**HAL** is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

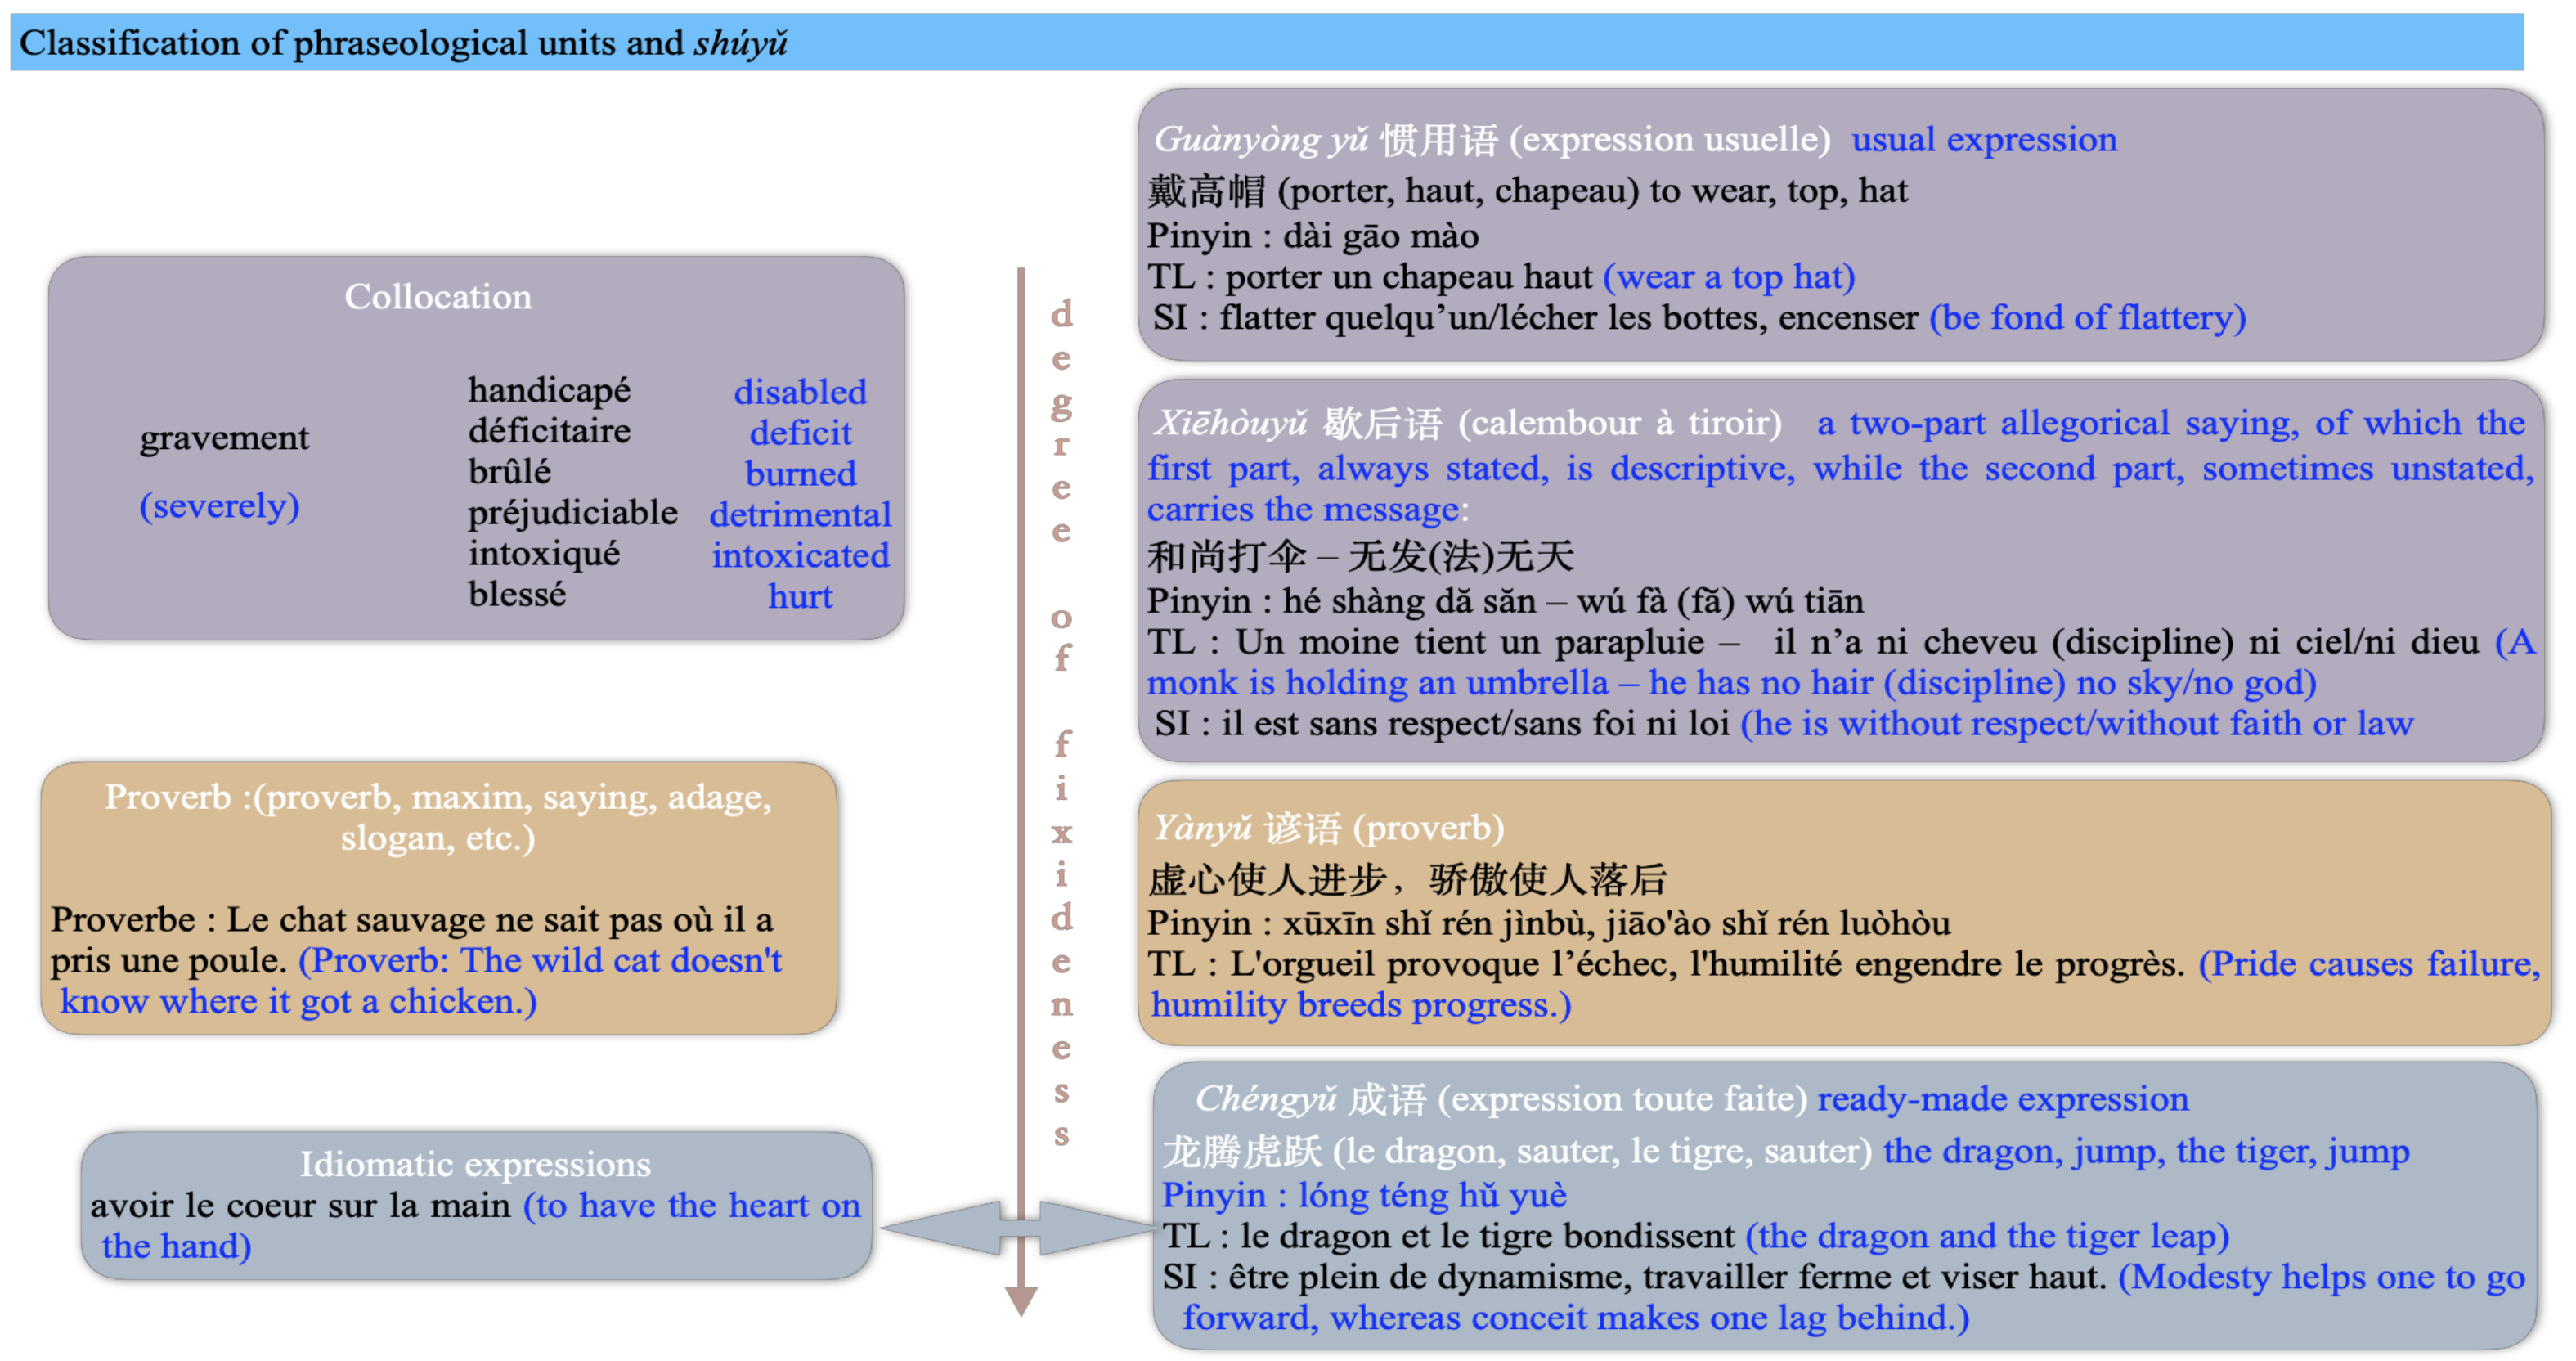

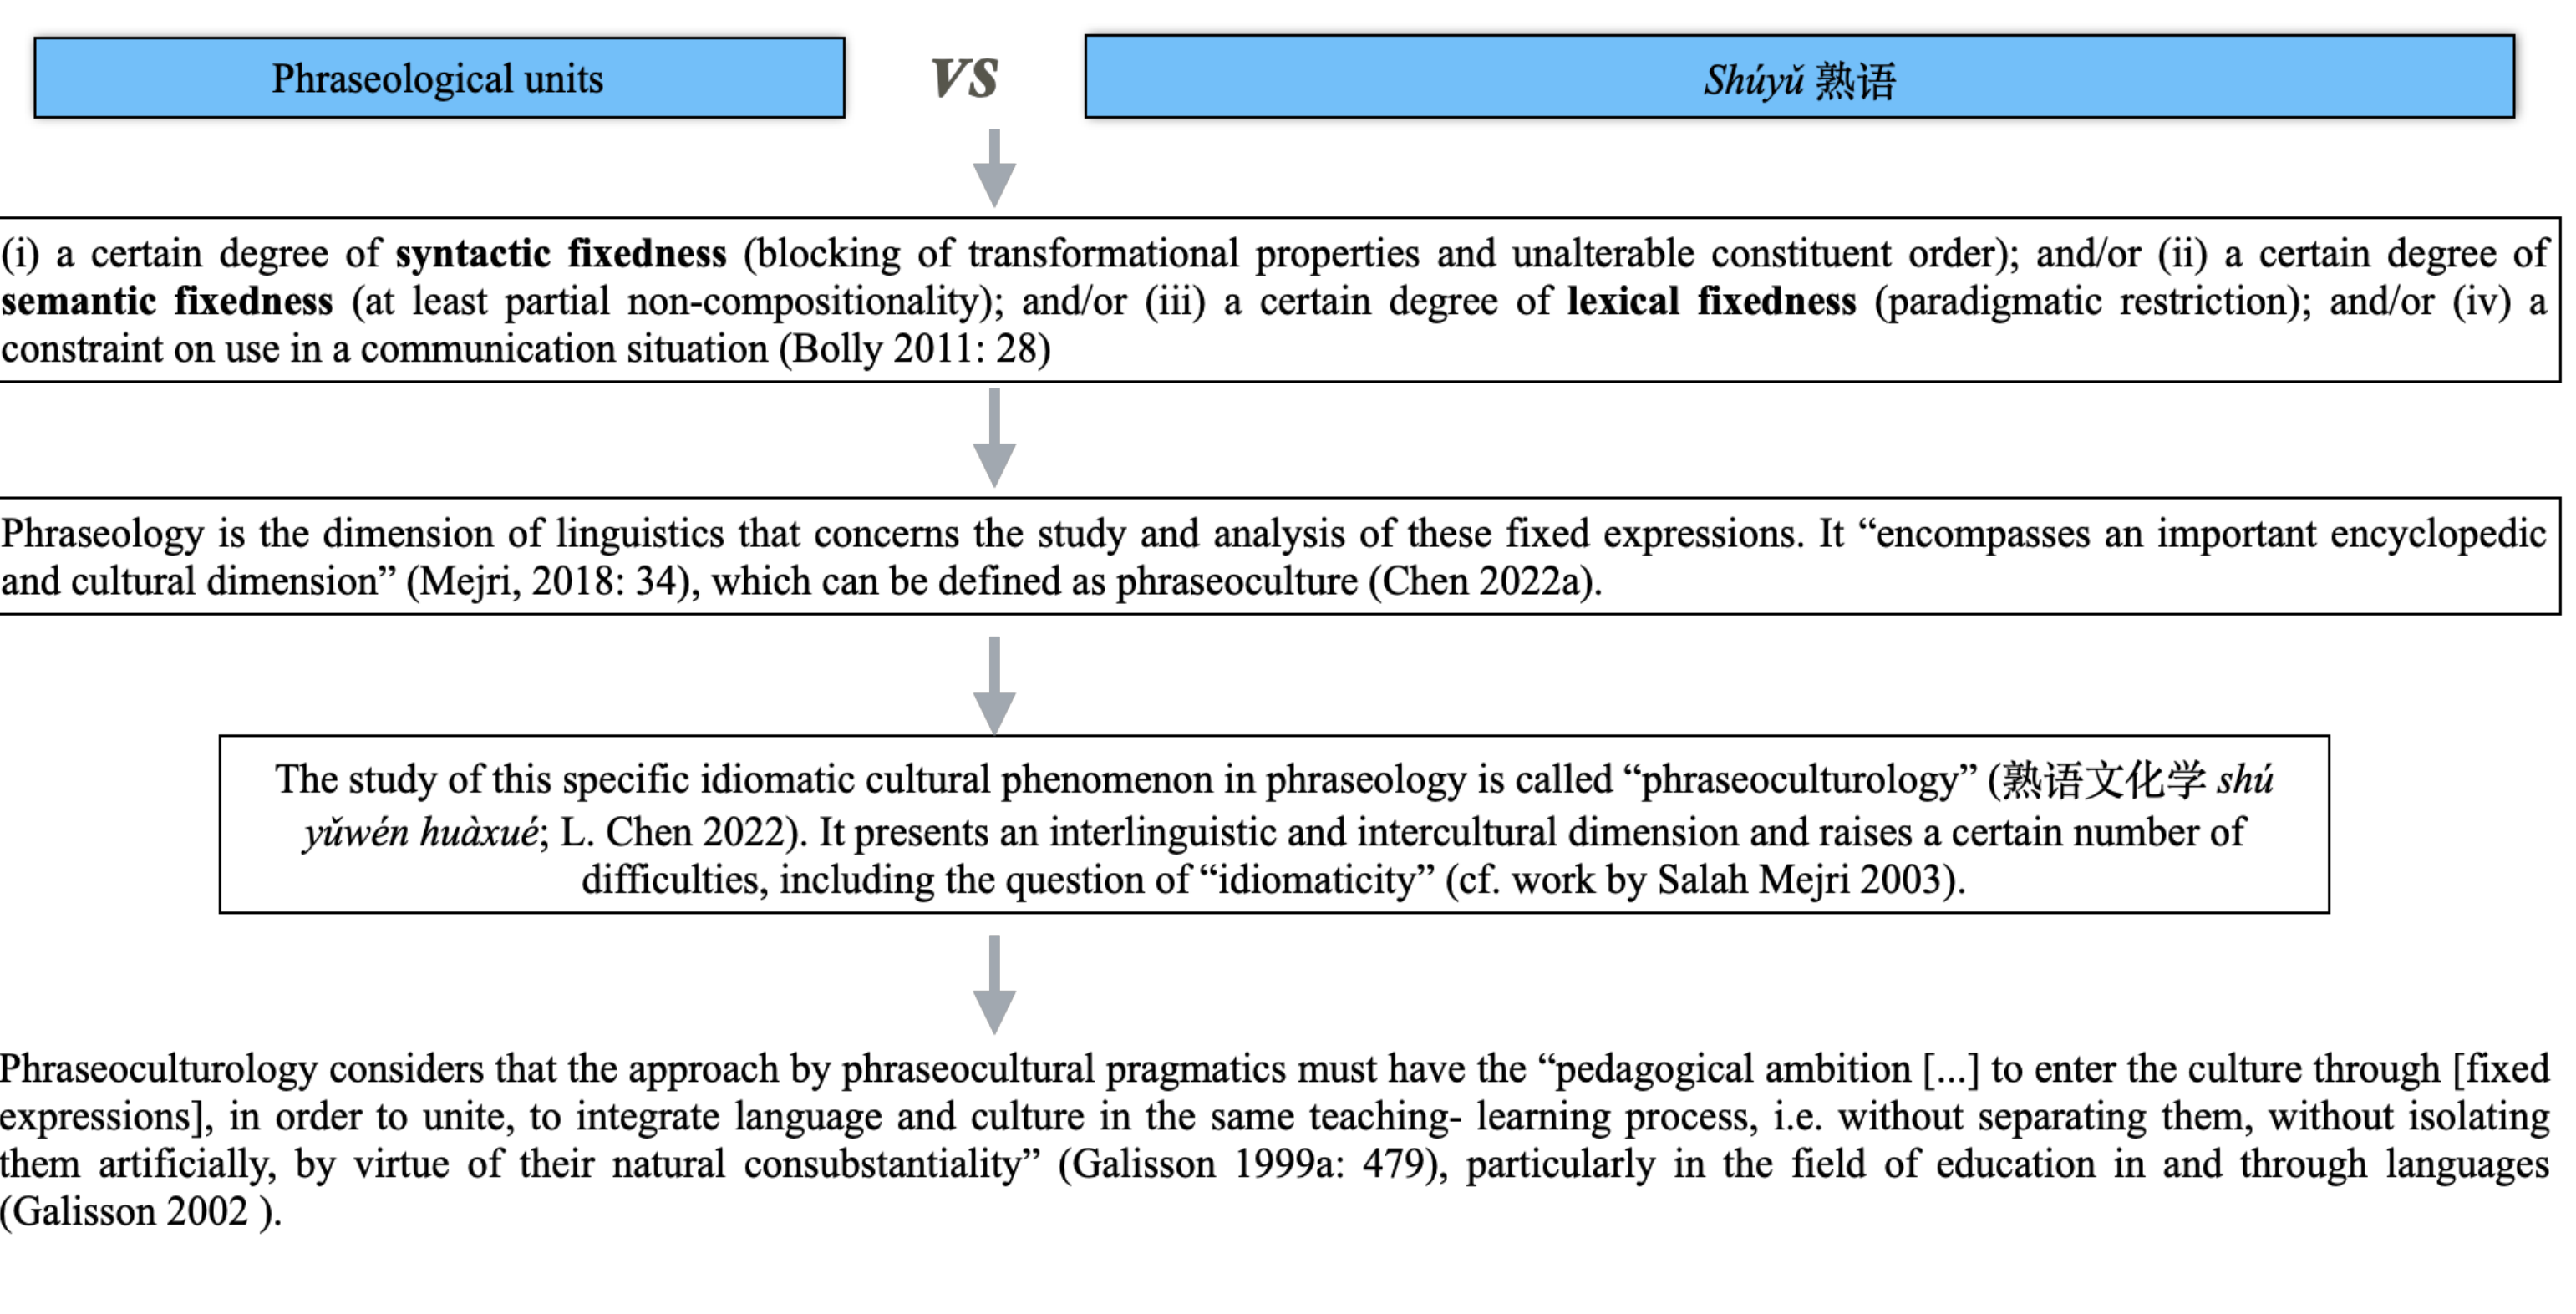

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

# Contrastive analysis of the idiomaticity of idiomatic expressions in French and Chinese

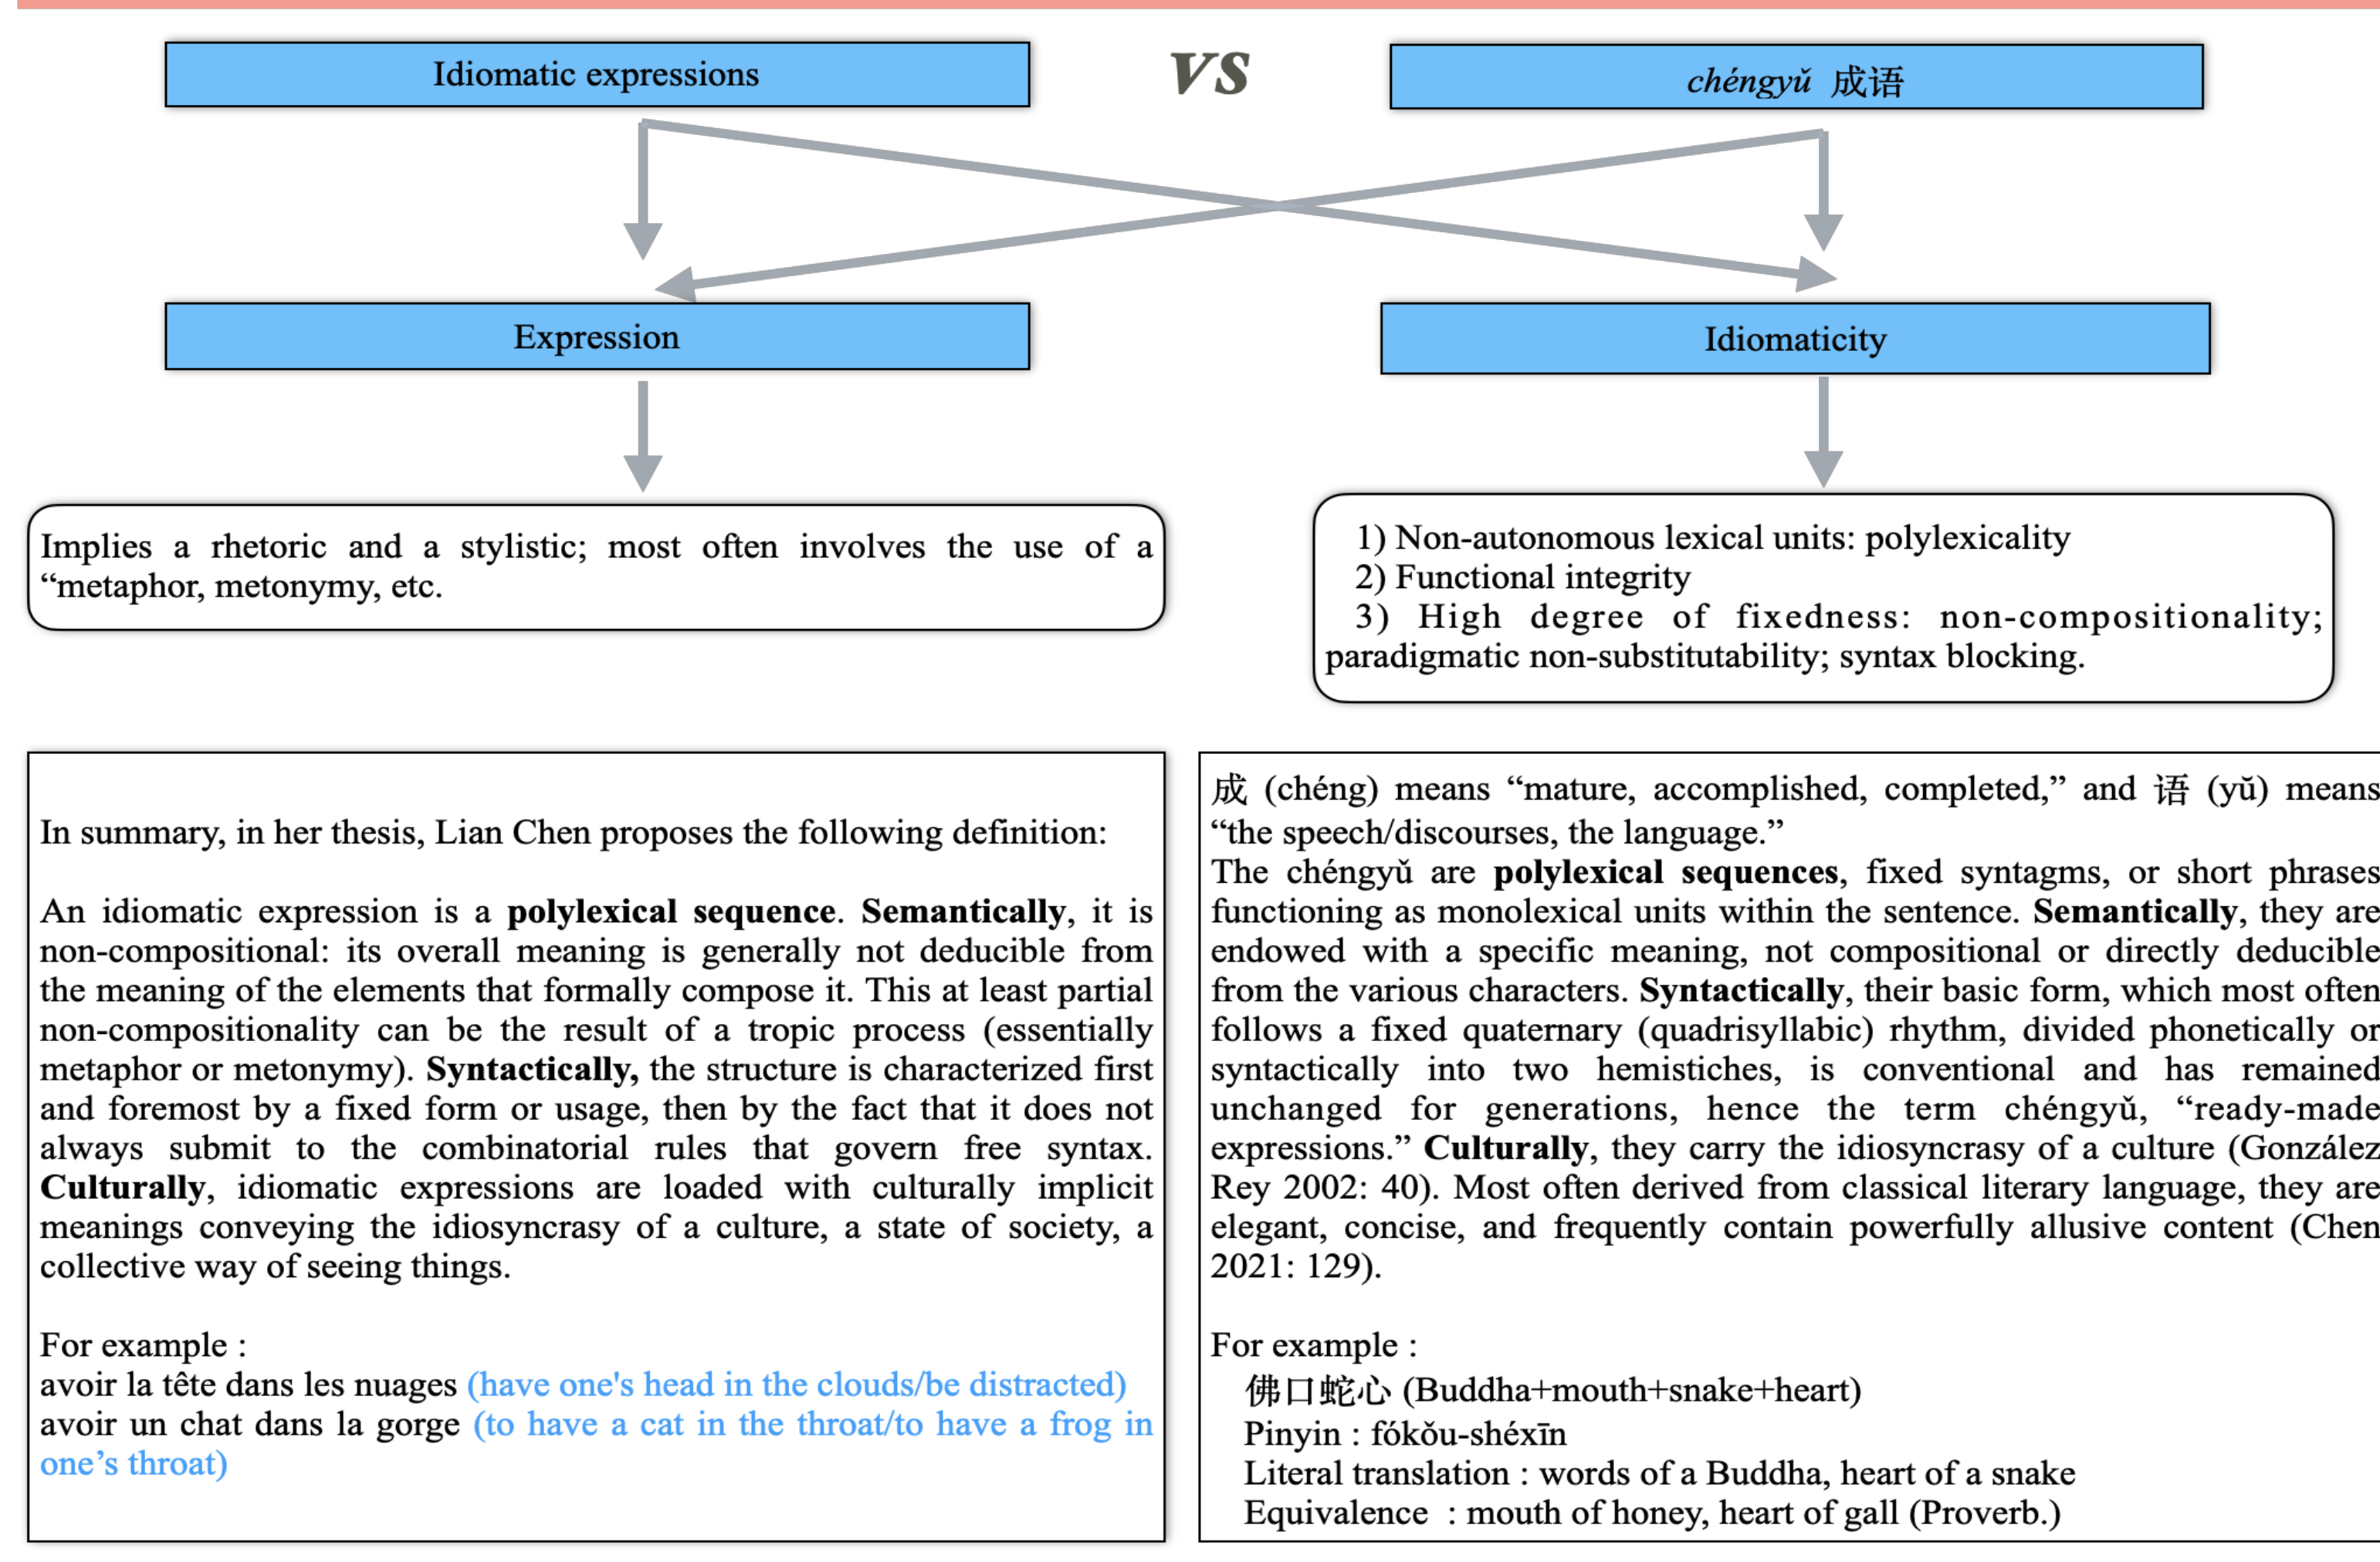

CHEN Lian 陈恋 loselychen@gmail.com

PhD in language science at Cergy-Paris University (LT2D-Jean Pruvost Centre laboratory)  
 Temporary teaching and research associate (ATER) in Chinese linguistics at the University of Artois France.

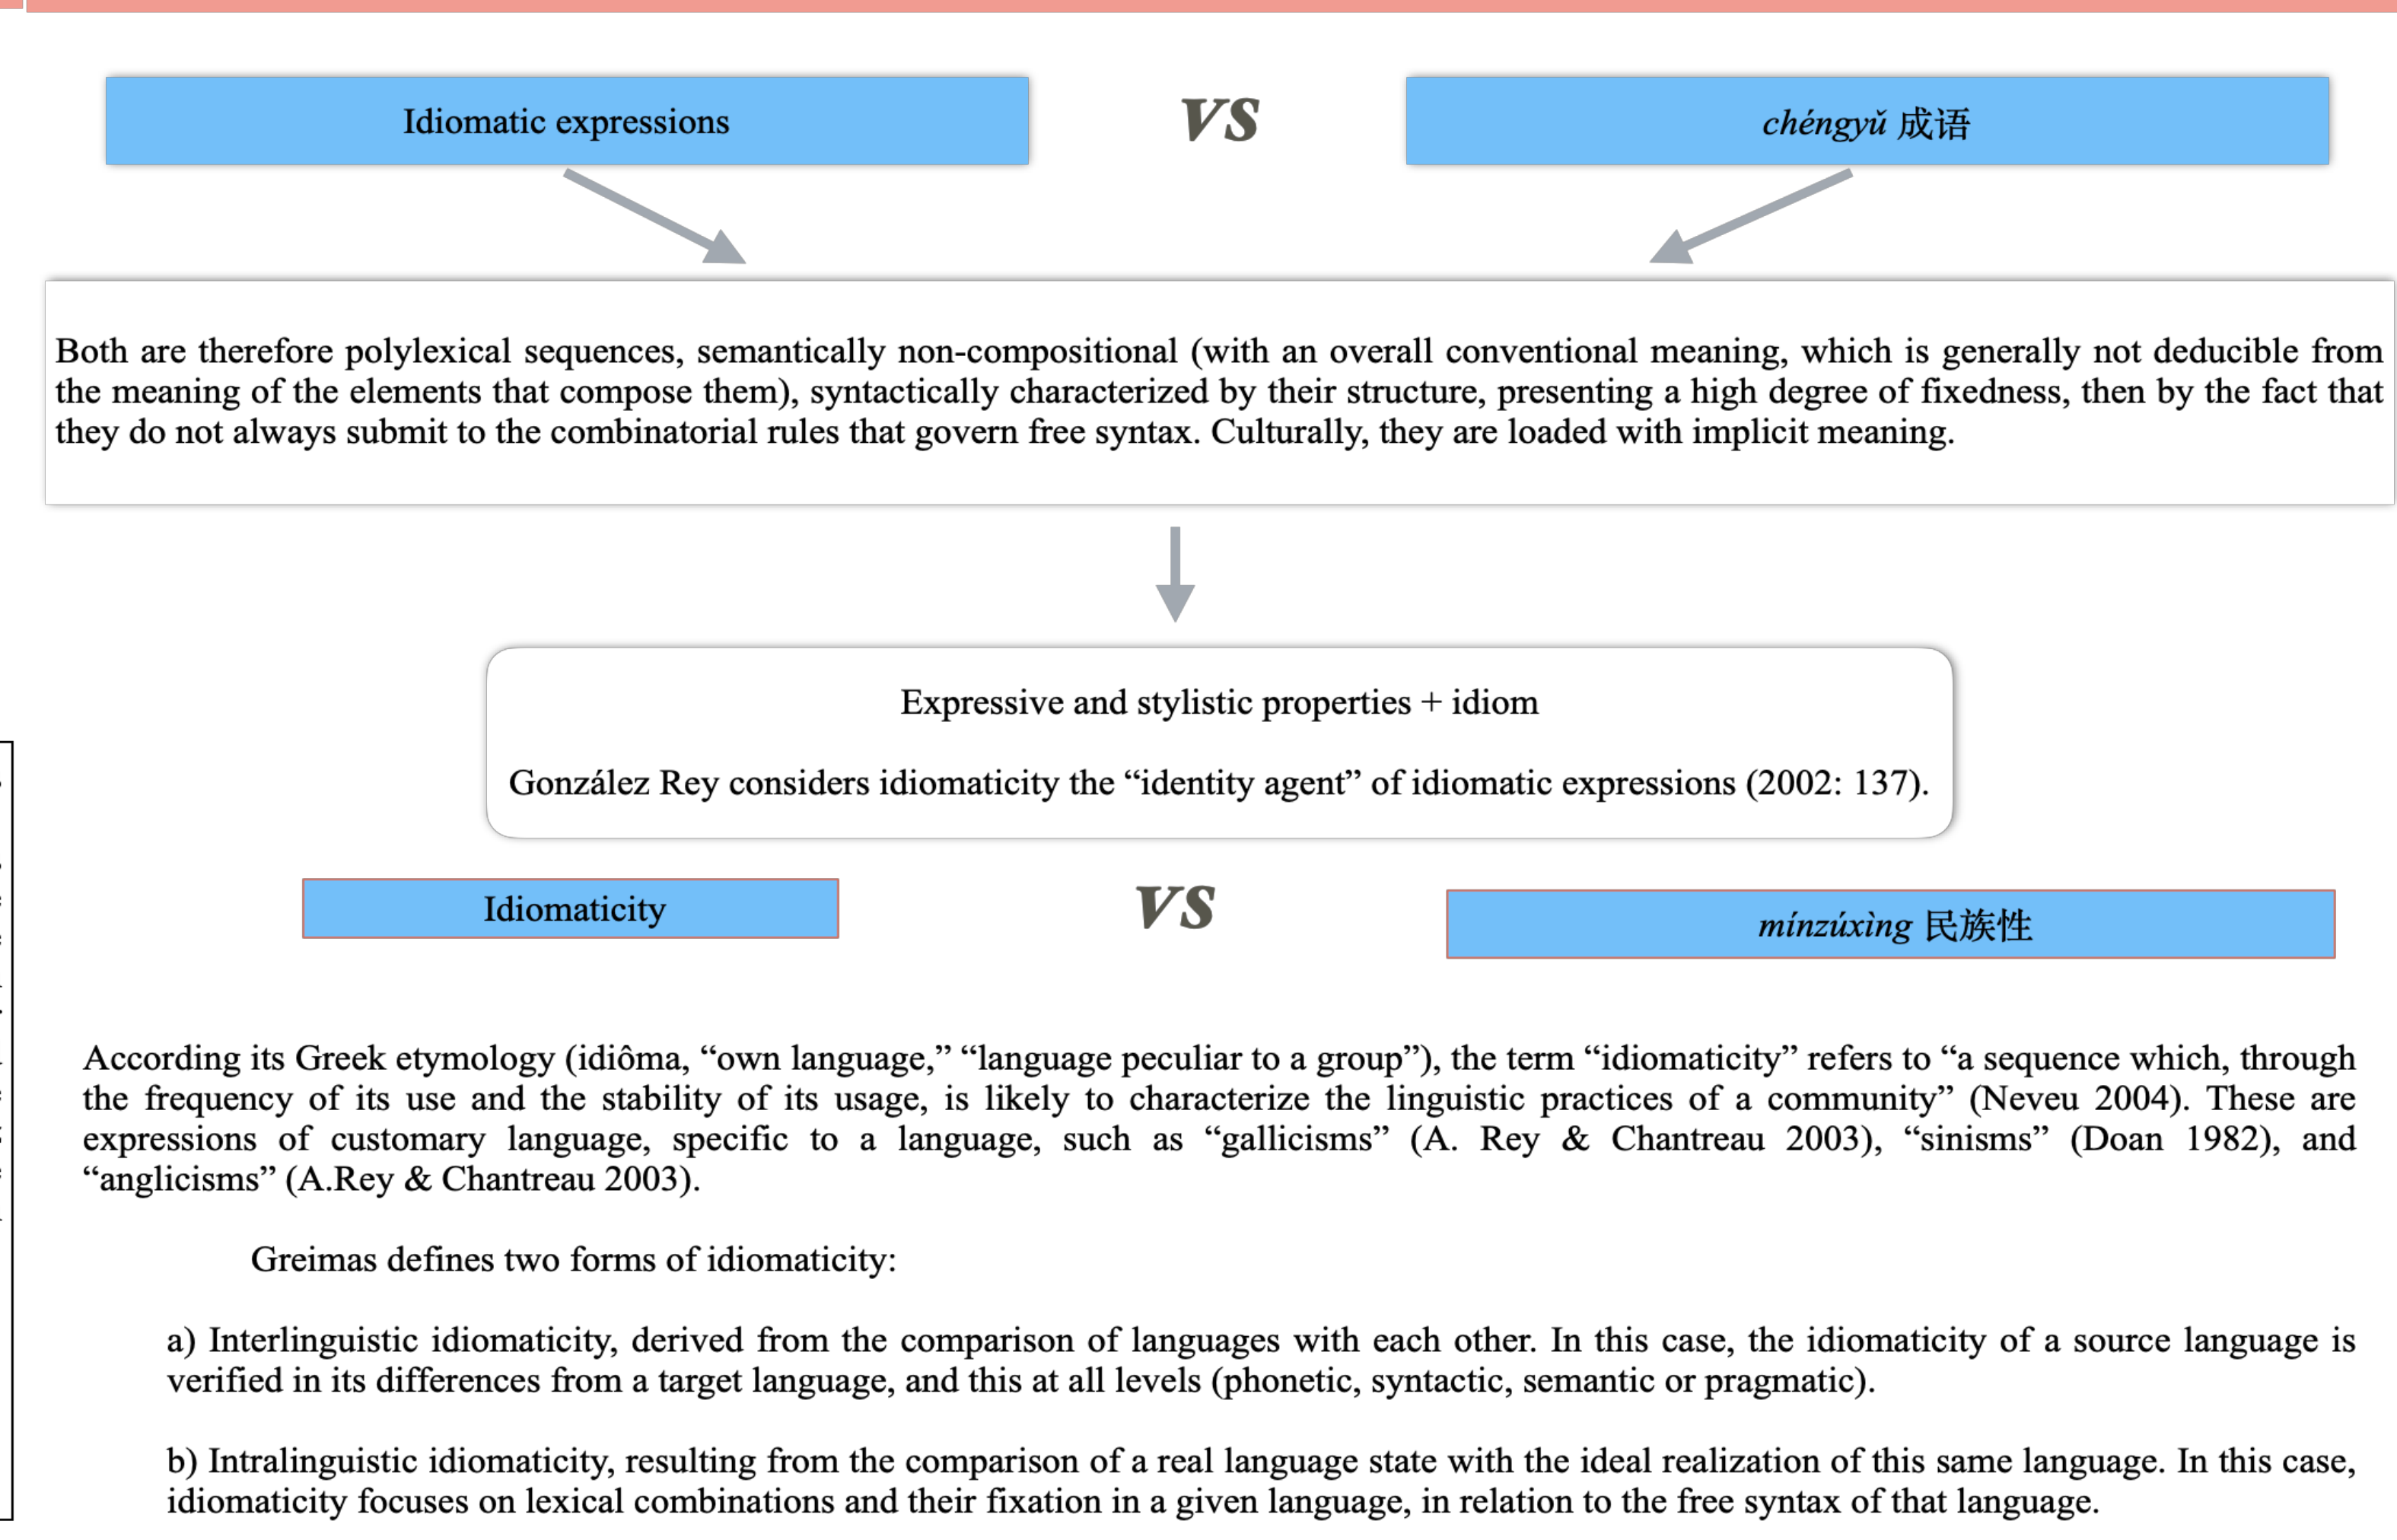

## 1 Phraseology and Phraseological units

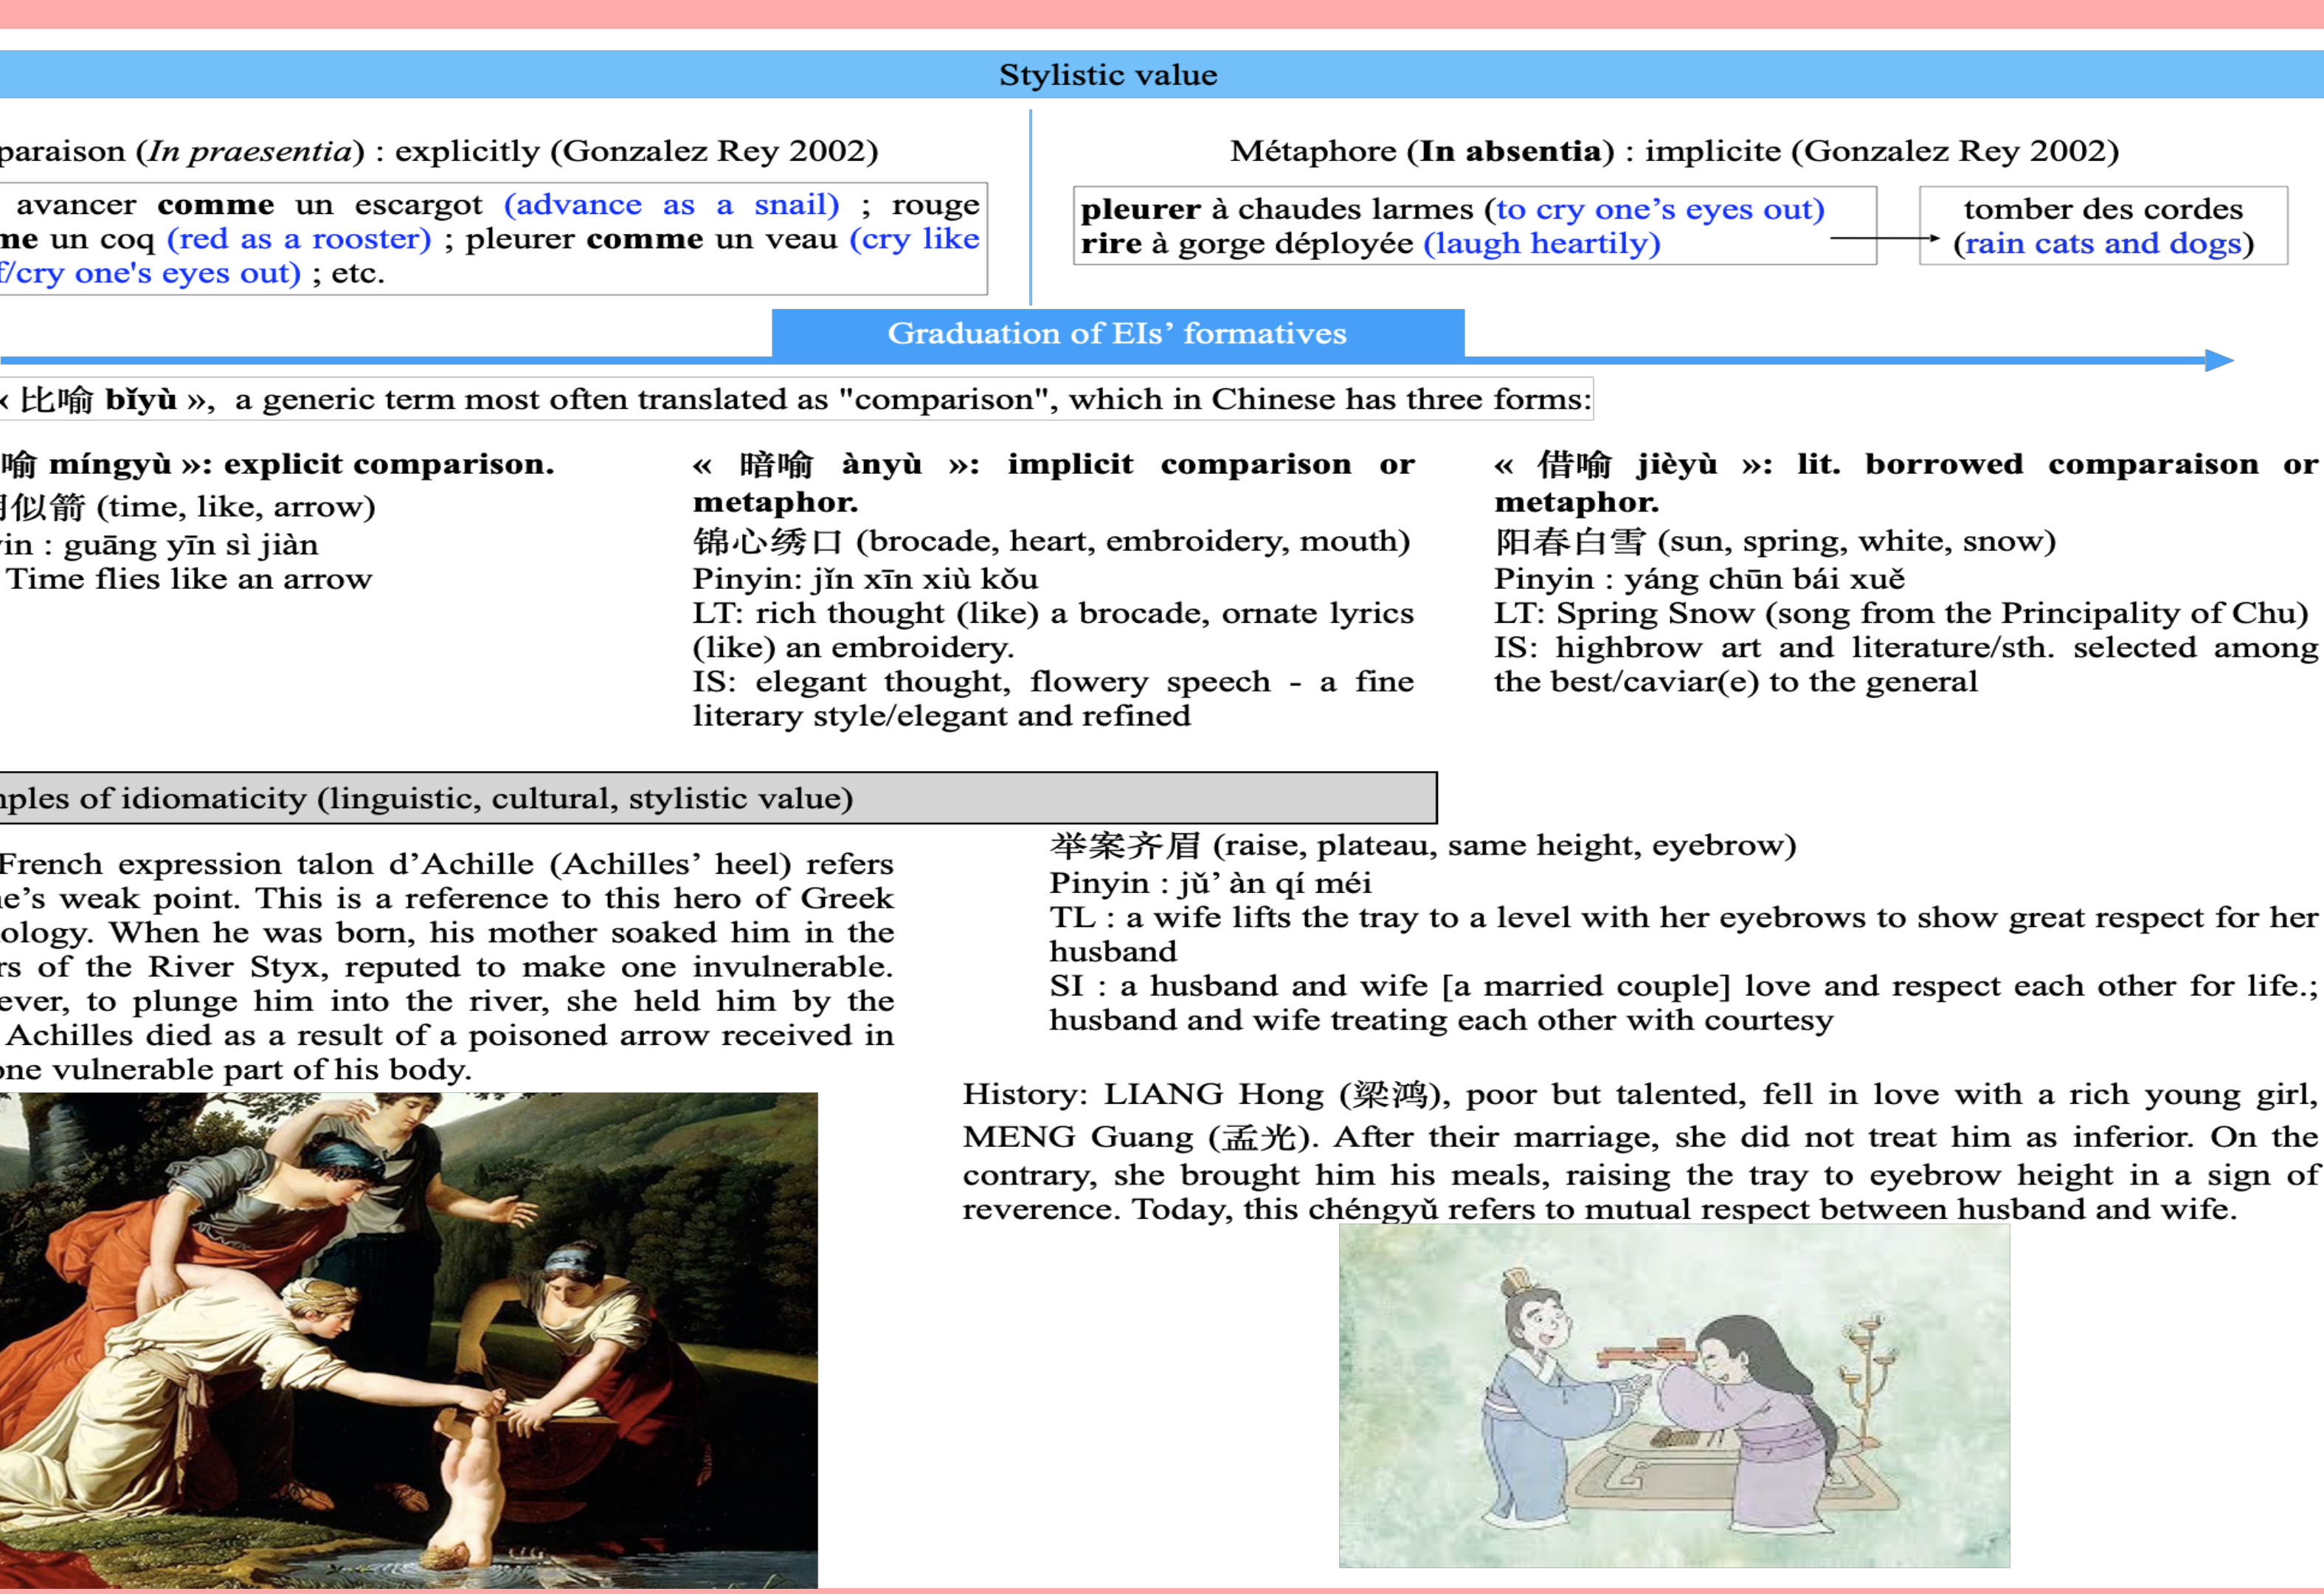

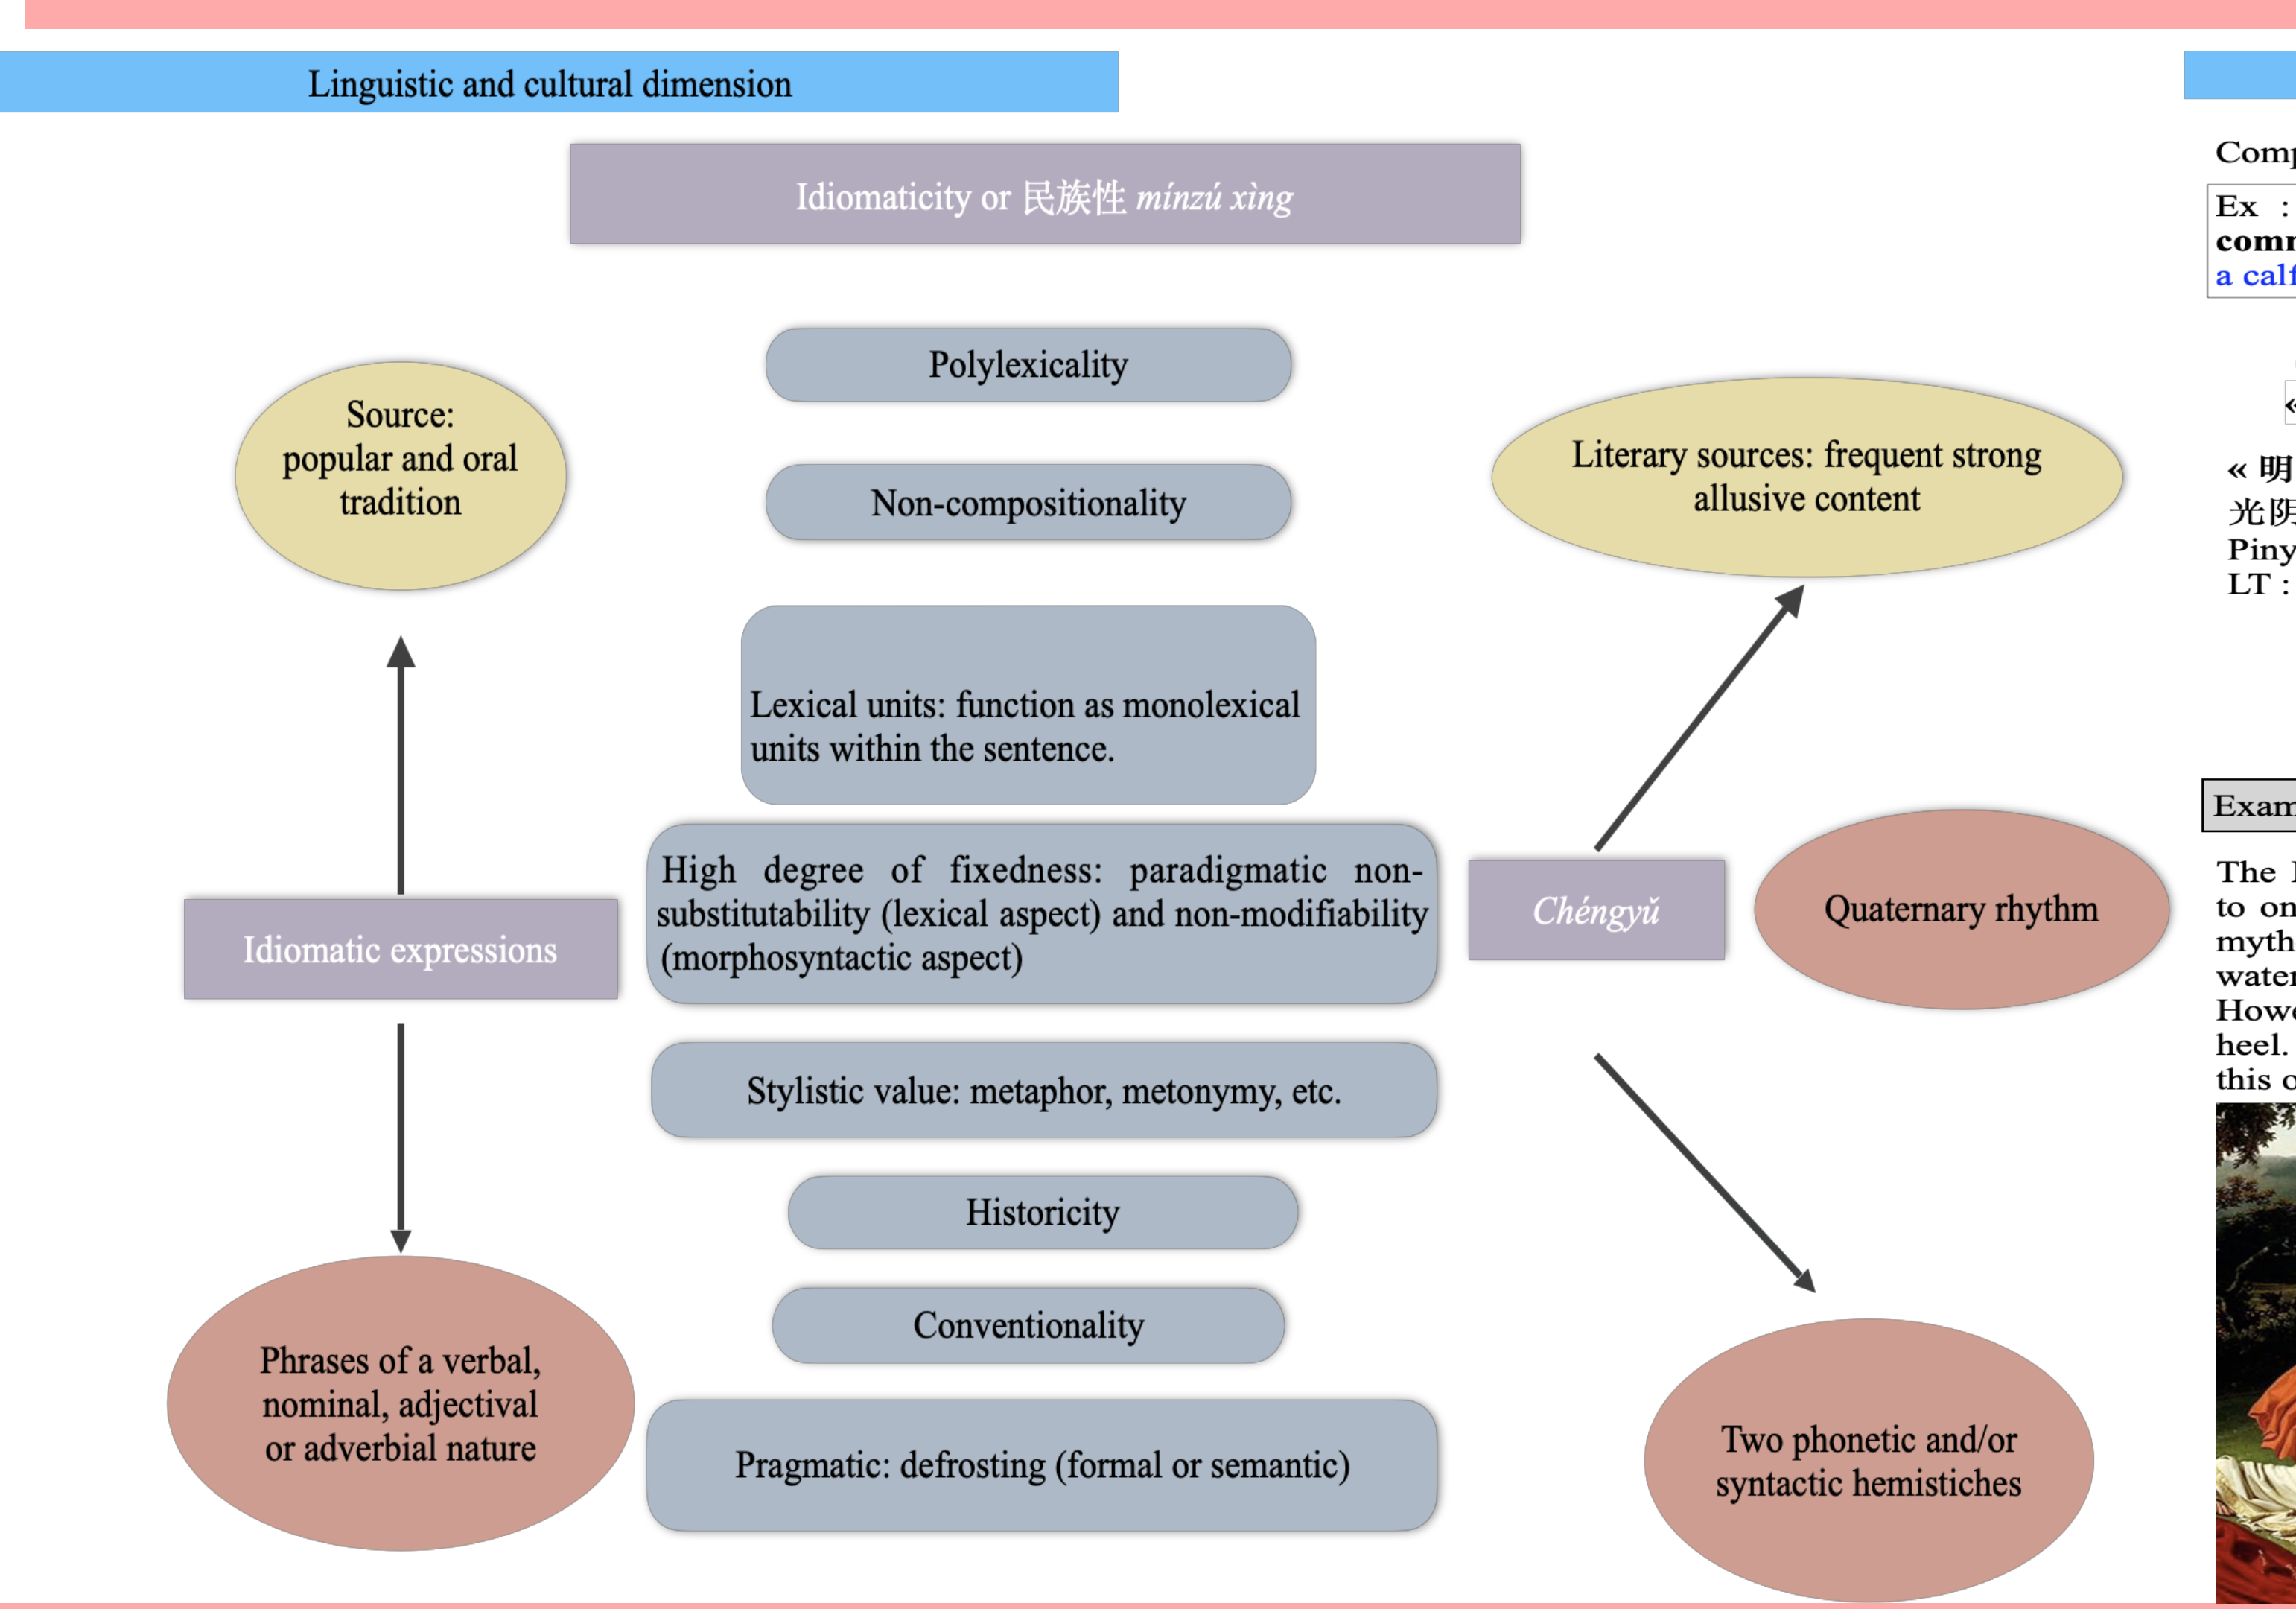

## 2 French idiomatic expressions and Chinese chéngyǔ

## 3 Idiomaticity = specific to a language

## 4 Contrastive analysis of the idiomaticity characteristics of IEs in French and Chinese

## 5 Conclusion

In conclusion, idiomatic expressions and chéngyǔ have many similar characteristics. From a linguistic point of view, these are non-sentence phrases that are rarely used in isolation. They are polylexical sequences, semantically non-compositional, with non-summative and "formal, non-analyzable meaning" (TAMBA, 2011). Lexically and syntactically fixed, they are not subject to diachronic evolution. In both languages, expressions appear as syntagms (nominal, adverbial, adjectival, and verbal) or function as a lexical moneme (noun, adjective, or verb) within a sentence. Their idiomaticity is also strongly linked to culture, carrying a certain historicity and conventionality. However, the idiomaticity (intra- and interlinguistic) of idiomatic expressions and chéngyǔ presents some differences. The former do not have as specific structure as in Chinese, where the quaternary rhythm (or quadrisyllabism) dominates. French idiomatic expressions come from common usage or even popular tradition, while chéngyǔ originate from literary sources and are of a bookish or scholarly nature, often with a strong allusive content.
