

CORRIGENDUM**WILEY**

The authors would like to draw the reader's attention to an error in the following article:

Alvar Agustí, Eleni Rapsomaniki, Richard Beasley, Rod Hughes, Hana Müllerová, Alberto Papi, Ian D. Pavord, Maarten van den Berge, Rosa Faner for the NOVELTY Study Investigators. Treatable traits in the NOVELTY study. *Respirology* 2022; 27 (11): 929–940 <https://onlinelibrary.wiley.com/doi/10.1111/resp.14325>

There is a mislabelling in Table 2 of the article, which reports patient characteristics. The characteristic currently labelled as 'Frequent productive cough, %' should instead be labelled as 'Chronic bronchitis, %'. The difference between these two labels is due to how the data for frequent productive cough and chronic bronchitis were collected in the NOVELTY study. This mislabelling has no impact on the discussion or conclusion of the article.

The authors apologize for this error and any confusion it may have caused.
