

A

Mean ΔC_t values from **low-dose** and **high-dose** experiments

$$y = -2.064 - 0.559x, \quad R^2 = 0.973, \quad S = 0.218$$

B

Mean ΔC_t values from **low-dose** experiment adjusted to **high-dose** experiment

Horizontal lines represent expression level in nonirradiated samples from both experiments
