HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

BYTE-Sea: the digital infrastructure of ATLASea, the French marine genome sequencing programme

Karine MASSAU¹, BYTE-Sea consortium² and Erwan CORRE^{1,3}

¹ ABiMS bioinformatic platform, FR2424, CNRS/Sorbonne Université, Station Biologique de Roscoff (SBR), 29680, Roscoff, France

² BYTE-Sea Consortium : https://gitlab.com/pepr-atlasea/byte-sea_consortium

³ IFB - Institut Français de Bioinformatique, CNRS UAR 3601, France

Priority research programs and equipment (PEPR)

Funded by the France 2030 framework program. Administered by ANR

Led by CNRS and CEA

Associated to the international ERGA and EBP projects

5 academic partners: Ifremer, MNHN, Aix-Marseille University, Paris Sciences & Lettres and Sorbonne University.

3 French infrastructures: France génomique, IFB, EMBRC-Fr

ATLASea Programme - an atlas of marine genomes

genome sequences of 4500 marine organisms along the French coast

Calls for expressions of interest (2026)

Study of metabolic pathways

Study of ecosystems subject to invasions

WHEEL-Sea (CNRS):

improve and support teaching and training in the field of biodiversity.

DIVE-Sea (MNHN):

sampling expeditions along the French mainland and overseas coasts and interactions with marine stations. Banking of samples.

SEQ-Sea (CEA):

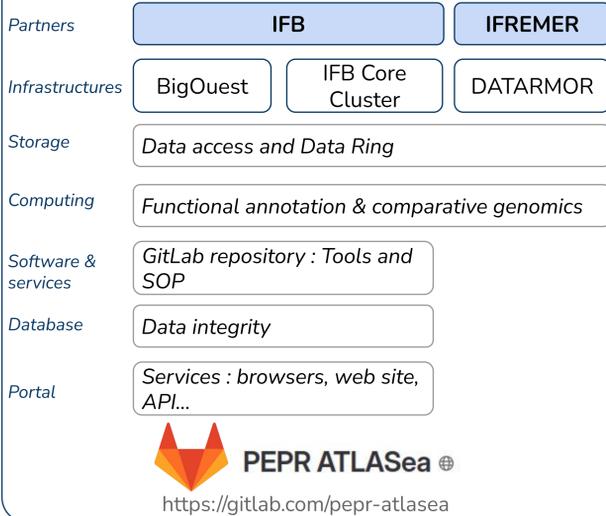

preparation of high quality DNA, sequencing, assembly and annotation of genomes at Genoscope.

BYTE-Sea (IFB):

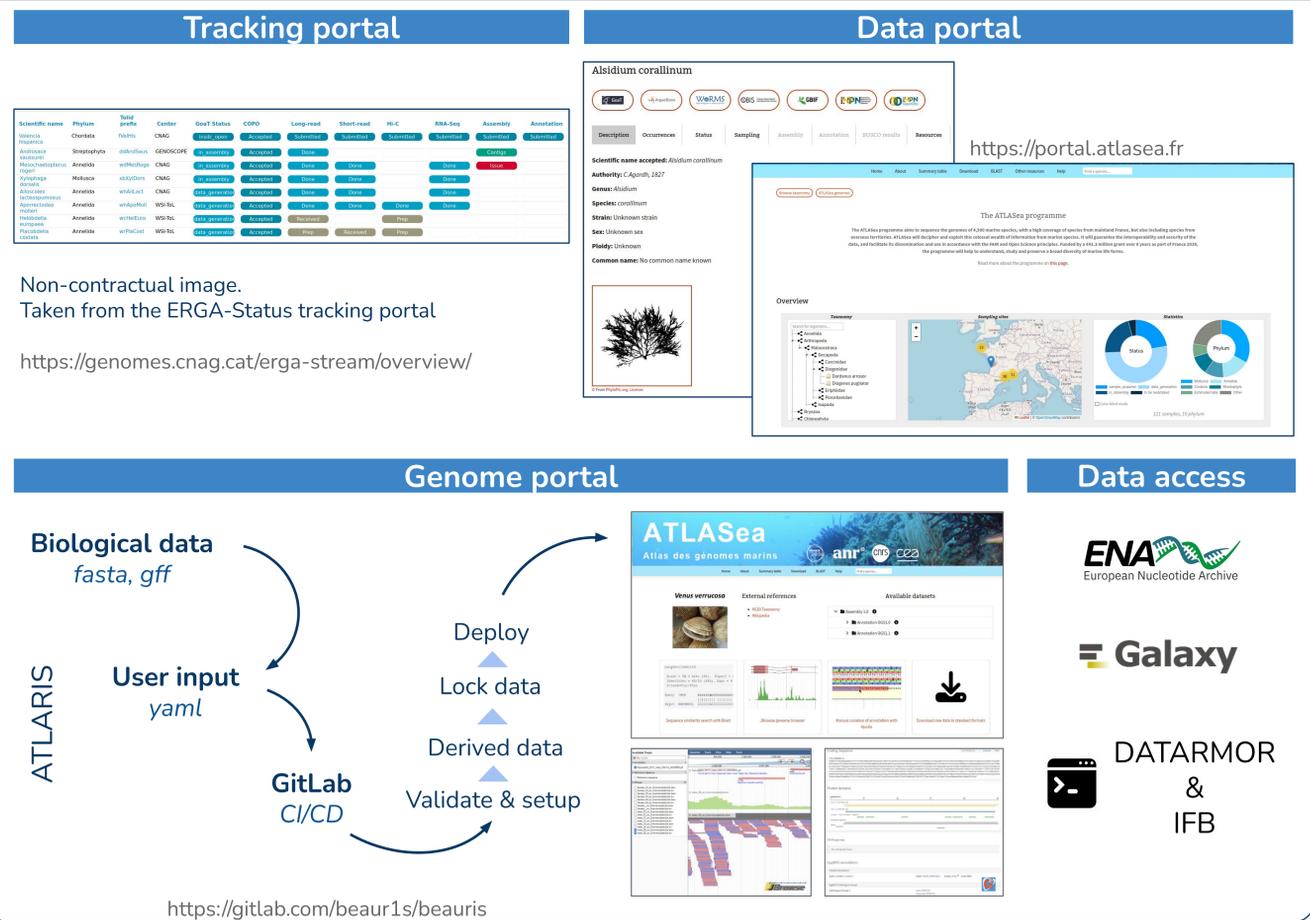

IT infrastructure for data storage, integration, display and sharing. Functional and expert annotation and comparative genomics

BYTE-Sea Work packages (WP)

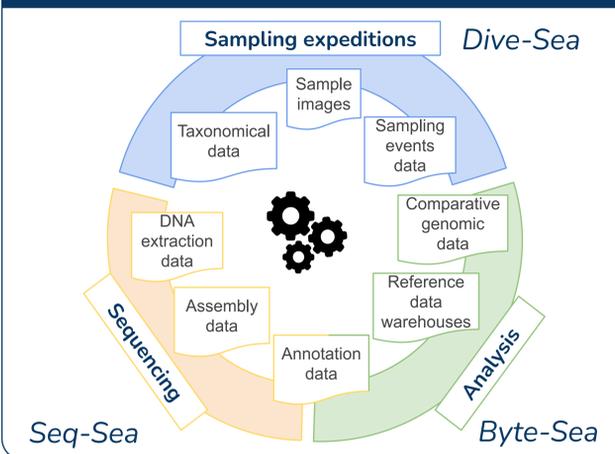

WP1: Infrastructure for storage, computing and software

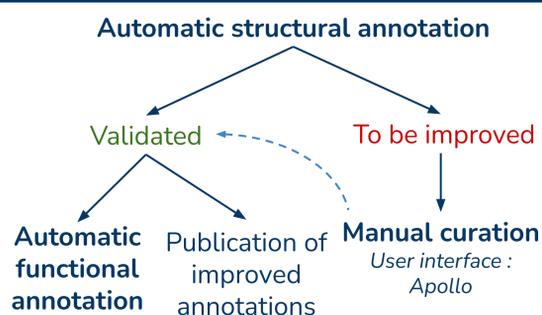

WP3: ATLASea portals for data and analysis tools

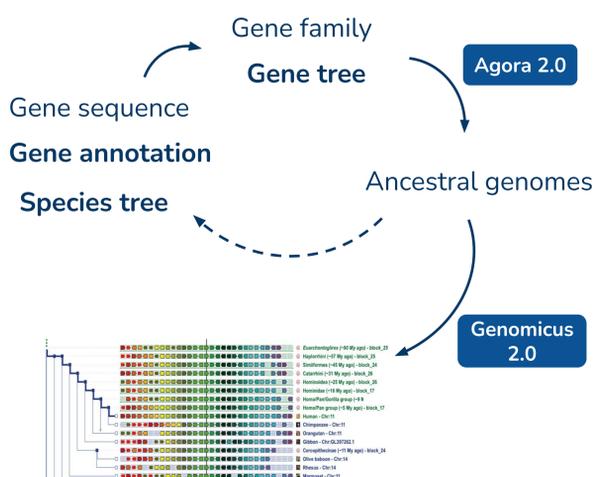

WP2: ATLASea database

WP4: Automatic functional annotation and expert annotation

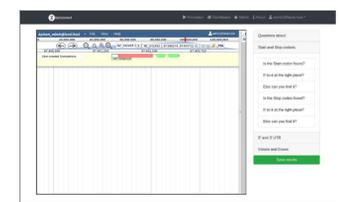

WP5: Comparative Marine Genomics

WP6: Citizen Annotation

Manual curation of genome annotation

Citizens
High school / undergraduate students
Introduction to the world of genomics
Scientific output
Guided and gamified curation web UI
Release of improved gene annotation
