not being able to be used independently, but rather of being part of complex sentences or being techniques through which to build subordinate clauses in Tamil, a formal feature that they share with the Latin category of the subjunctive which cannot stand alone. For a more detailed discussion on this perspective see Muru (2021a).

<sup>179</sup> Firstly, Costa differentiates between two different infinitives which he labels as *absolute* and *substantive*. The first one underlines its verbal usage, while the second one underlines the capacity of the infinitive of functioning as an abstract noun which points out the action. Therefore, it absolutes a nominal function. However, considering that Costa also specifies that the absolute infinitive can also *signify* the *Latin absolute ablative*, in order to understand Costa’s reasons for selecting this label, I have looked into Schad (2007: 5-6) who provides different interpretations for this label in the Latin grammar tradition. The first is for underlining the: 1. *absolute, independent i. for type of nouns*, ii. *pronouns (free of gender, intransitive)*, iii. *deponents*, iv. *of verbal utterance without a pronoun*. The second as referred to the *perfect and complete of the perfect tense*. No. 3 refers to *basic, primary* as for to i. ‘*positive*’ *grade, in comparison of adjectives and adverbs classification*; ii. *type of verb and participle*; the last one refers to 4. *definite* 1. *of pronouns*. Hence, considering that Costa refers to the Tamil absolute infinitive as being equal to the Latin *absolutūs ablative*, in my opinion the label *absolute* should be considered as a label specifying the main syntactic quality of the Tamil infinitive. Indeed, the equation with the Latin absolute ablative may be explained when taking into account a syntactic feature of this Latin construction which it appears to have in common with Tamil. In fact, in Latin this construction is *independent* from the main clause and the subject of this nonfinite clause is different from that of the main clause. The Latin absolute ablative is a verbal usage of the Latin participle which expresses in an implicit way a temporal, causal/purpose, conditional, and concessive clause but it is independent, hence *absolutūs*, from the grammatical relations with the other items of the sentence of which it is a part. The logical subject of the Latin absolute ablative cannot coincide with the subject of the governing proposition. This is also the basic rule displayed by the Tamil infinitive. As Annamalai (1980: 161) underlines “one of the surface realizations of the embedded sentence in Tamil is the infinitive clause – clause whose predicate is inflected neither for tense nor for person-number-gender and is morphologically marked with the suffix -a in Modern Tamil”. When this nonfinite form is used in complex sentences, where it carries out different semantic functions such as purpose, cause, circumstance, or result (see Annamalai 1980; Lehmann 1998: 92-93; Wilden 2018: 92), thus marking subordinate clauses that are resultative, simultaneous, causal, final, temporal, the use of the infinitive marks a *change* of subject. This is probably the main reason for which Costa chose this label: because *absolutūs* underlines the independent nature of the infinitive from the main clause in term of syntactical functions.

{31} வன விசுவசிக்க (avaṅ vicuvācikka) *credente illo* (believing he)

[f. M-34-29]

L

{1} அவ{ர்}களதினன (avarkaḷ tinna) *comedentibus*

{2} *illis* (eating they) etc.

{3} விசுவசிக்கதகதகதாக<sup>180</sup> (vicuvācikkat<sup>tu</sup>-takkatāka) (*in order*) to believe.

{4} **Infinite substantive**<sup>181</sup>

{5} விசுவசிக்கிறது (vicuvācikkiratu) *the belief, this thing that is believed*

{6} விசுவசிக்கிறது (vicuvācittatu) [*the fact of*] believing, having believed, or having believed

{7} *this one which is believed*

{8} விசுவசிப்பது (vicuvācippatu)<sup>182</sup> to have to believe, or the fact of having

{9} *to believe, this one which has to be believed.*

{10} விசுவசியாத்து<sup>183</sup> (vicuvāciyātatu) negative for all, *the one who*

{11} *does not believe, or did not believe* etc. By removing

{12} from all { {these infinites} } the letter து (tu) all become adjectival

<sup>180</sup> The infinitive *vicuvācikka* is followed by *takkatu*, meaning ‘to be fit, appropriate, suitable, proper, worthy, adequate, proportionate, be excellent, etc.’ (DED 3005), suffixed with *āka*, the infinitive of the verb *āku-tal* ‘to become’ which also occurs as a bound form added to quality nouns to form adverbials. Beschi (1738 [1728]: 76-79, § IX, par. 86; Mahon (1848): 64-66, Section IX, par. 86) describes it as a *noun adjective* that it is in truth a *participle präterite* from the defective verb *takukiratu* which signifies *to be meet, to become*. *taku-tal* is one of the auxiliaries that, according to Krishnamurti (2003: 375), has been used since the *Cankam* literature (3<sup>rd</sup> cent. AD) as a modal auxiliary even though it is not attested in Wilden (2018: 160-161).

<sup>181</sup> This is the second kind of infinitive described by Costa. It is labelled as *substantive* and the corresponding Tamil form is the verbal noun. The reason guiding Costa in the choice of this label seems to be quite evident. In Latin, when the infinitive is substantivated it works as a neuter substantive, it can be a subject, it can be part of the nominal phrase governed by the predicate, and it can also be specified and defined with attributes. In Tamil the nominalized verb forms, differentiated into tensed and untensed verbal nouns, occur in compound verb constructions and in the formation of complex sentences where they can take case markers. The verbal nouns can be considered as parallels to the participial nouns from which they differ for the fact of taking an abstract nominal rather than a pronominal as bound suffix. In this case the nominalisation is considered as a morphological rather than a syntactical process. Therefore, the verbal predicate occurring in the final position of the embedded clause combines with a bound nominal, the head Noun Phrase of the construction, the nominalizing suffix *-atu* meaning ‘the fact that’ or ‘the event of’ (Lehmann 1989: 299).

<sup>182</sup> The translation of this Tamil form should be: *the fact that I will believe*.

<sup>183</sup> What would be a *pulli* today, it is used here as a diacritic for marking C+V, hence ஃ should be read as [ta]. This form is the negative verbal noun, while those in the previous lines (5, 6, 8) are the tensed verbal nouns: present, past, and future, respectively. What Costa does not include here are the untensed verbal nouns (*in -al, -tal (-ttal), -kai (-kkai)*).

- {13} participles<sup>184</sup> as we soon will see  
 {14} even if among them the one formed from the future  
 {15} is rarely used.  
 {16} {{All these infinites}} are formed from the first persons, the 1<sup>st</sup>  
 {17} from the present, the 2<sup>nd</sup> from the preterit the 3<sup>rd</sup>  
 {18} from the future by changing the *en* in அது (*atu*);  
 {19} All are declined as nouns  
 {20} விசுவசிக்கிறது (*vicuvācikkiratu*) *the belief* விசுவசிக  
 {21} கிறதினுடைய (*vicuvācikkirat<sup>u</sup>-in-utaiya*) *of the belief* விசுவ  
 {22} சிக்கிறதுக்கு (*vicuvācikkirat<sup>u</sup>-ukku*) *for the belief*. Etc.  
 {23} **Gerund**<sup>185</sup>  
 {24} வி{சுவசிக}து (*vicuvācittu*) *believing*  
 {25} விசுவ{சிக}யாமல<sup>186</sup> (*vicuvāciyāmal*) *not believing*.

<sup>184</sup> Indeed, the verbal nouns in Tamil can be considered as deriving from the adjectival participle to which the suffix *-atu* is added (verb stem + tense+ a + *tu*).

<sup>185</sup> Here Costa gives the Tamil forms corresponding to a nonfinite verb which still finds different denominations in scientific literature, e.g. absolute, adverbial participle, conjunctive, gerund, converb, verbal participle. Its structure consists of the verb stem + the past tense morph (*-t*, *-nt*, *-in*, *-i*, *-it*) + *u*. Within the Tamil grammatical tradition, these forms are called *viñaiyeccam*: “they are independent, nonfinite verb forms that combine with following verbs, with or without additional material intervening” (Steever 2005 :70). *Viñaiyeccam*, in the Tamil traditional grammar, refers to an ‘incomplete’ verb form: “litt. “[qui a un] manque de verbe”; syntaxiquement, joue le même rôle que ce que des descripteurs du sanskrit appellent *absolutif*; est suivi dans la phrase par un verbe à une form finie; on dit qu’il le prend pour se conclure” (Chevillard 2008: 254) [“lit. “[which has a] lack of verb; syntactically, plays the same role as what the Sanskrit grammarians call *absolute*; in the sentence it is followed by a verb in the finite form; it is said that it takes it for its conclusion”, translation mine]. Therefore, the *viñaiyeccam* are tenseless verb forms and their time of reference is determined by the time reference of the verb of the main clause. In Modern Tamil they express conjunctive complement, adverbial clause, and verbal complement (Lehmann 1989: 265). It must also be noted that the Tamil traditional term for defining this kind of verb form implies the presence of the word *eccam* “ce mot désigne un term auquel il manque quelque chose, auquel cas nous le traduisons par *incomplete*, ou bien ce que lui manque, auquel cas nous le traduisons pare reste [...] le terme s’applique aussi bien aux participes ad-nominaux (*peyar – eccam*) qu’aux participes ad-verbaux (*viñai – eccam*), lesquels ont besoin d’un nom ou d’un verb pour compléter leur construction”. (Chevillard 2008: 92), [this word designates a term which is missing something, if it is translated as *incomplete*, or rather what it lacks, if it is translated as the *remaining* [...] the same term applies well to adnominal and adverbial participle (*peyar – eccam* and *viñai – eccam* respectively) which need a noun or a verb to complete their constructions, translation mine].

The label chosen by Costa refers to the property of the Latin gerund of expressing the verbal action in logical functions which are neither subject nor object. Indeed, the Latin gerund defines an action without specifying the subject, the tense, the number, or the person. To a certain extent this is also true in Tamil, the gerund being a nonfinite verb form. However, at least in Old Tamil, the gerund (or better the absolute) has the subject identity with the main verb in a sentence (Wilden 2018: 83). Furthermore, the Latin gerund can govern nominal phrases which depend on the normal construction of the verb. The verbal participle in Tamil occurs in compound verb constructions and in complex sentence constructions.

- {26} The gerund is formed ordinarily
- {27} from the first person of the preterit
- {28} by changing the *en* into *v* as in from வந்தென (*vantēn*),
- {29} *I came*, becomes வந்து (*vantu*) *coming*, from பொட
- {30} டென (*poṭṭēn*) becomes பொட்டு (*poṭṭu*) *throwing*.
- {31} From this rule we can exclude சொன்னெ

## R

- {1} ன (*conṇēn*) *I said* becomes சொலலி (*colli*) *saying*;
- {2} from பொன்னெ (*pōṇēn*) *I went* becomes பெய (*pōy*)
- {3} *going*; ஆனென (*āṇēn*) *I was*, becomes ஆய (*āy*)
- {4} *being*, and others. However, the verbs that
- {5} form the preterit with *inen* all lose
- {6} the *nen* and end with *i*, as in
- {7} பண்ணினென (*paṇṇiṇēn*) *I did* becomes பண
- {8} னி (*paṇṇi*) {*doing*}, from நடத்தினென (*naṭattinēn*)
- {9} *I went to*, becomes நடத்தி (*naṭatti*) *going to* etc.
- {10} **Participle**<sup>187</sup>
- {11} விசுவசிக்கிற (*vicuvācikkira*) *thing that believes*
- {12} விசுவசித்த (*vicuvācitta*) *thing that believed*
- {13} விசுவசிப்ப (*vicuvācippa*) *thing that will believe*
- {14} விசுவசிக்கும் (*vicuvācikkum*) *believing he or believing they*
- {15} விசுவசியா<sup>188</sup> (*vicuvāciyā*) or விசுவசியாத்<sup>189</sup> (*vicuvāciyāta*) *thing*

<sup>186</sup> This form, made up of the verb stem + the negative allomorph – *ā* and the verbal participle suffix –*mal* is generally addressed as a negative adverbial participle. However, according to Steever (2005: 70) “no demonstrations have ever been offered that its meaning is the sum of the adverbial participle and the negative operator”.

<sup>187</sup> This is what the Tamil grammatical tradition calls *peyareccam*, “litt. Ce-à-quoi-manque un nom” (Chevallard, 2008: 202) [the one which lacks a name, translation mine]. According to Steever (2005: 67) “they are nonfinite verbs that anticipate or combine with a noun that follows; as such they are instrumental in the formation of relative clauses”. They consist of a verb stem inflected for tense or negation (*-āt-*), to which the adnominal *-a* is suffixed (*-um* in the case of future *peyareccam*). Costa also considers as negative adjectival participles those derived from the addition of the negative allomorph *-ā* (for a discussion on *ā* see footnote 165). The Latin label that Costa selects for identifying this Tamil form is determined by its function. As in Latin, where the participle often functions as a verbal adjective and may have an attributive function, also in Tamil the *peyareccam* functions as an adjective of the following head noun phrase or head noun. Furthermore, the Latin participle, as well as the Tamil one, is tensed. It takes case markers if the personal pronoun marker is added to it (that is if it forms a participial noun).

<sup>188</sup> *vicuvāciyā* in Old Tamil is the third person plural neuter in the negative where the negative morph *-ā* is suffixed to the verb stem.

<sup>189</sup> *vicuvāciyāta* is the negative *peyareccam*.

- {16} *that did not believe.*  
 {17} All formed from the substantive  
 {18} infinite as stated.<sup>190</sup> And all  
 {19} are adjectives of a single form and are  
 {20} very frequent in this language, apart from  
 {21} the future விசுவசிப்ப (vicuvācippa), they become  
 {22} masculine feminine or  
 {23} neutral substantives<sup>191</sup> (according to) the pronoun  
 {24} that is placed after them அவன (avaṅ), அவ  
 {25} ள (avaḷ), அது (atu), as in விசுவசிக்கிறவன (vicuvācikkiravan)  
 {26} *man who believes*, விசுவசிக்கிறவள (vicuvācikkiravaḷ)  
 {27} *woman who believes* விசுவசிக்கிறது (vicuvācikkirātu)  
 {28} *thing that believes* and thus substantivated,  
 {29} they can be declined for cases, as stated (in)  
 {30} the infinite.<sup>192</sup> The adjective participles  
 {31} admit passive meaning,

#### [f. M-34-30]

##### L

- {1} when the manner of speaking requires it.<sup>193</sup>  
 {2} **Participle in *-bilis* (*-able*)**<sup>194</sup>

<sup>190</sup> The Tamil forms that Costa provides here are participles inflected for the present, past, and future tenses respectively (lines 11-14). They are derived from the *verbal* (that is the *infinitive substantive*) through the removal of the final personal endings. For this reason, one of the negative forms Costa provides only contains the negative allomorph *-ā*. On the contrary, Costa derives participial nouns with the opposite strategy of addition (lines 25-27).

<sup>191</sup> Here Costa is referring to participial nouns obtained by suffixing the tense marker to the verb stem and adding the suffix *-a* corresponding to the 3<sup>rd</sup> person remote demonstrative pronoun and the personal, number, gender marker (PNG).

<sup>192</sup> The infinitive referred to here is the *substantive*. See footnote 181.

<sup>193</sup> It is probable that Costa, using the expression *when the language requires it*, is referring to the differentiation later stated in the last paragraphs of his grammar about *active* and *neuter* verbs corresponding to what Paramasivam (1979) distinguishes as *affective* and *effective* verbs. For further details on this discussion see Muru (2021b).

<sup>194</sup> “In Latin, the suffix *-bilis* is a basic formant whereby we can derive – regarded synchronically, from the present verbal stem – the deverbative adjectives of passive possibility. [...] Leuman (1917: 82; 1977: 348f.) classifies the adjectives with the suffix *-bilis* into three groups: 1. the adjective of passive possibility (*amābilis* = “able or worthy to be loved, lovable”, *laudābilis* = “praise worthy”, *sānābilis* = “curable”, and similar); 2. the adjective with instrumental meaning (*ascendibilis* = “on what = by means of which one can ascend”; *terribilis* = “by means of which one can be afraid”); 3. the active adjectives from intransitive verbs (*stabilis* = “steady, stable”; *dūrābilis* = “lasting, durable” and similar)” (Poltrová 2007: 113). What Costa does here is to regather different items which may all be grouped under the same semantic that the Latin deverbatives in *-bilis* express.

- {3} விசுவசிக்கலாம்<sup>195</sup> (vicuvācikkal-ām) *it is believable*  
 {4} விசுவசிக்கலாச்சு<sup>196</sup> (vicuvācikkal āccu) *it is believable, or let's believe*  
 {5} விசுவசிக்கலாகாது<sup>197</sup> (vicuvācikkal ākātu) *it is not believable*  
 {6} விசுவசிக்கலான<sup>198</sup> (vicuvācikkal āna) *believable thing(s)*  
 {7} விசுவசிக்கலாகாத<sup>199</sup> (vicuvācikkal ākāta) *unbelievable thing*  
 {8} These are all formed from the verbal [noun]  
 {9} விசுவசிக்கல (vicuvācikkal) *the belief* with the particles  
 {10} ஆம் (ām) ஆச்சு (āccu) or ஆச்சுது (āccutu) ஆ  
 {11} ன (āna) ஆகாது (ākātu) all stemming from the  
 {12} verb ஆகிறேன் (ākīrēn), as in பொகலாம் (pōkalām)  
 {13} *one can go, or he is movable, சொல்லா*  
 {14} ச்சுது (collaccutu) *it is said. சொல்லலாகா*  
 {15} து (collākātu) *it cannot be said மாறலா*  
 {16} ன (māralāna)<sup>200</sup> *changeable thing etc.*

<sup>195</sup> Costa clearly states that all the Tamil examples provided are formed from the nominalised verb *vicuvācikkal* – an untensed verbal noun obtained through suffixation of the nominalizing suffix *-al* that Andronov (1989: 200) defines “the second stem of strong verbs”. Therefore, different declined form of the verb *āku-tal* are suffixed to this verbal noun in the series of examples that Costa provides in this paragraph. The results that Costa obtains all convey similar semantic outputs.

The first form seems to correspond to what is the modal auxiliary *āku-tal* ‘to become’ in Modern Tamil today. Indeed, the verb *āku-tal* is inflected for future tense, 3<sup>rd</sup> person singular neuter, therefore *ākum*, which is phonologically reduced to *ām*. Among its functions are circumstantial and conjectural possibility, permission, and finally, the hortative ‘let’s or shall’ (Lehmann 1989: 215-216). Even though Schiffman (1999: 48) recognises that the suffix *lām*: “historically it is probably derived from the verbal noun forms that end in *-al* plus *-ākum* ‘it will become’, i.e. *pōkal* + *ākum* ‘the going will become’. Since *ākum* is now reduced to *-ām* and the verbal noun forms in *al* are rare in Spoken Tamil” he prefers to consider *-lām* as a single unit added to the infinitive. However, looking at the Portuguese gloss offered by Costa, one can see how the meaning that the missionary conveys to this Tamil form is much more loyal to the literal meaning of the construction rather than being one of today’s grammaticalised meanings. The literal translation of the construction *vicuvācittal ākum* > *would be the thing that will be believable* which is close to Costa’s *it is believable*.

<sup>196</sup> In this second form, the verbal noun is followed by *āccu*, the spoken variant of *āyirru* (see Asher 1985: 164). I have already commented this form. in footnote 123

<sup>197</sup> In this third form, the verb *āku-tal* is inflected for negative polarity and 3<sup>rd</sup> person singular neuter (*āk-ā-tu*). As Lehmann (1989: 217) states, in Modern Tamil “this auxiliary verb form expresses the three prohibitive senses of (i) negative obligation, (ii) negative desideration, and (iii) negative permission”. Even in this case, however, Costa’s Portuguese gloss reveals that the form described had not yet fully grammaticalized into an auxiliary.

<sup>198</sup> This fourth form is the past *peyareccam*.

<sup>199</sup> The form *ākāta* is the negative *peyareccam* of *āku-tal*, which in Classical Tamil is the 3<sup>rd</sup> plural neuter negative (I am indebted to Ciotti, personal communication).

<sup>200</sup> Verbal noun of *māru-tal* ‘to become changed’ followed by the *peyareccam* of *āku-tal* grammaticalised into the adjectival suffix *āna*.

{17-18} **Many other assorted modes of speaking.**

{19} **Interrogative modes.**<sup>201</sup>

{2} or *we will go* etc. These two are indeclinable

{3} for all persons and numbers

---

<sup>201</sup> In this section Costa describes different *modes of speaking* in Tamil emphasizing the communicative and pragmatic aspects. Under different labels created ad hoc such as interrogative mode (*modo interrogativo*), causative mode (*modo cauzativo*), assertive mode without doubt (*modo asseverativo sem duvida*), mode with doubt (*modo com duvida*), attitude or convenient mode (*modo de aptidaõ ou conveniencia*), comparative mode (*modo comparativo*), Costa includes different Tamil forms such as interrogative pro-forms, dubitative clitics, modal auxiliaries, verbs, defective verbs, verbal nouns or verbal participles inflected for case marker, postpositions as well as noun phrases as part of more complex sentences. There are no formal criteria guiding him, there are no attempts to match the Latin categories with the Tamil ones, there is simply the need and the intention to reduce to the easiest categorization all the Tamil expressions necessary for asking, explaining, asserting, declaring, questioning, expressing surprise or disappointment, and similar communicative aspects. For this reason, Costa needs to extend his Latin reference model and create new labels to categorize the different *modes of speaking* that he is observing, and experiencing while being immersed in Tamil life. The extension of the Latin grammar here through the creation of new categories is based on semantic and pragmatic-communicative aspects rather than on formal similarities in categories between Tamil and Latin.

<sup>202</sup> This is the dubitative clitic *-ō* that occurs with all sentence constituents except noun modifiers to express the speaker's uncertainty with regard to the proposition of the sentence transforming the statement into a dubitative one (Lehmann 1989: 154).

<sup>203</sup> The past *peyareccam* of the verb *uḷ-tal* 'be, exist' suffixed with the dubitative marker to convey the sense of a rhetoric question or question tag: *isn't it? isn't there?*

<sup>204</sup> The verb form is *tiriṭu-tal* 'to steal' (*furtar* in Portuguese).

<sup>205</sup> Costa declares that these forms are used for the future tense. Therefore, it is probable that in the first example the dubitative marker is attached to the future tense marker *-v-*, while in the second one, the dubitative marker is attached to the termination of the defective verb *māṭṭu* 'will'.

{4} the 2<sup>nd</sup> for the preterit, the 3<sup>rd</sup> for  
{5} the future.

{6} **Why**

{7} எனனததுககுவிசுவசிககி

{8} நாய<sup>206</sup> (eṇṇat\* atukku vicuvācikkirāy) *why do you (plu) believe*  
எனவிசுவ

{9} சிககிறான (ēṇ vicuvācikkirāṇ) *why does he believe?* எனவி

{10} சுவசித்தான<sup>207</sup> (ēṇ vicuvācittāṇ) *why did he believe.* And so on for

{11} the other tenses and persons adding

{12} என (ēṇ) before the verb. The negative of this is

{13} எனவிசுவசிககிறதிலலை (ēṇ vicuvācikkirāt\* illai) or

{14} எனவிசுவசிககவிலலை<sup>208</sup> (ēṇ vicuvācikka.v illai) *why do*

{15} *you (plu) not believe*, it is general and is used for

{16} all numbers and persons, also விசுவசி

{17} பபொனன (*sic!*) (vicuvācippāy ēṇ) *why do you [sing.] believe*,

{18} is also used for all numbers and persons

{19} by placing என (ēṇ) after the 3<sup>rd</sup> masculine person

{20} of the affirmative future, the negative

{21} of this is விசுவசியாமலெ

{22} ன<sup>209</sup> (vicuvāciyāmal ēṇ) *why do you not believe?* for all

{23} tenses, numbers and persons also விசு

{24} வசியாமலெனன (vicuvāciyāmal eṇṇa) *why will they not believe?*

{25} **In order to**

{26} எனனததுககுவிசுவசிககி

{27} நாய<sup>210</sup> (eṇṇatatukku vicuvācikkirāy) *why do you (plu) believe?*,  
conjugating

{28} the verb according to the manner

---

<sup>206</sup> Costa identifies the interrogative *eṇṇatu* ‘what’ which precedes the pronoun *atu* inflected for the dative case and followed by the present indicative of the verb *vicuvāci* inflected for the second person singular for which a better translation would be: *what do you believe?*

<sup>207</sup> Costa identifies the interrogative *ēṇ* ‘why’, a *viṇa.p peyar* in the Tamil grammatical tradition.

<sup>208</sup> In both cases the interrogative is *ēṇ*. However, in this example as well as in the previous ones and in the following ones, Costa never gives the single form that conveys the meaning described by the label that he has selected for classifying a specific *mode of speaking*. But rather, he always gives a full sentence or phrase. Therefore, the first negative form is a verbal noun followed by the defective verb *il* ‘be not, exist not’.

<sup>209</sup> In this example and in the previous ones, *ēṇ* is a final suffix, an *iṭaiccol* in Tamil grammatical tradition, which is suffixed to finite forms in order to express a polite way of requesting something (cf. Cre-A.). In the 21<sup>st</sup> line *-ēṇ* is suffixed to the negative verbal participle *vicuvāciyāmal* which, however, Costa defines as being the third person masculine of the negative future.

<sup>210</sup> Costa gives the same form already given in the paragraph entitled *why*. See footnote 208.

- {29} of speaking. It can also be used for any of the  
 {30} modes stated above in the [paragraph] ‘why’.  
 {31} **Not**<sup>211</sup>

[f. M-34-31]

**L**

- {1} விசுவசிக்கிறெனலொ<sup>212</sup> (vicuvācikkirēn allō) *I believe,*  
 {2} *do I not?* வினையாடுகிறார்களால்  
 {3} லொ (vilaiyāṭukirārkaḷ allō) *they are joking, aren't they?*  
 {4} Also, it is made by adding the எ (ē) after any  
 {5} tense or person e.g. விசுவசிக  
 {6} கிறாயெ (vicuvācikkirāyē) *you [plu] believe, do you not?, it is enough*  
*that you [plu] believe,*  
 {7} *isn't it?* விடுகிறாயெ<sup>213</sup> (viṭukirāyē) *you leave, won't you?*  
 {8} **Who?**<sup>214</sup>  
 {9} We will make this question if to any  
 {10} infinite substantive modes  
 {11} we place ஆ{ர்ர்} (ār) as in விசுவசிக்கி  
 {12} றதா{ர்ர்} (vicuvācikkiratār) *who does believe? விசுவசித்த*  
 {13} தா{ர்ர்} (vicuvācittatār) *who did believe? Etc. விசுவசிக்க*  
 {14} பபொ{றவனா{ர்ர்}} (vicuvācikkappōraṇār) *who will believe.*  
 {15} Should also be used literally ஆ{ர்ர்}  
 {16} விசுவசிக்கிறான்! (ār vicuvācikkirāṇ!); or more  
 {17} commonly by putting the verb in the plural ஆ{ர்ர்}  
 {18} விசுவசிக்கிறா{ர்ர்} கள (ār vicuvācikkirārkaḷ) *who does believe?, or*  
 {19} as in the first mode by placing after  
 {20} ஆ{ர்ர்} (ār) the masculine and

<sup>211</sup> Here Costa includes two different elements: the interjection *allō* and the emphatic particle (clitic) *ē*.

<sup>212</sup> *al-tal* ‘be not, exist not’ is the defective verb which, along with *il-tal*, occurs unmarked for tense and inflected for third person, plural number, and neuter gender, that is *alla*. In the example given by Costa it is suffixed with the dubitative clitic discussed above which conveys a question tag.

<sup>213</sup> *-ē* is a clitic which has different functions including emphasis. However, Costa translates it here as we would have expected for the dubitative clitics, therefore as a question tag. For a discussion on Tamil clitics see Arokianathan (1981).

<sup>214</sup> Here Costa gives a contracted form of the interrogative pronoun *yār* ‘who’ as attested in Fabricius (1972 [1770]: 59) [inter. pro. [‘contracted from யாவர் or யார் who. நீ ஆர்?, who are you...’]] and Winslow (1862: 72) [‘Who, the interrogative pronoun common to both numbers and all persons, in the rational class, though really the third person plural–contracted from யாவர் or யார். (c.) நீயார்? Who art thou? ...’]].

- {21} feminine substantives etc. as in விசுவ  
 {22} சிககிறவனா{ர்} (vicuvācikkiravanār); *who is the one [masc] who believes?*  
 {23} விசுவசிககிறவனா{ர்} (vicuvācikkiravaḷār); *who is the one [fem]*  
 {24} *who believes?*  
 {25} **Is there (anyone) who?**<sup>215</sup>  
 {26} விசுவசிப்பாருண்டொ (vicuvācippār uṇṭō) *is there*  
 {27} *anyone who believed?* by placing the interrogative  
 {28} particle உண்டொ (uṇṭō) after the  
 {29} 3<sup>rd</sup> honorific person of the affirmative future.  
 {30} The negative of this is made by  
 {31} replacing உண்டொ (uṇṭō) with இலையொ (illayō)

## R

- {1} as in விசுவசிப்பாரிலையொ (vicuvācippār illa.y-ō)  
 {2} *is there anyone who does not believe?* விசாரிப்பாரி  
 {3} லையொ (vicārippār illai.y-ō) *is there anyone who does not investigate?*  
 {4} or without asking விசாரிப்பாரில  
 {5} லை (vicārippār illai) *there is not who investigates, who does not*  
 {6} *take care of.*  
 {7} **Causative mode. Because**  
 {8-9} 1. விசுவசிககிறதினால<sup>216</sup> (vicuvācikkirat\*ināl) or னாலெ (nālē) *because I, you, etc. believe*  
 {10} 2. விசுவசித்ததினாலெ (vicuvācittat\*inālē) *because*  
 {11} *I, you, etc. have believed*  
 {12} 3. விசுவசிககிறபடியினாலெ (vicuvācikkirapaṭinālē) *because*  
 {13} *I, you, etc. believe etc.*  
 {14} 4. விசுவசித்தபடியினாலெ (vicuvācittapaṭinālē) *because I,*  
 {15} *you have believed*  
 {16} 5. விசுவசியாததினாலெ (vicuvāciyātat\*inālē) *because of not*

<sup>215</sup> In this paragraph Costa gives again the clitic -ō (dubitative marker) added to both the affirmative and negative verb form even though he considers it as a whole particle along with the absolute of the verb *uḷ-tal*.

<sup>216</sup> In this paragraph, Costa gives an account of different ways of expressing the ‘cause’. Therefore, the 1<sup>st</sup>, the 2<sup>nd</sup>, and the 5<sup>th</sup> forms in lines 8, 10, and 16 respectively are verbal nouns in the present (1<sup>st</sup>) and in the past (2<sup>nd</sup>) tense – *infinito substantivo* in Costa’s terminology –, and in the negative (5<sup>th</sup>) followed by the instrumental case marker preceded by the augmentation -*in* which in Tamil traditional grammar is called *cāriyai*. One of its semantic functions is to express cause.

- {17} *believing or having not believed*  
 {18} 6. விசுவசியாதபடியினாலெ<sup>217</sup> (vicuvāciyāta paṭinālē) *idem*  
 {19} All of these tenses serve for  
 {20} all numbers and persons according to  
 {21} the pronoun that precedes it.~.~.~.  
 {22} விசுவசிக்கிறெனெனகிறதினாலெ<sup>218</sup> (vicuvācikkirēn-enkirat<sup>#</sup>inālē)  
 {23} *because you believe*, being always  
 {24} added, and conjugating according  
 {25} to the tenses, எனகிறதினாலெ (enkirat<sup>#</sup>inālē).  
 {26} the 1<sup>st</sup> [form] is the instrumental ablative  
 {27} of the infinite substantive of the present.  
 {28} The 2<sup>nd</sup> [form] is from the infinite substantive  
 {29} of the preterit as வருகிறதினால (varukirat<sup>#</sup>ināl)  
 {30} *because of coming* நானகெட்டதினால (nān kēṭṭat<sup>#</sup>ināl)  
 {31} *because of coming (sic) {hearing}*. The 3<sup>rd</sup> [it is] the present  
 adjectival participle

#### [fol M-34-32]

#### L

- {1} with படியினாலெ (paṭiyinālē).  
 {2} The 4<sup>th</sup> with the same adjectival participle  
 {3} of the preterit. The 5<sup>th</sup> [is] the instrumental  
 {4} ablative of the negative infinite absolute. The 6<sup>th</sup> [is]  
 {5} the negative adjectival participle with படியினா  
 {6} லெ (paṭiyinālē). This other mode is also used  
 {7} விசுவசிக்கிறெனெனறுகொ  
 {8} பிசுகொளளுகிறான<sup>219</sup> (vicuvācikkirēn enru kōpicukōllukirān) *since*  
*I believe,*  
 {9} *he gets irritated;* விசுவசிக்கிறாயென

<sup>217</sup> The 3<sup>rd</sup>, the 4<sup>th</sup>, and the 6<sup>th</sup> Tamil forms given in lines 12, 14, and 18 respectively are present (3<sup>rd</sup>) and past *peyareccam* (4<sup>th</sup>), and negative *peyareccam* (6<sup>th</sup>) – *participio adjectivo* in Costa's terminology – followed by the noun *pāṭi* 'way, manner' + the increment *in* + the instrumental case marker *-āl*.

<sup>218</sup> In his translation Costa ignored the finite verb form conjugated in the first person *vicuvācikkirēn*. Therefore, the full translation should have been: because it is said that I do not believe.

<sup>219</sup> In this sentence, *enru* is the verbal participle of *en(nu)-tal* 'say', grammaticalised into a quotative marker 'that' (cf. footnotes 136 and 139); *kōpiccu* is the spoken variant of the verbal participle *kōpittu* of the verb *kōpi-ttal*; while *koḷ* is the auxiliary which can express either the progressive aspect or the simultaneous occurrence of actions. However, this context does not allow us to understand its exact function.

- {10} *று* (vicuvācikkirāy ēṇru) *because you believe*, with the verb conjugated
- {11} according to the tenses, number and
- {12} persons and adding *என்று* (eṇru) the gerund

- {31} *வாறதைக்கண்டு* (vārat-ai.k-kaṇṭu) *for coming*. The 3<sup>rd</sup>, 6<sup>th</sup>

## R

- {1} and 8<sup>th</sup> are the datives of the same

<sup>220</sup> Here Costa confuses *ākireṇ* with *eṅkirēṇ*.

<sup>221</sup> When an infinitive is followed by the infinitive of the auxiliary *koḷ*, this is used to express reason or cause. I am indebted to Jonas Bucholz (CSMC Hambrug) for this suggestion.

<sup>222</sup> With the sole exception of the form given at number 1, which is an infinitive, all the other forms of the verb *vicuvāci-ttal* are verbal nouns.

<sup>223</sup> The 3<sup>rd</sup>, the 6<sup>th</sup>, and the 8<sup>th</sup> forms (in lines 16, 19, and 21 respectively), are the present, the past, and the negative verbal nouns of the verb *vicuvāci-ttal* inflected for the dative case and followed by the infinitive of the verb *āku* that functions as a benefactive case marker: *for the sake of*.

<sup>224</sup> The 2<sup>nd</sup>, the 5<sup>th</sup>, and the 9<sup>th</sup> forms (in lines 15, 18, and 22 respectively) are the present, the past, and the negative verbal noun of the verb *vicuvāci-ttal* inflected for the accusative case marker and followed by the verbal participle of the verb *kāṇ-tal* ‘see’ functioning as instrumental.

<sup>225</sup> The 4<sup>nd</sup>, the 7<sup>th</sup>, and the 10<sup>th</sup> forms (in lines 17, 20, and 23 respectively) are present, past, and negative verbal nouns suffixed with the dative case marker and followed by the defective verb *vēṇṭi* < *vēṇṭu* ‘want’ which after a noun in the dative case has the function of the benefactive, therefore *for the sake of*.

- {2} infinites according to the tenses with  
 {3} ஆக (āka). The 4<sup>th</sup>, 7<sup>th</sup> and 10<sup>th</sup> are the same  
 {4} datives with வெண்டி (vēṇṭi) as in பெ  
 {5} றுகிறதற்காக (perukirat<sup>u</sup>-ukk-āka) for being worth  
 {6} நடக்கிறதற்குவெண்டி (natakkirat<sup>u</sup>-ukku vēṇṭi)  
 {7} for walking etc.

{8}

### In order to

- {9} விசுவசிக்கிறதுக்கு<sup>226</sup> (vicuvācikkirat<sup>u</sup>-ukku) in order to believe, or  
 {10} விசுவசிக்கும்படிக்கு<sup>227</sup> (vicuvācikkum pāṭi-kku) in order to believe,  
 {11} விசுவசிக்கவெண்டி<sup>228</sup> (vicuvācikka vēṇṭi) I, you, etc.  
 {12} விசுவசிக்க<sup>229</sup> (vicuvācikka) indeclinable for all  
 {13} விசுவசிக்கத்தக்கதாக<sup>230</sup> (vicuvācikkat<sup>u</sup> takkatāka) numbers and  
 persons  
 {14} விசுவசியாததுக்கு<sup>231</sup> (vicuvāciyātat<sup>u</sup>-ukku) in order to not believe, or  
 {15} விசுவசியாதபடிக்கு<sup>232</sup> (vicuvāciyāta pāṭikku) in order to not believe,  
 {16} விசுவசியாதவண்ணம்<sup>233</sup> (vicuvāciyāta vaṇṇam) I, you, etc.  
 {17} The 1<sup>st</sup> is the dative of the infinite substantive,  
 {18} {{the}} 2<sup>nd</sup> {{is}} the 3<sup>rd</sup> person neutral of the affirmative future  
 {19} with படிக்கு (pāṭikku) as in பொ  
 {20} கும்படிக்கு (pōkum pāṭikku) in order to go. The 3<sup>rd</sup> is  
 {21} the infinite absolute with வெண்டி (vēṇṭi).  
 {22} The 4<sup>th</sup> is the infinite absolute alone. The 5<sup>th</sup>  
 {23} likewise with தக்கதாக (takkatāka). The 6<sup>th</sup> [form] from the  
 {24} dative of the negative infinite substantive. The 7<sup>th</sup> is  
 {25} the negative adjectival participle with  
 {26} படிக்கு (pāṭikku). The 8<sup>th</sup> the same adjective  
 {27} with வண்ணம் (vaṇṇam).<sup>234</sup>  
 {28} **Before. Firstly**<sup>235</sup>

<sup>226</sup> Present verbal noun inflected for the dative case.

<sup>227</sup> As stated by Costa this is the 3<sup>rd</sup> singular neuter in the future tense, followed by the noun *paṭi* ‘way, manner’ inflected in the dative case. The same form can also be a *peyareccam*.

<sup>228</sup> Infinitive followed by the defective verb *veṇṭi*.

<sup>229</sup> The infinitive is included in this paragraph as a nonfinite verb form used in the purposive and causal subordinate (cf. footnote 179).

<sup>230</sup> The form *takkatāka* has already been discussed in footnote 180.

<sup>231</sup> Negative verbal noun inflected for the dative case expressing purpose.

<sup>232</sup> Negative adjectival participle followed by the term *paṭi* ‘way, manner’.

<sup>233</sup> Negative adjectival participle. It is followed by *vaṇṇam* which after an adjectival participle means ‘so as, as, in the manner of’ and it is an *īṭaiccol* (Cre-A:).

<sup>234</sup> Once again, all these different Tamil forms are included within the same paragraph due to a common semantic value, the one stated in the title of the paragraph by Costa.

- {29} விசுவசிக்கிறதுக்குமுன்னெ (vicuvācikkirat<sup>#</sup>-ukku munṇē)  
 {30} விசுவசிக்முன்னெ (vicuvācikk<sup>##</sup> munṇē)  
 {31} விசுவசியாத்துக்குமுன்னெ (vicuvāciyātat<sup>#</sup>-ukku munṇē)

[f. M-34-33]

L

- {1} *before I, you believed,*  
 {2} according to the the pronoun. All indeclinable,  
 {3} serve for all numbers  
 {4} and persons. ~.~.~.~.  
 {5} The 1<sup>st</sup> is the dative as in the first  
 {6} figure above with முன்னெ (munṇē) or  
 {7} முந்தி<sup>236</sup> (munti). The 2<sup>nd</sup> (is) the 3<sup>rd</sup> person of the neutral future.  
 {8} The 3<sup>rd</sup> (is) the dative of the negative infinite substantive,  
 {9} as in நீ பிறகிறதுக்குமு  
 {10} நதி (nī pirakirat<sup>#</sup>-ukku munti) *before you were born அவன*  
 {11} சொல்லுமுன்னெ (avaṅ collu<sup>##</sup>-munṇē) *before he*  
 {12} *said அவளவாரத்துக்குமு*  
 {13} னென (ava! vārātat<sup>#</sup>-ukku munṇē) *before she came, etc.~.~.~.~.*  
 {14} **After that**<sup>237</sup>  
 {15} விசுவசிக்கிறதுக்குப்பிற்பாடு (vicuvācikkirat<sup>#</sup>-ukku.p pirpātu)  
 {16} விசுவசித்தத்துக்குப்பிறகு (vicuvācittatat<sup>#</sup>-ukku.p pirku) *after*  
 {17} *I believed, or having believed, etc. Serves*  
 {18} also for all persons and numbers according to the  
 {19} preceding pronoun.  
 {20} The 1<sup>st</sup> is the same formation of the first  
 {21} mentioned above, placing instead of முன  
 {22} னெ (munṇē) the particles பிற்பாடு (pirpātu) பிறகு (pirku)

<sup>235</sup> Costa discusses here the postposition *munṇē* ‘before’, used with a verbal noun in the present tense and in the dative case, in the positive and negative polarity (1<sup>st</sup> and 3<sup>rd</sup> Tamil form in lines 29 and 31) as well as with the 3<sup>rd</sup> singular neuter in the future tense (2<sup>nd</sup> form in line 30).

<sup>236</sup> This is a verbal participle of the verb *muntu-tal* ‘to be prior in time, place, etc.’ (MTL) which, in Modern Tamil, occurs as a postposition to express anterior location in time and space such as ‘before, in front of’ (see Lehmann 1989: 120).

<sup>237</sup> It stands for subsequent event/afterwards. The linguistic element described in this paragraph, added to verbal nouns in the dative case, derives from the noun *piṅ* ‘posteriority’. It occurs as a postposition to express posterior location in time and space. However, Costa discusses this postposition and the previous one not as such but as a mode of speaking about anteriority and posteriority as the three listed forms *pirpātu*, *pirku*, and *piṅpu* also display. In fact, only the latter, the noun + nominalising suffix *-pu* can occur as a postposition. Furthermore, it is only in the Sixth Chapter that Costa describes and classifies the postpositions.

- {23} பின்பு (pinpu). The 2<sup>nd</sup> is the dative of the present with the  
 {24} same.  
 {25} **Until, until when**  
 {26} விசுவசிக்கமட்டும<sup>238</sup> (vicuvācikka maṭṭum) *until believing, until one believes*  
 {27} விசுவசிக்குமட்டும (vicuvācikkum maṭṭum) or தனையும்<sup>239</sup> (tanaiyum) or  
 {28} அளவும் (aḷavum)<sup>240</sup> the same indeclinable  
 {29} for all numbers and persons.  
 {30} These are formed from the infinite absolute or affirmative neutral future  
 {31} with the placed particles,

## R

- {1} as in நீவரமட்டும<sup>241</sup> (nī vara-maṭṭum) or வரும  
 {2} ளவும் (varum-aḷavum) or வாந்தனையும் (vāraṅṅ-anaiyum) *until you come.*  
 {3} **While**  
 {4} விசுவசிக்குமளவும் (vicuvācikkum-aḷavum) *while*  
 {5} [I] believe for all persons and numbers as above.  
 {6} **Since**  
 {7} விசுவசிக்கிறபொதெ (vicuvācikkira pōtē) or பொழுதெ (poḷutu),  
 {8} *since I, you, etc believe etc.*  
 {9} விசுவசித்தபொதெ (vicuvācitta pōtē) *since I believed etc.*  
 {10} விசுவசியாதபொதெ<sup>242</sup> (vicuvāciyāta pōtē) *since I did not believe, you, he, etc. indeclinable for*  
 {11} all numbers and persons according to what  
 {12} precedes it.

<sup>238</sup> In Modern Tamil the noun *maṭṭu* ‘limit’ followed by the clitic -um has grammaticalized into a clitic which restricts “a set of entities to the one which is expressed by the constituent marked” (Lehmann 1989: 159). The sense that Costa gives in this passage corresponds to the fifth entry of Cre-A: dictionary and to the first one of the MTL (p. 3015), the latter considers it as an adverb.

<sup>239</sup> Even this particle denotes a “quantity or a time-limit” (DED3147). The same meaning is also attested in Winslow (1862: 565): “a particle used as an affix to express the number of quantity—thus, அத்தனை, that much, இத்தனை. This much, so many, so far, so much, so great...” and Fabricius (1972 [1770]: 502): “an affix expressing number or quantity...”.

<sup>240</sup> This is the third singular neuter future or the future *peyareccam* of the verb *aḷa-ttal* ‘to measure, to size’.

<sup>241</sup> This is the negative future (see Andronov 1989).

<sup>242</sup> In Modern Tamil this suffix is used to convey the sense of ‘while’, ‘when’, ‘at the time of’ (Cre-A:). It is used here with the *peyareccam* in the present and past tense and in the negative polarity.

- {15} They are formed from the adjectival participle  
 {16} of the present, preterit, and negative with  
 {17} பொதெ (pōtē) or பொழுதெ (pōlūtē) as in அவன  
 {18} திங்கிற்பொதெ (avaṅ tiṅkiṛa pōtē) *since he eats* or நா  
 {19} ன குடுதத்பொதெ (nāṅ kūṭutta pōtē) *since I gave* நீ  
 {20} வராத்பொதெ (nī varāta pōtē) *since you did not come,*  
 {21} *given that you do not come etc.*  
 {22} **As soon as**  
 {23} விசுவசிததவுடனெ (vicuvācitta.v uṭaṅē) *as soon as I believe*  
 {24} விசுவசிததமடடிலெ (vicuvācitta maṭṭilē) the same  
 {25} விசுவசியாதெவுடனெ (vicuvāciyāta.v uṭaṅē) *as soon as*  
 {26} *I do not believe* indeclinable for all numbers and  
 {27} persons according to the pronoun.  
 {28} The same adjectives with உடனெ<sup>243</sup> (uṭaṅē)  
 {29} or with மடடிலெ<sup>244</sup> (maṭṭilē) as in மழைபெரு  
 {30} சவுடனெ<sup>245</sup> (maḷai peṇca.v-uṭaṅē) *as soon as it rains, it reained etc.*  
 {31} காற்று அடியாதவுடனெ (kārru aṭiyāta.v-uṭaṅē) *as*

 {10} விசுவசியாததுபொய (vicuvāciyātatu pōy) } *instead of not*  
*believing*

<sup>243</sup> In Modern Tamil *-uṭaṅ* appears as a bound postposition used with the function of the sociative case (Lehmann 1989: 24), however, the noun meaning ‘immediacy’ “embeds a clause in an adjectival clause form to the matrix clause and expresses the temporal relation which is denoted by the complementizer ‘as soon as’ in English” (Lehmann 1989: 255, 343) as shown in Costa’s examples where *uṭaṅ* follows a past and a negative *peyareccam* in lines 23 and 25. In the MTL (p. 397) *uṭaṅ* is classified as an adverb meaning “together, altogether, instantly or immediately after”.

<sup>244</sup> See footnote 238.

<sup>245</sup> This should be taken as a spoken variant of the relative participle *penta* even though the standard form should be *peyta* from *pey-tal* ‘to pour, come down’.

- {11} I, you, we etc.
- {12} The 1<sup>st</sup> and 3<sup>rd</sup> of the present
- {13} and preterit of the infinite are datives. The 2<sup>nd</sup> and 4<sup>th</sup> (are)
- {14} the nominatives of the same with பொ
- {15} ய (pōy) gerund of பொறது (pōratu). The 5<sup>th</sup> and
- {16} the 6<sup>th</sup> are also negative {{infinite}} substantives the first
- {17} in the dative and the 2<sup>nd</sup> in the nominative
- {18} with the same பொய (pōy).
- {19} **Assertive mode**
- {20} **without doubt**<sup>246</sup>
- {21} This is formed by placing the particle
- {22} ஆகும் (ākkum) after the conditionals, the infinite
- {23} or [the] gerund as in நீ விசுவசித்தாலா
- {24} க்கும்நானவிசுவசிப்பென (nī vicuvācittāl ākkum nāṅ vicuvācippēṅ)
- {25} *if you [plu.] believe, then I will undoubtedly believe*
- {26} விசுவசிக்கவாக்கும்வந்தென (vicuvācikka.v-ākkum vantēṅ)
- {27} *I came to believe undoubtedly விசுவசித்தா*
- {28} க்கும்ஊடுறுவாய (vicuvācitt<sup>a</sup>-ākkum iṭēruvāy) *by believing you [plu.]*
- {29} *will certainly be saved. Also, by*
- {30} inserting the ஆகும் (ākkum) between the pronoun
- {31} and the substantive as in இவனாக்குஞ்சூரன்<sup>247</sup> (ivaṅ ākkum<sup>m</sup>ñ cūraṅ)
- this [person]*

## R

- {1} *without doubt is brave, or this [person] is*
- {2} *who is truly brave, the same*
- {3} இப்பொவாக்குசமைய[ம்] <sup>248</sup> (ippō.v ākku(m) camaiya[m]) *now,*
- {4} *undoubtedly is the occasion.~.~.*
- {5} **Mode with doubt, it seems that**
- {6} The same particle ஆகும் (ākkum)

<sup>246</sup> In Modern Tamil *ākkum* is a suffix added to assert a fact or confirm a particular point in a statement, mostly in a sarcastic tone (cf. Cre-A:). In the examples provided by Costa *ākkum* combines with conditional (lines 23-24), infinitive (lines 25-26), and past adjectival participles (lines 27-28). According to Winslow (1862) if it is placed in the middle of the sentence it means ‘certainty’, while at the end of the sentence it means ‘doubt’. This second meaning is given by Costa in the following paragraph, mode with doubt, it seems that.

<sup>247</sup> This should be taken as ‘*ākkum + śūra*’. The latter meaning ‘hero, strong’. I am indebted to Giovanni Ciotti for this suggestion.

<sup>248</sup> This is from the Sanskrit *samāyāma* meaning ‘occasion’. I am indebted to Giovanni Ciotti for this suggestion.

- {7} is placed after the verb or noun, as in இவன  
 {8} விசுவசிக்கிறானாகும் (ivaṅ vicuvācikkiraṅ ākkum) *it seems that*  
 {9} *this one believes*. And so forth for the other persons, the same  
 {10} விசுவசிக்கவந்தானாகும் (vicuvācikka vantāṅ ākkum) *it seems that*  
*[he] has come*  
 {11} *to believe*. இவன்கூர  
 {12} னாகும் (ivaṅ cūraṅ ākkum) *it seems that this one is brave*.  
 {13} கினாகண்டாயாகும்<sup>249</sup> (kiṅākaṅṭāy ākkum) *it seems*  
 {14} *that you dreamt, etc.~.~.~.~.~.*  
 {15} **The same as**<sup>250</sup>  
 {16} This mode is formed by adding to the  
 {17} neutral participles the word  
 {18} மாதிரி<sup>251</sup> (māttiram) e.g. நன்றாயநடக  
 {19} கிறதுவிசுவசிக்கிறதுமாதிரி (naṅṅāy vaṅcikkiratu vicuvācikkiratu  
 māttiram)  
 {20} *good living is the same as*  
 {21} *believing* or by putting the stated participles in the  
 {22} dative and {{adding}} சரி<sup>252</sup> (cari) or ஒக  
 {23} கும<sup>253</sup> (okkum)  
 {24} with a short *o*, as in விசுவ{சிக்கி}துக  
 {25} குச்சரி (*sic!*) (vicuvāccki {{ra}} t<sup>#</sup>-ukku.c cari) விசுவசிக்கிறதுக

<sup>249</sup> Proença's dictionary (f. M-34-308, R, l. 13-14) records the two entries: *kiṅā* 'dream' (sonho) and *kiṅākkāṅkiratu* 'to dream' (sonhar). No other dictionaries report these forms but rather *kiṅavutal* 'to dream' (MTL 837), from which CRE-A: derives *kiṅavukāṅ* 'dream'.

<sup>250</sup> The Tamil word under discussion is māttiram which, according to Fabricius (1972 [1770]: 791) also works as an adverb meaning 'as soon as, so much, as much as, etc.'

<sup>251</sup> In Winslow (1862: 861) and Fabricius (1972 [1770]: 791) it is given as a noun meaning 'quantity, measure' with the second meaning being the function of adverb meaning 'only, solely, as much as, so much, so much only'. The latter is the same meaning also found in the MTL (p. 3153) where the first meaning is 'loneliness' and the second is the adverb 'only, solely, exclusively, merely, alone'. In Cre-A: (p. 820) the meaning provided is 'alone, only, not more than'. The same meanings are already found in Proença's dictionary (GL1, f. M-34-167, R., lines 15-18)

<sup>252</sup> In Proença's dictionary (GL1, f. M-34-459, L, lines 20-23) the meaning for *cari* is: 'equality, it is also a word for someone who proves what he said, almost the same; it is also a silver arm shackle' (*igualidade, he tambem palavra de quem a prova o que se dis, quasi assi mesmo; ité huma manilha de prata do braço*). The meaning same is attested both in Fabricius (1972 [1770]: 355) and Winslow (1862: 414). In Cre-A: *cari* is classified as a verb, as a noun, and also as an *itaicol*. As a noun it also means 'equal parts' while as an *itaicol* it is "an expression of consent to conclude (by both parties); yes; OK". In the examples provided by Costa it is suffixed to the verbal noun in the dative case (lines 24-25 and 27).

<sup>253</sup> It is the future *peyareccam* or the neuter future of the verb *o-ttal* meaning 'to resemble, to equal'. In the examples provided by Costa it is suffixed to the verbal noun in the dative case (lines 25-26 and 27).

- {26} கொககும் (vicuvācikkirat<sup>#</sup>-ukk<sup>#</sup> okkum) [*it is*] *the same as believing*.  
 {27} விசுவசிதத்துககுசசரி (vicuvācittat<sup>#</sup>-ukku.c carī) or ஒக  
 {28} கும் (okkum) {{*it is*}} *the same as having believed*.  
 {29} And if to the same datives one places  
 {30} the negative ஒவ்வாது (ovvātu), or சரியலல (cariyalla)  
 {31} after, it becomes the negative mode as in விசுவ

[f. M-34-35]

L

- {1} சிககிறததுககொவ்வாது (vicuvācikkirat<sup>#</sup>-ukk<sup>#</sup> ovvātu) or சரி  
 {2} யலல (cariyalla) [*it*] *is not worth believing*.  
 {3} **So what. What's happening?**  
 {4} **What does it matter?**<sup>254</sup>  
 {5} விசுவசித்தாலென்ன (vicuvācittāl enna). விசுவசி  
 {6} யாதிருந்தாலென்ன (vicuvāciyāt<sup>#</sup> iruntāl enna) *So what*  
 {7} *if I, you, etc, believe or do not believe?* வி  
 {8} சுவசித்தென்ன (vicuvācitt<sup>#</sup> enna). விசுவசியாம  
 {9} லென்ன (vicuvāciyāmal enna) *so what if you [plu] believe, or do not*  
*believe*  
 {10} that, this is formed by placing  
 {11} the particle என்ன (enna) after the conditional,  
 {12} or gerund, [both] negative and affirmative.  
 {13} **Whether or not**<sup>255</sup>  
 {14} விசுவசித்தாலுமுத்தாரம் (vicuvācittālum uttāram). வி  
 {15} சுவசியாதிருந்தாலுமுத்தாரம் (vicuvāciāt<sup>#</sup> iruntālum uttāram).  
 {16} *whether one believes or does not believe* general  
 {17} for all persons, numbers and tenses  
 {18} according to the pronoun as in நீ வந்தா.  
 {19} லுமுத்தாரம் வராதிருதா

<sup>254</sup> What Costa describes here is the interrogative pronoun *enna* providing different examples with various verb forms. The first is the conditional (line 5), the second is again a conditional but of the verb *iru-ttal* preceded by the negative *peyareccam* of the verb *vicuvāci-ttal* (line 6); the third form is a past *peyareccam* (line 8), and the last one is a negative *viṇaiyeccam* (line 9). All these forms are followed by the interrogative pronoun *what*.

<sup>255</sup> In this context Costa attributes the sense usually conveyed by the clitic *-um* when used to conjoin two conditional clauses, that is “the concept of two contrasting conditions ‘whether—or’” (Lehmann 1989: 284), to the word *uttarām* (see example at lines 18-21). The same sense is also found in Proença’s dictionary (MS GL1, f. M-34-403, L, lines 15-19). The *-um* added to the conditional in the first Tamil form (line 1) “expresses concession of supposition or fact, depending on the tense of the verb of the main clause” (Lehmann 1989: 282). For the word *uttāram*, I could not find any other sense apart from ‘answer, reply’ in the other dictionaries.

- {20} லுமுததாரம் (nī vantālum uttāram varāt\* iruntālum uttāram) *whether you come*
- {21} *or you do not come*. They are formed by
- {22} placing after the negative and affirmative condi
- {23} tionals, the particle உததாரம் (uttāram).
- {24} **Besides**<sup>256</sup>
- {25} If after the neutral participles one
- {26} places the particle அலலாமல (allāmal) or
- {27} அலலாதெ (allātē) or அன்றியெ (anriyē) or தவி
- {28} ர் (tavira) it makes the manner of speaking [meaning] *besides*, as in
- {29} விசுவசிக்கிறதலலாமல (vicuvācikkirat\*-allāmal) *besides believing* [or]
- {30} விசுவசிக்கிறதலலாதெ (vicuvācittat\*-allātē) *besides having*
- {31} *believed* with தவிர் (tavira) that is placed only before

## R

- {1} உம (um) as in விசுவசிக்கிறதவிர் (vicuvācikkiratu tavira)
- {2} *besides believing* indeclinable for
- {3} all persons and numbers according
- {4} to the participles.
- {5} **Mode of aptitude**
- {6} **or of convenience**
- {7} This mode is made by placing after
- {8} the infinite absolute the particle தக்க
- {9} து (takkatu)<sup>257</sup> or [the] adjectivated [particle] தக்க (takka) as in இது
- {10} விசுவசிக்கத்தக்கது (itu vicuvācit[ā]ka.t takkatu) *it [that] must be*
- {11} *believed; it is to be believed; it should be believed,*
- {12} or [the] adjectivated [particle] with its substantive
- {13} விசுவசிக்கத்தக்காரியம் (vicuvācikka.t takka kāriyam) *thing*
- {14} *worthy of being believed or to be believed*. From this
- {15} adjective தக்க (takka) are formed the substantives
- {16} விசுவசிக்கத்தக்கவன (vicuvācikka.t takkavan) for
- {17} the masculine, விசுவசிக்கத்தக்கவள (vicuvācikka.t takkaval)
- {18} for the feminine விசுவசிக்கத்த=

<sup>256</sup> In Modern Tamil each of these forms is classified as an adverb (*allamāl*, Cre-A: p.40; *anriyē*, Cre-A: p. 60), a postposition (*allamāl*, MTL 141; Lehmann, 1989: 121; *tavira*, Lehmann 1989: 128), a conjunction (*allātē*, MTL 140, Cre-A: 40; *anriyē*, MTL 184), or an *itaiccol* (*tavira*, Cre-A: p. 510). They all convey the meaning described by Costa 'except, besides, not only...but also'.

<sup>257</sup> Already discussed in footnote 180.

- {19} தககது (vicuvācikka.t takkatu) for the neutral.  
 {20} **Comparative mode**<sup>258</sup>  
 {21} This mode of speaking is formed by  
 {22} placing after the accusative of any  
 {23} neutral participle the particles பர  
 {24} ற்க (pārka) பற்ற (parra) காட்டிலும் (kāṭṭilum) காட்டி (kāṭṭi)  
 {25} as in விசுவசிக்கிறதைப்பாற்கப  
 {26} புண்ணியமில்லை (vicuvācikkirat<sup>+</sup>-ai.p pārka puṇṇiyam-illai) *there*  
 {27} *is no greater virtue than believing*. 2<sup>nd</sup> by placing after  
 {28} the ablatives in *il* of any  
 {29} participle the conjunction உம (um) and then  
 {30} some of the particles above as in  
 {31} விசுவசிக்கிறதிலும்பாற்க (vicuvācikkirat<sup>+</sup>-il-um pārka) *more*

#### [f. M-34-36]

L

- {1} *or better than believing*.~.~.~.~.  
 {2-3} **Third Chapter**  
 {4} **Of the Passive Voice**<sup>259</sup>  
 {5} Leaving aside the passive verbs  
 {6} that exist in this language ending  
 {7} in *gren*, which, not having definite rules can only  
 {8} be learned by use, as is the case of  
 {9} முகிக்கிறென (mukikkirēṇ) *I finish*, முகிகிறெ  
 {10} ன (mukikirēṇ) *I am finished*; from முறிககி  
 {11} றென (murikkirēṇ) *I break*, முறிகிறென (murikirēṇ) *I am*  
 {12} *broken*, and other modes;<sup>260</sup> there are many others  
 {13} that are compounded and properly passive.

<sup>258</sup> Costa describes here the way in which the comparative construction is obtained in Tamil. He attests the usage of the infinitive pārka of the verb pār-ttal ‘to see’; the verbal participle kāṭṭi of the verb kāṭṭu-tal ‘to show’. As underlined in Muru (2010: 141-150) the comparative construction through the use of these words is recorded in Arden (1910: 55) and Asher (1985: 88). The latter states that kāṭṭilum and pārkilum are also used in standard written language and in certain spoken dialects in comparison with viṭa – from the verb viṭu-tal ‘to leave’ – which is the most widely used.

<sup>259</sup> “Old Tamil already had a complicated system of auxiliary verbs. Some of them are still employed in the same function in modern Tamil, most notably the auxiliary for passive...” (Wilden 2018: 160). Costa describes here different ways for obtaining the passive construction in Tamil. Among these ways, there is the passive auxiliary already found in Old Tamil which continues in Modern Tamil, that is paṭu-tal ‘to experience’ (cf. footnote 261).

<sup>260</sup> Costa is referring here to the Tamil verbs that have been differentiated between affective and effective by Paramasivam (1979). Muru (2021b) discusses in detail the so-called *paired verbs* as they were described by early missionaries, not only Costa.

- {14} 1<sup>st</sup>, from any infinite absolute with the  
 {15} verb படுகிறது (paṭukiratu) to suffer [from],<sup>261</sup> as in விசுவ  
 {16} சிக்கப்படுகிறேன் (vicuvācikka.p-paṭukirēṅ) I am believed,  
 {17} சொல்லப்படுது (colla.p-paṭutu) it was said, அ  
 {18} டிக்கப்படுவான் (aṭikka.p-paṭuvāṅ) [he] will be whipped;  
 {19} the infinite always remaining  
 {20} unchanged and being declined the verb படுகி  
 {21} றது (paṭukiratu) according to the tense, number and  
 {22} persons and the manner of speaking.  
 {23} 2<sup>nd</sup>, the passive voice is made by  
 {24} placing after the verbal<sup>262</sup> of some verbs the  
 {25} verb உங்கிறது<sup>263</sup> (uṅkiratu) which becomes in the preterit  
 {26} உண்டென (uṅṅēṅ) and in the future உண்  
 {27} பென (uṅṅēṅ) e.g. அறையுங்கிறது (arai.y-uṅkiratu) to be  
 {28} nailed, whence அறை (arai) ver  
 {29} bal of அறைகிறது (araikiratu) to nail,  
 {30} the same படைப்புண்டென (paṭaiṅṅēṅ) I  
 {31} was created; where the படைப்பு (paṭaiṅṅ) crea

## R

- {1} tion is the verbal of படைக்கிறபது (paṭaikkirapatu) to create.  
 {2} But this composition is rarely used,

<sup>261</sup> Costa describes here the passive auxiliary *paṭu* ‘experience’ which occurs after a main verb in the infinitive form to express the passive voice.

<sup>262</sup> This form is translated as such from the Portuguese verbal deriving from the Latin *verbālis* since what Costa is describing is derived from a verb. Comparing Costa with Beschi, one may notice that the same term is used but to address another Tamil form, that is an Infinite substantive. Indeed, Beschi (1738 [1728]: 97-98, § II, par. 111; Mahon 1848: 81, Section II, par. 111) distinguished two types of nouns derived from verbs: *appellative nouns* and *verbal nouns*. See Chevillard (1992a) for a discussion on Beschi’s *appellative nouns*. However, Costa uses the term in a different way since he derives the verbal from the Tamil form that he considers an infinite substantive as shown in his examples. However, the technical term verbal is used for the verb root. Hence, the first form identified as a verbal is *arai*, a verb root, which Costa considers as being derived from the infinite substantive *araikiratu*, which is a verbal noun. Therefore, in this context Costa inverts the two categories considering them to be derived from a verb. The second form is *paṭaiṅṅ* and it might be correctly considered a (de)verbal since it is an abstract noun formed from the verbal root *paṭai* adding the suffix *-ṅṅ*, already attested in Old Tamil (see Wilden 2018: 35). On the contrary, Beschi does not confuse these two forms, clarifying that the infinite substantive is not an infinitive, and considering the corresponding Tamil forms as verbal nouns, in the same way they are still considered today.

<sup>263</sup> The use of the verb *un-tal* ‘to eat or drink, to suck as a child, to take food’ as an auxiliary to form the passive voice is shown in Fabricius (1972 [1770]: 106), Winslow (1862: 126), and the MTL (p. 402). It is used with verbal roots, and verbal nouns as shown in Costa’s examples.

- {3} the former being the most frequent.  
 {4} Other passive compounds will be made evident by use,  
 {5} as in பிடிப்படுகிறது (piṭi.p-patukiratu) *to be arrested* etc.  
 {6} 3<sup>rd</sup>, every time that a clause  
 {7} lacks the person who acts (=the agent) it becomes passive as in  
 {8} விசுவசிக்கிறகாரியம்<sup>264</sup> (vicuvācikkira kāriyam)  
 {9} *the truth that is believed.~.~.~.~.~.*  
 {10} **Fourth Chapter**  
 {11-12} **Of the composition of verbs**<sup>265</sup>  
 {13} This language mostly  
 {14} makes use of compound verbs and rarely  
 {15} of simple ones. The composition is formed  
 {16} in three ways: the 1<sup>st</sup>, the most common,  
 {17} with the gerund,<sup>266</sup> which is joined with  
 {18} another verb according to the use and the sentence,  
 {19} which practice will show, as in விசுவ  
 {20} சித்துக்கொள்ளுகிறேன் (vicvuvācittu.k koḷḷukirēn) *I*  
 {21} *believe சொலவிவிட்டென் (collivittēn) I said*  
 {22} *பொயிட்டான (pōyittān) he went வந்து*  
 {23} *பொச்சு*<sup>267</sup> (vantupōccu) [*he*] *came*; so that the meaning  
 {24} is formed from the first gerun {d  
 {25} without} care for the verb that is added, from which  
 {26} the tense, persons and numbers are formed according to what the  
 way

<sup>264</sup> In Proença's dictionary (GL1, f. M-34-300, L, lines 16-19) the meaning of *kariyam* is 'effect as well as business, etc.' (*efeito ite' negocio item obra etc.*).

<sup>265</sup> Costa describes here compound verb constructions in which a verbal participle or infinitive combine with a second verb inflected according to the syntactic context in which they occur. In this kind of composition, the first verb has the lexical function denoting an action, an event, or a state, while the second verb expresses grammatical categories such as aspect, mood, passive, causation, negative polarity. In this paragraph in particular, Costa focuses on specific auxiliary verbs. For a detailed discussion on this issue see Muru (2010: 154-169), only partially reproduced in the following footnotes referring to this paragraph.

<sup>266</sup> The first kind of composition described by Costa is the auxiliary composition in which the first verb element is a *viṇaiyeccam* (called gerund) followed by an inflected verb. The auxiliaries identified are *koḷ-tal* 'to take', *viṇu-tal* 'to leave', *pō-tal* 'to go'. When added to a *viṇaiyeccam* the first is a non-attitudinal auxiliary and expresses the concept of volition; the second is an aspectual auxiliary and expresses the perfective aspect, thus a complete action or event; the third is an attitudinal auxiliary and expresses a change of state indicating the negative attitude of the speaker towards this change of state (cf. Lehmann 1989: 204-231).

<sup>267</sup> *pōccu* is the spoken form of *poynṭu* in which a palatalization of the soundless plosive [nj] which occurs resulting in [cc]. Even though Costa defines this form as a compound, he does not translate the sense conveyed by the auxiliary.

- {27} of speaking requires. Often
- {28} three and sometimes four verbs are joined,
- {29} the first being in the gerund and only the last
- {30} in the person etc. as in கூட்டிக்கொ
- {31} ண்டுபொனான (kūṭṭikkōṇṭupōṇān) [*he*] took it with himself

[f. M-34-37]

L

- {1} For being the கொணடுவருகிறான (koṇṭuvarukirān), [*he*] says.<sup>268</sup>
- {2} Another composition is formed with the
- {3} infinite absolute,<sup>269</sup> this also remaining
- {4} unchanged and adding the meaning, and the
- {5} other verb declined according to the
- {6} manner of speaking, as in விசுவசிக்கச்செ
- {7} யகிறென (vicuvācikka.c ceykiṛēṇ) *I believe*. The 3<sup>rd</sup> is formed with
- {8} the verb of the same mode, as in விசுவா:
- {9} சங்கொளளுகிறென (vicuvācaṁṅ kolḷukirēṇ) *I*
- {10} *believe*. This composition can sometimes be found
- {11} with a passive meaning,
- {12} as in அடிகொளளுகிறென (aṭi kolḷukirēṇ)
- {13} *I am beaten*,<sup>270</sup> but the most common
- {14} is the active meaning, as in மெய:
- {15} கொளளுகிறென (mey kolḷukirēṇ) *I believe*, செ
- {16} யங்கொண்டென (ceyaṁṅ koṇṭēṇ) *I won*; ந
- {17} மபிக்கைகொளான (nampikkai kolḷān) [*he*] does not
- {18} *trust*, etc.<sup>271</sup>
- {19} Also from the first person of the
- {20} affirmative future of any verb
- {21} other effective verbs are formed<sup>272</sup> by changing

<sup>268</sup> Here Costa does not translate the aspectual meaning expressed by the auxiliaries.

<sup>269</sup> The second set of verb auxiliary compounds that Costa describes is formed with the first verb in the infinitive and the second verb inflected for tense and PNG. The Tamil form provided is the infinitive of *vicuvāci-ttal* followed by the causative auxiliary *cey-tal* 'to do'. The other forms are followed by the auxiliary *koḷ* which gives a reflexive sense to the main verb or marks that the action is carried out without an external agency (Cre-A:), for this reason Costa states that it can convey a passive meaning to the verb form.

<sup>270</sup> Costa is underlining here the reflexive sense which the auxiliary *koḷ* gives to the main verb.

<sup>271</sup> The forms in lines 15-17, as it occurs in line 9, are constituted by a noun followed by the verb *koḷ*: *vicuvācam*, *mey*, *ceyam*, *nampikkai* meaning 'faith, belief' in Christina usage, 'truth, fact', 'victory', and 'faith or trust' respectively. In my opinion this is an example in which the verb *koḷ* should not be taken as an auxiliary but rather in its full lexical meaning.

- {22} the பென (pēṇ), or வென (vēṇ) into பிககிறெ  
 {23} ன (pikkirēṇ), and வககிறென (vakkirēṇ), and the meaning [of]  
 {24} {to make someone to do} {{what is expressed by}}  
 {25} the meaning of the simple verb, as in  
 {26} விசுவசிபபிககிறென (vicuvācippikkirēṇ) *I make someone believe*  
 {27} அழைப்பபிககிறென (aḷaippikkirēṇ) *I make someone*  
 {28} *call* செயவிககிறென (ceyvikkirēṇ) *I make*  
 {29} *someone do* etc. and it will form other  
 {30} verbs that have all {modes}, tenses,  
 {31} and persons. What has so far been said

## R

- {1} of the verb விசு{வசி}ககிறென (vicuvācikkirēṇ) is  
 {2} common to all verbs of this language that are not  
 {3} anomalous, or defective. And all  
 {4} one could say on this subject,  
 {5} in order to not cause confusion, is left  
 {6} to the master. Without him, even though the Arte  
 {7} says a lot, it does not help  
 {8} Beginners. And with a good master,  
 {9} less than what is said here would be sufficient.~.~.~.~.~.

{10} **Fifth Chapter**

 {12} **and anomalous verbs**<sup>273</sup>  
 {13} **Indicative**

- |             |          |  |
|-------------|----------|--|
| {14} ஆகிறென | (ākirēṇ) | <i>I am, or am made</i>                  |
| {15} ஆகிறாய | (ākirāy) | <i>You are, or are made</i>              |
| {16} ஆகிறான | (ākirāṇ) | <i>He is, or is made</i>                 |
| {17} ஆகிறாள | (ākirāl) | <i>She is, or is made</i>                |
| {18} ஆகிறது | (akitu)  | <i>ஆகிறது (akiratu) That one is etc.</i> |

<sup>272</sup> *Effective* here should not be taken as it is today in Paramasivam (1979). Indeed, Costa is describing here the morphological causative. For further details see Muru (2021b).

<sup>273</sup> In this section Costa provides verb forms which are considered as the anomalous verbs of Latin, thus irregular. These are characterized by the desinences which are added directly to the verb root without the thematic vowel. In Latin they are *sum* 'to be', *fero* 'to bring', *eo* 'to go', *volo* 'to want', *fio* 'to become, to be done', *edo* 'to eat'. The corresponding Tamil forms are represented by the verb *āku-tal* 'to become' which is equated to the Latin *sum*, and *uḷ-tal* 'to be', *il-tal* 'to not exist', *vēṇtu* 'to need', *pōtu-tal* 'to be enough', *kūtu-tal* 'to join, to unite', *o-ttal* 'to resemble, to be similar'. All these verbs are defective in Tamil and Costa inflects them in some of the tenses and moods already seen in the analysis of the verb *vicuvāci-ttal*.

{19}	<b>Honorific Singular of the present</b>	
{20}	ஆகிறொடம் (ākīrōm)	<i>My mercy is etc.</i>

- {28} **Infinitive Absolute**  
 {29} ஆக (āka) *to be*, plus the other meanings  
 {30} of the previous verb  
 {31} ஆகத்தகக (ākattakka) ஆகத்தககதா{க}  
 (ākattakkatāka)

[f. M-34-39]

L

- {1} சொல# (col#) *to be made*  
 {2} **Infinitive substantive**  
 {3} ஆகிறது (ākīratu) *to be, or to be done*  
 {4} ஆனது (āṇatu) *to have been etc.*  
 {5} ஆவது (āvatu) *to have to be or habitually*  
 {6} *to be*  
 {7} **Gerund**  
 {8} ஆய (āy) *being, or being done*  
 {9} **Participle**  
 {10} ஆகிற (ākīra) *thing that is, from here*  
 {11} ஆகிய (ākīya) ஆகிறவன (ākīraṇ), அகி  
 {12} றவள (ākīraṇ), ஆகிறது (ākīratu) masculine,  
 feminine,  
 {13} and neutral are composed. ஆன *thing that was*,  
 {14} from which come the substantives ஆனவன (āṇaṇ),  
 {15} வள (vaḷ). து (tu), ஆகா (ākā), ஆகாத (ākāta)  
 {16} negative of those above; whence  
 {17} the substantives ஆகாதவன (ākātavaṇ) † வள (vaḷ) †  
 {18} து (tu) are formed. The other modes are conjugated  
 {19} and formed following the rules and formations  
 {20} used to conjugate the verb  
 {21} விசுவசிக்கிறென (vicuvācikkirēṇ).  
 {22} **Anomalous verbs**  
 {23} உண்டு<sup>274</sup> (uṇṭu)

<sup>274</sup> The base form is *uḷ-tal* ‘be, exist’. It is a verb denoting ‘existence’. Therefore, to be present in a place or in something. It also denotes possession. As Costa underlines, it follows the rule of the Latin verb *sum* because it is invariably used for all genders and persons and also for both numbers. Indeed, like the following verbs in this paragraph, it is a defective verb. It is usually found inflected for the third person, singular number, and neuter gender, which is the form which appears in the title: *uṇṭu*. In Modern Tamil it also occurs in the tenseless adjectival participle and it is also used as an aspectual auxiliary verb to express perfectivity along with *iru-tal* ‘be’. However, Costa provides for *uḷ-tal*, as well as for the following defective verbs, a series of inflections such as conditional, concessive, verbal noun, infinitive, *peyareccam* in positive and negative polarity, etc.

- {24} This verb means *to have, to possess*, and  
 {25} follows the rule for the verb *sum* (to be) because it has, e.g.  
 {26} எனக்குண்டு (eṇakkuṇṭu) *est mihi* (lit. *it is for me = I have*). And it is also  
 {27} indeclinable for all persons and numbers,  
 {28} according to the pronoun. They have the following  
 {29} modes.~.~.~.~.  
 {30} உண்டானால (uṇṭāṇāl) *if I, you, etc. have*  
 {31} உண்டானாககால (uṇṭāṇākkāl) *serves for*

## R

- {1} உண்டாகில (uṇṭākil) all numbers  
 {2} உள்ளில (uḷḷil) and persons.~.~.~.  
 {3} உண்டானாலும் (uṇṭāṇālum) } *given that*  
 {4} உண்டானாககாலும் (uṇṭāṇākkālum) } *I have,*  
 {5} உண்டாகிலும் (uṇṭākilum) } *serves for*  
 {6} உள்ளிலும் (uḷḷilum)..... } *all persons, numbers, etc.*  
 {7} உள்ள (uḷḷa) *thing that has*, and from it the substantives  
 {8} உள்ளவன (uḷḷavan). ள (l). து (tu) .~.~.~.~.  
 {9} உண்டான (uṇṭāna) *thing that had or that was possessed*  
 {10} உண்டாக (uṇṭāka) infinite absolute  
 {11} உண்டாகிறது (uṇṭākiratu) } infinite  
 {12} உண்டானது (uṇṭānatu)... } *infinite substantive*  
 {13} already compounded of உண்டு (uṇṭu) and ஆகிறது (ākiratu)  
 {14} with which one can conjugate  
 {15} [all other] tenses etc.  
 {16} உள்ளது (uḷḷatu) Infinite substantive  
 {17} of the neutral present, *the one that has* or *the one*  
 {18} *that is*. It is also joined with ஆயி[ரு]  
 {19} ககிறது (āyirukkiratu) as in உண்டாயிருக்கிறது (uṇṭāyirukkiratu)  
 {20} *to have, or possess*, and become all tenses  
 {21} and persons of [the verb] இருக்கிறது (irukkiratu).~.~.~.  
 {22} இலலை (illai)<sup>275</sup>

<sup>275</sup> The base form is *il-tal* 'to be not, exist not'. It is the defective verb which occurs in the third person, plural number, and neuter gender, as for al, after the main verb in the infinitive tense. It expresses negative polarity. In Modern Tamil, it also occurs in the adjectival participle form *illai* – that is the one given in the title by Costa – and in the negative verbal participle form, therefore as

- {23} It means *do not have*. [It] requires the same dative  
 {24} as the one above, as in என்கிலலை (eṇakk<sup>u</sup>-illai) I  
 {25} *do not have*. This word இலலை (illai)  
 {26} joined with nouns has the stated meaning,  
 {27} whereas with verbs it is truly a negation.  
 {28} As an anomalous, it has the following  
 {29} [forms] இலலாதெ (illātē) }  
 {30} இலலாமல (illāmal) } *without having*  
 {31} இலலவிட்டால (illaviṭṭāl) *If one does not possess*  
*or if there is not.*

[f. M-34-40]

L

- {1} இலலவிட்டாலும (illaviṭṭālum) *given that there is not*  
 {2} இலலா (illā) or இலலாத (illāta) *thing that there is not,*  
 {3} or *thing that does not possess* whence  
 {4} the substantive comes இலலாதவான (illātavān) .ள (!) . தது (ttu).  
 {5} வெணும<sup>276</sup> (vēṇum)  
 {6} It means *to want* or *to matter* with  
 {7} the same dative, as in எனக்குவெ  
 {8} னும (eṇakku vēṇum) *I want, or it matters to me.*  
 {9} வெண்டாம *not want* [you plu], or *it is not*  
 {10} *necessary, or I do not have need for,*<sup>277</sup>  
 {11} or [I] *do not want,* with dative, or without it.  
 {12} வெண்டிசுசு (vēṇṭiccu) [*one*] *wanted* or *it was necessary*  
 {13} வெண்டின (vēṇṭina) *thing that wants, or thing that has*  
 {14} *needs* or more commonly *necessary*  
 {15} *thing,* whence the substantives come  
 {16} வெண்டினவள ((vēṇṭinaval), து (atu).  
 {17} வெண்டாத (vēṇṭāta) } *thing that does not want*  
 {18} வெண்டா (vēṇṭā) } *or thing that does not have*

*illāmal*, occurring as a postposition expressing ‘without’ and ‘except’, and *inri*, an old form (Lehmann 1989: 83-84).

<sup>276</sup> This is the spoken variant of the defective verb *vēṇum* occurring in Modern Tamil as a lexical verb meaning ‘request, want’, and with auxiliary function expressing necessity ‘must’, both in the positive or negative polarity, after an infinitive main verb. Hence, it expresses the modalities of desideration (duty, advice), negation of external obligation, internal obligation imposed by the speaker (see Lehmann 1989: 212). In Modern Tamil it may also occur in the past and negative adjectival participle (*vēṇṭiya* and *vēṇṭāta*), or in the infinitive form (*vēṇṭa*).

<sup>277</sup> An alternative translation of the gloss could be: [*it*] *is not needed*, or [*it*] *has no need*.

- {19} *necessity*, whence the substantive comes:  
 {20} வெண்டாதவன (vēṇṭāt<sup>278</sup>-avan). வள. (val). து (atu).  
 {21} பொதும<sup>278</sup> (pōtum)  
 {22} It means *to be enough* with the same dative  
 {23} as in எனக்குபொதும (eṇakku pōtum) *it is enough*  
 {24} *to me, for me*  
 {25} பொதாது (pōtātu) *it is not enough*,  
 {26} பொததுது (pōtutu) *it was enough*,  
 {27} பொதாத (pōtāta) or பொதா (pōtā) *thing that is not enough*  
 {28} whence we can make the  
 {29} substantives பொதாதவன (pōtāt<sup>278</sup>-avāṇ). எ (l). தது (tu).  
 {30} பொத (pōta) infinite of the same verb  
 {31} *to be enough*, etc. .~.~.~.~.~.

## R

- {1} கூடும (kūṭum)<sup>279</sup> [lit. may, might, could]  
 {2} கூடும (kūṭum) [it] *is possible*  
 {3} கூடிச்சு (kūṭiccu) [it] *was possible*  
 {4} கூடுகிற (kūṭukira) *possible thing*  
 {5} கூடின (kūṭina) *impossible thing*  
 {6} கூடாத (kūṭāta) *impossible thing*  
 {7} கூடாது (kūṭātu) [it] *is impossible*  
 {8} கூடாவிட்டால் (kūṭāviṭṭāl) *if it were*  
 {9} கூடாதிருந்தால் (kūṭāt<sup>279</sup>iruntāl) *not possible*  
 {10} ஒககும்<sup>280</sup> (okkum) **with short ‘o’**  
 {11} ஒககும் (okkum) *idem est, equal est* [this means *it is equal*]  
 {12} ஒவ்வாது (ovvātu) *disagrees, does not match*  
 {13} ஒவ்வாத (ovvāta) *thing that does not match*  
 {14} *or is not equal or equivalent*  
 {15} **6<sup>th</sup> Chapter**

<sup>278</sup> The form given in the title is again the third person singular neuter of the verb *pōtu* only used as lexical verb in Modern Tamil and meaning ‘be enough, suffice’. It has the same forms already described for *vēṇṭu*.

<sup>279</sup> A modal auxiliary with defective morphology which occurs after an infinitive form to express different modalities, depending on its polarity. In Standard Modern Tamil, if it is positive, then it expresses circumstantial possibility, while if it is in the negative polarity, it expresses obligation, desideration, permission (see Lehmann 1989: 213-214). In the infinitive, it is also used as cliticized form and expresses unexpected inclusiveness (Lehmann 1989: 151). It is attested since *Tolkāppiyam* (cf. Krishnamurti 2003: 375).

<sup>280</sup> See footnote 253.

{16-17} **Of the other parts of speech**

{18} **Postpositions**

- {19} What in the Latin language are  
{20} prepositions are in this [language] postpositions because they  
{21} always come after. There is no more  
{22} to say of this matter except that  
{23} they are declinable in some  
{24} oblique cases, and from their variation  
{25} their meaning also vary  
{26} as in முன (mun) *in front of* முன்னாகு (munṅāku) *in front of*  
{27} முன்னுகு (munṅukku) *forward* dative  
{28} முன்னாலெ (munṅāle) *forward*, or  
{29} *onward*. ablative. முன்னிலெ (munṅilē)  
{30} *in front of*. They also require several  
{31} cases, as use will show.<sup>281</sup>

[f. M-34-41]

L

{1} **Adverbs**

- {2} Adverbs are formed with three letters  
{3} *a*, *i* and *e*. The letter *i* denotes presence,  
{4} the *a*, a distant place, and the *e*  
{5} makes question e.g. இங்கெ (iṅkē) *here* அங்கெ (aṅkē) *there*, over there எங்கெ (eṅkē) *where?*  
{6} கெ (aṅkē) *there*, over there எங்கெ (eṅkē) *where?*  
{7} as in இப்பொ (ippō) *now* அப்பொ (appō) *then* எப்பொ (eppō) *when*.  
{8} பொ (appō) *then* எப்பொ (eppō) *when*.  
{9} If to those formed from எ (e) one  
{10} adds the conjunction உம் (um) they  
{11} express universal meaning e.g. எங்கும் (eṅkum) *everywhere* எப்பொ (eppō)  
{12} கும் (eṅkum) *everywhere* எப்பொ (eppō)  
{13} தும் (eppōtum) *always*. The adverbs also  
{14} have their cases, which give them  
{15} varying meaning e.g. நெற்று (nerru)  
{16} *yesterday* நெற்றைக்கு (nerraikku) *for*  
{17} *yesterday*, dative நெற்றையின (nerraiyin) *of*

<sup>281</sup> As underlined in footnote 1062 in *Part 2*, when looking at the other copies of Costa's *Arte*, in particular in MS VL, MS GL2, and MS GL3, in this paragraph Gaspar de Aguilar's grammar is also mentioned. Furthermore, they also have the label *Prepositions* rather than *Postpositions* in the *Title*, even though they do not all differ in the remaining contents.

- {18} *yesterday*, genitive. Apart from these, all  
 {19} abstract nouns can be made into adverbs  
 {20} by placing after them [the particle]<sup>282</sup> ஆக (āka), or ஆய (āy) as in  
 from பிற  
 {21} காசம் (pīrakācam) *clarity* பிறகாச  
 {22} மாய (pīrakācamāy) *clearly*, from மெய (mey) *truth*  
 {23} மெய்யாக (meyyāka) *truly*.  
 {24-25} Sometimes the gerund கொண்டு (koṇṭu) from the verb  
 கொள்ளுகிறது (koḷḷukiratu) is added to ஆக (āka)  
 {26} as in பிறகாசமாக  
 {27} கொண்டு (pīrakācamāka.k koṇṭu) *clearly*. A series  
 {28} of adverbs belong more properly to the  
 {29} Vocabulary than to the Arte.<sup>283</sup>  
 {30} **Interjections**  
 {31} There are also in this language many

## R

- {1} interjections, which can be found in the  
 {2} Luso-tamul<sup>284</sup> Vocabulary in the [head]word interjection  
 {3} – there is not much more  
 {4} to say about them.~.  
 {5} **Conjunctions**<sup>285</sup>  
 {6} There is but one in this language and it is உம் (um),  
 {7} which is always placed after and is always  
 {8} repeated twice, as in நானும் (nānum) நீயும் (nīyum)  
 {9} *I and you*. If a negative follows,  
 {10} it means *nor* as in பாலும்லநீரும்ல (pālumalla nīrumalla)  
 {11} *neither milk nor water*. It means also  
 {12} *until*, or (can be used) in the sense  
 {13} in which the Latin considers *vel*, e.g. தபி

<sup>282</sup> The particles described here are the *peyareccam* and the *viṇaiyēccam* of the verb *āku-tal* ‘to become’ which have grammaticalised into adjectival and adverbial suffixes. Cf. footnote 175.

<sup>283</sup> This is the second context in which Aguilar’s grammar is mentioned in the other manuscripts such as MS GL2, MS GL3, MS VL while it is missing here and in MS BL.

<sup>284</sup> Here Costa refers to his Portuguese-Tamil dictionary which according to James (2000) is held in the State Central Library of Goa corresponding to MS 50. See *Introduction (Part 1)* for further details.

<sup>285</sup> Costa discusses again the clitic *-um*. In this paragraph he lists all its functions recognizing that it is used as co-ordinative (lines 7-11), inclusive (lines 11-16), all-inclusive (lines 16-21), while he had already identified the concessive and immediacy functions in the previous paragraphs (cf. footnotes 158 and 255).

- {14} நியமுளளவளுமபயப்படு  
 {15} வான (tapiriyam uḷḷavanum payappatuvāṅ) *he fears until, or still, or constantly.*  
 {16} If this conjunction is palced after  
 {17} the adjective *unus, una, unum* (one) ஒ  
 {18} ருததன (oruttan), ஒருததி (orutti), ஒன்று (onru) it takes  
 {19} the meaning of universal negative  
 {20} as in ஒருததனும் (oruttanum) *nobody*  
 {21} ஒருததியும் (oruttiyum) *not a single woman,*  
 {22} ஒன்றும் (onrum) *nothing.* When placed after the  
 {23} adverbs it takes a universal meaning,  
 {24} as stated for the adverbs.  
 {25} **Disjunctions**<sup>286</sup>  
 {26} In this language the disjunctions are:  
 {27} ஆகிலும் (ākilum) எனகிலும் (enkilum)  
 {28} ஆனாலும் (ānālum) ஆதல (ātal) ஒன்றில (onril)  
 {29} but they must be repeated two or  
 {30} more times, as in நானாகிலும் நீயா  
 {31} கிலும் (nāṅ-ākilum nī.y-ākilum) *either I, or you; ஒன்றில (onril)*

[f. M-34-42]

L

- {1} precedes as in ஒன்றிலிது (onrilitu) ஒன  
 {2} றிலது (onrilatu) *either this, or that,* the rest are  
 {3} placed after. Also, the interrogative  
 {4} ஒ (ō), if repeated, takes the strength of a disjunction  
 {5} as in நானொ நீயொ (nāṅ-ō nī.y-ō) *I or you?*<sup>287</sup>  
 {6} The remainder that are dealt with in the Latin grammar are  
 {7} not necessary.  
 {8} **3<sup>rd</sup> Title**  
 {9} ***Wherein some rules are given***  
 {10} ***for preterit future imperatives***  
 {11} ***and plurals of preterits***

<sup>286</sup> Among the forms listed here, only *ātal* ‘or’ is a proper conjunction, the others are inflected forms of the verb *āku-tal* ‘to become’ or *en(ṅu)-tal* ‘to say’.

<sup>287</sup> Again, this is a passage at the end of which the other manuscript copies of Costa’s *Arte* mention Aguilar’s Grammar. Furthermore, compared to MS GL2, MS GL3, MS VL, and MS BL both share an addition not found in the other two copies, a statement qualifying Aguilar’s grammar: which deals with everything in greater detail [*q(ue) tudo tratta diffusamente*].

{12} This is a rather embarrassing  
 {13} and confusing matter for Beginners, because  
 {14} the variety of the preterits cannot be  
 {15} reduced to general rules.  
 {16} Nevertheless, after a few years of practicing  
 {17} them, one comes to use them properly,  
 {18} so that eventually one will rarely misuse them,  
 {19} if at all. In order to say something concerning this,  
 {20} and to avoid putting  
 {21} all the preterits in the vocabulary,  
 {22} we will form some general  
 {23} rules or almost general, separating  
 {24} the preterits not herein  
 {25} comprised for the vocabulary,  
 {26} and leaving their many particularities  
 {27} to the practice, so as not to create confusion  
 {28} for beginners.  
 {29} Let the 1<sup>st</sup> {{Rule}} be that any Verb  
 {30} ending in *Icradu* or *.I.*, be it vowel,  
 {31} or diphthong or consonant, forms

## R

{1} the preterit in *Ichen*, e.g. {விசுவசி}  
 {2} ககிறது (vicuvācikkīratu) [[*to believe whence*]]<sup>288</sup>  
     விசுவசி{சசெ}ன (vicuvāciccēṇ), அ  
 {3} டைக்கிறது (āṭaikkīratu) [[*to close whence*]] அடைச்சென  
     (āṭaiccēṇ),  
 {4} மேயக்கிறது (mēykkīratu) [[*to graze whence*]] மெய்ச்சென  
     (mēyccēṇ). This is  
 {5} a rule without exception, for even though  
 {6} one could point out செதிககிறது (cetikkīratu) [[*to rub, to*  
     *brush*]] whence  
 {7} கெதிககினைன (ketikkinēṇ) and நீ{ககி}றது (nīkkīratu) [[*to*  
     *turn away*]]

<sup>288</sup> The English translation of the Tamil verbs in double square brackets is based on the meaning provided by the other copies of Costa's *Arte*, in particular in MS GL2 and MS GL3 (cf. footnotes between 1151 and 1313 in *Part 2*, Portuguese transcription). The meaning has been maintained as it is found in the Portuguese manuscript, therefore, the English gloss provided here translates the Portuguese form found in the two above-mentioned manuscripts.

- {8} whence நீக்கினென (nīkkinēn) these do not oppose  
 {9} the rule, as such verbs  
 {10} and some others formed in this kind are  
 {11} செதிகுகுகிறது நீக்குகி  
 {12} றது (cetikkukiratu nīkkukiratu) and are pronounced by  
 syncope,  
 {13} as [those] above. The verbs that  
 {14} fall under this Rule instead of *ichen*<sup>289</sup>  
 {15} can also make [the preterit] with *iten*. This is usually used  
 {16} by the Poets and the Brahmans.  
 {17} However the first rule is generally more common  
 {18} in these Kingdoms only நிக  
 {19} கிறது (nikkiratu) *to stand*, becomes நினறென (ninrēn)  
 {20} but this is also not against the Rule,  
 {21} because it is more properly written as நிறகிறது (nirkiratu)  
 {22} 2<sup>nd</sup> rule all verbs ending in  
 {23} [*Igradu*] make [the preterit] in *ngen* as in அ  
 {24} றிகிறது (arikiratu) [*to know, whence*] அறிஞ்சென  
 (arīñcēn). {அடை}  
 {25} கிறது (ataikiratu) [*to reach, whence*] அடைஞ்சென  
 (ataiñcēn) . பெய்  
 {26} கிறது (peykiratu) [*to rain, whence*] பெய்ஞ்சென  
 (peyñcēn). [This rule] also is  
 {27} without exception. I warn you of two things.  
 {28} First, that in place of சென (cen) it can also be formed  
 {29} in தென (ten),<sup>290</sup> as in அறிந்தெ  
 {30} ன (arintēn). அடைந்தென (ātaintēn) etc. according to  
 {31} the above stated about . *chen*.

#### [f. M-34-43]

L

- {1} which becomes *ten*. 2<sup>nd</sup> that some {that have} the consonant  
 {2} ஸ (y), or the diphthong ஐ (ai) make it without  
 {3} ஞ (ñ) and this is usually the best

<sup>289</sup> Here the palatalization of *-tt-*, *nt* into *-cc-*, *-nj-* in front of high front vowels is evident, a feature which is typical of Spoken Tamil.

<sup>290</sup> Costa here differentiates between the past morphs typical of Spoken Tamil (*-cc-*) and those typical of Standard Tamil (*-tt-*). The palatalization of the dental plosive is one of the main features of what Zvevilil (1959a, b; 1960a, b; 1963a, b) defined Common Standard Tamil.

- {4} pronunciation, as in நெய்கிறது (neykiratu), [[to weave, whence]] நெய
- {5} தென (neytēṅ). வைகிறது (vaikiratu), [[to curse, whence]] . வைதென (vaitēṅ),
- {6} others lose the ய (y), as in பெஞ்சென (peñcēṅ), etc.
- {7} 3<sup>rd</sup> {{Rule}} all verbs ending in *acradu*<sup>291</sup> make {{the preterit}}
- {8} in *nden*, as in மறக்கி
- {9} றது (marakkiratu) [[to forget, whence]] மறந்தென (marantēṅ) நடக்கிற (naḍakkiratu)
- {10} து (naḍakkiratu), [[to walk, whence]] நடந்தென (naḍantēṅ), etc. {{From this rule}} are removed
- {11} 1<sup>st</sup> the actives whose neutrals have
- {12} ங (ṅ) according to the 12<sup>th</sup> and 10<sup>th</sup> rules.
- {13} Secondly the verbs that before the ...a...
- {14} have a single letter are also removed, like நக்கிறது, (nakkiratu) [[to lick]],
- {15} தாக்கிறது (tākkiratu) [[to give]], கக்கிறது (kakkiratu) [[to vomit]] etc.
- {16} They make {{the preterit}} in *inen*. Thirdly, the verbs
- {17} வளக்கிறது (vaḷakkiratu) [[to create]] whence வளத
- {18} தென (vaḷattēṅ) மணக்கிறது (maṇakkiratu) [[to smell]] whence மண are removed
- {19} ககினை (maṇakkiṅēṅ).
- {20} 4<sup>th</sup> {{Rule}} that all verbs ending
- {21} in *gradu*, or *ogradu*, make {{the preterit}}
- {22} in *nden*, as in வேகிறது (vēkiratu) [[to get burnt]] whence வேந்தெ
- {23} ன (vēntēṅ), நோகிறது (nōkiratu) [[to feel pain]] whence நோந்தென (nōntēṅ).
- {24} If they end in *ocradu* they make {{the preterit}}
- {25} in *inen*, as in பொக்கிறது (pōkkiratu) [[to make someone to go]] whence பொக்கி
- {26} னென (pokkiṅēṅ). நொக்கிறது (nōkkiratu) [[to look at]] whence நொக்கினை (nōkkiṅēṅ).

<sup>291</sup> The transcription reveals the pronunciation of the Spoken variant for the present tense marker. For a comparison between Literary Tamil and Spoken Tamil see Table 3.10 in Schiffman (1999: 63).

- {27} 5<sup>th</sup> {{Rule}}. All verbs ended  
 {28} in *ugradu*, make [the preterit] in *inen*, as in பெசுகிற  
 {29} து (pēcukiratu) [[to speak]] whence பெசினென (pēcīnēn),  
 உளதுகிறது [[to blow]] (uḷatukiratu)  
 {30} whence உளதினென (uḷatinēn), etc; In the case of the  
 {31} verbs that before the உ (u) have ப (p).பப (pp).தத (tt).

## R

- {1} வ (v). ம (m). ச (c). சச (cc). this rule is without {ex}ception.  
 {2} In the case of the other letters that may  
 {3} precede the V there is some variety,  
 {4} for which we provide the following Rules, that are  
 {5} exceptions to this general rule.~.~.~.~.  
 {6} 6<sup>th</sup> {{Rule}}. All verbs ending in  
 {7} ளுகிறது (lukiratu) make {{the preterit}} in ண்டென (ṅṭēn)  
 {8} as in கொள்ளுகிறது (koḷḷukiratu) [[to receive, whence]]  
 கொண்டென (koṅṭēn),  
 {9} பிர்ளுகிறது (piralukiratu) [[to wallow, whence]]<sup>292</sup>  
 பிர்ண்டென (pirāṅṭēn), ஆ  
 {10} ளுகிறது (ālukiratu) [[to rule, whence]] ஆண்டென (āṅṭēn).  
 Are removed  
 {11} ஆருளுகிறது (āruḷukiratu) in order to give  
 [grace]  
 {12} and those which double the ளள (!! except கொ  
 {13} ளளகுகிறது (koḷḷukiratu)) which make [as above the  
 preterit] in *inen*,  
 {14} according to the above general rule. You  
 {15} remove also அழுகிறது (aḷukiratu) to cry,  
 {16} whence அழுதென (aḷutēn) being written  
 {17} in this way with ழு (ḷu), which is the most proper and  
 {18} it does not fit in this rule.~.~.~.~.~.  
 {19} 7<sup>th</sup> Rule all verbs ending in  
 {20} லுகிறது (lukiratu) make [the preterit] in ன்றென (ṅrēn),  
 {21} as in கொல்லுகிறது (koḷḷukiratu) [[to kill, whence]]  
 கொன்றென (koṅrēn)  
 {22} வெலுகிறது (velukiratu) [[to win, whence]] வென்றென

<sup>292</sup> In MS VL: to undress.

- (venṛēṇ) சொல  
 {23} லுகிறது (collukiratu) [[to say, whence]] also சொன்னென  
 (connēṇ). செல  
 {24} லுகிறது (cellukiratu) [[to say, whence]] சென்றென (cenṛēṇ)  
 it is removed கெ  
 {25} லலுகிறது (kellukiratu) [[to dig up making a pit]] whence  
 கெலலினெ  
 {26} ன (kellinēṇ), and it follows the fifth general rule.  
 {27} 8<sup>th</sup> {{Rule}} All verbs ending  
 {28} in ருகிறது (rukiratu) make {{the preterit}} in *nden* as in வ  
 {29} ருகிறது (varukiratu) [[to come, வந்தென]] (vantēṇ), வளளு  
 {30} கிறது (vaḷlukiratu) [[to grow, whence]] வளந்தென  
 (vaḷantēṇ), etc  
 {31} it is removed from this rule வாருகிறது (vārukiratu) to join

#### [f. M-34-44]

##### L

- {1} together with your [hands] what has fallen, or is  
 {2} on the ground. From this rule தருகிறது (tarukiratu) to lower  
 {3} the price also பெருகிறது [[to fill up]] (perukiratu) கருகிற  
 {4} து (karukiratu) [[to turn black]] அருகிறது (arukiratu)<sup>293</sup> [[to  
 cut]] and others that make  
 {5} the preterit in *inen* according to the 5<sup>th</sup>  
 {6} general rule.  
 {7} 9<sup>th</sup> R(ule). All verbs ending  
 {8} in டுகிறது (ṭukiratu) make [the preterit] in டடென (ttēṇ), if  
 {9} the ட is not doubled or does not have a long (vowel)  
 {10} before it e.g. படுகிறது (paṭukiratu) [[to suffer, whence]]  
 படடென (paṭṭēṇ),  
 {11} இடுகிறது (iṭukiratu) [[to throw, whence]] இடடென (iṭṭēṇ)  
 etc. I said  
 {12} if there is ட (t) as single or it does not have  
 {13} a long (vowel) because having it or doubling the  
 {14} ட (t), it makes it in *inen*, following  
 {15} the general rule, as in ஆடுகிறது (āṭukiratu)<sup>294</sup> [[to dance]]

<sup>293</sup> It is evident here that Costa is confusing ‘r’ and ‘ṛ’, indeed the verb meaning ‘to cut with a saw, a knife’ is *aru-tal*.

<sup>294</sup> This is one of the possible meanings for *āṭu-tal*.

- {16} வெடடுகிறது (veṭṭukiratu) [[to strike]] etc. It is removed  
பொடுகிறது (pōṭukiratu)
- {17} [[to throw]] [from this rule], which, while long, follows this  
{18} rule and makes போட்டென (pōṭṭēṇ) etc. it is removed  
{19} from this rule மூடுகிறது (mūṭukiratu) [[to close]].  
கூடுகிறது (kūṭukiratu)
- {20} which make it in *inen*. ~.~.~.~.~.~.~.~.~.
- {21} Of the verbs ending in *vcra*
- {22} *du*, their preterits are twofold,
- {23} those ending in *ten* or *inen*, and they vary so much
- {24} that I was not able to form
- {25} a general rule for them, so that
- {26} they are for the most part exceptions. And thus, leaving
- {27} these verbs for the use of which
- {28} we have given some Rules for, let us conclude
- {29} with those that before the *gradu* or *cradu*
- {30} have a consonant. I will only say that any
- {31} verb that in the Imperative changes

## R

- {1} the *cradu* into *cû* makes the preterit  
{2} in *inen*.
- {3} 10<sup>th</sup> Rule any verb that before
- {4} the *gradu* always has a ங (ṅ) makes [the preterit] in *inen*,
- {5} as in வாங்கிறது (vāṅkiratu) [[to take, whence]] வாங்கினென  
(vāṅkiṅēṇ),
- {6} பிடுங்கிறது (piṭuṅkiratu) [[to pull out, whence]]  
பிடுங்கினென (piṭuṅkiṅēṇ).
- {7} It is without exception. I say whenever it has
- {8} ங (ṅ), because some have, or may
- {9} have ன (ṇ). These make it in நென (rēṇ), e.g.
- {10} தினகிறது (tiṅkiratu) [[to eat, whence]] தினநென (tiṅrēṇ),
- {11} எனகிறது (eṅkiratu) [[to say, whence]] எனநென (eṅrēṇ).
- {12} 11<sup>th</sup> {{Rule}}. All verbs that before
- {13} *cradu* have ற (ṛ) make [the preterit] in *ten*, as in பாற்  
{14} கிறது (pārkiratu) [[to look at]] whence பாததென (pāṭṭēṇ).  
கோற்கிறது [[to put on]] (kōṛkiratu)
- {15} கொற்றென (kōṛrēṇ). விற்கிறது (virkiratu) [[to sell]] வித

- {16} தென (vittēṅ) etc. Are removed நிறகிறது (nirkiratu)
- {17} whence நினறென (ninnrēṅ). மொறகிறது (mōrkiratu) [[to  
smell or to urinate]]
- {18} whence மொந்தென (mōntēṅ).
- {19} 12<sup>th</sup> {{Rule}}. All Verbs that are
- {20} the active [forms] of those that fall under the 10<sup>th</sup> rule,  
stated above,
- {21} make [the preterit] in *inen*, e.g. அடககிறது (aṭakkiratu) [[to  
include
- {22} whence]] அடககினென (aṭakkinēṅ), மடககிறது  
(maṭakkiratu) [[to double,
- {23} whence]] மடககினென (maṭakkinēṅ), ஒதுககிறது (otukkiratu) [[to  
hide, whence]] ஒ
- {24} துககினென (otukkinēṅ) etc. it is also
- {25} without exception.<sup>295</sup>
- {26} **Of futures**<sup>296</sup>
- {27} This matter does not pose as much difficulty,
- {28} and can be reduced to a few,
- {29} infallible rules, because the futures are
- {30} reduced to two endings like *veṅ*
- {31} or *peṅ* in which the *gren*, or *cren*,

#### [f. M-34-45]

#### L

- {1} is changed, leaving the other letters unchanged,
- {2} except for those that fall under the 2<sup>nd</sup> rule, below,
- {3} and [this] because the verbs end in *gren*
- {4} or *cren*. Let the
- {5} 1<sup>st</sup> Rule be: any verb ending
- {6} in *gradu*, makes the future in வென (vēṅ) as in அ
- {7} {றிகிறது} (arikiratu) அறிவென (ārivēṅ). அடை
- {8} கிறது (āṭaikiratu) [[to reach, whence]] அடைவென  
(aṭaivēṅ),

<sup>295</sup> The rules discussed here will be reorganized by later grammarians like Ziegenbalg and Beschi leading to what is known today as Graul's verb classification. Indeed, the Tamil verbs can be subdivided into three main groups (weak, middle, strong) on the basis of the morphophonemic rules which apply to the verb stem taking the past tense morph. Muru (2021b) discusses it in greater detail.

<sup>296</sup> Even here Costa is identifying the different future tense morphs which depend on the class to which the verb belongs: weak, middle, or strong.

- {9} ஆடுகிறது (ātukiratu) [[to dance, whence]], ஆடுவென (ātuvēṅ). etc.
- {10} those that before *gradu* have ன (ṅ)
- {11} or ண (ṅ), தின்கிறது (tiṅkiratu) [[to eat]] whence
- {12} தின்பென (tinpēṅ), என்கிறது (enkiratu) [[to say, whence]]  
என்பென (enpēṅ),
- {13} காண்கிறது (kāṅkiratu) [[to see, whence]] காண்பென (kāṅpēṅ) etc. are removed
- {14} 2<sup>nd</sup> {{Rule}} Any verb ending
- {15} in *gradu* which makes the preterit in
- {16} *inen*, makes the future in *ven*, by
- {17} changing the *cren* into *cuen*, as well as
- {18} those in *gradu* which make it [the preterit] in *inen*,
- {19} by changing *gren* into *guen*, as in
- {20} அடக்கிறது (aṭakkiratu) [[to include, whence]]  
அடக்கினென (aṭakkiṅēṅ),
- {21} அடக்குவென [[to reach, whence]] (aṭakkuvēṅ) முறுக்கிறது (muṟukkiratu)
- {22} முறுக்கினென (muṟukkiṅēṅ) முறுக்குவென (muṟukuvēṅ) [[to twist like a rope]].
- {23} 3<sup>rd</sup> {{Rule}} Any verb ending in
- {24} *gradu* that does not make the preterit in
- {25} *inen* makes the future in *pen*, whichever way
- {26} the preterit is made, e.g. பாற்கி
- {27} றது (pāṟkiratu) [[to look at, whence]], பாததென (pāṭṭēṅ),  
பாறபென (pāṟpēṅ).
- {28} கெழ்க்கிறது (kēḷkkiratu), [[to hear, whence]] கெட்டென (kēṭṭēṅ), கெ
- {29} ழ்பபென் (keḷppēṅ), மறக்கிறது (maṟakkiratu) [[to forget, whence]], மறந்தெ
- {30} ன (maṟantēṅ), மறப்பென (maṟappēṅ), etc.
- {31} **Of imperatives**

## R

- {1} I will summarise
- {2} the doctrine of the imperatives very briefly,
- {3} for there is little more to say of
- {4} their formation than is said

- {5} in the Arte, from where all  
 {6} regular forms can be taken. I will only add  
 {7} that the verbs ending in *cren*, change the *cren* into *cu* when they have  
 {8} the preterit in *inen* as in துவககிற  
 {9} து (tuvakkiratu) [[to begin, whence]] துவககினென (tuvakkinēn) துவககு (tuvakku)  
 {10} சிறுககிறது (cirukkiratu), சிறுககினென (cirukkinēn), [[to become smaller, whence]]  
 {11} சிறுககு. (cirukku) செதிககிறது. [[to rub, to brush, whence]] (cetikkiratu) செதி  
 {12} ககினென. (cetikkīnēn) செதிககு. (cetikku), மடககி  
 {13} றது (maṭakkiratu) [[to double, whence]], மடககினென (maṭakkīnēn), மடககு (maṭakku), etc.  
 {14} Some imperatives are irregular and  
 {15} respect neither the formation nor  
 {16} the rule as in தினகிறது (tin̄kiratu) [[to eat, whence]]  
 {17} தினனு (tin̄nu). eat (plu)! நிற்கிறது. (nir̄kiratu) [[to stop, whence]]  
 {18} நிலலு (nillu) stop (plu)! விற்கிறது (vir̄kiratu). [[to sell, whence]] வில  
 {19} லு (villu) sell (plu)! அவிழ்கிறது (avil̄kkiratu) [[to untie, whence]] அ  
 {20} விறு (aviru) untie (plu)! And a few more  
 {21-22} of this kind which will have their own specified imperatives in the Vocabulary.<sup>297</sup>  
 {23} **Of infinites**  
 {24} Also the collection of the infinites  
 {25} is for the most part very easy  
 {26} because all verbs end the infinite  
 {27} in short *a*, to which the  
 {28} following rules apply.  
 {29} 1<sup>st</sup> any verb ended in *cra*  
 {30} *du* makes the infinite in *ca*, to which  
 {31} *cradu* [becomes to be] as in பொறுகிறது (pōr̄ukkiratu) [[to forgive, to hope for, whence]]

<sup>297</sup> The imperatives given here only include the proper Tamil imperative and not the other forms discussed above. Here Costa provides regular and irregular imperatives.

[f. M-34-46]

L

- {1} பொறுக்க, விற்கிறது (vir<sub>i</sub>kiratu) [[to sell, whence]] விற்க  
(vir<sub>i</sub>ka)
- {2} பாற்கிறது (pār<sub>i</sub>kiratu) [[to look at, whence]] பாற்க (pār<sub>i</sub>ka)  
முக்கிறது (mukikkiratu) [[to end]], மு
- {3} கிக்க (mukikka) {{this rule}} it is without exception.
- {4} 2<sup>nd</sup> any verb ended in *gradu*,
- {5} that has ங before *gradu*, changes
- {6} this *gradu* into *ga*, as in வாங்கிறது (vā<sub>n</sub>kiratu) [[to take,  
whence]]
- {7} வாங்க (vā<sub>n</sub>ka), தாங்கிறது (tā<sub>n</sub>kiratu) [[to take rest(?),  
whence]]. தாங்க (tā<sub>n</sub>ka), வீ
- {8} ஙகிறது (vī<sub>n</sub>kiratu) [[to swel, whence l]] வீங்க (vī<sub>n</sub>ka).
- {9} 3<sup>rd</sup> All verbs that before *gradu*
- {10} have ன (ṅ) or ண (ṇ) or another consonant
- {11} lose the *gradu* and they add an *A*
- {12} above the preceding consonant, as in
- {13} காணகிறது (kā<sub>n</sub>kiratu) காண (kā<sub>n</sub>a), [[to see, whence]]  
உணகிறது (u<sub>n</sub>kiratu) [[to eat rice]]
- {14} உண்ண (u<sub>ṅ</sub>ṇa), தினகிறது (ti<sub>n</sub>kiratu) [[to eat, whence]].  
தினன (ti<sub>ṅ</sub>ṇa).
- {15} எனகிறது (e<sub>n</sub>kiratu). எனன (e<sub>ṅ</sub>ṇa). அமிழ்க்கிற
- {16} து (ami<sub>l</sub>kkiratu) [[to be immersed, to sink, whence]]  
அமிழ்க்க (ami<sub>l</sub>kkka), etc. be warned that
- {17} those that before the *n* have a long [vowel] do not
- {18} double the *n* in the infinitive; those that have a short *o* double  
it, as can be
- {19} seen in the examples
- {20} [above], even though எனகிறது (e<sub>n</sub>kiratu) [[to say]] can be
- {21} with a single *n* making என (e<sub>ṅ</sub>).
- {22} 4<sup>th</sup> All verbs that before
- {23} *gradu* have a *V* lose the *gradu*... and
- {24} change the *u* into ...*a*..., as in வருகிறது (va<sub>r</sub>ukiratu). வ{ர்ர்}  
(vara). [[to come]]
- {25} அழகிறது (a<sub>l</sub>akiratu) அழ (a<sub>l</sub>a) [[to cry]]. விடுகிறது  
(vi<sub>t</sub>ukiratu) [[to leave, whence]] விட (vi<sub>t</sub>a). etc.

- {26} from the rule some verbs that make {{the preterit}}  
 {27} in *en*, *inen*, are removed which change the *gradu* into *ga*  
 {28} as in முடுகிறது (muṭukiratu) [[to hurry up, whence]] முடுக  
 (mūṭuka), பொருகிறது (porukiratu) [[to fill up, whence]]  
 {29} பொருக (poruka), கருகிறது (karukiratu) [[to  
 lose, to get furious, to turn black, whence]] கருக (karuka),  
 அரு  
 {30} கிறது (arukiratu) [[to diminish, to be joined(?),  
 whence]] அருக (aruka).~.~.~.  
 {31} 5<sup>th</sup> The verbs that make {{the present}} in *igradu*,

## R

- {1} whether vowel, diphthong or con  
 {2} sonant losing the *gradu*, add  
 {3} *a* over *i*, as in அறிகிறது (arīkiratu) [[to know,  
 whence]] அறிய (ariya),  
 {4} காயகிறது (kāykiratu) [[to warm up, whence]] காய (kāya),  
 etc<sup>a</sup>. Some  
 {5} that have a diphthong or consonant  
 {6} double the *y* (y) as in வைகிறது (vaikiratu) [[to curse,  
 whence]] வைய  
 {7} ய (vaiyya). நெயகிறது (neykiratu) [[to weave, whence]]  
 நெயய (neyya). செய  
 {8} கிறது (ceykiratu) [[to do, whence]] செய்ய (ceyya). And  
 others that use  
 {9} will show.  
 {10} 6<sup>th</sup> Those that before *gradu* have an *a*,  
 {11} and *o*, change the *gradu* into *ga* as in  
 {12} ஆகிறது (ākiratu) [[to be or to be done, whence]] ஆக  
 (āka). வெகிறது (vēkiratu) [[to get burnt, whence]], வெக  
 (vēka)  
 {13} நொகிறது (nōkiratu) [[to burn(?))] நொக (nōka).

{14}

### Of plurals

- {15} The common plurals can be reduced  
 {16} to four endings, because they end  
 {17} in *gal*, or they double the *க*, in *cal*,  
 {18} or in *mar* or in *ar* for which the following  
 {19} rules can be given.

- {20} 1<sup>st</sup> Any noun which ends  
 {21} in ஆ (ā) doubling the க (k) makes {{the plural}} in *cal*,  
 {22} which is {{added}} over the ஆ (ā) as in பிதா (pitā)  
 [[father]]  
 {23} பிதாக்கள (pitākkaḷ), மிடா (miṭā) [[big pot]] மிடாக்கள  
 (miṭākkaḷ)  
 {24} 2<sup>nd</sup> Any noun ending in  
 {25} *i* makes {{the plural}} in *gal* as in ஆவி (āvi) steaming  
 ஆவிகள் (āvikaḷ),  
 {26} அடி (āṭi) [[hit]] அடிகள் (āṭikaḷ), சொது (cōti) [[luster, star  
 in libra]] சொ  
 {27} திகள் (cōtikaḷ), etc. some {{forms}} are removed from  
 {28} the {4<sup>th</sup>} and 6<sup>th</sup> rules.  
 {29} 3<sup>rd</sup> Any noun ended in  
 {30} உ (u) that has a long {{vowel}} before it, does not  
 {31} {do}uble and makes {{the plural}} in *gal*, as in ஆடு (āṭu)  
 [[goat]] ஆ

#### [f. M-34-47]

#### L

- {1} டுகள (āṭukaḷ), மாறு (māru)<sup>298</sup> [[cow]] மாறுகள (maṟukaḷ),  
 கூத்து (kūttu) [[dance]]  
 {2} கூத்துகள (cūttukaḷ), வீடு (vīṭu) [[home]] வீடுகள (vīṭukaḷ),  
 etc.  
 {3} If it has a short {{vowel}} it doubles *ca* as in மறு (maṟu)  
 {4} மறுக்கள (maṟukkaḷ) குத்து (kuttu). [[hit]] குத்துக்கள  
 (kuttukkaḷ). குரு (kuru) [[teacher]]  
 {5} குருக்கள (kurukkaḷ). சத்துரு (catturu). [[enemy]] சத்துரு  
 {6} ககள (catturukkaḷ). {{some forms}} are removed[:] பெண்டு  
 (peṇṭu) [[woman]] that makes  
 {7} {பெண்டு}கள (peṇṭukaḷ) even though others  
 {8} make it according to the rule as in பெண்டுககள (peṇṭukkaḷ).  
 {9} 4<sup>th</sup> The monosyllables ending  
 {10} in a long {{vowel}} double it, as in ஈ (ī). [[fly]] ஈக  
 {11} கள (īkkaḷ). பூ (pū). [[flower]] பூக்கள (pūkkaḷ). பீ (pī).  
 பீக்கள (pīkkaḷ) [[excrement]]

<sup>298</sup> Costa is confusing here the retroflex *ṭ* with *ṛ*. indeed, *cow* should have been *māṛu*.

- {12} {5<sup>th</sup>} Any noun ending in a  
 {13} consonant forms {{the plural}} in கள (kaḷ) without doubling as in  
 {14} செயம (ceyam). [[victory]], செயங்கள (ceyaṅkaḷ). தென (tēṅ) [[honey]] தெ  
 {15} னகள (tēṅkaḷ). பால. [[milk]] (pāl) பால்கள (pālkaḷ). கா  
 {16} ல (kāḷ) [[leg]] கால்கள (kāḷkaḷ), etc. although those  
 {17} ending in ள (ḷ) vary  
 {18} because ஆள (āḷ) [[persons]] whence ஆளககள (āḷkkaḷ). வி  
 {19} ற்ல (viral). [[finger, toe]] விரலககள (viralkkaḷ) [[pot]], கால் (kāḷ) கால்  
 {20} ககள (kāḷkkaḷ). The masculines which  
 {21} have அ (a) before the ன (ṅ) are removed  
 {22} they make {{the plural}} in ar as in மனுஷன (maṇuṣaṅ), [[man]]  
 {23} மனுஷ்{ர்} (maṇuṣar) பர்வன (paravaṅ) [[parava]]. பர்வ{ர்} (paravar). க  
 {24} ற்தன (kartan). [[Lord]] தந்த்{ர்} (kartar) etc. However, these  
 {25} after அ{ர்} (ar) can, and many of them  
 {26} usually add கள (kaḷ)  
 {27} as in அவன (avaṅ). {{he}} அவ{ர்}கள (avarkaḷ). பெ  
 {28} ரியவன (periyavaṅ). பெரியவ{ர்}கள (periyavarkaḷ). {ம}  
 {29} னுஷன (maṇuṣaṅ). மனுஷ்{ர்}கள (maṇuṣarkaḷ), etc.  
 {30} 6<sup>th</sup> For those that make the {{plural}} naturally  
 {31} in மா{ர்} (mār) a general rule cannot be provided.

## R

- {1} {{So}} for now the use will  
 {2} teach them, as in தம்பி (tampī) [[younger brother]] தம்பிமா{ர்} (tampimār)  
 {3} etc. தகப்பன (takappaṅ) [[father]]. தகப்பமா{ர்} (takappamār). தொ  
 {4} முன (tōḷaṅ). [[friend, companion]] தொழமா{ர்} (tōḷamār). These  
 {5} and other irregular {{forms}}  
 {6} that diverge from these general rules  
 {7} we will put in the Vocabulary.

- {8} Finally I advise  
 {9} those who do not wish to embarrass themselves  
 {10} with plurals to use the singular,  
 {11} even if the preceding adjective  
 {12} demands the plural, as in இரண  
 {13} இகண (iraṇtu kāṇ) *two eyes*, அனெ  
 {14} கமபெ{ரர்} (aṇēkam pēr) *many people*. But  
 {15} in this, as in other subjects, the practice  
 {16} ~.will make everything clear.~<sup>299</sup>  
 {17} **4<sup>th</sup> Title**  
 {18-19} **Spelling Rules**  
 {20} I do not intend to give rules here  
 {21} about how to write in the middle or beginning  
 {22} of the words; these or those letters  
 {23} double, or single, but  
 {24} only {{to provide rules}} in the co-occurrence of one word  
 {25} with another since it is very  
 {26} common in Tamil  
 {27} to change or to double the last {{letter}} of  
 {28} one {{word}} and the first one of another.  
 {29} Let the first general rule on this  
 {30} subject be that the words ending in

[f. M-34-48]

L

- {1} ட change {{this m}} in accordance with the  
 {2} consonant that follows e.g. if ச (c) follows, the ட (m)  
 {3} becomes ஞ (ñ) if த (t) {{follows, the ட (m) becomes}} ந (n), if க (k)  
 {{follows, the ட (m) becomes}} ங (ṅ), if ப (p) {{follows, the ட (m)}}  
 remains  
 {4} as it is ut. அவனுஞ்சொன்  
 {5} னான (avanuṁṅ conṅāṇ), அவனுந்தான (avanuṁṅ tāṇ), அவ  
 {6} னுங்கண்டான் (avanuṁṅ kaṅṅāṇ), அவனுமபா  
 {7} த்தான் (avanuṁṅ pātṅāṇ).  
 {8} 2<sup>nd</sup> {{Rule}} if after the word ending  
 {9} in a consonant there is a vowel, this

<sup>299</sup> These last paragraphs all describe *sandhi* rules which apply in forming the infinitive – which, in this context, is only represented by what Costa had earlier defined *infinite absolute* – and the plurals.

- {10} is then included in the consonant and it is not common to  
 {11} give it in the alphabet {{symbol}} ut. அவனுமி  
 {12} ருக்கிறான் (avaṇum irukkirāṇ), அவனுமெடுக்கிறா  
 {13} ன் (avaṇum meṭukkirāṇ), அவனுமுருக்கிறான் (avaṇum  
 urukkirāṇ), அ  
 {14} வனுமானுகிறான் (avaṇum ālukirāṇ), etc. And not  
 {15} அவனும்இருக்கிறான் (avaṇum irukkirāṇ), அவ  
 {16} னும்எடுக்கிறான் (avaṇum eṭukkirāṇ) etc. Although,  
 {17} perhaps for the sake of clarity, it will be necessary to  
 {18} write the vowel as distinct for example in these  
 {19} words வந்தான் ஆனா  
 {20} லப்பாரமில்லை (vantāṇ āṇālapparamillai). And so on, in other  
 {21} cases where it will be necessary in order to avoid co(n)fusion  
 {22-23} I will write a distinct vowel in order to be clear.  
 {24} 3<sup>rd</sup> {{Rule}} in the co-occurrence of a vowel  
 {25} with {another} vowel the general rule is that if the vowel  
 {26} occurs after அ (a), ஓ (o), உ (u), it will be added  
 {27} வ between the vowels, for example பண்  
 {28} ணவிருக்கிறான் (paṇṇa-v-irukkirāṇ). *He is going to do*  
 {29} வந்தானோவிலையேயாதெரியா.  
 {30} து (vantāṇō-v-illaiyō teriyātu). *I don't know if he came or not, குருவி*  
 {31} ருக்கிறா{ர்}

## R

- {1} இ (i) or எ (e) it will be added ய (y) {{between the vowels}}.  
 {2} 4<sup>th</sup> {{Rule}} if monosyllabic {{words}}  
 {3} ending in .n. with a short letter co-occur  
 {4} with a vowel, they double the .n. as in  
 {5} கண. ஆனது (kaṇa āṇatu) becomes கண்ணா  
 {6} னது (kaṇṇātu), என். ஆற்றுமம் (eṇ, ārrumam) becomes  
 {7} என்னாற்றுமம் (eṇṇārrumam), like {பெண்.}  
 {8} ஆனவள் (peṇ āṇaval) becomes பெண்ணானவள் (peṇṇāṇaval).  
 {9} etc. as I said with a short letter because  
 {10} if {{the n}} is preceded by a long letter, it doesn't double  
 {11} like in ஆண. ஆனவன (āṇa āṇavan) becomes ஆணா  
 {12} னவன (āṇāṇavan), மான . ஆனது (māṇa āṇatu) is  
 {13} மானானது (māṇāṇatu).

- {14} **Of the 4 letters க (k). ச (c). த (t). ட (p)**
- {15} The rules above are easy and general ones.
- {16} The greatest difficulty occurs
- {17-18} in doubling or not doubling the 4 letters க (k). ச (c). த (t). ட (p).  
in the co-occurrence of words {{ending and beginning as such}}.
- {19} And this pronunciation proves difficult
- {20} for foreigners, who rarely achieve them in Tamil
- {21} how they are
- {22} known to the natives even though
- {23} they are very learned in specific properties
- {24} of the language. However, in order to write
- {25} correctly, we will give some rules
- {26} that experience
- {27} has taught us up until now.
- {28} let. {{The}} 1<sup>st</sup> rule be that after the da(tiv)e and accusative
- {29-30} the above-mentioned letters க (k). ச (c). த (t). ட (p). always  
double க (k) like in அவீனுக்குக்குடுத
- {31} ரன், அவனைக்காண்டான். (avaṇuḱku.k kuṭu cūraṇ, avaṇai.k kāṇṭāṇ)

#### [f. M-34-49]

##### L

- {1} 2<sup>nd</sup> {{Rule}} in the majority of the oblique cases
- {2} {{they}} never double like in அவனுடை
- {3} யகாரியம் (avaṇuṭaiya kāriyam). அவனாலெபொச்
- {4} சுது (avaṇālē poccutu) அவனோடெசொன்னா
- {5} ன் (avaṇōṭē conṇāṇ). The ablatives in *il* and
- {6} *al* which are very co(m)mon are an exception.
- {7} 3<sup>rd</sup> {{Rule}} after the nominative
- {8} there is a great variety that can be achieved
- {9} only through use. What seems to be without exception is that
- {10} when the last consonant of the nominative doubles,
- {11} the abovementioned letters double,
- {12} if another noun follows as in பத்துப்
- {13} பொன (pattu.p poṇa). கற்றப்பாரம் (karru.p pāram) etc. if
- {14} a Verb follows, they never double
- {15} as in தத்துப்பாத்தான் (cūttu.p pāttāṇ) பல்லு
- {16} தைச்சான (pallutai.c cāṇ).
- {17} 4<sup>th</sup> {{Rule}} the adjectives which as such
- {18} double the last consonant, they

- {19} double the following ones too as in ஆட்டுக்  
 {20} குட்டி (āṭṭu.k kuṭṭi). மடத்துச்சம்மந்  
 {21} தம் (maṭattu.c cammantam). ஆற்றுப்பாச்சல் (arṭu.p pāccal). The  
 adjectives  
 {22} ending in .a. derived from the nouns  
 {23} in .am., do not have a proper rule, only use  
 {24} will teach the {{proper}} pronunciation, it is clear only  
 {25} that after {{words like}} அநத . இநத . எந  
 {26} த (anta, inta, enta) ille, a, ud they always double ut  
 {27} அந்தக்கரியம் (anta.k kariam), இந்தக்கத்தி (inta.k katti)  
 {28} etc. if பிற follows the abovementioned {adjectives}  
 {29} then, ப doubles  
 {30} as in வரப்பிறசாதம் (vara.p piraçātam) etc.  
 {31} 5<sup>th</sup> {{Rule}} after the adjectives originating from

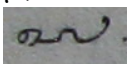

## R

- {1} verbs never double  
 {2} as in இருக்கிறபதாறதம் (irukkira patāratam), வந்தகாரி  
 {3} யம் (vanta kāriyam), வேண்டினதளபாரம் (vēṇṭiṇa taḷapāram) etc.  
 {4} 6<sup>th</sup> {{Rule}} after the infinite absolute  
 {5} they always double as in இருக்கக்கட  
 {4} வான் (irukka.k kaṭavāṇ), பண்ணச்சொல்லு (pṇṇa.c collu),  
 {5} இறுக்ககட்டு (irukka.k kaṭṭu) etc.  
 {6} 7<sup>th</sup> {{Rule}} after the gerund ending  
 {7} in .i. they always double ut நடத்  
 {8} தக்கொண்டு (naṭatta.k koṇṭu), பண்ணிப்பொ  
 {9} ட்டான் (paṇṇi.p poṭṭāṇ). போயச்சொல்லு (pōy.c collu) etc.  
 {10} 8<sup>th</sup> {{Rule}} after the gerund ending  
 {11} in .V. which also doubles the last consonant,  
 {12} they always double as in பாத்துக்:  
 {13} கொண்டு (pāṭṭu.k koṇḍu), காத்துக்கொண்டு (kāṭṭu.k koṇḍu),  
 {14} if the last letter of the abovementioned gerunds does not  
 {15} double, the aforesaid four letters  
 {16} never double as in வந்துபொனான் (vantu poṇāṇ),  
 {17} அறிஞ்சுகொண்டான் (ariñcu koṇḍāṇ) etc.  
 {18} 9<sup>th</sup> {{Rule}} after the majority  
 {19} of the tenses of the indicative {{they never}} double.  
 {20} After the conditional they always

- {21} double ut வந்தாலத்தெரியும் (vantāla.t teriyum)  
 {22} etc. this is all we can say in this matter,  
 {23} practice will teach more  
 {24} and will reveal more infallible  
 {25} rules .~.~. .~.~. .~.~. .~.~.  
 {26} **5<sup>th</sup> Title**  
 {27} **Collocation of the Tamil**  
 {28} **letters {{following}}**  
 {30} **the order of our alphabet**

[f. M-34-50]

L

- {1} A. அ, ஆ, ஐ  
 {2} B. ஸ,   
 {3} C. க  
 {4} D. த,   
 {5} E. எ  
 {6} G. க  
 {7} H. க,   
 {8} I. இ, ஈ, ய, ச  
 {9} L. ல, ள, ழ  
 {10} M. ட,   
 {11} N. ந, ன, ண, ஞ, ட  
 {12} O. ஓ  
 {13} P. ஸ,   
 {14} Q. க  
 {15} R. ர, ற, ள  
 {16} S. ச,  (ஸ்)  
 {17} T. த  
 {18} V. உ, உள (ஊ), வ  
 {19} X. ச, கூ, வு,   
 {20} In the prologue we already gave the reason why  
 {21} {{we left}} the order of the Tamil Alphabet

{22} {{and we decided to}} follow the {{order of the}} Lusitanian  
 alphabet.  
 {23} What remains to be done is to place the Tamil characters  
 {24} {{following the order}} of the Lusitanian {{alphabet}} for which:  
 {25} In .A. we put the short *அ* and  
 {26} then the long *ஆ*; therefore, in the  
 {27} second letters, because it is rare to find it at the beginning  
 {28} we put the diphthong *ஐ*, which  
 {29} is accompanied by the short .a.  
 {30} and by .i.. For this reason, it is necessary to place it

## R

{1} under *அ* and before *ஐ*. But, in order not to interrupt  
 {2} *அ*, *ஆ* with {new}  
 {3} characters, we put {{the diphthong}} after both.  
 {4} In .B. we put the letter *ப* when  
 {5} it must be pronounced as .B. at the  
 {6} beginning of the word, when it is  
 {7} single in the 2<sup>nd</sup> and 3<sup>rd</sup> syllable}. The  
 {8} letter  is the proper Grandonic .B.  
 {9} that we mention here  
 {10} because we will find it in some nouns.  
 {11} In .C. we place the letter *ச* when it is pronounced  
 {12} as *cha*, or when at the beginning  
 {13} of the word it should be  
 {14} pronounced in this way, or when in the middle {{of the word}} it  
 doubles.  
 {15} We do not include in this letter the pronunciation  
 {16} of *ca*, *co*, *cu* because we reserved that  
 {17} for the letter .Q. for the reasons that we will state there.  
 {18} Tamil doesn't have any letter  
 {19} that corresponds to .D. although  
 {20} because the letter *ச* supplies many of the uses  
 {21} of .D., mainly when it is alone  
 {22} in the middle of the word.  
 {23} We will put in .D. the nouns beginning  
 {24} in *ச* which must be pronounced as  
 {25} .D. as well as {{the nouns in which the ச}} is in the {2<sup>nd</sup> and 3<sup>rd</sup>}

letters as  
 {26} single {{letter}}. In the order and the place  
 {27} of *.D.* {{is found}} the letter  which is Grandonic,  
 {28} and properly corresponds to our *.D.*  
 {29} We state this here because,  
 {30} we will find it again a few times further on.  
 {31} In *E* is the short and long  $\epsilon$

[f. M-34-51]

L

{1} with the distinction that in the next Title  
 {2} we will see.  
 {3} None of the Oriental Alphabets  
 {4} has the letter *.F.*, nor  
 {5} has words in which there is a similar pronunciation.  
 {6} Furthermore, Tamil does not have  
 {7} a proper letter corresponding to  
 {8} our *.G.*, since the letter  $\text{ḡ}$   
 {9} is sometimes pronounced like *.G.* mainly  
 {10} when found in the middle of the word,  
 {11} it is single. Under the letter *.g.*  
 {12} we will place the letter  $\text{ḡ}$  when it has the pronu(n)ciation  
 {13} *ga, gue, gui, go, gu* because we leave  
 {14} the pronunciation *ge, gi* to the *I.*  
 {15} Also there is no letter that  
 {16} corresponds to our *h*: nor a noun  
 {17} that has this pronunciation. So that  
 {18} in the Alphabet we leave this letter  
 {19} and those few {{words}} which have {{this pronunciation}} in the  
 middle  
 {20} and they only can have this pronunciation, we will distinguish  
 {21} the  $\text{ḡ}$  by placing a dot under {{the letter}}  
 {22} so that it will be pronounced as *.h.* even though  
 {23} the Tamil always pronounce it  
 {24} as *ga* and not *ha*, despite *.h.* being  
 {25} the best pronunciation.  
 {26} We will follow the order as if  
 {27} it were *ga*. The letter  is the *grand(doni)c h*.

- {28} In *I* we will primarily put
- {29} its short  and long *ஈ*. Therefore,
- {30} the letter *ஊ* that corresponds to our *.y*. {{will follow}}.
- {31} After the letter *ஈ* when {{it is found}} at the beginning

## R

- {1} of the word {{and}} must be pronounced as
- {2} *.j*. ut சீவன (## ##) (cīvan ## ##). I say
- {3} at the beginning of the word, because
- {4} {{if it were}} in the middle {{of the word}} in order to avoid  
co(n)fusion,
- {5} we will always put the single *ஈ* as if it were
- {6} *.X*. and as such the words should be looked up
- {7} And if perhaps the best pronunciation
- {8} demands *ja*, we will add a sign like a dot under *ஈ*
- {9} that we will discuss below.
- {10} In *.L*. we will put the three *ழ* that the
- {11} Tamil {{language}} has. In the first place the *ழ*, because
- {12} it is connatural with our *.L*; in the 2<sup>nd</sup> place
- {13} the *ழ*; the *ழ* will be put in the 3<sup>rd</sup> place
- {14} for having the most different pronunciation
- {15} from our {{pronunciation}} compared to *ழ* as we already saw
- {16} in the first title.
- {17} In *.M*. there is the Tamil *ழ* {{and}} the
- {18} letter  which is the *Grandonic .M*. that
- {19} we will find many times below.
- {20} And when there is , this means that *.M*.
- {21} is in the final {{position}} or it does not have the vowel.
- {22} In *.N*. I place the five castes of *.NN*
- {23} that the Tamil {{language}} has. In the first
- {24} place {{I put}} *ழ* because, besides having our
- {25} natural pronunciation, it serves
- {26} the beginning of nouns, or in the middle
- {27} in front of the letter *ழ*. In the 2<sup>nd</sup> place
- {28} there is *ழ* whose pronunciation does not
- {29} differ from the first one because (it) is never written
- {30} at the beginning {{of the word}}. In the 3<sup>rd</sup> place {{there is}}

{31} ண {because in its figure it looks more like

### [f. M-34-52]

#### L

{1} the 2<sup>nd</sup> {{n}}. In the {4<sup>th</sup>} place is ஞ which  
{2} {serves} at the beginning or in the middle.  
{3} In the last place {{there is}} the {{letter}} டு for  
{4} its most barbarous pronunciation compared to the others  
{5} and to our pronunciation. In the second  
{6} letters we observe this order so that  
{7} it will be easy to look for nouns.  
{8} In .O. there is the Tamil short and long ஔ  
{9} with the same distinction already  
{10} mentioned for .E.~.~.  
{11} In .P. there is the Tamil டு whose letter,  
{12} {{if found}} at the beginning of the word,  
{13} is usually pronounced as  
{14} P. in the middle of the words it has this  
{15} pronunciation when it is double  
{16} or it is written after the consonant.  
{17} In .Q. we put the nouns that  
{18} begin with the letter டு with the same  
{19} pronunciation we follow the order  
{20} that in the 2<sup>nd</sup> and 3<sup>rd</sup> letters will be  
{21} doubled. It is assumed that the  
{22} pronunciation of கா, கா, கா must be  
{23} written in our letters with .c.  
{24} cá, co. We do not place this  
{25} pronunciation under .C. but rather under .Q. where  
{26} we must necessarily place *que*  
{27} and *qui*, appearing to me to be the best  
{28} pronunciation among the five  
{29} of the same letter given below. I thought that  
{30} their best place was under the {{letter}} .Q.  
{31} where the words {{beginning in}}

#### R

{1} *qua*, *quo*, *qu* can be placed, and not under {C}  
{2} where the latter two cannot be placed.

{3} Therefore, in the letter  
 {4} .*Q*. we put கா , கெ , கி , கொ , கு  
 {5} *qa, qe, qi, qo, qu*. I am well aware of the fact that  
 {6-7} all these pronunciations could find a better  
 {8} place under the letter *k*. However,  
 {9} since this letter is rarely named  
 {10} in our Alphabet, and it is considered as extraneous  
 {11} by the Portuguese, I have avoided  
 {12} mentioning it. After the  
 {13} pronunciations of *ca.co.cu.*,  
 {14} we reserve the pronunciation  
 {15} of *ce.ci*. which do not find a place  
 {16} under the letter *ச* and can be reduced to {{the letter}} *S*.  
 {17} What remains is to place under .*C*. {{those words}}  
 {18} that the Tamil {{people}} pronounce like *ch*;  
 {19} and that the Italians pronounce  
 {20} as *ca, {ce, ci}*.  
 {21} In the letter .*R*. we put the three .*rr*.  
 {22} that the Tamil {{people}} have. In the first place  
 {23} {{there is}} ற whose pronunciation is as .*r*.,  
 {24} in the 2<sup>nd</sup> {{place, we put}} ற that is like our double *rr*  
 {25} even if when it precedes  
 {26} some letters, it has another pronunciation.  
 {27} However, regarding the explanation of  
 {28} letters, we have already mentioned this in the first Title.  
 {29} In the 3<sup>rd</sup> place we put  
 {30} ற which is the most distant from  
 {31} our pronunciations, among the {{Tamil}} *rr. .~.~. ~.~.*

### [f. M-34-53]

#### L

{1} In .*S*. we put ஸ since  
 {2} it can and must be pronounced as *s*.  
 {3} at the beginning of the word even though  
 {4} the pure Tamils do not know how  
 {5} to pronounce this letter despite the fact that many  
 {6} nouns deriving from the *Grandonic*  
 {7} require the pronunciation of  
 {8} .*S*. Only those who speak better

{9} pronounce the *s*. I said at the beginning of the word  
 {10} because {{if it occurs}} in the middle, it always respects  
 {11} the order as if *ʃ* were  
 {12} *.X*. as we already aware.  
 {13} {{This does not occur if}} it is written with  which is the  
 {14} *grandonic s* which will be found  
 {15} at the beginning and in the middle of the word  
 {16} many times in the dictionary  
 {17} as joined with *ʃ* like  *.st.* or  
 {18} with  *.sm.*; or with  *.sp.*  
 {19} etc. And ordinarily putting   
 {20} this consonant, we will write  
 {21} the *Grandonic* consonant, as it is  
 {22} found written in the books. ~.~. ~.~.  
 {23} In *.T*. we put the letter *ʃ* and under  
 {24} *t*. we put all the nouns which  
 {25} begin with this letter, placing under  
 {26} the {{letter}} *.D*. {{all}} those that should be pronounced like this  
 {27} at the beginning. And when {{ʃ}} doubles in the middle  
 {28} of the word, the *ʃ* always follows  
 {29} the pronunciation and the place of *.T*.  
 {30} In *.V*. we put the short *u*,  
 {31} after the long *our*, and in the 3<sup>rd</sup> place

## R

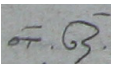

{1} *ω* which is the consonant *.v*. And the {or}der  
 {2} of *.U.V*. we keep not only  
 {3} for the first {{letters}} but also in the second  
 {4} and third ones.  
 {5} In *.X*. we put all the nouns  
 {6} that begin with the letter *ʃ* placing  
 {7} in *.ch.*, *.S.*, *.I*. those that must be pronounced  
 {8} in this way at the beginning {{of the word}}. And generally  
 {9} if all words are pronounced  
 {10} as *...X...* they will be understood by the  
 {11} native speakers. In the middle of the word,  
 {12} this letter *ʃ* always follows the order and the place of

- {13} *x* when it is  
 {14} single. In the 2<sup>nd</sup> place of the *.X.* we put  
 {15} the letter , so in the first  
 {16} as well as in the other letters, and it is formed with  
 {17} , both *grandonic*.  
 {18} In the 3<sup>rd</sup> place we put the letter  
 {19}  which is the *.X.* pronounced  
 {20} in the palate such as  is  
 {21} the Tamil . Sometimes it  
 {22} joins with  as . *ct.* Many times this letter  
 {23}  will be expressed as   
 {24} composed of  whose value  
 {25} corresponds to what in Tamil is written as   
 {26} Sometimes it will be realised as  having  
 {27} the *grandonic* letter  below  
 {28} which is the same as  {{pronounced as}} aspirated.  
 {29} And all these last pronunciations  
 {30} are extraneous to our way {{of pronunciation}}  
 {31} and we have already mentioned them in the explanation of the  
 letters

**[f. M-34-54]**

- {1} where they can be found. The letter  
 {two}  is the *grandonic x* with the rigorous  
 {3} pronunciation of our *.X.* that the  
 {4} Tamil {{people}} do not have.  
 {5} **6<sup>th</sup> Title**  
 {6} ***About some signs that are used in this***  
 {7} ***dictionary.***  
 {8} For greater help for beginners  
 {9} we will supply the barbarism  
 {10} of the Tamil writing with some  
 {11} signs in the Tamil characters which can  
 {12} have many meanings and thanks to which

{13} the words can be read without embarrassment,  
 {14} in a single, unique way. In this way,  
 {15} we will avoid the confusion  
 {16} which we discussed in the first titles  
 {17} dealing with the composition of the letters, in the 3<sup>rd</sup>  
 {18} paragraph, and in the 2<sup>nd</sup> one. ~.~. ~.~.  
 {19} Primarily, since Tamil distinguishes  
 {20} the short vowels from the long ones,  
 {21} in order to make this distinction,  
 {22} on the ஄ and on the ஆ, in order to show  
 {23} which is the long one between these two letters, we will put  
 {24} a line above the letter

{25} like this  é . ó. And {{also}} in the compound  
 {26} syllables  mé, mó.  
 {27} when the long {{letter}} needs to be  
 {28} longer in duration, and it is longer,  
 {29} having in the pronunciation || as already  
 {30} explained || three, or more compounds and they say  
 {31} that the short letter, has one, and the

**R**

{1} long {{letter}} has two. Therefore {{if it is longer}} we will put  
 {two lines}  
 {2} as found in the word {#}  
 {3}   
 {4} This letter  does not serve only  
 {5} for {{representing}} .r. but for forming the long .A. , and  
 {6} not placed after a consonant, and of  
 {7} the long .O. when the consonant has  
 {8} the kombo after. And so, in order to deal with  
 {9} this embarrassment, when the  is .R. {we}  
 {10} will {only} add a dot  
 {11} on the top, whenever it is required.  
 {12} We will put the same dot on all  
 {13} mute consonants that do not have  
 {14} the short .A. after, like ல̇.  
 {15} However because in  we have already used a dot

- {16} to distinguish it from when {{it is used in order to do}}
- {17} the long .A., or the .O. when it is
- {18} a mute consonant, and without a vowel,
- {19} we will put two dots above it, like  (pēr).
- {20} When below the ூ there is a dot,
- {21} it means that such ூ must be pronounced
- {22} as .j. And when it is found under ூ
- {23} it means that such ூ stands for .H.
- {24} As we said, we would put a
- {25} dot on the mute consonants. {{However, since}} it is very  
common,
- {26} when the letter doubles, for the first one to be mute, so we will avoid
- {27} dots in these letters. {{Furthermore, since}}
- {28} two ஸஸ can also be found, or two joined தத,
- {29} or any other consonant, that must be pronounced
- {30} individually each one by itself, and both have a vowel,
- {31} then we will put a comma between the {{two}} letters.

### *First Title*

#### [f. M-15-9]

- {1} These vowels only serve at the beginning of
- {2} the word, because in the middle {{of the word}} other characters or  
signs are used
- {3}: e.g. to say short = ca = they put
- {4} the letter = ூ = which contains in itself the short a
- {5} {{to say}} long =ca= they use = ூஈ = {{to say}} =ke= they put  
another
- {6} sign = ெ = which they call *kombu* like this = ெூ = and
- {7} {{it is obtained}} the short and the long ke, {{to say}} the short ki  
= ெ = and for
- {8} the long they use = ெஈ = for the short and long ko {{they use}} ெஈ

#### [f. M-15-10]

- {1} {{to say}} the short ku they put ூ, {{to say}} the long ku they use
- {2} ூ and {{to say}} short cay they use = ெூ = and so
- {3} in most letters, as seen below and {{to say}}
- {4} cau= they use ெூஈ.

- {5} க it is our *ca* or *ka* at the beginning of the word
- {6} since in the middle is *ga*.
- {7} ங at the root of the tongue to say = *nga*.
- {8} ச it serves as our *.ch. .x. .j*.
- {9} ஞ it is our *.nha*.
- {10} ட with the tip of the tongue on the ‘palate’ (lit. *the sky of the mouth*)
- {11} to say *taa*
- {12} ண with the tip of the tongue on the ‘palate’ (lit. *the sky of the mouth*)
- {13} to say *na*
- {14} த with the tip of the tongue at the root of the
- {15} teeth say *.ta*. in the middle of the word
- {16} it is doubled, it is said, and when it is single it is said *da*
- {17} ந is our *.n*. only at the beginning of the
- {18} word or in front of த
- {19} ட is our *.P*. in the middle of the word
- {20} is mild *.b*.
- {21} ம it is our *.m*.
- {22} ய it is our *.ya*.
- {23} ர it is our *.r* . simple
- {24} ல it is our *.l*.
- {25} வ it is our *.v*.
- {26} டு turning the tongue without touching the palate
- {27} say *la*.
- {28} ண with the tip of the tongue touching the palate
- {29} say *La*

**[f. M-15-11]**

- {1} டு it is our double *r*, like *rr*
- {2} ண it is our *n* in the middle of the word
- {3} கஷ touching with the tip of the tongue
- {4} the palate they say *cxā*
- {5} ஷ the tongue being turned without touching
- {6} the palate, moving the chin
- {7} from below, say *csa*.
- {8}  it is composed of two letters ஷடட
- {9}  it is *.spa* .  it is *sna*. it is  *stra*  it is

- {10} *sma*  it is *seu*  it is *st*
- {11} *ll* the letter *l* doubled, and pronounced
- {12} *la* in the place, where *றl*
- {13} *றற* it is the letter *ற* doubled and pronounced
- {14} *ta* in the place where *ற*
- {15} and some strict Tamil {{people}} do not
- {16} want the *Grandonic* letters such as = கூ = and in their place
- {17} they use *டச* as சாகுழி
- {18} they write சாடசி
- {19} Follow the consonants with vowels
- {20} *ka. kâ. ki. kî. ku. kû. ke. kē. ko. kō.*
- {21} க. கா. கி. கீ. கு. கூ. கெ. கெ. கொ.
- {22} *kai. kau.* [##quena]
- {23} கை. கௌ. க்
- {24} ங. ஙா. ஙி. ஙு. ஙூ. னெ. னெ. னொ.
- {25} னை. னௌ. ங்<sup>ing</sup>
- {26} ச. சா. சி. சு. சூ. செ. செ. சொ.
- {27} சை. செள. ச்<sup>cḥy</sup>
- {28} ஞ. ஞா. ஞி. ஞு. ஞூ. ஞெ. ஞெ. ஞொ.
- {29} ஞை. ஞௌ. ஞ்<sup>ng</sup>

From folio M-15-12 to folio M-15-13 there are all the other Tamil letters which are not reproduced here.

**PART 4**  
**CONCLUSION**

## 4.1 Premise

This final section intends to discuss two main issues which always arise around the reproduction and translation of texts describing and classifying non-European languages in the period of time prior to the birth of Linguistics as a scientific discipline. These descriptive linguistic texts, composed by individuals who were *linguists avant la lettre*, may be considered as contributing to the history of grammatical description, therefore to the history of the Science of Language; to the history of the language that they described as well as to the history of the metalanguage used for composing these descriptions. A missionary grammar may thus be considered as a piece of evidence for different histories, each of which deserves its own attention, study, and research. Indeed, it would be overly ambitious to cover all these aspects in the final chapter of a book devoted to the reproduction of one missionary descriptive text of Tamil and I will not attempt to do so. I have already discussed the features of the metalanguage used in the copies of Costa's *Arte* in the *Introduction* and in the footnotes of the English translation (*Part 3*). Here I intend to touch upon the methodological background within which this Tamil grammar was composed so that its contents, which are of much greater interest to me, can be better understood. Indeed, to *understand what* the grammatical model of reference behind the composition of this specific grammar was, it is essential to understand the categorization and therefore the conceptualization Costa used while dealing with the structure of a newly discovered language such as Tamil. The object he was observing was new to him and the methodological framework on which he relied allowed him to define *descriptive categories a priori* to fit this newly discovered language into. Hence, first of all it is necessary to identify what the general framework was from which these *a priori descriptive categories* were taken. Secondly, it is helpful to observe how these *a priori descriptive categories* were adapted and eventually extended according to the necessity to describe the peculiarities of the newly discovered language because this might contribute to our understanding of how these descriptions laid the foundations for the birth of *linguistics*. Thirdly, it is essential to make some assumptions and hypotheses about the linguistic

data available through the analysis of these texts. Indeed, this data should be considered the most representative specimen of the language used by the speakers of that time or what was more commonly considered as part of the language at that time. In our case, the Tamil language as it was used or spoken during the 17<sup>th</sup> century. In fact, if these texts can be considered as the result of ambitious fieldwork carried out by missionaries, it is also known – as seen in the *Introduction* – how native speakers contributed to their composition, frequently helping the missionaries who wrote these kinds of texts. Consequently, the Tamil linguistic forms selected to be representative of *a priori descriptive category*, even though they belonged to different registers that nowadays we would address as formal, standard, informal, and colloquial (cf. § 4.4.1), should also be considered as representative of the most commonly used linguistic forms directly collected by the missionaries or suggested by the native speakers during the 17<sup>th</sup> century. Whatever the situation, they are linguistic forms representing the picture of the language at that time as it was perceived and used, as also demonstrated in the translation of Christian texts. And this is the core of this conclusion: what was the Tamil language that Costa described? To answer this question, I have divided these conclusive remarks into two sections.

The first section stresses the aspect of *grammaticisation* (cf. Auroux 1992a, 1994). In continuation with Muru (2020b and 2021), where this perspective already applied to some categories such as noun, adjective, and verb mood and modality, I will focus here on the treatment of verbs in general and on the remaining parts of speech. In particular, I will also provide a more extensive socio-historical contextualization for identifying the model of reference that Costa presumably followed, an aspect that I only touched on in Muru (2020b) without entering into detail. I will then discuss the way in which this model was adapted and extended in Costa's grammar with reference to the abovementioned parts.

The second and final section, of which the final appendices are part, aims to offer a description of the Tamil language as it was recorded at Costa's time, focusing on the linguistic features of the Tamil forms that Costa was

able to identify and codify in his *Arte*.

## 4.2 The early *grammaticisation* of the Tamil language

In 2004 Koerner wrote: “Only in the last decade or so has the work of missionary linguistics received the attention of historians of linguistics it deserves. After all, it is to no small extent that, owing to their labours, we may have a fair idea of the history and genetic affiliation of many previously unwritten languages of the Americas (as well as other parts of the world)” (Koerner 2004: 103). When missionaries reached different parts of the world, motivated by communicative and religious needs, they started to record and describe new languages, engaging themselves in their *grammaticisation*.<sup>1</sup>

As already underlined in Muru (2011, 2018 and 2020b), the grammatical model largely used among missionaries was the Greek-Latin one, or the vernacular which had been elaborated from the Greek-Latin grammar and applied, thus modified, when used to describe other (non-European) languages. Auroux (1992a, II: 19) refers to it as *grammaire étendue*, from which *Grammaire Latine Étendue* (hereafter GLE), underlining how two opposite forces operate simultaneously in this process of adaptation. It is a motion toward the stabilization of a theoretical core around a specific language (which is the core of the GLE), and a *centrifugal motion* which is determined by the necessity of *grammaticising* a language according to a more appropriate theoretical model – in other words, a model able to give account of the linguistic specificity of that language (Auroux 1994: 134-135). Even though the earliest missionaries’ works were far from being theoretical because missionaries composed their grammars for pedagogical and pragmatical needs and based their descriptive works on the empirical study of the language (cf. Muru 2020c [2021]), missionaries had to select appropriate grammatical categories for the description of the

---

<sup>1</sup> “Par grammatisation, on doit entendre le processus qui conduit à décrire et à outiller une langue sur la base des deux technologies, qui sont encore aujourd’hui les piliers de notre savoir métalinguistique: la grammaire et le dictionnaire” (Auroux 1992a, II: 28) [One must consider grammaticisation as the process which leads us to describe and to equip a language on the basis of two different technologies. These technologies still represent today the pillars of our metalinguistic knowledge, i.e. the grammar and the dictionary, translation mine].

newly discovered language. This fact largely contributed to later theoretical issues in which the language descriptors found themselves involved in the discussion of linguistic peculiarities of these languages, such as Tamil. Furthermore, even though the “révolution technologique de la grammatisation” (Auroux 1994) realised through the GLE led to a certain uniformity in the descriptions of these newly discovered languages, the linguistic diversity missionaries faced in trying to learn and describe these newly discovered languages, along with the two above-mentioned motions acting simultaneously, led them to reflect on the linguistic peculiarities of the new languages. They questioned how best to describe them since the lens through which they observed the new languages was not always sufficiently equipped, and the traditional metalanguage did not cover the unknown linguistic features of the new languages. Hence, missionaries used their mastery and skills in order to ‘adapt, modify and thus extend’ the Greek-Latin grammar, elaborating new technical terms and conceptualisations.

### **4.3 The Portuguese Jesuit grammatical tradition: Álvares’ grammar**

Firstly, it is appropriate to take a step backward with regards to the Latin model of reference behind the description of the Tamil language by Costa, since it is representative of the whole grammatical theory through which he observed and understood the Tamil language. For this reason, I will start by discussing the contextualisation of the grammatical framework within which Costa’s *Arte* was composed. The aim is to detail the discussion started in Muru (2020b) who clearly states that among the possibilities, the model of reference for Costa should be identified with the abridged version of *De Institutione grammatica libri tres* (1572) by Manuel Álvares (1526-1583). This assumption derives from the fact that there is general agreement among scholars of missionary linguistics in considering Álvares as the model of reference (cf. Zwartjes 2002; Assunção and Toyoshima 2012; Fernandes 2015a and 2021), at least among Portuguese missionaries, despite the lack of any concrete reference in any missionary grammar, but also from the socio-historical context within which Costa’s *Arte* was composed. The general framework

according to which I have been observing it includes Koerner's principles of *contextualisation*, *immanence*, and *adequacy* (2014: 58-59) on one hand, and the notion of GLE – already illustrated above – on the other.

#### 4.3.1 Following Koerner's principle of contextualisation

Koerner (2014: 58-59) defines the 'principle of contextualisation' as the principle which deals with the general 'opinions' about conceptual theories of the specific historical moment in which the text under analysis was composed. Indeed, as Koerner states, linguistic ideas never developed independently from other intellectual currents. Hence, in dealing with Costa's grammar, it is necessary to understand the intellectual environment in which it was produced. In the *Introduction* I have already contextualized Costa's time in India and the role he played in the Jesuit mission. As regards the intellectual environment in which Costa elaborated his description, one may refer to the training that Jesuits used to receive in the colleges, therefore the theoretical texts on which they were instructed. Costa, like many others, belonged to the period during which *Constitutiones* (1546 and 1552), *Ordo studiorum* (1565), and *Ratio Studiorum* (1586, 1591, 1599) codified the Jesuit education (Zwartjes 2002: 29). In particular, as discussed in paragraph one of the *Introduction*, before sailing for India, Costa had studied in Coimbra where the Madeiran Jesuit Manuel Álvares (1526-1583) had previously been the Rector of the College and taught the Latin Grammar until his death on the 30<sup>th</sup> December, 1583 (Springhetti 1961-62: 286).

Manuel Álvares was also the author of the grammar used for teaching Latin in the Jesuit Colleges, a grammar written at a time when Latin studies, starting from the beginning of the 15<sup>th</sup> century in Italy under the movement addressed as Humanism (or the Renaissance), had attracted new attention.<sup>2</sup> According to Kemmler (2015: 1), in Portugal<sup>3</sup> the first

---

<sup>2</sup> Among the main exponents of this re-discovery of Latin between the 15<sup>th</sup> and 16<sup>th</sup> centuries were Lorenzo Valla (1405/07-1457) (*Elegantiae linguae latinae libri sex* - c. 1444) in Italy, Elio Antonio de Nebrija (1441-1522) (*Introductiones latinae* - 1481) in Spain; Thomas Linacre (1465-1524) (*De emendata structura Latini Sermonis* – 1524) in England (Padley 1976), the Flemish Johannes Despauterius (ca. 1460-1520) with *Commentarii Grammatici*, and the *Libellus de*

metalinguistic work to be published was the Latin ensemble entitled *Grammatica Pastrane* (Lisbon, 1497),<sup>4</sup> an edition of the late 14<sup>th</sup> / early 15<sup>th</sup> century Spaniard Juan de Pastrana's grammar,<sup>5</sup> organised by Pedro Rombo (?–1533), with his own annexes and those of his former teacher, Antonio Martins (d. before 1497), while the first humanist who gained the title of 'debelador de la barbarie' was Estêvão Cavaleiro with his *Nova grammaticæ Marie Matris Dei Virginis ars* (1516).

However, according to Ponce de León (2001: 318) the *ars* imbued with the *studia humanitas* in the Lusitanian territories reached its peak with the *De Institutione grammatica libri tres* (1572) by the Madeiran Jesuit Manuel Álvares (1526-1583) which represented a milestone grammar in Europe and beyond. The Portuguese metalinguistic tradition,<sup>6</sup> however, started with the 1536 and 1540 works by the Portuguese Renaissance scholars Fernando de Oliveira (ca. 1507– ca. 1581) and João de Barros (1496–1570).<sup>7</sup> But until 1572, the majority of the printed grammars in Portugal, also used as models of reference for the description of vernaculars, were Latin:

“17-20 compendia of Latin grammars: three editions by Pastrana, the last in 1522; the same number by Nebrija, in 1552, 1555 and 1565; two by Estêvão Cavaleiro, in 1505 and 1516; two by Clenardo from Braga in 1538, with 207 pages, and one from Coimbra in 1546 under João Vaseu's supervision; two by Jerónimo

---

*constructione octo partium orationis* (1513, 1515) by William Lily (1468?-1523?). Another milestone in the Renaissance grammars was also the *Minerva Seu de Causis Linguae Latinae* (1587) written by Francisco Sanctius Brocensis (1523-1601) and widely studied in several countries, but not in Spain and Portugal (Zwartjes 2002: 30).

<sup>3</sup> Fernandes (2015a: 34) states that, previous to Humanism, “Portuguese medieval students and scholars had used the works of Aelius Donatus (mid 4<sup>th</sup> cent. AD), Priscianus Caesariensis (late 5<sup>th</sup> – early 6<sup>th</sup> century AD), and Isidore of Seville (ca. 560-636), but they also accessed some works of the more recent grammarians, such as Alexandre de Villedieu (ca. 1170- ca.1250), Évrard de Béthune (d. ca. 1212), Ugucione da Pisa (1130/40-1210) and Papis Vocabulista (ca. 1005)”. For a general view on the (Latin-)Portuguese grammatical tradition see Buescu Carvalhão (1978), Cardoso (1994), Verdelho (1995), and Kemmler (2013). This list is not exhaustive.

<sup>4</sup> Earlier texts were also available in Portugal for teaching Latin. For further details, see Fernandes (2010, I: 223-236).

<sup>5</sup> For further details on *Grammatica Pastrane* in Portugal see Fernandes (2015b: 37).

<sup>6</sup> On the contribution of Portuguese philologists to the consolidation of the science of language see Kossarik (2015).

<sup>7</sup> On the first Latin grammar written in Portuguese see Fernandes (2002).

Cardoso in 1557 and 1562; one by D. Máximo de Sousa, leading Capitular of Santa Cruz in Coimbra, in 1535; two by Despautério, in 1555 and 1561, the latter printed in Braga; one of the *Rudimenta Grammaticae* by an unknown author in 1553; and another by André de Resende which Barbosa Machado and Justino Mendes de Almeida have dated to 1540. But up to 1599 the total increases to 26-29, including three editions by Álvares and a Comment by António Velez” (Assunção and Toyoshima 2012: 159).

This is confirmed by Padley (1985, I: 233) who states that

“Those vernacular authors who do follow a developed linguistic theory, find their models in certain great Latin works of the period: in Linacre’s *De emendata structura* (1524), J. C. Scagliar’s *De causis linguae Latinae* (1540), Sanctius’ *Minerva* (1587) and Campanella’s *Grammatica* (1638). Taking one or more of these authors as their basis, they evolve systems of universal grammar applicable to the various vernaculars.”

In the same way, missionaries used Latin/vernacular grammars to study the non-European languages around the world. If a likely source for Álvares was the English grammarian Thomas Linacre who was the first to introduce the *potential mood* (Padley 1976: 48), among Spanish missionaries Nebrija’s grammar was the work of reference, while it is reasonable to assume that the Portuguese missionaries used Álvares’ grammar (Zwartjes 2002: 19; Koerner 2004: 111).

As mentioned before, the *Ratio Studiorum* had established the principles according to which the Jesuits should be instructed and Álvares’ grammar had been officially recognised as the main manual for the all the Jesuit schools in 1599,<sup>8</sup> since a single manual was required for the preparation of the young Jesuits. Therefore, *De Istitutione* replaced the Latin grammar of the Flemish author Johannes Despauterius (Jan de Spauter) in all the institutions of the Society of Jesus (Rosa 1997: 113), with the exception

---

<sup>8</sup> According to Ponce de León (2009: 53) Álvares’ grammar was not only used in the Portuguese Jesuit schools but also in the majority of schooling centres distributed over the four continents where the Ignacian schools had been established.

of the 16<sup>th</sup> and 17<sup>th</sup> century New France,<sup>9</sup> where Despauterius (1528) remained the school grammar (Zwartjes 2002: 29). Álvares' 1572 grammar was commissioned for the precise purpose of being used as the single text for all the Society's colleges (Kemmler 2015: 7) which, according to Springhetti (1961-62: 283) amounted to 293 from the foundation of the first Jesuit College in Messina (Sicily) in 1548 to the end of the 16<sup>th</sup> century. Consequently, while the most frequently adopted grammars in 16<sup>th</sup> century Europe were the ones by Nebrija in Spain, Despauterius in New France, Melchthon in Protestant Germany, and Lily in Britain, Álvares was the first and only grammar to be accepted as a text for the education of all Jesuits<sup>10</sup> in Europe and around the world.<sup>11</sup>

Having attained such importance, Álvares' grammar, which was divided into three books (*De Etymologia*, *De syntaxi*, and *De Prosodia*) and was printed for the first time in September 1572 by J. Barreira,<sup>12</sup> was reprinted and adapted more than 530 times in 22 countries and regions,<sup>13</sup> including Mexico, China, Japan and Europe.<sup>14</sup> Its importance in the history of

---

<sup>9</sup> Álvares' grammar did not reach the same fame and diffusion everywhere due to the fact that it was largely criticised for being written in Latin, rather than in Portuguese and for promoting monolingual teaching. It was banned by the 'Alvarà Real' (available at: <http://www.unicamp.br/iel/memoria/crono/acervo/tx12.html>) issued by Marquis of Pombal in 1579 (Schäfer-Prieß 2010: 122).

<sup>10</sup> According to Gómez Gómez (2002: XX), Springhetti (1961-62: 285) gives an account of three grammars composed by Father Andrea Frusio, Father Coudret, and Father Ledesma respectively, all members of the Jesuit order. None of these was totally approved.

<sup>11</sup> For further details refer to Springhetti (1961-62: 287), Gómez Gómez (2002: V), Kemmler (2012).

<sup>12</sup> For further details refer to Gómez Gómez (2002: XX; 2021), Kemmler (2014), Kemmler (2016: 57).

<sup>13</sup> Fernandes (2007: 86) refers 600 copies, while Kemmler (2015: 2, fn. 2) points out valuable sources "For bibliographical repertoires on Álvares' grammars, cf. the *Bibliothèque de la Compagnie de Jésus: Première Partie: Bibliographie* (Backer and Backer 1861; Backer et al. 1960 [1891] I, cols. 223–247; 1898 VIII, cols. 1615–1620) and volume III of the *Bibliografia Geral Portuguesa* (ACL 1941-1983: 207–376). While these two printed bibliographies are very much incomplete (omitting reference to hundreds of editions), the online bibliography LUSODAT (s.d. [see <http://www.ghtc.usp.br/server/Lusodat/pri/02/pri02145.htm>]) offers a more accurate, albeit still incomplete and occasionally defective insight into the work's worldwide editorial dimension. None of these repertoires attempts to undertake the necessary differentiation between the different text traditions of Álvares' work".

<sup>14</sup> Sommervogel (1890) quoted in Springhetti (1961-62: 287) and Pereira da Costa (1972: xv); see also Zwartjes (2002: 29).

linguistic pedagogy is undoubtedly enormous.<sup>15</sup>

According to Kemmler (2015: 3), in addition to the version dated 1572, Álvares also composed an abridged version (1573) of *De Istitutione* from which all the *scholios* found in the 1572 edition had been omitted. Kemmler (2015: 7) proposed “the Latin distinction between *ars minor* ~ *ars maior*, similarly to the use that had already been consecrated for centuries in the Latin tradition concerning Aelius Donatus’ classical treatises on Latin grammar (mid 4<sup>th</sup> century A.D.) for differentiating the two versions.” Consequently, the 1572 grammar should be considered as the *editio principes* of *ars maior*, mainly written for the teachers in the Jesuit Colleges, while the abridged version (1573) should be considered as an *editio principes* of the *ars minor* for students.<sup>16</sup> It seems that this was an easier and more accessible text of 148 folios, both in economic and pedagogical terms. As Kemmler (2015: 5) states “Álvares justifies this edition by stressing the utility of an abridged version for schoolboys and the poor who might be unable to acquire or use a copy of the complete grammar”. This perspective coincides in part with what can be read in Álvares’ paratext “Auctor Lectori”. Springhetti (1961-62: 291-292) also refers to two versions of Álvares’ grammar:<sup>17</sup>

“L’Alvares, che aveva inteso fare una grammatica completa da mettersi in mano ai professori, ai quali soprattutto erano destinate tutte le aggiunte di scogli, commentari e appendici, sentiva già da sé che la sua grammatica, così com’era, poco si adattava alle menti e anche alla borsa dei fanciulli, e, mosso anche dalle osservazioni che in tal senso gli venivano fatte, tra la fine del 1572 e il Febbraio del 1573 attende a preparare e stampare un “arte pequena sin

---

<sup>15</sup> “Dozens of generations would have been instructed in the Latin language by the art of Álvares, given that the Jesuits were in charge of teaching at the end of the Renaissance and throughout the Baroque period. Thus, the importance of this work in the history of linguistic pedagogy is, without a doubt, enormous” [translation is mine, “Decenas de generaciones se formarían en lengua latina por el arte de Álvares habida cuenta de que eran los jesuitas quienes copaban las enseñanzas medias a finales del Renacimiento y durante todo el Barroco. Así pues, la importancia de esta obra en la historia de la pedagogía lingüística es, sin duda alguna, enorme”] (Gómez Gómez 2002: V).

<sup>16</sup> The only existing copy, with handwritten annotations, belongs to the Biblioteca Geral of the University of Coimbra (call number V.T.–18–7–3) and was discovered by Kemmler in December 2011 (Kemmler 2015: 3, fn. 3).

<sup>17</sup> For a detailed discussion about Álvares’ editions see Kemmler (2015).

comentos” che di fatti uscì nel 1573 in Sivilia, con correzioni della precedente, ma senza scogli e commentari, di prezzo accessibile anche ai poveri, che sono i più.”<sup>18</sup>

Furthermore, according to Verdelho (1995: 190), before writing his *De Institutione*, Álvares had also composed a small grammatical compendium of more than 20 pages entitled *De octo partium orationis constructione*, the first edition of which dates back to 1557.

The *ars minor*, which “lacks most of the grammatical, critical or explanatory comments that are so typical of the *editio princeps* of the *ars maior* and its reprints” (Kemmler 2015: 9), played a major role in the circulation of Álvares’ grammar in Portugal (Iken 2002: 60-63). “It was with this grammar that the Jesuits pursued the teaching of the Latin language in Portugal for more than two hundred years, until they were expelled from Portugal in 1759 by the Marquis of Pombal”.<sup>19</sup> The same grammar was also used in the Southern German Jesuits’ seminars (44 editions) (Iken 2002: 54). According to Kemmler (2015: 9):

“among the important paratexts that are part of the 1573 edition, such as the republications of texts previously printed in the 1572 *ars maior*, one finds the privilege dated 14 September 1567 (Álvares 1573a: [iii–iv]), as well as the author’s foreword (Álvares 1573a: [v–vi]). Otherwise, the two texts, *ars maior* and *ars minor*, do not present any significant disparities. There is, howbeit, another essential text that does not appear in Álvares (1572) or in any other edition of the *ars maior*, namely the short prefatory statement “Auctor Lectori” in which the author addresses the reader. At least

---

<sup>18</sup> “Álvares, who had intended to elaborate a complete grammar in order to put it into the hands of the teachers, for whom all the additions of *scholia*, commentaries and appendices were mainly intended, felt already by himself that his grammar, as it was, did little to fit to the minds of the children, and, also moved by the comments that were made to him to that effect, between the end of 1572 and February of 1573, he dedicated himself to preparing and printing a ‘small grammar without comments’, that indeed came out in Seville in 1573, with corrections of the former, but without *scholia* and commentaries, and with a price that was affordable to the poor, who are the majority” (Kemmler’s translation, 2015: 3-4, fn. 4).

<sup>19</sup> “Foi com esta gramática que os jesuítas promoveram o ensino do latim no ensino menor em Portugal durante mais de duzentos anos, até serem expulsos de Portugal pelo Marquês de Pombal em 1759” [translation in English is mine].

in the Portuguese tradition of Álvares' grammar, this text is part of all the *ars minor*'s editions from 1573 to 1755 as it was also observed in other editions, such as the first Aragonese/Spanish edition, published in Zaragoza (Álvares 1579; Kemmler 2012), in the later Italian (Álvares 1588) and French editions (Álvares 1594b) or the Japanese Amakusa edition (Álvares 1594a) — a facsimile recently published by Assunção and Toyoshima (2012).”

As previously discussed, Álvares' manual can be considered the most representative theoretical framework through which the majority of missionaries, above all Portuguese missionaries, learnt the Latin language of which they already had a good command. Indeed, as Zwartjes (2002: 28) states, apart from the possibility of having knowledge of Spanish works, they knew the works by Donatus, Priscian, Quintilian, and other possible works used were Valla, Nebrija, Despauterius, Erasmus, and Álvares. Consequently, even though both Spanish and Portuguese missionaries rarely mentioned their sources or models of reference when composing their grammars, on the basis of the Portuguese cultural background, the possible grammars which could have been used as models of reference are Nebrija's, Barros', and Álvares'. However, considering that Costa was a Portuguese Jesuit and that Álvares' text was adopted in Jesuit colleges, this seems to be the best candidate as a model of reference.<sup>20</sup>

#### *4.3.2 Following Koerner's principle of immanence*

The second principle to be taken into consideration is what Koerner defines the 'principle of immanence', which means the observation of the general theory and the terminology used in the text which must be defined internally and without reference to the modern linguistic doctrine. As Nowak (1999: 8) reminds us “these descriptions are also to be seen as documents of the linguistic ‘state of the art’ of their time, and as such they are important for the historiography of the science of language”. In this

---

<sup>20</sup> As it has been demonstrated, this is also true for the description of other non-European languages in the New World (see Zwartjes 2002), in Africa and Brasil (Fernandes 2015a, 2021) and Japan (Assunção and Toyoshima 2012).

regard, in the last column of *Appendix 1*, I have collected all the technical terms that Costa used along with the corresponding Tamil forms (first column of *Appendix 1*) and discussed them in the footnotes of the English translation of the Tamil *Arte* and in the following paragraphs. What emerges so far, above all when compared to later grammars of the Tamil language produced by other missionaries, is how missionaries reflected on the language described bearing in mind not only the Latin grammatical framework but rather reflecting on the language structure and its function. The category of the *infinitive* is one of the best examples to mention here (see also Chevillard 2021). Costa provides two kinds, the first being *absolute* and the second *substantive*. Both these forms would later be reanalyzed by Beschi (1738 [1728]) as *infinitive* and *appellative noun* (see Chevillard 1992a and Chevillard 2021 on *appellative noun*).

#### 4.3.3 Following Koerner's principle of adequacy

The last principle to be taken into consideration is the 'principle of adequacy': once a specific linguistic manifestation has been understood in its historical context, a modern approximation of the technical vocabulary and the conceptual frame in the text can be elaborated. Therefore, I looked at how the Alvaristic model found implementation and application in the description of Tamil in Costa's *Arte*. Indeed, when looking for Álvares' influence on missionary grammars, one has to bear in mind that it is not really possible to speak of a 'pure' Alvaristic model. First of all, because Álvares' work was the result of various influences to which the author refers in the preface of his *De Institutione*, namely Varro, Quintilian, Probus, Diomedes, Donatus, and Priscian (Padley 1976: 28) and to which Linacre's *De emendata structura sermonis libri sex* (1524) should also be added, since according to Padley (1976: 48) and Ponce de León (2009), it was the probable source for Álvares' grammar.

Secondly, it should be taken into consideration that possible models of reference for these missionary grammars may also have been other Tamil *arte* produced by other missionaries. This seems to be the case for Costa

since he refers to Aguilar's work (see footnote 1062, 1090, 1126 in *Part 2*; 283, 285, 289 in *Part 3*).

What Kossarik (1990) states for the vernacular grammar of the Portuguese language can also be applied to the observation and analysis of others written in order to describe what would later be defined as 'exotic' languages. As is the case for the many of vernacular grammars composed between 1500 and 1700, both Álvares' and Costa's grammars were pedagogical texts. Despite Álvares' *De Institutione* touching upon etymology/morphology syntax and prosody and giving many linguistic explanations, it was a descriptive grammar meant to facilitate the acquisition of the Latin language by giving the student indications on how to read, write and understand Latin correctly (Fernandes 2007: 91). For Costa, whose aim was to teach Tamil, the main concern was morphology. Like Álvares, he relied very much upon a deductive method, and he proceeded by introducing the 'rule' (even though this is not systematic) followed by examples showing how to apply the rule. Regarding the organisation and thus the successions according to which the *Partes Orationis* are presented in Costa, we can observe a similarity with Álvares who was inspired by Linacre (1524) (Colombat 2016: 5).<sup>21</sup> Likewise, Costa also has final appendices for noun declensions, gender of noun, and rules about preterits, future, imperative, infinitives, and plurals. In continuation with Muru (2020b) and Muru (2021a), the focus moves to the treatment of the parts of speech in order to highlight how the 'Alvaristic' framework was applied, modified, and extended in Costa's description of Tamil.

---

<sup>21</sup> The Latin grammar of reference could be neither Donatus nor Priscian, since the former has "nomen, pronomem, verbum, adverbium, participium, coniunctio, praepositio, interiectio" (Ramajo Caño 1987: 50) and the latter noun, verb, participle, pronoun, preposition, adverb, interjection and conjunction (Colombat 2016: 5).

#### 4.3.4 Grammaire Latine Étendue: Partes Orationis<sup>22</sup>

Costa does not list the parts of speech as clearly as Álvares does in his chapter *Rudimenta* (Álvares 1572: f. 47v; 1573: f. 38v).<sup>23</sup>

- (1) There are eight parts of speech: nouns, pronouns, verbs, participles, prepositions, adverbs, interjections and conjunctions. Four of these, nouns, pronouns, verbs, participles are declined. The others, prepositions, adverbs, interjections and conjunctions lack declension.<sup>24</sup>

[Partes orationis sunt octo, Nomen, Pronomen, Verbum, Participium, Præpositio, Aduerbum, Interiectio, Coniunctio. Harum quatuor, Nomen, Pronomen, Verbum, Participium declinantur: reliquæ Præpositio, Aduerbum, Interiectio, Coniunctio declinationes sunt expertes (Álvares 1572: 47v)].<sup>25</sup>

However, he lists them in the paratext *Auctor Lectori*:

- (a) To this end I shall divide this Recapitulation into six chapters. In the First, I will state all that pertains to nouns and pronouns. In the Second, I will conjugate a verb providing all the modes of speaking there are in this language, and because most of these are made by supplementation, I will note in the margin the places in {{which}} they are formed so that they can be easily used in all verbs. In the third, I will state how to form the passive voice. In the fourth, I will deal with the composition of verbs. In the fifth, the substantive verb and some irregular verbs will be conjugated. The Sixth will deal with the other parts of speech.  
(translation mine)

[P(er)a isto dividerei esta [Recopilaçaõ] em 6 cap(itulos). No 1º direi o que pertence aos nomes e [{pro}nomes]. No 2º conjugarei hu(m) verbo

---

<sup>22</sup> The Tamil grammatical tradition found its origins in the *Tolkāppiyam*. The treatise is organized into three sections: letters (*Eluttu*), words (*Col*) and poetic matters (*Poru!*). As Chevillard (1992b: 37) discusses in the section devoted to *col*, four parts of speech are identified: *peryar col* «noms, *viṅai col* «verbes», *iṭai col* «particules» and *uric col* «mots propres».

<sup>23</sup> *Nebrija* (1492) also differentiates between *partes de la oracion declinables*, meaning Noun (and its species), Pronoun, Verb and Participle and *partes de la oracion indeclinables*.

<sup>24</sup> Translation into English of Álvares' grammar are mine, whenever not specified, while the translation of DC's grammar is also mine in collaboration with Jorge Longa.

<sup>25</sup> For an analysis of parts of speech in Álvares see Cardoso (1995: 159-172).

pondo nelle todos os modos de [falar] q(ue) nesta lingua hâ; e porq(ue) os mais delles se faze(m) por suplemento porei a [marge(m)] os lugares {donde} se formão e p(er)a q(ue) facil(m)ent)e se possa uzar delles em todos os verbos. No 3º direi o que serve p(ar)a formar a [vos] passiva. No 4º [{tratarei}] da composiçaõ dos verbos. No quinto se conju{ga}rá o verbo substantivo e algúns irregulares. No 6º se tratará das mais partes da oraçaõ]. (GL1, f. M-34-15, lines 26-29 and f. M-34-16, lines 1-4 )

Compared to Álvares, the two main parts of speech are the Verb and the Noun. The others are grouped within the sixth chapter.

As Auroux (1992b, I: 583) points out, the grouping of words into parts of speech within the Greek-Latin grammatical theory led to the understanding that the human language is organised into categories («nature catégorielle du langage humain»). The grouping of words into these categories, or rather into parts of speech, can occur according to different criteria based on morphology, semantics, pragmatics, etymology, functionality, etc. In the application of the Greek-Latin grammar to the description of Tamil, and thus in the attempts made by Costa to identify the words corresponding to the different parts of speech, criteria based on morphology, syntax, and semantics apply in different measures. Even though they lack methodological consistency in giving definitions or explanations for each part of speech (as with Álvares), the observation of the given Tamil forms and a few definitions found in Costa's grammar allow us to understand how he used, adapted and extended Álvares' grammar. As Zwartjes (2002: 40) states “when the Romans wrote their grammars, Greek grammars served as their model” and for example, “Latin grammars usually included [...] the mode ‘optativus’, although this is only morphologically marked in Greek and not in Latin”. In the same way, while describing the Tamil verb, missionaries added categories not relevant to the Tamil language, only because that is how they were in the language taken as a model of reference, either Latin or Portuguese, otherwise they needed to extend the existing categories of their model of reference in order to give account of complex constructions like complementation and nominalisation. For example, looking at the description of the verb in Costa's grammar, his

introductory paragraph to this part of speech already suggests that some kind of extensions of the grammatical model of reference had occurred. Indeed, Costa immediately points out the complexity of the Tamil verbal system:

- (b) As all doctrine in this matter consists in shedding light so that the conjugation of verbs in this language is made easier, in this chapter we we state only that which is common to all. It [corresponds] to what, without embarrassment, can help Beginners, leaving the diversity of conjugations and Rules that in this matter can be applied to preterits [which one will discover through use, since they serve for nothing more than to bore and bother]. Hence, leaving [all the modes] to the use [of them], I will only conjugate a single verb, placing under this all the modes which exist in this language, and which are common to the other verbs. And from the one we can conjugate the others.  
(translation mine)

[Como toda a doutrina nesta materia concista em dar lus p(er)a se conjugarem os verbos desta lingoa com facilid(ad)e dirse hã sô neste capitulo o q(ue) há comu(n) a todos q(ue) he o q(ue) sem embaraço pode ajudar aos principiantes, deixando a diversidade das co(n)jungações e regras q(ue) nesta materia se podem dar p(er)a os preteritos q(ue) como finalmente se não vem a cair nelles, se não pello uso (uzo), não sirvem se não de embaraçar e enfadar, e assim deixando tudo isto ao uzo só conjugarei hum verbo, pondo nelle todos os modos q(ue) nessa lingoa hã, os quais são comu(n)s aos demais verbos, e desse q(ue) conjugamos se podem conjugar todos os mais]. (GL1, f. M-34-b, not numbered, misplaced – R lines 13-31)

Therefore, Costa maintains Álvares' structure according to which, as the Latin tradition believed ((2) in *ars maior* 1572: f. 15v) there are five tenses and five moods ((3), in *Rudimenta* of *ars minor* 1573: f. 44r) also including “next to the indicative, imperative and subjunctive – [...] an

optative, a potential,<sup>26</sup> a permissive,<sup>27</sup> and an infinitive (*modus infinitivus*)” (Schäfer-Prieß 2010: 130):

- (2) Varrone, in the III book of *De analogia*, defines the moods *species*. «The fifth *species* – he says – is the *species optandi*, such as, for example *dicerem, facerem, dicam, faciam*. The sixth *species* (of the verb) is *species imperandi*, such as, *cape, rape, capito, rapito*».

Diomede, in the I book, explains that some grammarians established six [moods], others eight, many others nine [moods], and others even ten (moods). I will not include his classification here so as not to go on and on. If you have time, read Diomede.

Here, we establish five [moods], a number largely accepted by others as the author (Quintiliano?) says. We will propose (these five moods) to children to learn, without however leaving out some specifications [scholii – comments] that we consider to be relevant and useful.<sup>28</sup>

[Varro lib. 3 de Analog. Modos verborū species appellat. Quinta, inquit, species optandi, vt dicerem, facerem, dicam, faciam. Sexta imperandi, vt cape, rape, capito, rapito. Diomedes lib. I docet quosdam sex, alios septem, nonnullos octo, quostam novē, alios denique decem statuisse, quorum appellations, ne longior sim, pretermitto: si vacat, Diomedem legito. Nos quinque, quem numerum, vt idem etiam autor ait preariq amplexi sunt, pueris ediscendos proponemus, in sebolis tamen nihil corumprætermisur, quæ ad rem facere videbuntur.]

- (3) The verbal moods are three, even though they are commonly five, indicative, imperative, optative, conjunctive, infinitive.

---

<sup>26</sup> Since the potential mood is used with other verbs, the early grammarians did not use to name it with a different term and did not differentiate it from other moods (Álvares 1572: 26v; 1573: f. 12v-13r).

<sup>27</sup> This mood also was not differentiated because it is similar to the subjunctive (Álvares 1572: f. 30v; 1573: f. 12v-13r).

<sup>28</sup> Translation into English is mine, while I am grateful to Grazia Sommariva (University of Tuscia) for having provided the Italian translation of Álvares' original Latin text. Any mistake about the right interpretation is mine.

The verbal tenses are five, present, or instant, imperfective preterit, perfective preterit, plusquamperfect preterit, future.

[Modi verborum triti, ac communes sunt quinque, Indicativus, Imperativus, Optativus, Coniunctivus, Infinitus.

Tempora verborum sunt quinque, Præasens, siue Instans, Præteritum imperfectum, Præteritum Perfectum, Præteritum Plusquam perfectum, Futurum.]<sup>29</sup>

Indeed, Costa describes the verb system following Álvaresian taxonomy. Hence, he gives correspondences for five tenses and moods but reduces the four Latin conjugations to one single conjugation that is represented by the verb ‘to believe’ (*vicuvāci-ttal*). However, what he is observing in the Tamil language differs from the Latin. In fact, the first limit is imposed by the impossibility of finding conjugations similar to the Latin ones. Tamil lacks some of the mechanisms and the conjugation of the single verb “to believe” is enough to represent the whole Tamil paradigm. Therefore, Costa gives five tense declensions (‘Present’, ‘Preterit’, ‘P. Pluperfect’, ‘P. Imperfect’ and ‘Future’) for the Indicative mood. However, here also, Costa has to acknowledge some differences: categories such as the Imperfect and Pluperfect are lacking in Tamil, the category can only be filled by a periphrasis with adverbs conveying the same sense. Even the present tense requires some specifications, since in Tamil the future tense also expresses habitual or recurrent actions in the

---

<sup>29</sup> “ao lado do indicativo, do imperativo e do conjuntivo – [...], Manuel Álvares considera ainda um optativo, um potencial, um permissivo e o infinitivo (*modus infinitus*)” [translation in English is mine] (Schäfer-Prieß 2010: 130). While in Zwartjes (2002: 42) one reads that Álvares (1572: 15v) gives moods: “Modi: Indicativus, imperativus, optativus, coniunctivus, potentialis, permissivus siue concessivus, infinitivus. Tempora tria sunt: præasens, siue instans, præteritum, futurum. [Modes: Indicative, imperative, optative, conjunctive, potential, permissive or concessive, infinitive. There are three tenses: present, or ‘instants’, preterit and future]. I have not found the quoted passage on the given page of Álvares but I did however find a corresponding Italian translation (1795) of Álvares’ grammar which reads as follows: “Cinque sono i modi principali, cioè indicativo, imperativo, ottativo, congiuntivo e infinito; ai quali si aggiungono gli altri due più rari, e men principali, cioè il potenziale, e il permissivo. A questi sette io mi tengo, benché sappia annoverarsene da altri Grammatici, i quali però a’soprammentovati [sopra menzionati] si riducono.” [There are five principal moods: *indicative, imperative, optative, conjunctive*, and *infinitive*. Two more rare moods must be added, the secondary moods that are *potential* and *permissive*. I will adhere to these seven [moods], even though I am aware that other grammarians [list a larger number]. However, there are fewer [moods] than mentioned above] [translation is mine].

present or in the past (Andronov 1989: 174), therefore Costa needs another label, i.e. *habitual present*. Considering the moods, not only does the ‘Alvaristic’ terminology apply, but also the conceptual methodology. Indeed, Costa adopts the same onomasiological perspective found in Álvares (Schäfer-Prieß 2010: 130) for whom moods are the expression of «voluntas, ver animi affectio» (Álvares 1572: f. 15r) and their definitions are semantic rather than formal. As Padley (1976: 28) states “The major criteria [for the definition of word-classes] are however semantic rather than formal ones, and in this Álvares is typical of the general trend”. Indeed, Álvares attributes semantic characteristics to the individual moods, as shown in the following list (Schäfer-Prieß 2010: 131):

- (4) ‘Indicative’ = *affirmation*: «cvm hoc modo indicemus, regemos, respondeamus, fateamur, pronuntiemus, definamus meritè à grammatici Indicatiuus» (Álvares 1572: 16r).  
 ‘Imperative’ = *order*: «QVanuis hoc modo iubeamus, imperemus, prohibeamus, mādata legesque demus, deprecemur, bortemur, auxilium denique & misericordiā imploremus, grāmaticis tamen visum est, vt ab imperando potissimum diceretur» (Álvares 1572: 17r).  
 ‘Optative’ = *desire*: «Modus optatiuus, vt nomen ipsum indicat, ab optando nomen accepit, vnde optandi aduerbia ei præponimus O, si, Osi, ò vtinam, Vt, Qual, & siqua eiusdē generis sunt» (Álvares 1572: 22r).  
 ‘Potential’ = *possibility, doubt*: «Iste ignitur modus, vt breuiter eius vim colligam, apud Latinos est quando dubitationem, quando comprobationem, quando possibilitatem significat» (Álvares 1572: 26v).  
 ‘Permissive’ = *permission, concession*: «Permissiuus sive concessiuus modus permissionem, siue concessionem adsignificat, vnde & nomen inuenit, quem in bunc locum reservavimus, quòd coniunctivo voce simillimus sit» (Álvares 1572: 30v).

Like Álvares, not only does Costa deal with the *permissive* mood and this is probably the technical label most representative of the Alvaresian model behind Costa’s grammar, since “the ‘permissive’ mode is

obviously ‘Alvaristic’” while “the term ‘potential’ is used in many other regions too, since Linacre” (Zwartjes 2002: 45). As Muru (2021a) highlights, Costa’s «voluntas, ver animi affectio» perspective particularly applies to moods like the ‘Imperative’ within which Costa identifies not only the present and future imperative but also the ‘prohibitive’ and ‘permissive’ imperative, as well as the ‘Imperative of benevolence’ and the ‘Imperative with plea or familiarity’.

Furthermore, the imperative that Costa describes includes not only the proper Tamil imperative, but rather different linguistic forms that are representative of “a continuum along which the degree of intensity in the ‘command strength’ expressed by the imperative of the verb *vicuvāci* followed by an ‘x element’ varies” (Muru 2021a: 241-248).

As Muru (2021a) stresses, “if we adhere to Palmer’s (2001) definition that mood is the grammaticalisation of modality across languages, whereas modality is a notional, or semantic, domain, we can consider the imperative mood in these *Arte* the modality within which different clause types express commands, requests, desires and they are representative of the primary illocutionary force of an utterance. The result is that next to the Tamil imperative forms [...] we also find other constructions (verb followed by auxiliaries; question markers; emphatic particle, etc.) which semantically express the same modality of the imperative”. Therefore, the mood is the representation of the formal possibilities through which attitudes and opinions of the speaker can be presented.

The same strategy also applies for the *optative*. Even though Costa fails to identify the Tamil optative, he includes various Tamil linguistic forms under this label. Not only true verbal forms but also functional words such clitics and interjections. As with the Imperative mood, the main criteria is semantic as all these Tamil forms are able to express the same meaning and function of the optative. For example, *kaṭavatu* is one of the verb forms listed under the optative which grammaticalized into ‘let that be so’ (footnotes 64, 74, 102 in *Part 3*). As already observed for the imperative, the optative also becomes the *loci* where different Tamil

constructions, which would otherwise not find a place in the other Latinate categories, may be described and ‘reduced’.

Conversely, another criterion emerges while identifying the Tamil *subjunctive*. Hence, in the same way as is observed in Álvares, the subjunctive is the only mood where the semantic principle of classification does not apply. Being the mood for subordination, Álvares categorises it according to syntactical principles<sup>30</sup> rather than semantic. Following Álvares who followed Donato, he conjugates the different forms with the conjunction *cum* (Schäfer-Prieß 2010: 136) and he also refers to the conjunctions *quamvis*, *si*, and *nisi*. While dealing with the Tamil subjunctive, Costa perfectly adheres to this conceptualisation and, applying syntactical principles, he finds in Tamil a correspondence for the Latin subjunctive giving account of various devices that Tamil uses to mark the embedded or adjoined clause (cf. footnotes 105, 157, 164, 178 in *Part 3*). As Muru (2021a) highlights, Costa includes under the subjunctive label both morphological devices like nonfinite and nominalised verb forms and syntactical devices like complementizing verbs, nouns and clitics. In doing so, he applies the ‘Alvaristic’ labels like *cum*, *si*, *quamvis*, *nisi*, which are, however, further extended including Portuguese glosses such as *diz que*. The extension is made necessary to take into account the linguistic specificity of the Tamil language which does not fit into the Latin categories.

As for the nonfinite verb forms, Costa gives *participle*, *gerund*, and *infinitive*. In these contexts, other criteria of organization seem to apply, i.e., the formal criteria.

As for the *participle*, Álvares (1572: f. 56v; 1573: f. 40r) defines it as the part of speech which has cases and tenses [Participium est pars orationis, quæ tum casus, tum tempora habet] and this is the reason why Costa includes two Tamil forms under this label: the most representative is the *adjectival participle* which is listed as the first form representing the Latin

---

<sup>30</sup> Álvares (1572: 26v) states that the *subiunctivus* derives its name from the construction since it occurs conjoined with other verbs.

category, the second one is the *participial noun* which is considered to be derived from the first. The former takes tenses and has, as the Latin participle does, an adjectival meaning and an attributive function. The latter takes cases and tenses. The inclusion of these Tamil forms under the label *participle* can be justified by the property of the Latin participle of occupying a middle ground between a verb and a noun showing characteristics which are common to both categories. The Tamil adjectival participle is the only nonfinite form which distinguishes tenses as the verb does. It is formed by adding the past or the present allomorph to the verb stem followed by the adjectival suffix *-a*, while “the participial noun may be analysed as consisting of the verb stem + tense suffix or negative suffix + a third person remote demonstrative pronoun as bound form” (Lehmann 1989: 78). As such it takes case markers as the noun does. Furthermore, grouping both these forms under the same label Costa proposes an analysis which is similar to Lindholm’s (1971) according to which it is the adjectival participle form of the verb that combines with the third person pronominal suffixes rather than a verb stem.

What Costa includes under the Latinate *gerund* is the Tamil form corresponding to what is labelled nowadays, without a common consensus in the scientific community, as *absolute* (Wilden 2018), *converb*, *adverbial participle*, *conjunctive* (Steever 2005), *verbal participle* (Lehmann 1989), *gerund*. As stated in footnote 185 of *Part 3* this can be justified by the fact that in the Latin grammatical tradition, this label refers to a form of expressing the verbal action in logical functions which are neither subject nor object, defining an action without specifying the subject, the tense, the number, or the person. Furthermore, the Latin *gerund* can govern nominal phrases which depend on the normal construction of the verb. The absolute in Tamil occurs in compound verb constructions and in complex sentence constructions. In particular, it works in conjunctive complement, in adverbial clauses, and in verb complement. It is a nonfinite verb formed by the affixation of the verbal participle suffix to the verb stem. This suffix is homophonous with the various past tense allomorphs, to which the enunciative vowel *-u* is added if the allomorph consists of one or two consonants. It is probable that

Costa includes this Tamil form under the label *gerund* for some of its properties, in particular, the fact that it does not directly specify the subject, being the same expressed by the main verb. The tense also does not depend on the allomorph of the past tense suffixed to the verb stem but rather on the tense of the main verb. Differently from the Latin language, in Tamil it does not represent a verbal substantive or deverbal noun.

Regarding the category of the *infinitive*, Costa distinguishes two kinds: *the absolute* and the *substantive* and this classification extends beyond his model of reference. Chevillard (1992b; 2021) discusses the substantive infinitive. As stated in footnote 179 of *Part 3*, Costa compares what he defines as the *absolute infinitive* to the Latin *absolute ablative*. Therefore, the label *absolute* should be considered as a label specifying the main syntactic quality of the Tamil infinitive. Indeed, the comparison with the Latin absolute ablative may be explained when taking into account a syntactic feature of this Latin construction which it appears to have in common with Tamil. In fact, in Latin this construction is *independent* from the main clause and the subject of this nonfinite clause is different from that of the main clause. The Latin absolute ablative is a verbal usage of the Latin participle which expresses in an implicit way a temporal, causal/purpose, conditional, and concessive clause but it is independent, hence *absolūtus*, from the grammatical relations with the other items of the sentence of which it is a part. The logical subject of the Latin absolute ablative cannot coincide with the subject of the regent proposition. This is also the basic rule displayed by the Tamil infinitive. When this nonfinite form is used in complex sentences, where it carries out different semantic functions such as purpose, cause, circumstance or result (see Annamalai 1980; Lehmann 1989: 92-93; Wilden 2018: 92), thus marking subordinate clauses that are resultative, simultaneous, causal, final, temporal, the use of the infinitive marks a *change* of subject. This is the main reason for which it is probable that Costa selected this label: because *absolūtus* underlines the independent nature of the infinitive from the main clause in term of syntactical functions. The second infinitive described by Costa is labelled as *substantive* and the corresponding Tamil form is the verbal

noun. As already stated in footnote 181 of *Part 3*, the reason behind Costa's choice seems to correlate with a feature of the Latin infinitive. Indeed, when it is substantivated it works as a neuter substantive, it can be a subject, it can be part of the nominal phrase governed by the predicate, and it can also be specified and defined with attributes. In Tamil the nominalized verb forms, differentiated into tensed and untensed verbal nouns, occur in compound verb construction and in the formation of complex sentences where they can take case markers. The verbal nouns can be considered as parallels to the participial nouns from which they differ for the fact of taking an abstract nominal rather than a pronominal as bound suffix. In this case the nominalisation is considered as a morphological rather than a syntactical process. Therefore, the verbal predicate occurring in the final position of the embedded clause combines with a bound nominal, the head NP of the construction, the nominalizing suffix *-atu* meaning 'the fact that' or 'the event of' (Lehmann 1989: 299).

Costa ends the chapter on verbs with a very interesting section entitled *outros modos avulsos de falar* [Many other assorted modes of speaking] where he gives an account of how to ask, enquire, doubt, wonder, deny, address, etc. in Tamil. Even though he displays an Alvaresian conceptualisation, in this section, Costa completely abandons the Latinate categories and is guided exclusively by the communicative and practical needs of knowing how to say *such things* in Tamil. In fact, the technical labels used for classifying these *other modes of speaking* - thus the other moods, or rather modalities - are not the same in Álvares, but some of them are based on glosses expressing the Portuguese coordinating and subordinating conjunctions. In this section, he provides other ways of speaking represented not only by verbs and nonfinite verb forms, but also by interjections, clitics, interrogative and indefinite pronouns, purposive, final, and causal clauses.

The following chapter, the third, deals with the *passive voice* and the *anomalous* and *substantive verbs*<sup>31</sup> where Costa not only places the Tamil

---

<sup>31</sup> Comments of these forms and the labels that Costa uses in his grammar have already been commented in *Part 3* in footnotes 260, 262, 264, 274-281, 286.

defective verbs but also shows how to form the passive construction in Tamil. He refers not only to the passive auxiliary *paṭu* but also to the Tamil effective verbs which differ from the affective voice for having the action directed toward the subject of the verb (see Muru 2021b). The *Arte* ends with the indeclinable parts of speech and some appendices on how to form the Tamil tenses of verbs, in particular the past, and plural of nouns.

In the final section, which is devoted to the indeclinable parts of speech, Costa includes postpositions, disjunctions, conjunctions – already discussed in Muru (2020a) – adverbs, and interjections. Costa does not provide a definition, but rather an explanation on how they are formed. As regards adverbs, Álvares’ states that (1572: f. 59v.; 1573: f. 41r):

- (5) The adverb is a part of speech, which added to the voice [word] explains and delimits their signification.

[Aduerbum est pars orationis, quæ vocibus addita, earum significationem explanat, ac definit.]

Álvares also sums up the following subcategories (Álvares 1572: f. 59v.-60r. 1573: f. 41r):

- (6) Optandi, vocandi, interrogandi, respondendi affirmatè, confirmandi, negandi, dubitandi, hortandi, prohibendi, demonstrandi, eligendi, comparandi, congregandi, separandi, intendendi, remittendi, temporis, loci, numeri, ordinis, eventus, similitudines, diuersitatis, qualitatis, quantitatis [...]

In applying this to Tamil, Costa identifies three forms with special adverbial functions having word initial demonstrative (*a-* [distal], *i-* [proximal]) and interrogative determiners (*e-*). These forms correspond to the ‘Alvaristic’ *loci* subcategory. Costa also states that “the adverbs also have their cases which give them varying meaning” and that they can be derived from all abstract names by suffixing the ‘particle’ (*particula*) *-āka* or *-āy* to them. This means that unlike Álvares for whom they are indeclinable, Costa considers adverbs and prepositions as declinable parts of speech.

The other subcategories given by Álvares for adverbs do not find a place in Costa's *Arte*.

As far as *interjections* are concerned, Álvares' (1572: f. 60r; 1573: 42r) defines this part of speech as follows:

- (7) The interjection is a part of speech which indicates different emotions of the mind.

[Interiectio est pars orationis, quæ varios animi affectus indicat.]

*laudanti, exultandi, lætantis, dolentis, suspirantis, lugentis, eiulantis, admirantis, admirantis & interdum, irridentis, exclamantis, silentium indicentis, timentis, deprehendentis, præsagientis malū, reijeientis cum fastidio, stomachantis, exerçantis.*

Costa includes them in their Tamil grammar without providing a list of them, since, according to him they are reproduced in his Portuguese-Tamil dictionary (see *Introduction*) where one finds the following forms அய்யொ, உளசு, அப்படா, உளசு; அடா, தொ, ஓகெ, ஓய, அடெ, அவீ; வசமலல, அலலவொ, being the remainder included in the dictionary as Costa declares (cf. *Part 2*, p. 108 and *Part 3* pp. 198-199).

In conclusion, even though there was a certain number of constraints which applied in the adoption of the Latin model for the description of Tamil, the linguistic specificity of the described language as well as Costa's ability in grasping the linguistic features of Tamil, led him to adapt and to extend the metalanguage, the conceptual domains, as well as the *modus operandi* found in Álvares when describing Tamil. Even though his grammar proved to be more practical than theoretical, the data Costa was able to collect would have later offered other missionaries the possibility to reorganize this linguistic material and to achieve better (even theoretical) results (cf. § 1.2.3 and Muru 2021b).

#### 4.4 The Tamil language in Costa's *Arte*

As seen above, the third part of the book not only translates Costa's Portuguese grammar but also provides insights into the parallelism between the Latinate categories listed above and the corresponding Tamil forms which are further commented on the previous paragraph. At this point the question that should be addressed is what is the picture that emerges so far? What is the Tamil language that Costa described and how did he describe it? The answer to these questions cannot be straightforward for various reasons. The main one depends on the fact that Tamil is characterized by a high variation. Not only does it move on the diatopic and diastratic axis, but it is also functionally differentiated. As Chevillard (2021: 2) underlines "as those missionaries would progressively discover, the *tamul* language which they were trying to master [...] turned out to be a symbiotic combination of three languages, difficult to separate in practice, because each component of the Tamil Triglossia [including vernacular, modern formal, and classical Tamil] had its own role to play in the global picture of the everyday life in Tamil Nadu."<sup>32</sup>

The conclusive paragraphs will discuss the variety that Costa described from a sociolinguistic (§ 4.4.1) and a linguistic perspective (4.4.2).

##### 4.4.1 Sociolinguistic variation

The variation characterising the Tamil language is testified since the earliest grammar of Tamil, the *Tolkāppiyam* (ca. 1<sup>st</sup>-3<sup>rd</sup> cent. A.D.). Indeed, it refers to twelve regional varieties of Tamil<sup>33</sup> and two non-regional varieties, i.e. *valakku* 'colloquial' and *ceyyul* 'literary'. Therefore, since the earliest period, different styles were recognized and they found a place in various texts and supports, i.e. the colloquial style was typical of inscriptions on stones while the literary style was typical of literary works on palm leaves. According to Ramaswamy (1997: 23) there

---

<sup>32</sup> Insertion into square brackets are mine.

<sup>33</sup> For a detailed discussion on the twelve regions mentioned in *Tolkāppiyam* and later commentaries see Chevillard (2008: 21-51). See also Shanmugam (2008: 142-145).

were three main variations: geographical, stylistic, and social and they coincided with the political boundaries of the Pallava and Pandya kingdoms (Karashima 2014).

Jumping forward to the modern situation, Tamil is usually referred to as having a diglossic repertoire, where two different varieties are functionally differentiated.<sup>34</sup> However, the reduction to diglossia for the current situation of Tamil is reductive – as it was in the past.<sup>35</sup> Furthermore, there is no common consensus on how to describe the different varieties which characterise the Tamil *continuum*. For example, according to Zvelebil (1963a, b), the most fundamental dichotomy is the one between Brahmin and non-Brahmin speech variation in Tamil the main difference being that the former uses unassimilated Sanskrit loans and the latter uses them as assimilated. Other authors such as Sethu Pillai (1974) and Shanmugam Pillai (1965; 1972) differentiate between *Literary* and *Colloquial Tamil*; Annamalai (1982) distinguishes between *Written* and *Spoken Tamil*, while Ramaswamy (1997) refers to *Formal* and *Informal Tamil*. As the latter states (1977: 18) “the question here is whether the terms, such as ‘literary’, ‘written’ and ‘formal’ refer to one variety of Tamil and ‘colloquial’, ‘spoken’, and ‘informal’ refer to the other variety of Tamil without any problem.” It is for this reason that Ramaswamy (1997: 19-20) – quite convincingly – says that the terms *formal* and *informal* are the only ones able to capture the real essence of the variety which characterize Tamil because both *written* and *literary*, which to a certain extent might be synonymous, are not necessarily identical to the *reading pronunciation* of the written variety. In the same way, *colloquial* and *spoken*, which might be synonymous, but which cannot exist without including a regional or social variety of Tamil, both differ from the *standard spoken Tamil*. In conclusion, the differentiation between *formal* and *informal* Tamil offered in Ramaswamy (1997) seems to be the most convincing since it considers each of these labels as hypernyms of the three different varieties where the former includes *colloquial*, *spoken* – both can be regional or social varieties –, and

---

<sup>34</sup> For example, see Britto (1986).

<sup>35</sup> See for example Smirnitskaya (2018: 318-334).

*standard Spoken*, while the latter includes the *literary*, the *written*, and the *reading pronunciation* of the written Tamil. What emerges so far is that the hierarchies and relationship between the varieties of the Tamil repertoire are more complex than being simply diglossic and this is as true for the present day as it was for the past. Indeed, in this regard, it is Schiffman (1996: 198) who has underlined that for the fact of being included in two of the four possibilities offered by Fishman's (1980) taxonomy,<sup>36</sup> "in some sense it could be argued that Tamil linguistic culture is a multiglossic linguistic culture, rather than 'merely' a diglossic one". Infact, Schiffman (2008: 6) identifies "at least five different styles or varieties of language": the *spoken Tamil* (*pēccu Tamil*) used and understood by all speakers; *Modern Literary Tamil* which is the language that educated speakers can read and write; *Older Modern Literary Tamil* (13<sup>th</sup> cent.) known only by a restricted circle of speakers; *Medieval Tamil* (the language of classical texts such as *Tirukkural*) and *Old Tamil* (*Cāṅkam Tamil*) which cannot be actively understood by anyone without commentaries and dictionaries.

However, neither Ferguson's (1959) *diglossia* nor Fishman's *multiglossia* – applicable today to the Tamil language – should be thought of as working in the same way as in the past, at the time when Costa wrote his grammar. Indeed, even though it has been widely demonstrated that even in the past a functional variation between varieties existed (i.e. in Proença's dictionary, see Chevillard 2021), the distance occurring between these varieties as well as the perception that speakers and, above all missionaries had of it, must have been different. Even though early missionaries such as Henriques already had the perception of different ways of speaking between the *learned* and the *non-learned*, it was Beschi who identified an official differentiation into a diglossic repertoire within the missionaries' circle. He did not invent this differentiation (see Chevillard 2008: 47) but he was the first one to distinguish two varieties into two grammars. The first one, composed in 1728, described the

---

<sup>36</sup> The two possibilities to which Schiffman (2008) refers are: 1. High variety as classical, Low variety as vernacular, the two being genetically related; 2. High variety as a written/formal-spoken and L as vernacular, the two being genetically related to each other.

*common* or *ordinary Tamil* (koṭuntamil) – that is comparable to today’s Standard Tamil. The other grammar, composed in 1730, described the *poetical Tamil* (centamil). From this moment onwards, other Westerners – above all the British – would contribute to establishing the gap between the High and Low varieties of Tamil. In particular, at the beginning of the 19<sup>th</sup> century, during the so-called Tamil Renaissance, the diglossic repertoire as it is described today was definitively embedded in the Tamilians’ perception along with the diffusion of a very strong *purism* movement at the time of Independence (cf. Schiffman 1996; Annamalai 2011: 13-34; Annamalai 2016: 661-666).<sup>37</sup>

Consequently, when consulting Costa’s *Arte*, and other early missionary sources, one should keep in mind that features of different varieties are mingled in the texts. They may appear with more or less relevance depending on many factors such as *who* the locals interacting with the missionaries were, *what* awareness the missionaries had of the different styles, *what* the missionaries’ language proficiency was, and *what* knowledge the missionaries had of Tamil literature. In conclusion, despite the fact that different styles of language, functionally differentiated, were already attested in *Tolkāppiyam*, in order to understand the linguistic situation that missionaries faced, the diglossia model should be taken into consideration in a flexible manner without the compulsion to classify all the earliest missionary grammars as grammars of the spoken Tamil or other varieties.

It is thus necessary to take into account three indisputable facts: being immersed among the people that missionaries wished to convert, they were exposed to a spoken variety of the language. This ‘spoken variety’ moved along a range of social and geographical variations with respect to the area of influence of the missionary considered and this is the reason why in their texts and grammars there are occurrences of typical isoglossic features such as the occurrence of *!/?*. Secondly, considering

---

<sup>37</sup> For a detailed reconstruction of the so-called Tamil Renaissance as well as an analysis on how Westerners contributed to the establishment of the actual perception of a High and a Low Tamil, see Ebeling (2013), Trautmann (2006), Annamalai (2011: 13-34), Wilden (2014: 27-34).

*peccu Tamil* in terms of the descriptive categories offered in Gumperz (1982: 66) as a *we-code*, since missionaries were *out-groupers*, it is plausible to assume that the variety the native used with them was not the *peccu Tamil* but rather something more neutral, cleansed of diatopically and diastratically marked features which they would not be able to understand. Thirdly, missionaries had to use the language they learnt not only in oral communication but also in the written form for translating their religious text into Tamil. In this task, even though they were helped by local speakers and native catechists, missionaries faced choice of different options: to use the language of poetry, of commentaries, of inscriptions, or of speech for their prose. The result was to use a form of Tamil where the old morphological forms and the complexity of sentences was reduced but the conventional spelling of words was kept (Annamalai 2016: 664). Furthermore, the *peccu Tamil* would not have been transcribed by natives, but rather a variety as close as possible to today's Standard language and not as difficult as the Literary variety. Therefore, missionaries used of a variety of language very similar to what Zvebil (1963a, b) described as *Common Spoken Tamil* based on the non-Brahmin Tamil spoken in Madurai. The missionaries confirmed the fact that the language described was not the Brahmin variety by clarifying that some of the described linguistic forms in their *Arte* differed from how Brahmins used to speak. For example, even though he was familiar with Tamil literature such as the Medieval treatise *Tirukkural*, Costa described a variety of Tamil which was not used by poets or Brahmins, as one may assume from some of his statements. For example, while dealing with the third plural neuter form – *avarkaḷ* – Costa quickly clarifies that Brahmins use another form (i.e. *avāḷ*)<sup>38</sup> and at the end of his *Arte*, when he describes how to form past tenses, imperative, futures, and infinitives, he states that:

- (c) {The verbs that fall in this Rule} instead of *ichen* can also make [the preterit] with *iten*. This is usually used by the **Poets** and the **Brahmans**. However the first rule is generally more common in

---

<sup>38</sup> *Os Bramanes fazem este plural அவாள் அவாளுடைய*. [Brahmins form this plural in *avāḷ* *avāḷutaiya*] [Only found in two of the Goan manuscripts: MS GL2 and MS GL3. See footnote 94 in *Part 2*].

these Kingdoms only நிககிறது (nikkiratu) *to stand*, becomes நினறென (nirreṇ) but this is also not against the Rule, because it is more properly written as நிறகிறது (nirkiratu).

(GL1, f. M-34-42, R, lines 13-21)

[Podem também os verbos desta regra em lugar do *ichen* fazer *iten*. Esta segu(n) ordinariamente os Poetas e os Bramanes com tudo a p(rimeira) he mais geral ordinaria nestes Reynos somente நிககிறது Estar em pé faz நினறென mas este não faz contra a Regra porque se escreve melhor நிறகிறது].

Therefore, one may assume that both Brahmins (representative of a social dialect) and Poets (representative of High Tamil) spoke in a different way from the common, ordinary manner of speaking that Costa was describing. The Kingdom to which he refers is the Madurai<sup>39</sup> kingdom and the linguistic form he is recording is the past tense morpheme which undergoes palatalization in Standard Colloquial Tamil as opposed to Literary Tamil. As Zevelebil (1963b: 109) states, “the paradigm of finite verb forms is one of the proofs of the existence of a distinct speech-form of Tamil which may be called Standard Colloquial Tamil and which is different from the local dialects as well as from the literary language”. Thus the type of speech that Costa and other missionaries described in their grammar was formed by a mixture of linguistic features from the *formal* and *informal* Tamil, giving shape to a variety of Tamil similar to what is nowadays “used in ordinary informal conversation by educated native Tamilians throughout Tamil Nadu when talking to their family and friends and generally to persons of the same social standing and education, a superposed variety different from local dialects and from written language” (Zvelebil 1963b: 110). This variety is based on the speech of the classes which Costa and others like him were in contact with, such as *Vellāla* in the areas of Madurai, Tiruchirappalli, and Madras (*ibid.*).

---

<sup>39</sup> A similar reference to Madurai is found in two of the Goan manuscripts, MS GL2 and MS GL3 in dealing with the orthography rules (cf. footnote 1558 in *Part 2*).

In conclusion, even though there is no clear boundary on where Costa's *Arte* can be placed, it may be claimed that the language described by Costa is made up of features of the written formal Tamil – but not the classical – and of features which are typical of the Standard Colloquial Tamil (cf. Zvelebil 1959b: 572-603) cleansed of its regional and societal linguistic features.

Among the most relevant features typical of the Standard Spoken variety of Tamil – as defined by Schiffman (1999: 22-23) – are the following:

- a. suffixation of final *-e* to case suffixes, i.e. *viṭṭle*, *kaṭṭaṇōṭe* (cf. footnote 12 in *Part 3*);
- b. simplification of the consonant cluster *rr* into *tt*, i.e. *nērru* > *nēttu* (cf. footnote 1081, 1082 *Part 2*);
- c. simplification of the consonant cluster in the present tense morpheme *kkir* into *kk̄* visible in the Romanization of Tamil script, i.e. *accradu* > *ikk̄iratu* (cf. GL1, f. M-34-43, L, lines 7-9).<sup>40</sup>
- d. consonant cluster reduction, i.e. *pārttu* > *pāttu* even though not constant and general (cf. footnote 8 in *Part 3*);
- e. palatalisation of the past tense marker *tt* into *cc*, i.e. *kuṛittu* > *kuṛiccu* (cf. footnotes 9, 10 in *Part 3*) or *kōpitta* > *kōpicca* (cf. footnote 121 in *Part 3*);<sup>41</sup>
- f. intervocalic deletion of *k*, i.e. *pōkirēṇ* > *pōrēṇ*;
- g. reduction of the nasal + consonant cluster, i.e. *vēṇṭum* > *vēṇum* (cf. footnote 277 in *Part 3*);
- h. merging of *l̄* with *l̄* – at least in some of the copies of the manuscript revealing for them a Southern area of production (cf. footnotes 1236, 1347, *Part 2*, see below);
- i. Old Tamil negative form, i.e. verb stem-PNG (cf. footnote 56 in *Part 3*);

---

<sup>40</sup> The monophthongization of accusative *-ai* in *-e* is not visible in Costa's *Arte* as it is in other manuscripts such as Aguilar/Baldaues because compared to this text, Costa used to write in Tamil rather than to transliterate his examples into Roman script. On the contrary, another examples of verb contraction in Costa is observed in the present tense of *pō-tal* 'to go' that is *pōratu* rather than *pōkiratu* (cf. footnote 55, *Part 3*. In the same *Part 3* see also footnote 106).

<sup>41</sup> Other examples of spoken variants are found in footnotes 17, 150, 162, 196, 268 in *Part 3*.

- j. intervocalic deletion of [ɭ] (retroflex frictionless continuant). It often merges with [l] but in some cases is deleted instead, resulting in compensatory lengthening பெழுது → *time* [po:ɖɨ] (cf. footnote 52, *Part 3*).

What prevails at the morphological and syntactical level is today's standard variety of the language. Therefore, the structures that Costa describes are typical of those used in the prose written context rather than the spoken one and the variation is found only marginally at the morphological level. The overlapping of *formal* and *informal* Tamil is indeed observed mainly at the phonological level where *formal Tamil* forms are realised using the phonology of the *informal Tamil*.<sup>42</sup>

Furthermore, comparing the manuscripts, apart from the differences already highlighted in *Introduction* concerning the references to Aguilar's *Arte* and the Portuguese language, the manuscripts also display some dialectal variations. Therefore, in MS VL the verb base used for illustrating the single paradigm of Tamil is *vicuv(ā)ti* compared to *vicuv(ā)ci* found in all the other manuscripts (cf. footnote 243, *Part 2*); the diastatically marked past tense morpheme *-cc-* is not given in MS GL2, MS GL3, and MS VL while it is found in MS BL where the second vowel in the verb stem is always long, hence *vicuvāci*. (cf. footnote 244, *Part 2*); there is a higher number of consonant cluster reduction both in MS BL and MS VL compared to the Goan manuscripts, i.e. காத்து instead of காற்று (cf. footnotes 783, 1081 in *Part 2*), பத்த instead of பற்ற (cf. footnote 844, *Part 2*). MS BL and MS VL share another common feature that is the merging of ழ with ள, i.e. கெள்ப்பென instead of கெழ்ப்பென (cf. footnotes 1236, 1347, *Part 2*).

---

<sup>42</sup> In this regard, it should be noted that, even though authors such as Schiffman (1979, 1999), Asher (1985), and Zvelebil (1963b) have pointed out consistent differences between the Standard and the Spoken Tamil, according to Ramaswamy (1997: 15) "both Formal and Informal Tamil do not have separate morphological features".

#### 4.4.2 Costa's Tamil

As it has already been observed, Costa's *Arte* is well organized and systematic in the scrutiny of the Tamil language through the lens of the Latin grammatical framework. We do not know if he benefitted from previous missionary grammatical works such as Henrique's *Arte* (cf. Hein and Rajam 2013: 231-282) while it is evident that Costa had contact with Proença whose work became associated to his *Arte* in almost all the nowadays existing manuscripts. Judging from internal evidence, it is difficult to imagine that Henriques could have been a source of inspiration for Costa, since the two works differ greatly in terms of organisation as well as of linguistic data. Compared to Henriques (Hein and Rajam 2013: 277-280), Costa has a very restricted number of nouns referring to aspects of the social environment in which he was immersed – contrary to what occurs in Henriques' *Arte* (cf. Hein and Rajam 2013: 231-282): for example, one does not find castes and professions names, as well as nouns referring to typical activities or places. Even the number of verbs is not rich as in Henriques (cf. Muru 2021b, *Appendix*, p. 1-12). What the two grammars have in common is the way of proceeding for identifying the Tamil forms that is also common to the majority of missionary grammars. There is a common strategy of addition and subtraction of augments (*creçencias*) or of particle (*particula*) to a (class of) word (stem), a technique which was presumably facilitated by the agglutinative tendency of the Tamil morphology.

Despite the fact that Costa deals with different parts of speech of the Latin grammar, his major attention focuses on one class of words, i.e. the *verb*. Indeed, keeping aside the noun and the adjectives, the whole skeleton of Costa's *Arte* can be reduced to the description of a single verb of which Costa gives the declension and offers different contexts of occurrences in phrases and complex sentences where other verbs also occur (cf. *Appendix 3*). More precisely, it is from the verb stem *vicuvāci* or *vicuvāti*, depending on the manuscript in which one looks in, that Costa derives all the forms that he was able to observe in Tamil identifying such as *peyareccam*, *absolute*, *participial nouns*, *verbal nouns*, *infinitive*,

*conditional*, and *imperative*. Indeed, it is to these identified forms that Costa adds *nominal* or *adjectival suffixes*, *causative morphs*, *tense morphs*, *negative morphs*, *postposition*, *itaiacol*, *case markers*, *auxiliaries*, *particles*, *defective verbs*, *interrogatives*, *clitics*, etc. His main objective is to find out structures which might convey the same sense of the Latinate formal categories that Costa uses as lens for observing the Tamil language. Despite this fact, his grammar cannot be reduced to an aseptic Latin grammar pasted above the linguistic structure of the Tamil language. On the contrary, the Latinate categories, being the starting point of reference become the *loci* where Costa deals with the semantic and the syntaxis of the Tamil language (cf. also Muru 2021a). As the charts in *Appendix 3* highlight, Costa builds his categories through additions of what he mainly defines *particles* or *augment* or, on the contrary, through their subtraction. The identified Tamil forms do not necessarily have a formal matching with the Latin ones but rather they are equal in the sense that they convey when they are used.

The following subparagraphs end this paragraph pointing out each one of the part of speech dealt with by Costa with the aim to delineate the features of the Tamil language with which he was acquainted or that he was ‘creating’ through codification in his grammar.

As per the **nouns**, Costa immediately states that the Tamil nouns differ from the Latin ones since they do not have final declension bur rather, they change internally due to sandhi rules occurring when they are suffixed with cases. The **case** markers include both standard and spoken Tamil forms (cf. footnotes 4, 6-10, 12-13, in *Part 3*) while seem to be absent more recently case markers which started to appear already in Medieval Tamil such as *il* + *ninru* (abs. of *nil-tal* ‘to stand’) or *il*+ *iruntu* (abs. of *iru-tal* ‘to be’). They are not found in the grammar even though they appear to be used in the religious texts which follows the grammar.<sup>43</sup>

---

<sup>43</sup> These two examples, taken from the Catechism which follows the Grammar, show how Costa used the constructions referred above, even though they seem do not have yet undergone gramamticalisation:

A. MS GL2, f. 123, lines 26-28

As per **pronouns**, Costa provides forms which are typical of the Modern Tamil. Not only he lists both honorific and non-honorific forms for the second and the third singular (cf. footnote 16, 17, 19-21, 23-26, *Part 3*), but he also differentiates between the inclusive and exclusive first plural pronoun even though he does not offer any technical term for differentiating or naming them (cf. footnote 16 *Part 3*). He also discusses the Tamil 4<sup>th</sup> pronoun *tāṇ*, usually referred as reflexive in the grammatical literature. However, both the Latin category as well as the Portuguese glosses that Costa uses reveal what is the function on which he paid attention in describing *tāṇ*. Therefore, the Latin category that Costa selects is the nominative *intensive ipse*, which is used in Latin to emphasise something and for suggesting that subject and object are the same, while the Portuguese glosses underline the anaphoric function of the Tamil *tāṇ*, that is its main function since the 4<sup>th</sup> person pronoun refers always to a third person referent (cf. footnotes 25-26, *Part 3*). The following category that Costa deals with is the **relative pronoun** and, after the noun declension, this is the other category for which Costa has to admit a difference between the model of reference and the Tamil language (cf. footnote 27, *Part 3*). In fact, the relative pronoun in Tamil does not exist as it is in Latin, however, as Costa recognises, there are two different ways for obtaining a form with the same meaning of the Latin relative clause. This might lead to think that Costa is trapped within the Latin grammatical framework. Undoubtedly, this is partially true, but at the same time the way he finds for overcoming the problem shows how Costa did not look obsessively for a categorial form in Tamil corresponding to the relative pronoun – as he accuses Aguilar to have

done earlier – but rather, he looks for a Tamil structure which may be semantically compared to the Latin sense provided by the relative construction. In doing that he is guided by a conceptual transfer, rather than by a categorial one, despite the fact he starts from that one. He finds two different ways for conveying a relative sense in Tamil: the first one is to made use of the adjectival participle (*peyareccam*), the second one refers to a structure Annamalai (1969) defines a tag construction with clitic *-ē* that is semantically and pragmatically conditioned. It corresponds to an embedded finite clause with the clause final clitic *-ē* before a noun phrase. This embedded clause functions as complement to that Noun Phrase which always consist of a remote demonstrative Noun Phrase as it is in the example provided by Costa:<sup>44</sup>

- (i) vicuvāci-kkiṛ-āvaṅ-ē      avaṅ karaiyeṛu-v-āṅ  
 believe-PRES-3SG.M-CLIT 3SG.M save-FUT-3SG.M  
 aquillo que cre, salvarse há  
*That one who believes, he must be saved/rescued*

The following category with which Costa deals with is that one of the **adjective**.<sup>45</sup> He begins his paragraph saying “there is in this language no lack of adjectives, as many would want” (MS GL1, f. M-34-not numbered, a – misplaced, L, lines 18-19) presumably implicitly opposing to what is sustained in the Tamil grammatical tradition where only four class of words are recognised and the adjectives is not included (cf. Chevillard 1992a, b). However, despite his statement, he does not provide a list of “primary” simple adjectives but rather he lists different way through which it is possible to form adjectives being the first one represented by the *peyareccam* (adjectival participle). This form is identified through a process of subtraction of the personal ending, i.e. *-āṅ* – from the Tamil participial noun. Other ways listed by Costa for forming adjectives includes the construction made of noun + *peyareccam* sequence (i.e. *uḷḷa, illāta, ākā, ākāta*) which “are entitled to be analysed as adjectival clauses consisting of a verbal predicate with one noun

<sup>44</sup> I discussed this topic further in my presentation at ICHoLS XV, Università Cattolica, Milan, 23-27 August 2021.

<sup>45</sup> For a further discussion Muru (2010: 125-150).

argument only, which occur in the position between determiner and head noun” (Lehmann 1989: 135). There is also the construction with the past adjectival participle of the verb *āku* ‘become’ that has grammaticalised into a bound form added to nouns, i.e. *-āṇa*. This construction occurs in the syntactic position of simple adjectives between a determiner and the head noun. Another way that Costa describes is the old way of forming adjectives already attested in *Caṅkam* literature (cf. Wilden 2018: 47-49) that is by suffixation of *-a* to the noun even though the missionary takes it as a process of subtraction and describes it as a reduction of the suffix *-am*<sup>46</sup> into *-a*. Finally, Costa states that the simplest manner of forming adjectives, as it is true since the antiquity, it is to put another noun in attributive position directly before another noun. What emerges so far is that Costa describes derivational processes and adjectival suffixes which are still found in what is considered to be the Standard Modern Tamil, the only missing form is the description of the adjective when it occurs in its attributive function – that on the contrary is found in Henriques. Interestingly, Costa deals with the **comparative** in the section of his *Arte* entitled the *many other assorted modes of speaking*. This section not only includes Latin categories such as adverbs and conjunction but also Tamil forms that cannot be placed within the Latin grammatical framework. In this context Costa refers to periphrastic constructions which are typical of the standard written language (Asher 1985: 88), i.e. *pārkkā* and *kāṭṭilum*<sup>47</sup> etymologically related to the verbs *pār-ttal* ‘to see’ and the causative of the verb *kāṇ* to see’, *kāṭṭu-tal* that means ‘to show, exhibit’ (cf. footnote 260, *Part 3*). The comparative construction recorded by Costa totally differs from the Old Tamil where one finds the cross-linguistically most common form for encoding standard noun phrases in comparative construction (Heine and Kuteva 2004 [2002]: 31), i.e. the ablative case marker. In fact, in Old Tamil the ablative *-iṅ* followed by the clitic *-um* is suffixed to the preceding noun while equal degree is expressed by simple *-iṅ* without *-um*. However, it also differs from the Common Spoken Tamil where the verb used in the same construction is *viṭu-tal* in its infinitive

---

<sup>46</sup> This is another suffix attested in *Caṅkam* corpus for deriving adjectives. As Wilden (2018: 49, fn. 20) states in traditional grammar is taught as an increment (*cāriyai*).

<sup>47</sup> Probably a frozen concessive form of the Old Tamil (cf. Wilden 2018: 139-140).

form *viṭa* rather than those described by Costa who only provides examples with *pārka* but not with *kāṭṭilum*. In the first example the standard, against which a comparison occurs, is in the accusative case, while in the second example it is a verbal noun in the locative *-il* followed by the clitic *-um*, therefore as it occurred in the Old Tamil but with the case marker *il* which replaced the old *iṅ*.

The last category that Costa describes, before turning his attention to the Tamil verb, is the **gender** of nouns. Once again, he underlines a difference with the Latin language. Tamil adjectives, in facts, do not manifest formally the gender to which they belong too, but rather this is manifested by the personal ending marker which occurs on verbs. The differentiation in genders is not formal but rather semantic, indeed whatever refers to Gods, Angels, and men is masculine but whatever refers to Goodness and females are feminine, while the majority of the remaining, such as those referring to children, are neuter.

Therefore, Costa starts with his *Arte* devoted to the Tamil **verb** which is among all the categories the most complicated. I will not repeat what I have already emphasised in Muru (2020b, 2021) or said in the linguistic footnotes to the English translation of Costa's *Arte*. It will suffice to remind that, despite the fact of repeating the verbal categories that Álvares listed in his grammar, it is in the description of the Tamil verbal morphology that Costa mainly extends his *Arte* adapting the Latin model to the Tamil language and adding categories and concepts for taking into account the complicate nature of the Tamil verb (cf. *Appendix 2*). As already specified above, all the verb forms and the verb complex constructions, as well as different modes of speaking are based on a single verb stem that is *vicuvāci* 'believe' which also corresponds to the non-polite *imperative* mood. *Appendix 3* highlights what are all the possible combinations that Costa finds out starting from the verb root/imperative from which he firstly derives nonfinite verb forms. These, being used in Tamil for forming compound verbs or for creating complex structures, may combine with other elements within a single clause or between two or more phrases. Therefore, *viṅaiyeccam* combine with a following verb,

a predicate elsewhere in the sentence with which the nonfinite form is constructed, with or without other intervening grammatical material. Costa identifies all these nonfinite forms, like the absolute, the infinitive, the conditional, the negative, and the negative conditional. The other nonfinite verb form identified is the *peyareccam* that includes those verb forms combining with a following nominal to form a variety of structures. Few structures obtained when these adnominal forms combine with a following noun, also include relative clauses. Costa testifies all these forms while trying to respect the skeleton imposed by the Latin grammar. Apart from identifying some particles which are typical of the formal variety of the language and are in direct continuation with the Old Tamil, i.e. *āṇal*, *ākil*. (cf. footnote 147 in *Part 3*), it is interesting to notice the verb compound that Costa identifies in his grammar, mainly with reference to the auxiliary compound verbs, i.e. *koḷ-tal* ‘to contain, to hold’, *pō-tal* ‘to go’, *iru-tal* ‘to be, to seat’, *viṭu-tal* ‘to leave’ to which the auxiliary for the passive voice should also be added, i.e. *paṭu-tal* ‘to experience, to suffer’, as well as other auxiliaries even though they are not recognised as such by Costa (i.e. *uṇ-tal*, *āku-tal*, *kaṭavatu*) (cf. footnotes 55, 61, 64, 133, 156, 180, 195, 197, 220, 222, 260, 262, 266-271 in *Part 3*) and the modern periphrastic causative construction with *cey-tal* ‘to do’ (cf. footnote 270 in *Part 3*). It is interesting to notice that these verbs are all discussed in the fourth chapter *Of the composition of verbs*, where Costa also describes the morphological causatives in *-vi-* and *-pi-* (cf. footnote 273 in *Part 3*) while, he feels the necessity to build a periphrastic construction for expressing Latin categories such as perfective and imperfective (cf. footnote 45 and 51 in *Part 3*) as shown in the following example that is glossed in Portuguese as *quando tu cria, cria elle*:

- (ii) nī vicuvaci-kkiṛ-āy-ē    appō    avan    vicuvāci-tt-āṇ  
 2SG believe-PRES-2SG-CLIT ADV 3SG.M believe-PST-3SG.M  
*You believe! At that time, he believed*

When looking into his translated text, not only these constructions are productively used, in particular the rhetoric final tag-questions realised with the dubitative marker *-ō* or the conditional *ākil* or the concessive *ākilum* but also other linguistic features that Costa did not include in his

*Arte* as the above-mentioned ablative case marker (cf. footnote 45, this *Part*). As more than one-time underlined, native Catechists helped Costa as well as other missionaries in their task of composing grammars and translating texts. However, it is quite reasonable to imagine that in the two different tasks missionaries had a different weight in term of contribution. Being the composition of grammars mainly directed by missionaries and the translations of Christian religious texts mainly realised by and through native speakers.

At this point a further researchers should be carried in this direction, with the aim to compare the linguistic data inferable from the grammar with those found in the religious texts in order to verify if what Costa described about the Tamil language corresponded to what he also used for translating the Christian religious texts. The final achievement at this respect would be providing a detailed picture of the Christian Tamil that missionaries contributed to spread through their predications and to codify in their grammars. A variety that appears to be the ancestor of what would have become Common Spoken Tamil just like Zvelebil suggested in his articles.

## **APPENDICES**

**APPENDIX 1 – TAMIL FORMS AND TAMIL EXAMPLES IN COSTA’S *ARTE* ALONG WITH TECHNICAL TERMS USED FOR DESCRIBING THE TAMIL FORMS**

**1.A TAMIL FORMS AND TECHNICAL TERMS**

<b>Tamil forms in Costa’s <i>Arte</i></b>	<b>gloss</b>	<b>Literal translation and/or Costa’s translation</b>	<b>Paragraph in which the form is found in Costa’s <i>arte</i></b>	<b>Technical term used by Costa</b>

VOC	vocative
VOL	volitional
VN	verbal noun
VR	verb root

*Adjectivo* - Adjectives

*Adverbio* - Adverb

*Verbo anomalous* – Anomalous verbs

*Conjunção* - Conjunction

*Disjunções* - Disjunctions

*Genero* - Genders

*Infinito adjectivado* – Adjectivated infinite

*Interrogativo* – interrogative

*Interjeção* - Interjection

*Letra* – Letter

*Negativo* – Negativo

*Nome* - Noun

*Nome numeral cardinal* – Cardinal numeral number

*Outros modos avulsos de falar* - Many other assorted modes of speaking including: *modos interrogativos* [interrogative modes]: *por que* [why], *pera que* [in order to], *naõ* [not], *quem* [who], *há quem?* [Is there anyone who?]; *Modo cauzativo* [causative mode]: *por* [because], *pera que* [in order to], *antes que/primeiro que* [before/firstly], *depois que* [after that], *ate que* [until, until when], *em quanto* [while], *ja que* [since], *em tanto que* [as soon as], *em ves (de)* [Instead/Instead of]; *Modo asseverativo sem duvida* [assertive mode without doubt]; *Modo com duvida: parece que, tanto monta, que importa que?/que vay?/Que mais, quer si quer naõ, alem de; Modo de aptidaõ ou conveniencia; Modo comparativo.*

*Voz passiva* - Passive Voice

*Particula* - Particle

*Postposiçaõ* – Postposition

*Pronome* – Pronoun

*Pronome relativo* – Relative pronoun

*Verbo* – Verb

*Verbo substantivo* – Substantive verb

*Verbal* – verbal

With reference to the verb, the Alvaresian taxonomy of moods and tenses is extended and applied differently as the chart below shows.

MOODS							
<b>Indicative</b>	actual present	habitual present	preterit	imperfect	pluperfect	future	neg.
<b>Imperative</b>	absolute	<b>permissive</b>	prohibitive	with plea or familiarity			
<b>Optative</b>							
<b>Conjunctive</b>	with <i>cum</i>	<i>dis que</i>	<i>si</i>	<i>quam vis</i>	<i>sicut</i>	negative	
<i>Infinitive</i>	absolute	substantive					
<i>Gerund</i>							
<i>Participle</i>	adjectival	substantivated	neuter	in - <i>bilis</i>	negative		

**Chart 5 – Moods in Costa’s *Arte***

Each of these moods and tenses corresponds to a specific Tamil form. Therefore, there are four sub-types of **Imperative**, among which the Alvaresian *permissive*, and six sub-types of **Subjunctives**. They both correspond to the Tamil imperative along with periphrasis and periphrastic meanings for convening the Latin subjunctive.<sup>1</sup>

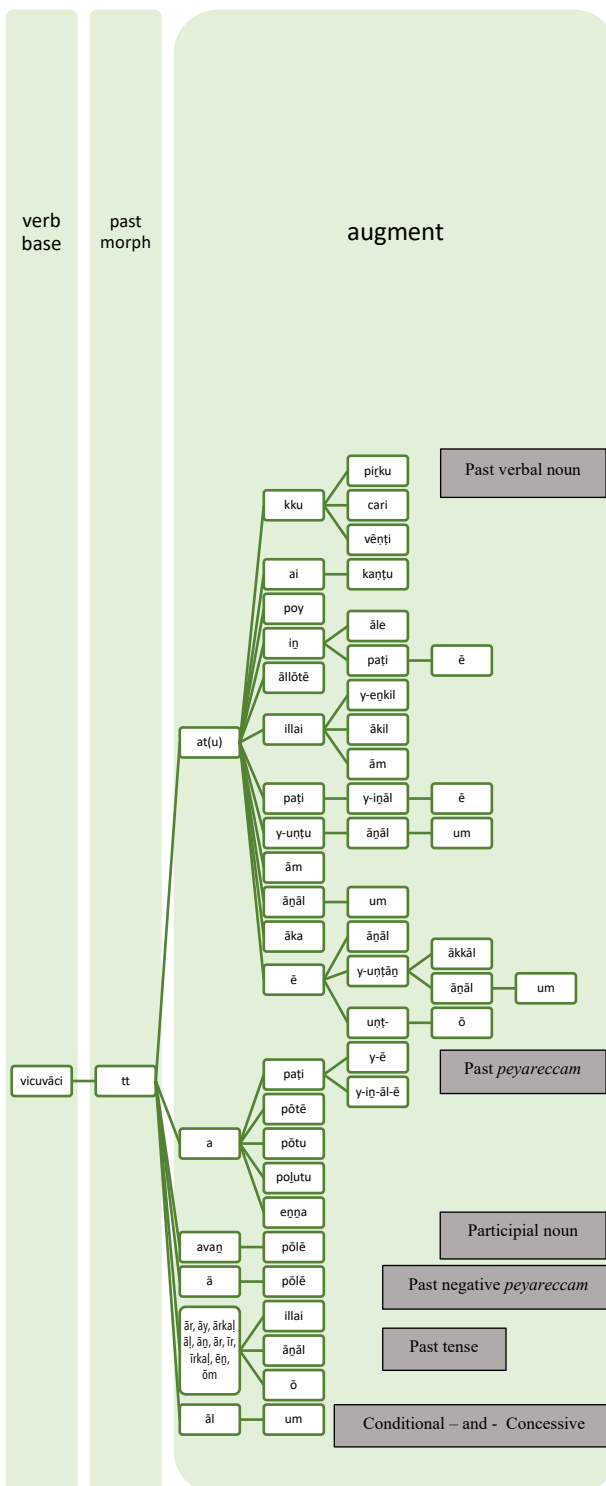

The **Infinitive** of which there are 51 occurrences and two subtypes, i.e. the *absolute* and the *substantivated*, corresponds to the Tamil infinitive and to the verbal noun respectively.

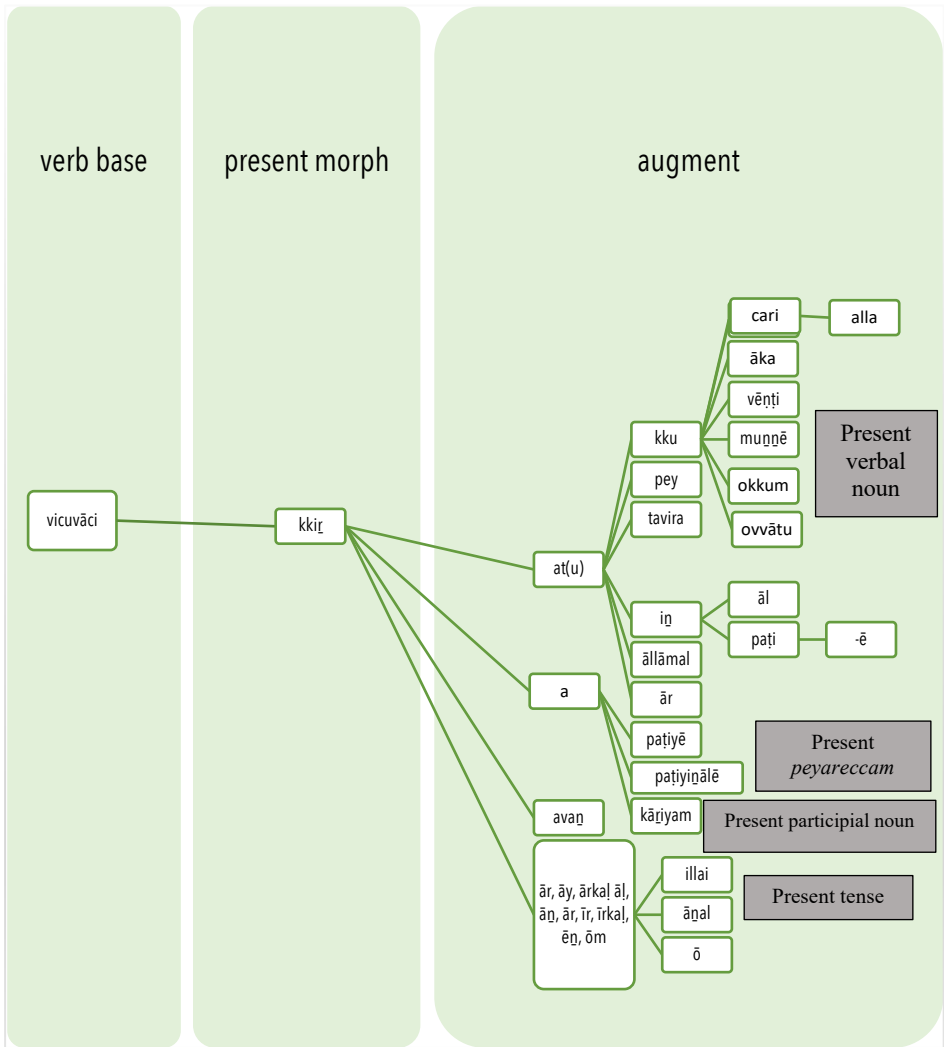

The **Gerund** corresponds to the Tamil absolute (*viñaiyeccam*) while the **participle**, of which there are 29 occurrences and four subtypes, i.e. *adjectival*, *substantivated*, *neuter*, and in *-bilis* corresponds to the Tamil *adjectival participle* (*present, past, future, and negative*), the *participial nouns*, the *verbal nouns*, and the nominalised verb *vicuvācikkal* – an untensed verbal noun obtained through suffixation of the nominalizing suffix *-al* – respectively. Then, Costa adds a section devoted to *ways of speaking* where he includes further moods.

As for the diathesis, Costa devotes a full chapter to the *passive voice* and another for the **substantive** and **anomalous verbs** where the defective Tamil verbs also find a place. As for the technical terminology used for addressing morphemes and their functions, the most commonly used term is *particle* while for morphological processes such as suffixation, Costa uses terms such as *adjunction* and *increment*.

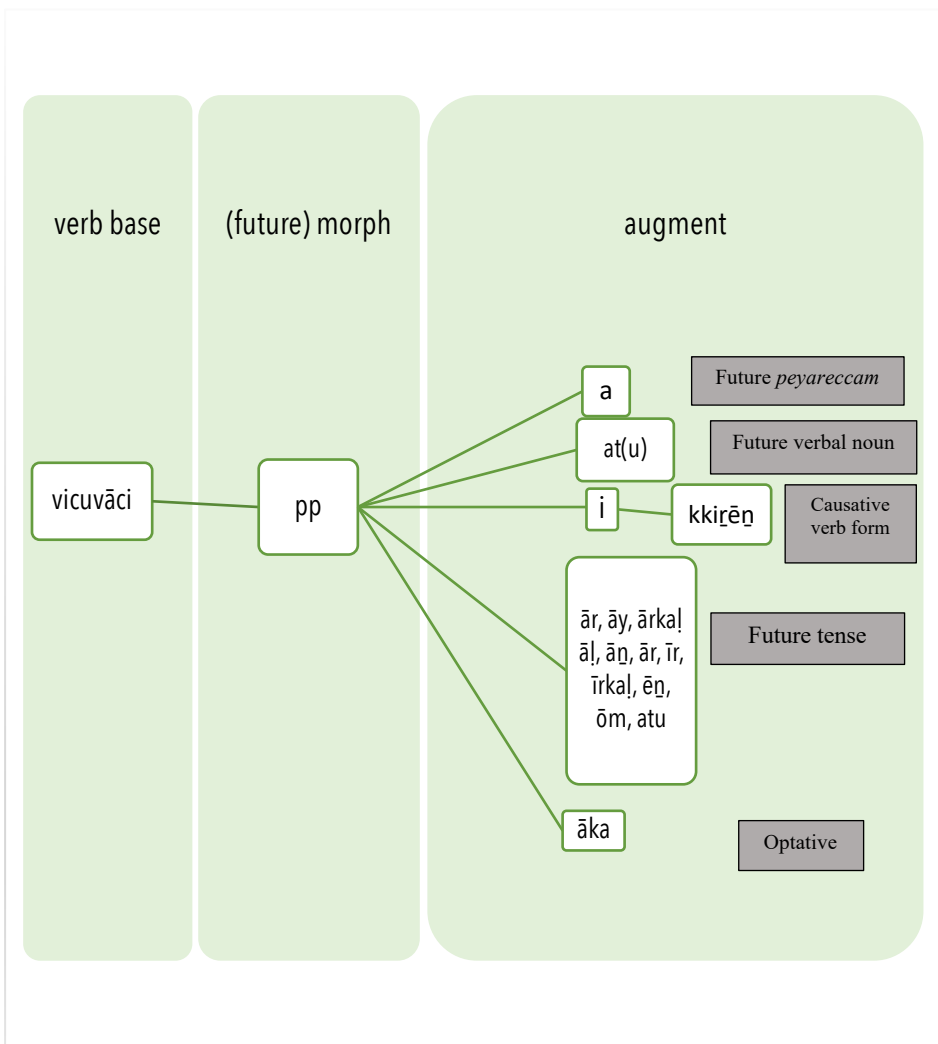

<sup>1</sup> For a detailed discussion on these moods in Costa see Muru (2021a).

## TABLE OF CONTENTS

<i>Premise</i> .....	<i>i</i>
<i>Purpose and value of this book</i> .....	<i>ii</i>
<i>Acknowledgments</i> .....	<i>iv</i>
<b>PART 1 – INTRODUCTION</b> .....	<b>2</b>
1.1 A short contextualization of the author .....	3
(a) <i>List of letters and Annual report composed by Baltasar Da Costa</i> .....	13
1.2 Manuscript copies of Costa’s <i>Arte</i> .....	14
1.2.1 <i>The Goan Manuscripts</i> .....	14
1.2.2 <i>The Vatican Manuscript</i> .....	33
1.2.3 <i>The Sloane Manuscript</i> .....	38
1.3 Costa’s manuscripts: a general overview.....	51
1.4 Criteria for selection and transcription of the Portuguese manuscript.....	67
<b>PART 2 - ARTE TAMUL COMPOSTA PELLO PADRE BALTASAR DA COSTA DA COMPANHIA DE JESUS</b> .....	<b>71</b>
<i>Titulo 2º Em que se poem a recopilação da Arte Tamulica. Composta pello P(ad)re Baltasar da Costa da Companhia de Jesus</i> .....	72
Capitulo 1º – Dos Nomes, e Pronomes.....	73
Primeiro Nome.....	73
2º Nome.....	75
3º Nome.....	76
4º Nome.....	77
Dos Pronomes .....	78
Do Relativo .....	85
Dos adjectivos.....	86
Dos Generos.....	89
Cap[itulo] 2º – Da Conjugação dos Verbos .....	90
Presente actual do indicativo .....	91
Formações do negativo .....	92
Preterito perfeito .....	93
Preterito plusquamperfeito.....	95
Futuro affirmativo vulgar.....	95
Imperativo absoluto .....	99
Imperativo Permissivo .....	101
Imperativo prohibitivo .....	102
Impera[tiv]o com rogo ou familiaridade.....	103

Modo optativo .....	104
Modo conjuntivo <i>cum</i> .....	105
Conjuntivo <i>dis q(ue)</i> .....	107
Conjuntivo Condicional <i>Se</i> .....	111
Conjuntivo <i>quamvis</i> .....	115
Conjuntivo <i>sicut</i> .....	116
Modo infinito absoluto.....	120
Infinito Sustantivo.....	120
Gerundio .....	121
Participios .....	122
Participios em <i>bilis</i> .....	123
M[ui]tos outros modos de fallar avulsos.....	123
Modos interrogativos .....	123
Porque .....	124
Pera Q(ue) .....	125
Naõ .....	125
Quem? .....	126
Ha quem? .....	126
Modo cauzativo. Por .....	127
Pera <del>que</del> crer .....	130
Antes que. Primeiro que.....	131
Depois que .....	132
Ate, Ateque .....	132
Em quanto .....	133
Ja que .....	133
Em Tanto que.....	134
Em ves. Em ves de.....	134
Modo asseverativo sem duvida.....	135
Modo com duvida. Parece que.....	135
Tanto Monta.....	136
Que importa, que vay? q(ue) mais monta? .....	136
Quer si; quer naõ .....	137
Alem de.....	137
Modo de aptidaõ ou conveniência .....	138
Modo Comparativo .....	138
Cap(itolo). 3º - Da Vos Passiva .....	139
Cap(itolo). 4º – Da composiçaõ dos verbos.....	141
Cap(itolo). 5º – Do verbo sustantivo et Anomalos .....	144
Verbos Anomalos.....	148
உண்டு.....	148
இலலை .....	149
வெணும் .....	150
பொதும .....	151

கூடும .....	151
ஓககூம com 'o' breve .....	152
Cap. 6º – Das mais partes da oraçaõ .....	152
Posposiçõs .....	152
Adverbios .....	153
Interjeiçõs .....	154
Conjunçõs .....	155
Disjunçõs .....	155
<i>Titulo 3º. Daõse algunas regras pera preteritos Futuros Imperativos e plurais dos preteritos .....</i>	156
Dos futuros .....	165
Dos Imperativos .....	167
Dos infinitos .....	168
Dos plurais .....	171
<i>Titulo 4º – Regras de Ortografia .....</i>	175
Das 4 letras க. ச. த. ழ .....	177
<i>Titulo 5º – Da collocaçaõ das letras Tamuis pella ordem do nosso Alfabeto .....</i>	180
<i>Titulo 6º – De algũs sinais que neste Vocabulario se observaõ .....</i>	191
Tamil letters .....	193
<i>Titolo primeiro .....</i>	194

**PART 3 – TAMIL ARTE COMPOSED BY FATHER BALTASAR DA COSTA OF THE COMPANY OF JESUS..... 197**

<i>The second Title which includes the recapitulation of the Arte Tamulica, composed by Father Balthazar da Costa of the Company of Jesus.....</i>	198
First Chapter – Of Nouns and Pronouns .....	200
First noun .....	200
2 <sup>nd</sup> Noun .....	202
3 <sup>rd</sup> Noun.....	203
4 <sup>th</sup> Noun.....	204
Of Pronouns .....	204
Of the Relative .....	210
Of Adjectives .....	211
Of Genders .....	213
Second Chapter – Of the Conjugation of Verbs .....	214
Indicative Actual Present .....	215
Forms of the negative.....	216
Preterit perfect [Past perfect tense] .....	216
Preterpluperfect [Past perfect tense] .....	218
Ordinary Affirmative Future.....	218
Imperative Absolute.....	221
Permissive Imperative.....	223
Prohibitive Imperative .....	223

Imperative with plea or familiarity .....	225
Optative mode .....	225
Conjunctive mode with <i>cum</i> .....	227
Conjunctive <i>dis que</i> [one says that/they say that] .....	229
Conditional Conjunctive <i>if</i> .....	233
Conjunctive <i>quamvis</i> .....	236
Conjunctive <i>sicut</i> .....	237
Infinite Absolute Mode .....	242
Infinite Substantive .....	243
Gerund.....	244
Participle .....	245
Participle in <i>-bilis (-able)</i> .....	246
Many other assorted modes of speaking.....	248
Interrogative modes .....	248
Why.....	249
In order to.....	249
Not.....	250
Who? .....	250
Is there (anyone) who? .....	251
Causative mode. <i>Because</i> .....	251
In order to.....	254
Before. Firstly .....	254
After that .....	255
Until, until when .....	256
While.....	256
Since.....	256
As soon as .....	257
Instead. Instead of.....	257
Assertive mode without doubt .....	258
Mode with doubt, it seems that .....	258
The same as.....	259
So what. What's happening? What does it matter? .....	260
Whether or not .....	260
Besides .....	261
Mode of aptitude or of convenience .....	261
Comparative mode .....	262
Third Chapter – Of the Passive Voice .....	262
Fourth Chapter – Of the composition of verbs .....	264
Fifth Chapter – Of substantive and anomalous verbs .....	266
Anomalous verbs .....	269
உண்டு.....	269
இலலை .....	270
வெணும .....	271

பெர்துட .....	272
கூடுட .....	272
ஓககுட with short ‘o’ .....	272
Chapter 6 – Of the other parts of speech.....	272
Postpositions .....	273
Adverbs .....	273
Interjections.....	274
Conjunctions .....	274
Disjunctions .....	275
<i>3<sup>rd</sup> Title – Wherein some rules are given for preterit future imperatives and plurals of preterits.....</i>	<i>275</i>
Of futures .....	282
Of imperatives.....	283
Of infinites .....	284
Of plurals .....	286
<i>4<sup>th</sup> Title – Spelling rules .....</i>	<i>289</i>
Of the 4 letters க (k) ச (c). த (t). ட (p).....	291
<i>5<sup>th</sup> Title – Collocation of the Tamil letters {{following}} the order of our alphabet.....</i>	<i>293</i>
<i>6<sup>th</sup> Title – About some signs that are used in this dictionary.....</i>	<i>300</i>
<i>First Title .....</i>	<i>302</i>
<b>PART 4 – CONCLUSION.....</b>	<b>305</b>
4.1 Premise.....	306
4.2 The early <i>grammaticisation</i> of the Tamil language.....	308
4.3 The Portuguese Jesuit grammatical tradition: Álvares’ grammar.....	309
4.3.1 <i>Following Koerner’s principle of contextualisation .....</i>	<i>310</i>
4.3.2 <i>Following Koerner’s principle of immanence.....</i>	<i>310</i>
4.3.3 <i>Following Koerner’s principle of adequacy.....</i>	<i>317</i>
4.3.4 <i>Grammaire Latine Étendue: Partes Orationis .....</i>	<i>319</i>
