HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

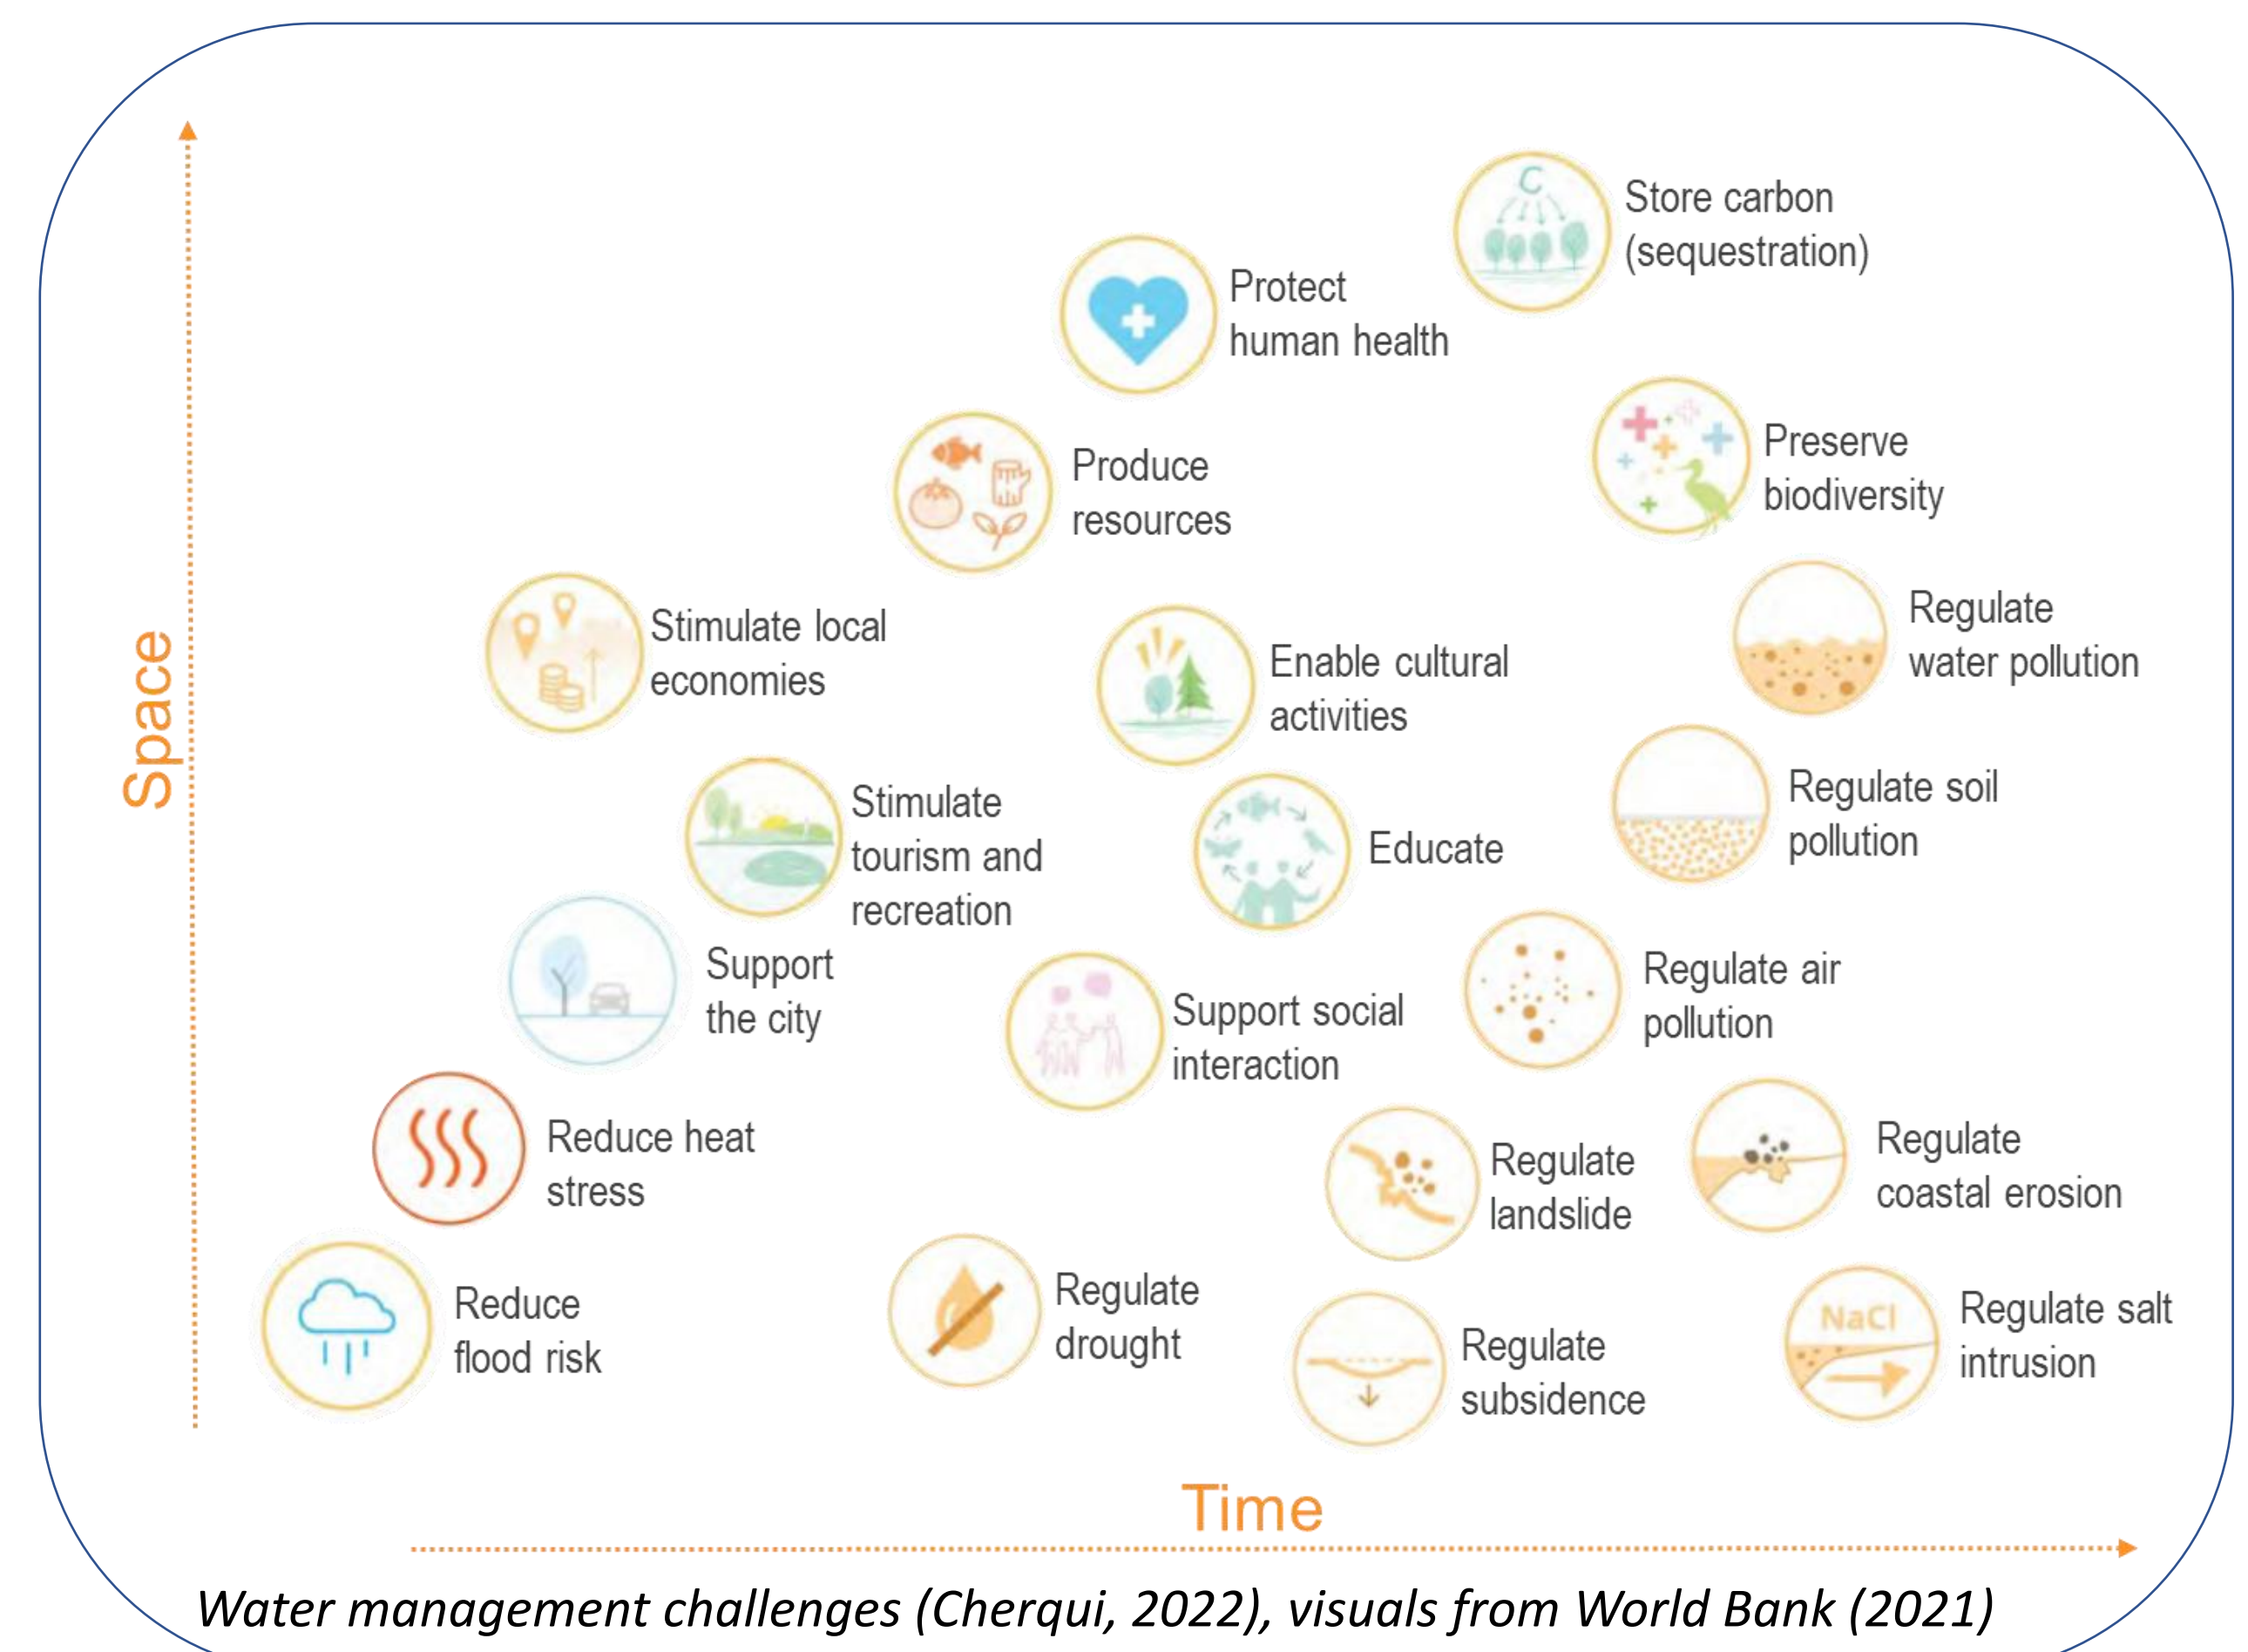

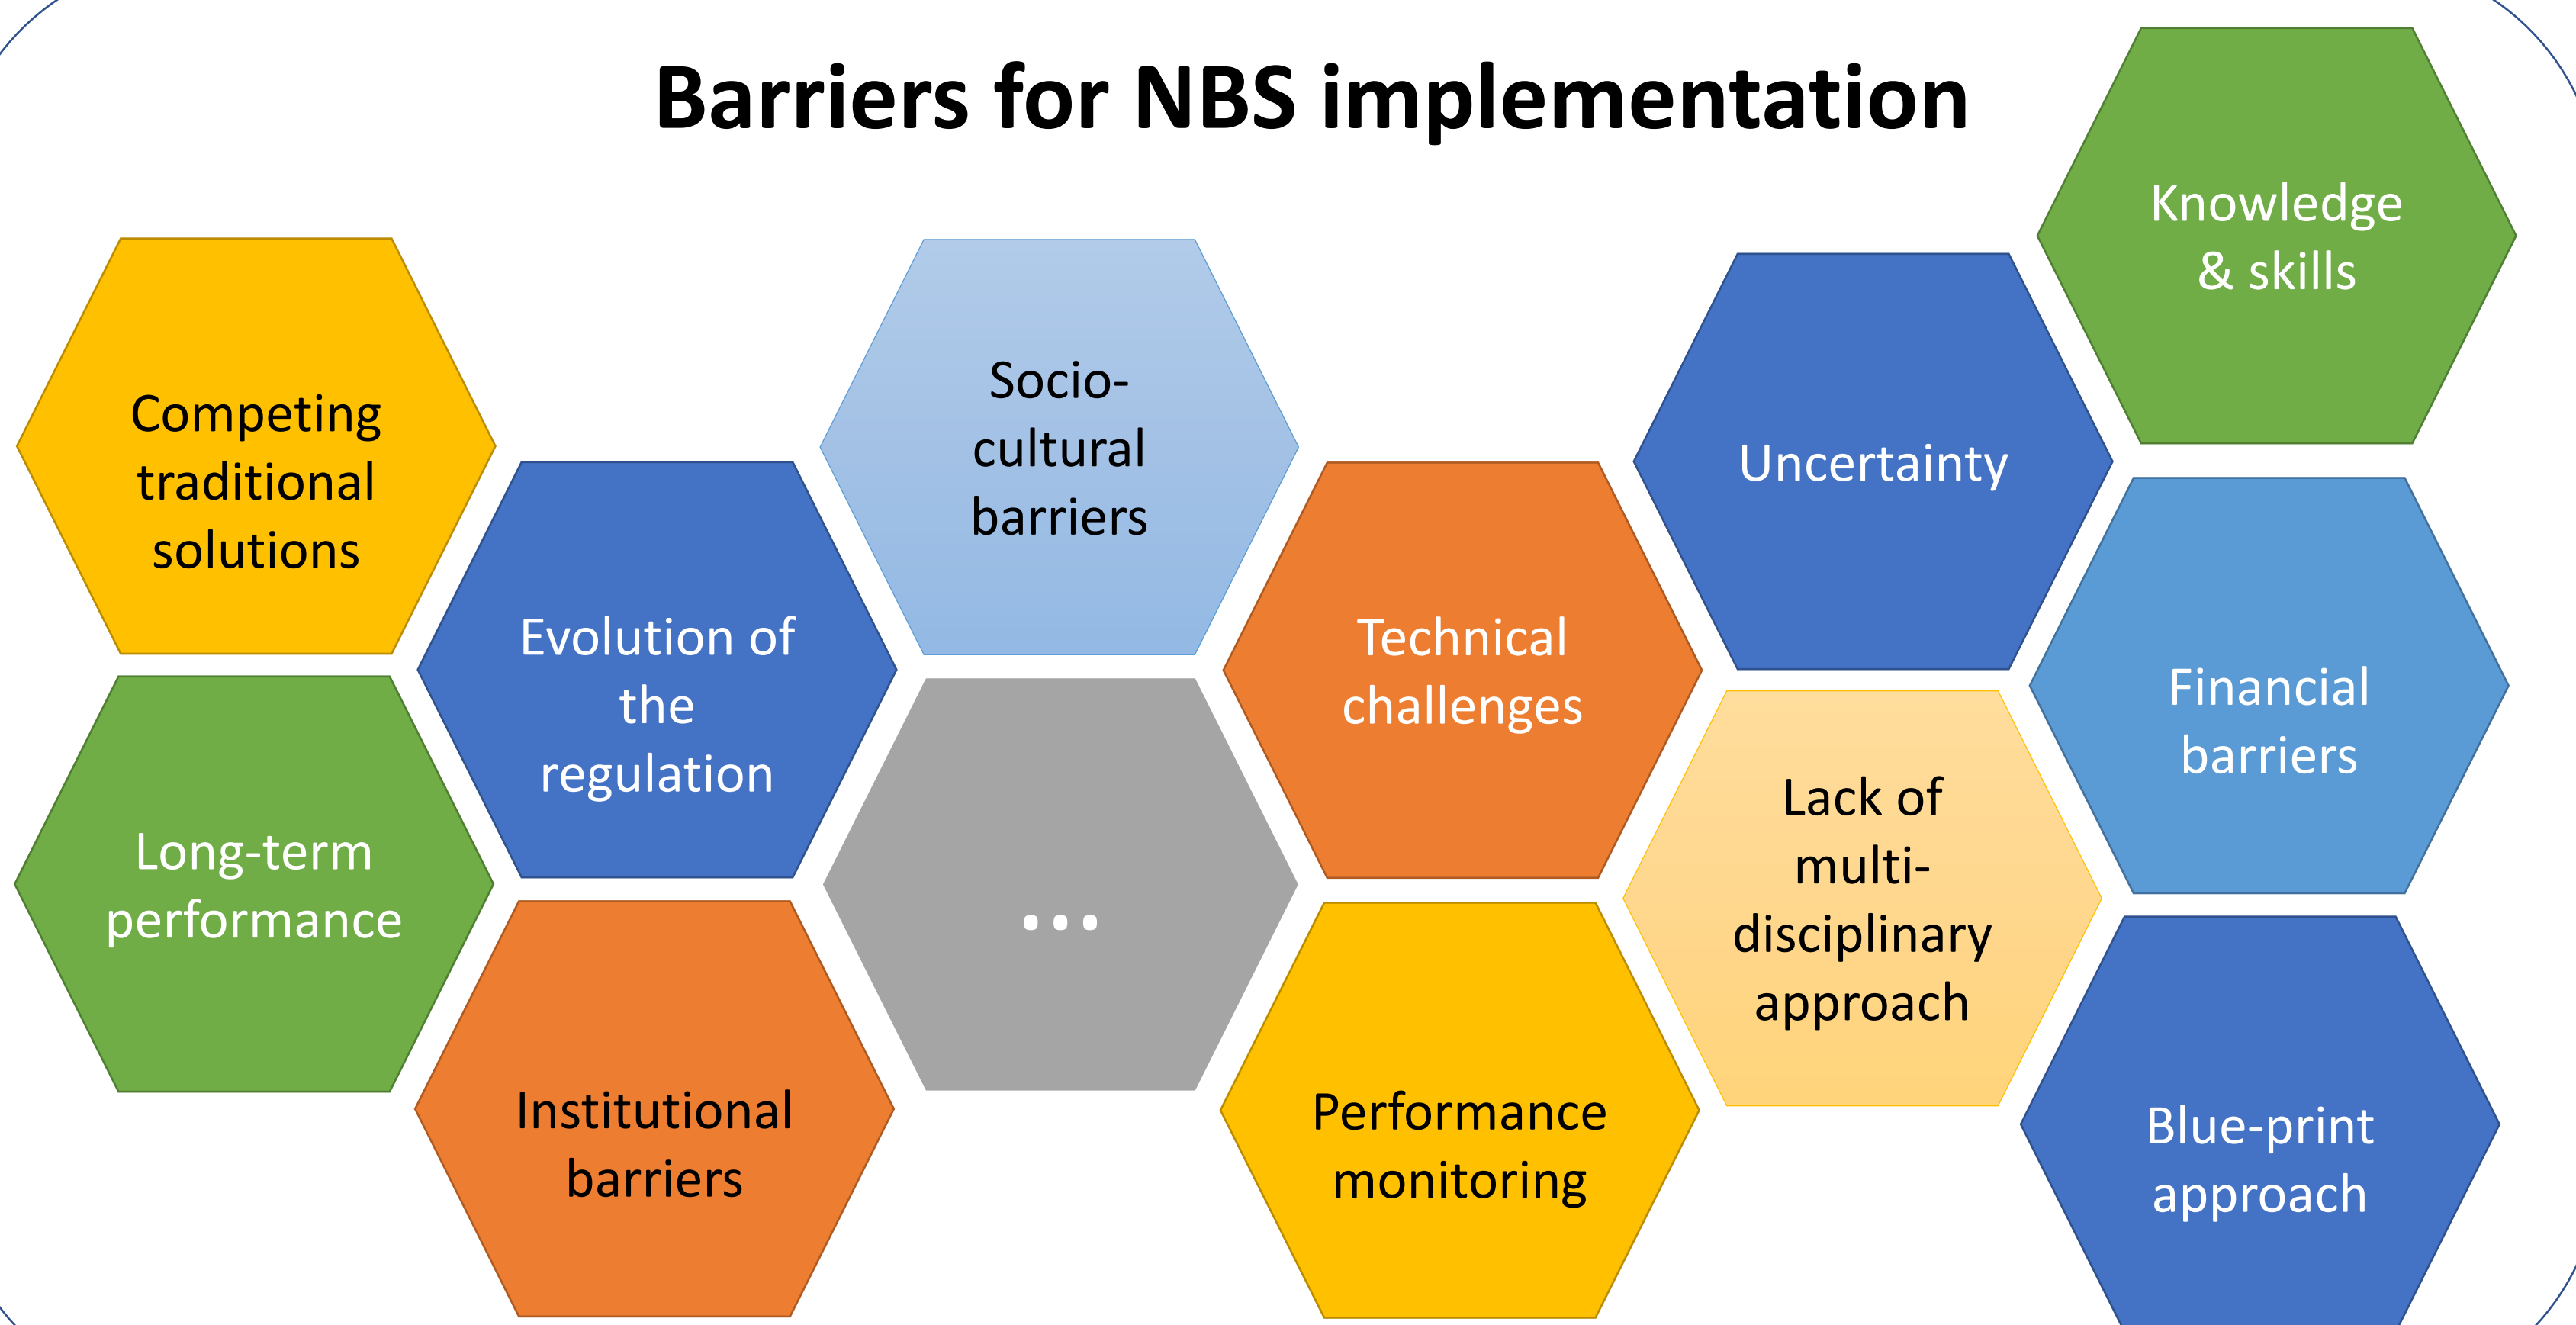

Freins et moteurs au développement de solutions fondées sur la nature

Nature-based solutions implementation: barriers and enablers

Nature-based solutions (NBS) are solutions addressing **societal challenges**, while simultaneously providing **human well-being** and **biodiversity benefits**.

Barriers for NBS implementation

The ways to overcome barriers

Measurement of effectiveness | Development of a better evidence databases | Larger-scale case studies to demonstrate that NBS works at larger scales | Demonstrating the long-term viability of the NBS | Inclusion of the stakeholders at local levels from the start | Multistakeholder dialogue | Enforcing the education on NBS | Young professional's employment | Identifying approaches to reduce the barrier of land ownership/management and its costs | Cross-sectoral collaboration and engagement on a European level | Enabling greater inter-disciplinary and cross-sectoral working on NBS development and implementation | Improving institutional coordination | NBS should be incorporated more explicitly within National Adaptation Strategies | Innovative governance models at the city/municipalities levels | Bottom-up approach to increase the visibility of NBS | Emphasizing the cost-saving during fund raising | Capitalize benefits | Develop and promote new business models | Enlighten the innovation angle of NBS | Involvement of the private sector | ...
