NUTRITION**

Dear colleagues, Dear friends,

It is a great honour for the French branch of WPSA to host the 26th World's Poultry Conference in Paris, at the Congress Center of Porte Maillot.

Initially planned in 2020, we had to postpone this major event twice, because of the sanitary crisis due to COVID-19. This gave us the opportunity to celebrate the centenary of the WPC in 2021. We wish here to acknowledge our faithful sponsors who stayed with us since 2020. The 26th WPC actually started in 2021 with a series of monthly webinars featuring some of the abstracts accepted in 2020. In 2022, we are particularly happy to welcome you in Paris from August 7 to 11, for a WPC which will innovate by many aspects.

Since the pandemics has still an impact on traveling, we propose a hybrid event, with a full on-site programme of sessions, combined with live-streaming for a set of sessions, and a systematic recording of all sessions to make them available in replay on the Congress platform. To start with, our diamond sponsor ADISSEO invites you to an opening conference on Sunday 7, dealing with the key issue of water in the sustainability of poultry production.

Then as usual for a WPC, the opening ceremony will give the opportunity to celebrate the awardees of the International Poultry Hall of Fame, of the Paul Siegel scientific award, of the Education award and the Cliff Carpenter awards. A typical Parisian show will rhythm the ceremony. The scientific programme features 5 plenary sessions with 11 invited lecturers, who will address the different components of sustainability of poultry production and present some cutting-edge topics, such as environmental impact, microbiota, One Health-One Welfare, evolution, biotechnologies as well as ethics. Plenary sessions take place on Monday 8 and Thursday 11 and will be live streamed.

Then, 45 parallel sessions will take place on Tuesday 9 and Wednesday 10, eight of them will be live streamed. As compared to previous editions of the WPC, we have added a set of object-oriented topics to trigger pluridisciplinary interactions between specialists of nutrition, genetics, welfare, quality of products, as well as hygiene and pathology, who participate in this congress. Of course, specialized sessions targeting one discipline or one type of product will also take place to provide the must up-to-date knowledge in each field.

As an innovation for a WPC, all posters will be presented as e-posters on TV screens distributed in the exhibition hall, and the congress App will make possible to contact authors directly to set an appointment, in addition to poster viewing. The council meeting of WPSA will take place on Tuesday 9 with the election of the new board and the choice of the city hosting the next WPC. We will also propose for the first time an electronic voting procedure, to facilitate participation of WPSA members who could not travel. Besides the scientific program and the key events for WPSA, the congress also features a Gala dinner in the surprising setting of the Fairground Museum, on Wednesday 10, and technical visits on Friday 12, for participants curious of discovering the French poultry sector. In the meantime, the awardees of the Youth program will visit Chartres and Tours, with poultry farms and cultural sites. We hope you will enjoy this program and are looking forward seeing you all in Paris.

General Information

Practical information

CERTIFICATE OF ATTENDANCE

You will receive your certificate of attendance after the congress.

CHILDREN

For reminder, children under 16 years old are not allowed on the exhibition.

CLOAKROOM

A cloakroom is located next to Salle Maillot will be open at the following hours:

- August 7th 1 p.m. > 9:30 p.m
- August 8th 7:30 a.m. > 7:30 p.m
- August 9th 7:30 a.m. > 7:30 p.m
- August 10th 7:30 a.m. > 5:30 p.m
- August 11th 7:30 a.m. > 1:30 p.m

COFFEE BREAKS

Coffee breaks for registered participants will take place in the morning from 10:00 to 10:30 in the afternoon from 15:00 to 16:00 each day of the congress in the Exhibition Area.

SOCIAL MEDIA

Each day you can follow the news of the congress on LinkedIn and Twitter!
Do not hesitate to share them.

EPOSTERS

They will be located near WPSA France & World booth and displayed on 20 screens.
You can have access to all abstracts.

Practical information

EXHIBITION FLOORPLAN

Please see on the app and on page 16.

CLOSING CEREMONY

During the closing ceremony, it will be the time for the announcement of the name of the city where the World's Poultry Congress 2026 will be held. Which candidate countries will organize the next World's Poultry Congress:
Cape Town, South Africa or Toronto, Canada.

TECHNICAL SYMPOSIUM

Please see on the next page.

INTERACTIVITY

Lots of interactive sessions will be held. Please download the official mobile app to know more and to interact with your peers.

LOST AND FOUND

Articles found should be taken to the registration desk.

LUNCHES

Buffets will be served in the exhibition area (included in your registration fees).

MOBILE APP

A dedicated mobile app is available on your store: WPC 2022.

NAME CHANGE

Registered participants who are unable to attend the congress cannot nominate a substitute participant. Name changes are not permitted.

OFFICIAL LANGUAGE

The official language of the World's Poultry Congress is English.

Symphiome™

Microbiome managed precisely

When it comes to optimal gut health, the microbiome should function like an orchestra playing in perfect harmony. Conducting this orchestra is Symphiome™, a unique first-of-its-kind Precision Biotic. Symphiome™'s unique mode of action increases metabolic functions intrinsic to the bird's microbiome that detoxify unabsorbed amino acids and leaked host protein independent of the microbiota composition.

Symphiome™ is the first-of-its-kind Precision Biotic that optimizes your birds' resilience to enteric stress, aids in nutrient utilization, improves welfare, and reduces emissions.

Symphiome™. Microbiome managed precisely

If not us, who? If not now, when?

Let your poultry flock flourish with phytogenics

Are you having challenges with:

-   High feed costs and lack of performance,
-   Low hatchability and fertility,
-  Heat stress,
-  Dysbiosis and poor gut permeability,
-  Organic farming requirements ?

Explore our **Biostrong®** line of products on our website or ask our phytogenic experts.

Innovating from what nature provides

At **METEX NOOVISTAGO** we produce indispensable amino acids for better animal nutrition and a more sustainable world. We provide the whole livestock value chain with innovative amino acids solutions at the heart of a virtuous circular economy. More than 40 years of expertise and high-quality R&D make us a reliable partner for our clients.
