HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Withdrawal: “Observations of Nutrient Supply by Mesoscale Eddy Stirring and Diapycnal Mixing in the Oligotrophic North Atlantic” from the Authors: Carl P. Spingys, Richard G. Williams, Robyn E. Tuerena, Alberto Naveira Garabato, Clément Vic, Alexander Forryan, and Jonathan Sharples, published online on 17 June, 2021 on Wiley Online Library (<http://wileyonlinelibrary.com>), has been withdrawn by agreement between the authors and Wiley Periodicals LLC on behalf of the American Geophysical Union due to major flaws in the paper uncovered by the authors during further research.
