**HAL** is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destin ee au d ep ot et  a la diffusion de documents scientifiques de niveau recherche, publi es ou non,  emanant des  tablissements d'enseignement et de recherche fran ais ou  trangers, des laboratoires publics ou priv es.

Correction

## Correction: Vinayak, V., *et al.* Diatom Milking: A Review and New Approaches. *Marine Drugs* 2015, 13, 2629–2665

---

The following two sentences, appearing on p 2642, need to be modified:

“Using a new dedicated method, Daboussi *et al.* [232] targeted the diatom model organism *Phaeodactylum tricornutum* and used zinc finger nucleases, meganucleases, and transcription activator-like effector nucleases to edit *Phaeodactylum tricornutum* by inducing targeted mutagenesis of certain genes responsible for HVM production. This led to formation of a mutant diatom Tn 19745\_1 that produces 45 times more lipid than the control and further increased the HVM production when grown in nutrient-stressed media.”

These sentences should read (changes are indicated in bold)

“Using a new dedicated method, Daboussi *et al.* [232] targeted the diatom model organism *Phaeodactylum tricornutum* and used zinc finger nucleases, meganucleases, and transcription activator-like effector nucleases (**TALEN**) to edit *Phaeodactylum tricornutum* by inducing targeted mutagenesis of certain genes responsible for HVM production. This led to formation of a mutant diatom Tn 19745\_1 that produces 45 times more **TAG** than the control and further increased the HVM production when grown in nutrient-stressed media.

The authors would like to apologize for any inconvenience caused to the readers by these changes.
