

n*.pdf

→ nodes # , topology , deterministic Boolean function truth assignment at each node

ajm*.csv

→ adjacency matrix

tpall*.csv

→ 10,000 time series from *deterministic* all initial states: TP

arsbn*.csv

→ 10,000 time series from an initial state on ARSBN: TP+FP+FN?

※ with perturbation at each node i.i.d.

※ with autoregressive as within above

※ same topology, same Boolean function as *deterministic*
