HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Legend

- green: periodisation
- no marking = panhellenic (rather than supradialectal, since we deal about Linguistic varieties and not only Dialects)
- δᾶμο- lexical base (Civic instead of Heroic semantic-pragmatic connotation)
- pink: PN difficult to analyze
- yellow: Ionic-Attic *Koine* marking
- bold**: Latin name
- blue : reversed Compounds

Nota bene: -the following Table is given without any bibliographical note: each dialectal feature is indeed explained in E. Nieto Izquierdo, *Gramatica de las inscripciones de la Argolide* (2008); each Personal Name (PN) is morphologically and semantically analysed on the website *LGPN-Ling* (<https://lgpn-ling.huma-num>); and each reference to the (mainly epigraphical) sources is given in the *Lexicon of Greek Personal Names*, volume III.A, s.v. (online: <https://search.lgpn.ox.ac.uk>)

-With regard to the correspondence postulated in the penultimate column of the Table between Stylistic register and Social level, please refer to the quotation from P. Bourdieu in the epigraph to the paper, which develops the results of the analysis of these data.

-For the reversed compounds, see O. Tribulato “Homeric θυμολέων and the Question of Greek ‘Reversed Bahuvrīhis’ ”. In: D. Kölligan/R. Sen (eds), *Oxford University Working Papers in Linguistics, Philology and Phonetics* (2006), 11, 162-178.
