Submitted on 15 Nov 2023

HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Journal of Micromechanics and Microengineering

Volume 33 Number 6 June 2023

SPECIAL ISSUE ARTICLE

- 064001** **Parameter uncertainty and noise effects on the global dynamics of an electrically actuated microarch**
Kaio C B Benedetti, Paulo B Gonçalves, Stefano Lenci and Giuseppe Rega

PAPERS

- 065001** **Noninvasive measurement of temperature for simulated tissue based on piezoelectric micromachined ultrasonic transducers**
Yizhou Chen, Mengjiao Qu, Yuping Huang, Zaiping Zheng, Peijuan Cui, Huicong Liu and Jin Xie
- 065002** **Investigating WBC margination in different microfluidic geometries: influence of RBC shape and size**
Sanjay Mane, Vadiraj Hemadri and Siddhartha Tripathi
- 065003** **Visually clear diffusive light panel with embedded semi-reflective rough-surface planar outcouplers**
Hongbae Park and Boris Stoeber
- 065004** **High-reliability circular-contact RF MEMS switches in silicon hermetic package**
Lili Jiang, Ning Ma, Lifeng Wang and Xiaodong Huang
- 065005** **Evaluation of solvent releases from microfluidic devices made of cycloolefin polymer by temperature-desorption mass spectrometry**
Seiichiro Takahashi, Yutaka Mune, Akihiko Yamamuro, Akira Aiba, Kenji Hatakeyama and Ken-ichiro Kamei
- 065006** **PDMS-polyimide transcutaneous blood gas collector with self-folding out-of-plane heater elements**
Ragnar Seton, Zahra Khaji and Anders Persson
- 065007** **Inkjet printing of pixel arrays: droplet formation and pattern uniformity of a non-aqueous ink with tunable viscosity**
Eun Young Lee, Robert Bail and Byung Doo Chin
- 065008** **Quantifying and correcting tilt-related positioning errors in microcantilever-based microelectromechanical systems probes**
Steve Arscott

Journal of Micromechanics and Microengineering

IOP Publishing is a not-for-profit learned society publisher with a reputation for quality and high standards. It has a comprehensive range of products serving the physics and physics-related communities and in particular is an established leader in the world of scientific journals and is at the forefront of electronic publishing. Authors and readers benefit from the rigorous refereeing procedures, prompt publication times and rapid response to research developments, ensuring that the journals are timely, topical and fully validated. There are no page charges.

Journal scope

Journal of Micromechanics and Microengineering covers all aspects of microelectromechanical structures, devices, and systems, as well as micromechanics and micromechatronics.

- The journal focuses on original work in fabrication and integration technologies, on the micro- and nano-scale. The journal aims to highlight the link between new fabrication technologies and their capacity to create novel devices.
- Original work in microengineering and nanoengineering is also reported. Such work is defined as applications of these fabrication and integration technologies to structures in which key attributes of the devices or systems depend on specific micro- or nano-scale features. Such applications span the physical, chemical, electrical and biological realms.
- New fabrication and integration techniques for both silicon and non-silicon materials are reported. Relevant modelling papers in micro- and nanoengineering are reported where supported by experimental data.
- The journal also covers integration of interface electronics with micro- and nanoengineered systems, as well as vacuum microelectronics, microfabricated electrically passive elements, and other micro- or nanoengineering-enabled electrical devices.

A brief guide for authors

A submission to *Journal of Micromechanics and Microengineering* must be the original work of the author(s) and must not be published elsewhere or be under consideration for another publication in its submitted or a substantially similar form in any language.

Contributions in the following categories may be submitted.

- Research Papers (up to 14 journal pages).
Reports of original scientific research, techniques and applications.
- Technical Notes (up to 8 journal pages).
These are technical communications containing material typically insufficient for publication as a full scientific article but revealing new technical procedures. A Technical Note should be sufficiently detailed and in-depth to further the technical know-how of the community and help the development of novel devices.
- Topical Reviews.
These are intended to summarize accepted practice and report on recent progress in selected areas. Such articles are generally commissioned by the Editorial Board.

All contributions must be in English.

Details on how to structure an article, including specific information on figures, tables and references, are given in the *Guidelines for authors* available from our Author services website at authors.iop.org.

What to submit

When submitting a new article, we only require you to supply a single PDF file. This should be your complete manuscript, including figures and tables. On acceptance of an article, the text should be supplied as either Microsoft Word or any common variant of TeX. Figures should be submitted as separate files, preferably in Encapsulated PostScript (EPS) format.

How to submit

You can submit online at http://mc04.manuscriptcentral.com/iop_journals.

Colour illustrations and supplementary data

Colour reproductions of illustrations and supplementary data are both free of charge in the online version of your published article (iopscience.org/jmm). However, for colour reproduction in the printed journal, authors will be asked to pay the additional costs incurred. Supplementary data can enhance the electronic version of your article. For further information see the *Guidelines for authors* on the journal submission page.

Articles in *Journal of Micromechanics and Microengineering* are abstracted in: INSPEC[®] Information Services; PASCAL Database; Article@INIST; ISI (SciSearch[®], ISI Alerting Services, Current Contents[®]/Engineering Computing and Technology, Science Citation Index[®]); Chemical Abstracts; Mass Spectrometry Bulletin; Engineering Index/Ei Compendex[®]; Applied Mechanics Reviews; VINITI Abstracts Journal; Aerospace Database.

Journal of Micromechanics and Microengineering is a journal recognized by The European Physical Society.
