# The Food Commons in Europe: Preliminary works concerning the case of Montenegro

Montenegro 13 812 km<sup>2</sup>

37% is considered farming land which means mainly pastures and meadows very often (nearly half) governed commonly

42% is considered forests of which 67% owned by the state, while the rest is privately (a part communally owned)

0,684% arable land mainly not common

Possible communal management of river flows and fishing but minor
