**HAL** is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

# In-Memory-Computing Implementation of Magnetoresistive Networks for Ultra-Low-Power Computing

## Edge AI & Von-Neumann Bottleneck

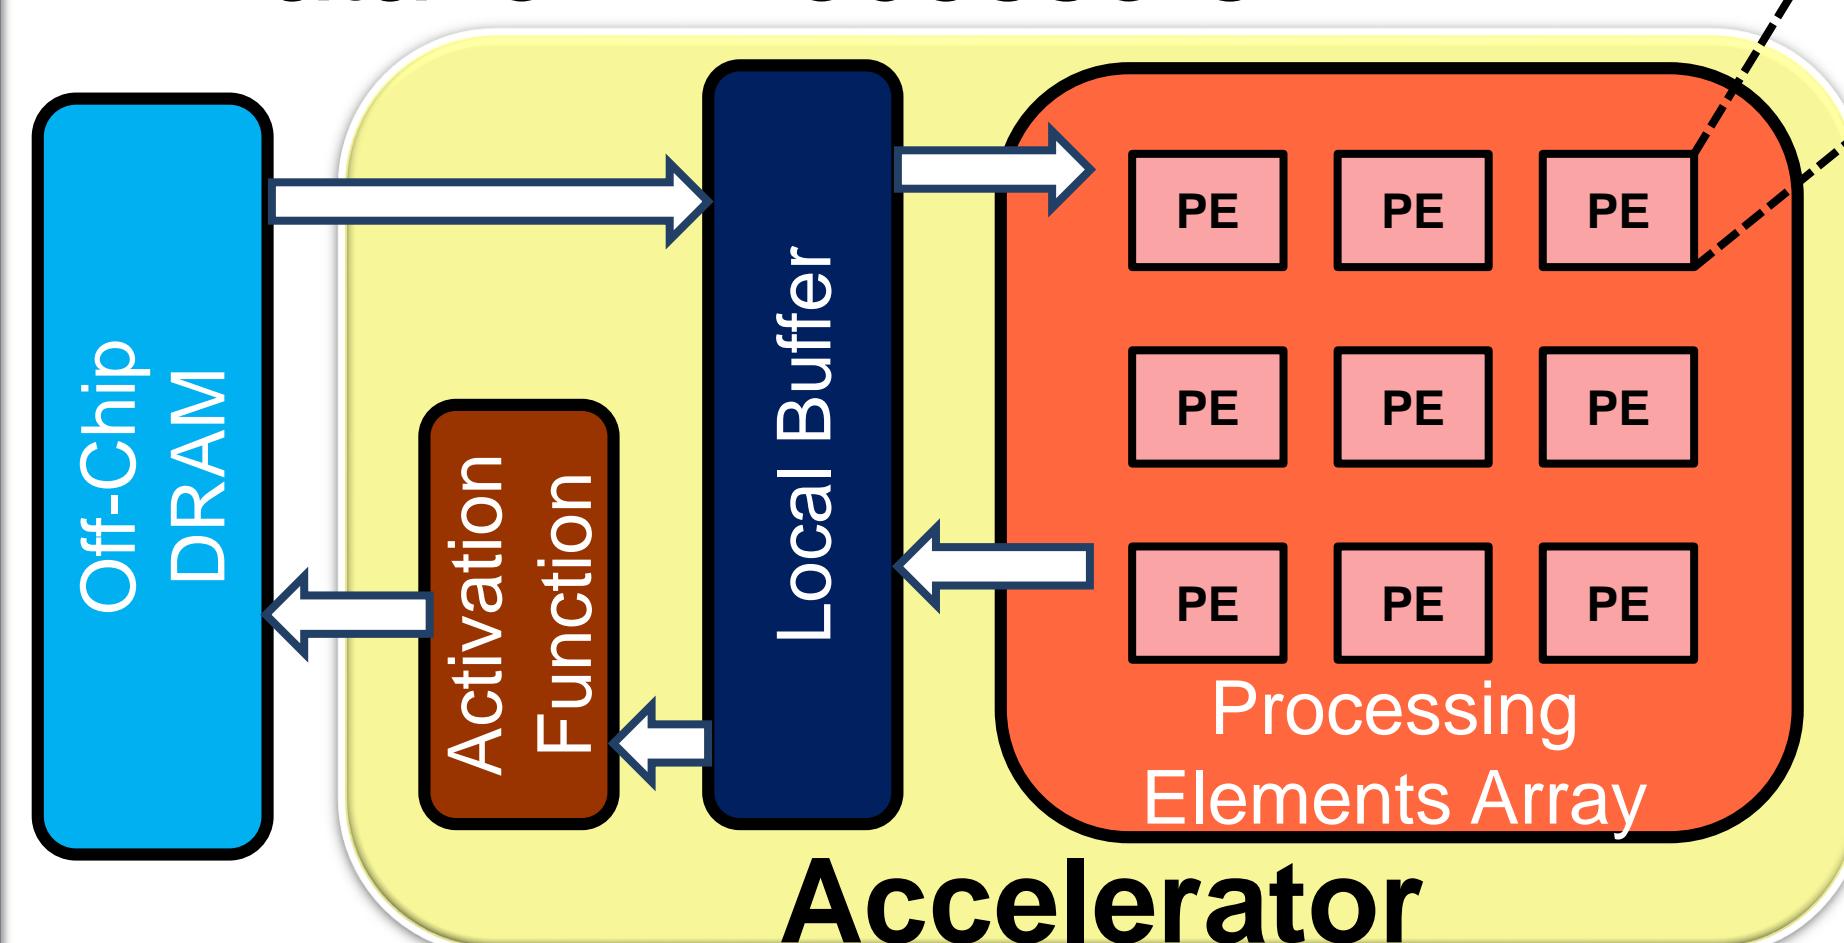

## Objectives

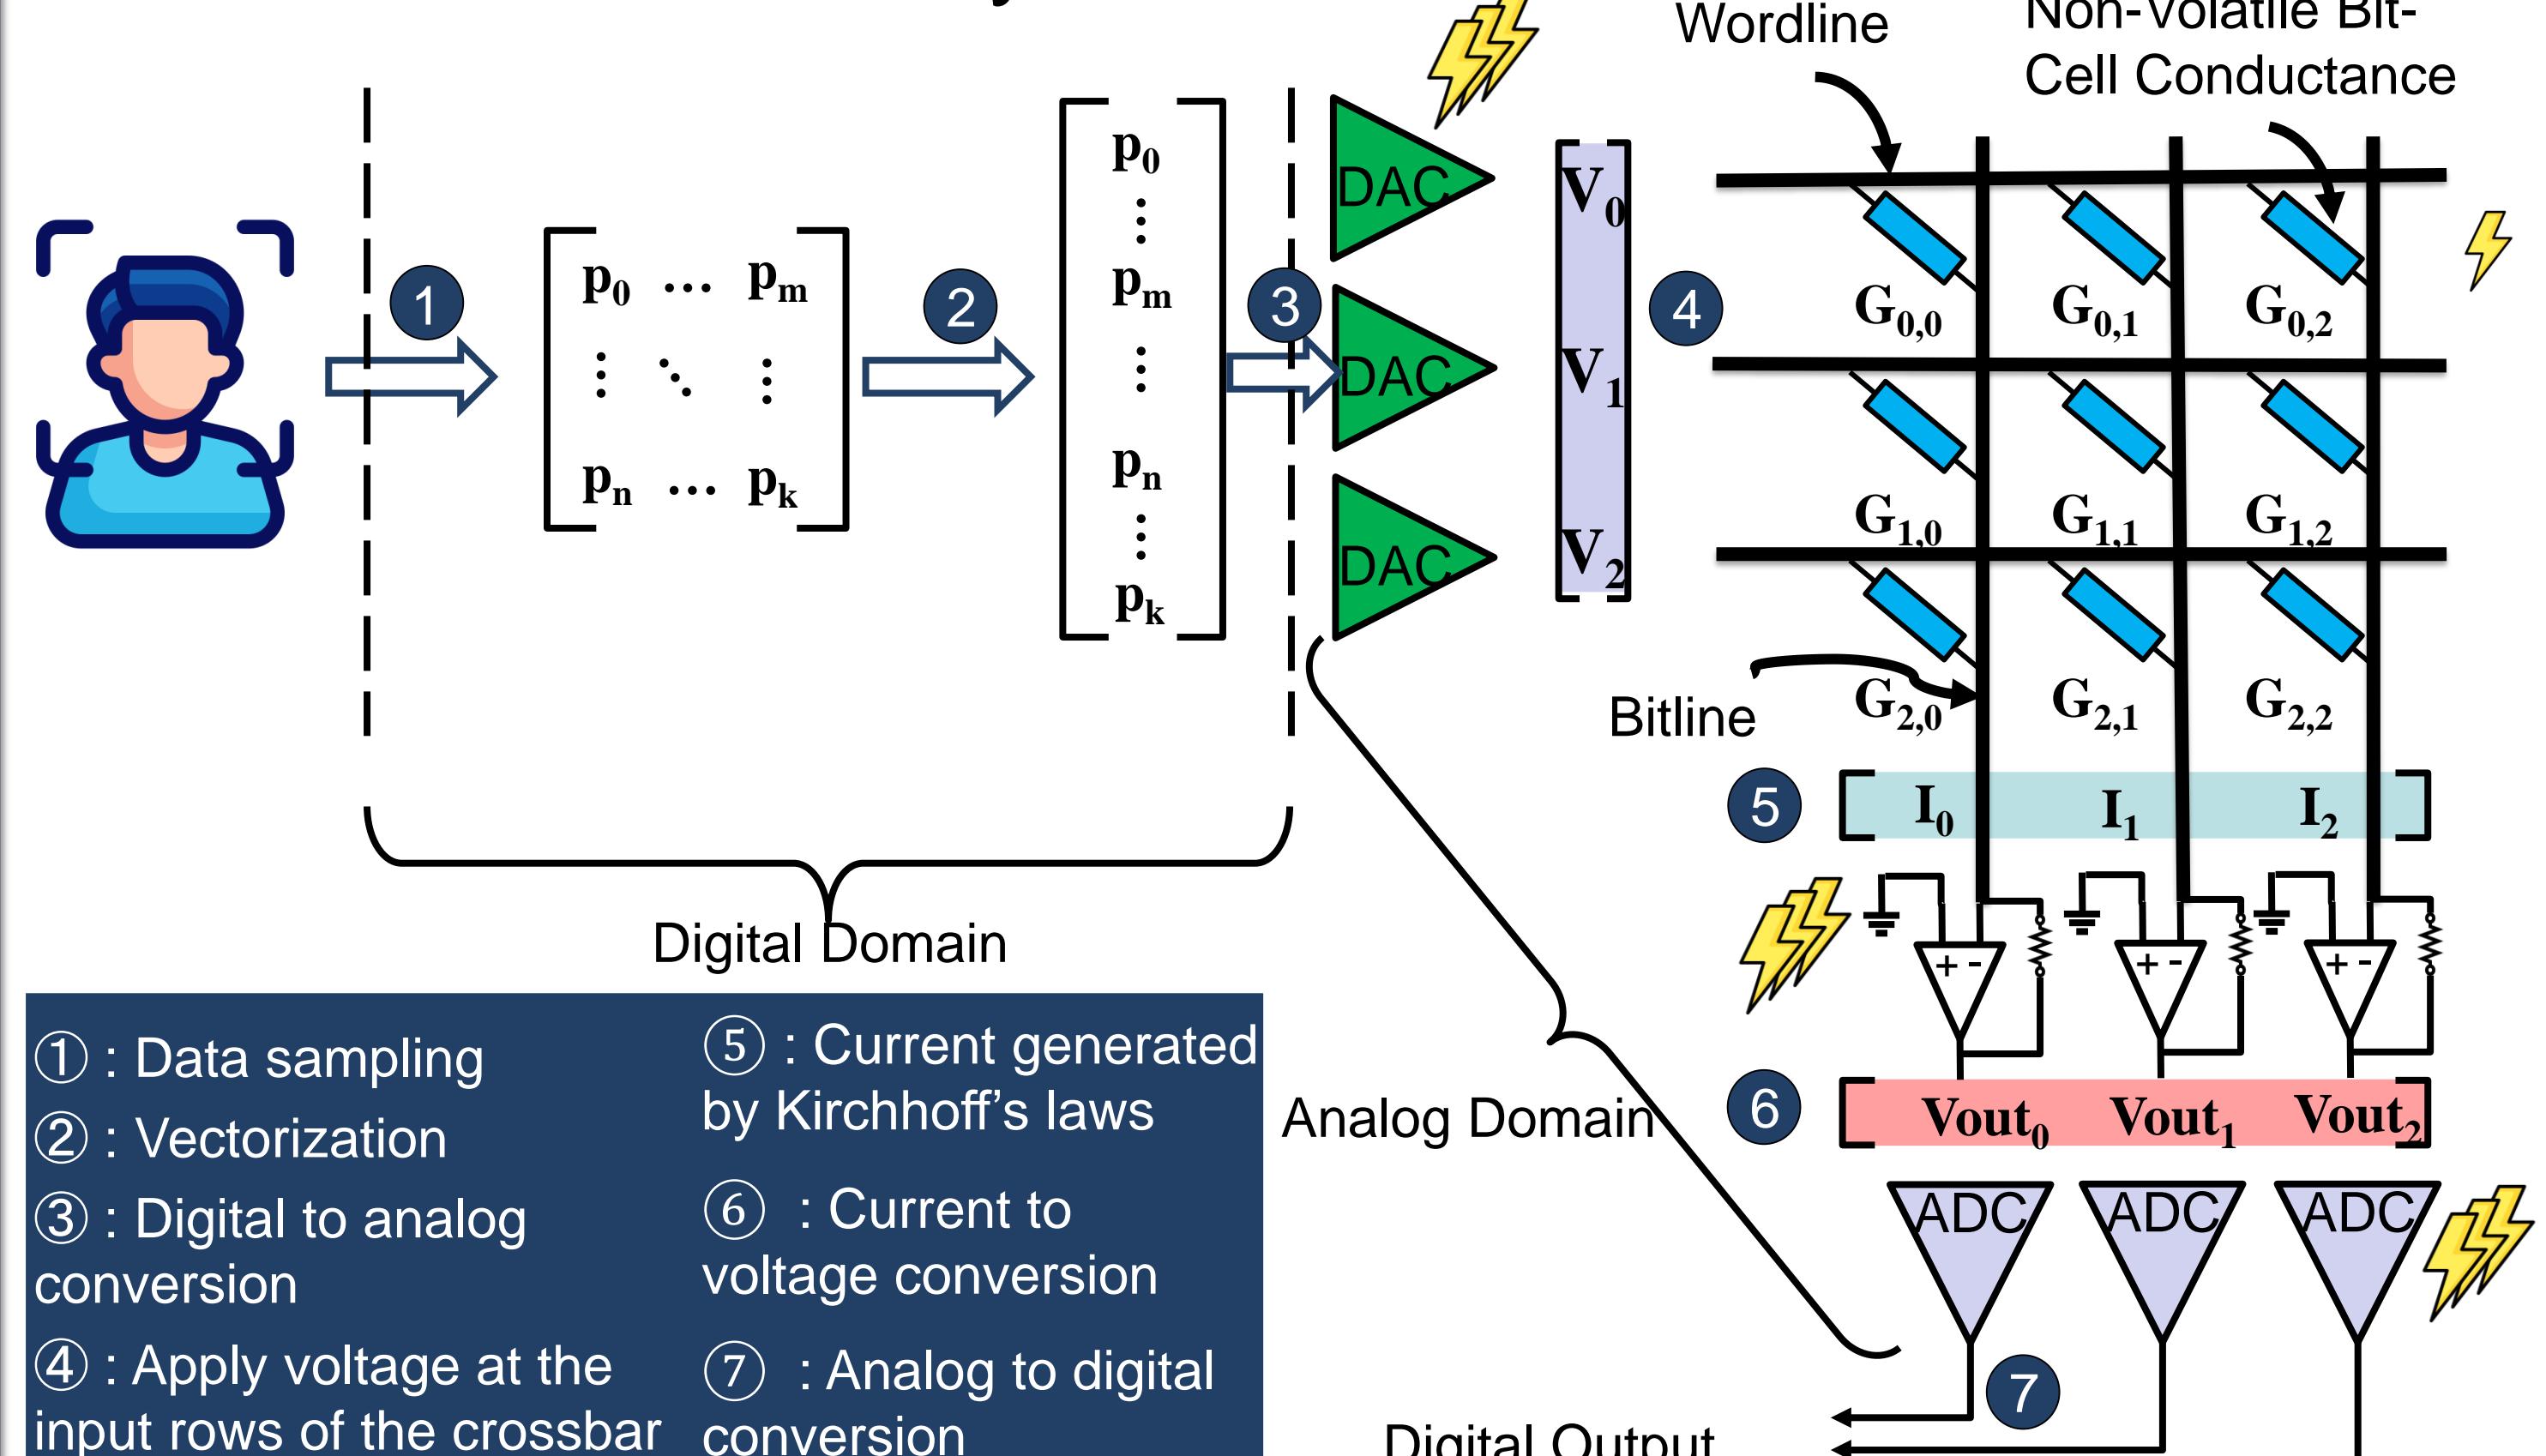

## State of the Art Solutions

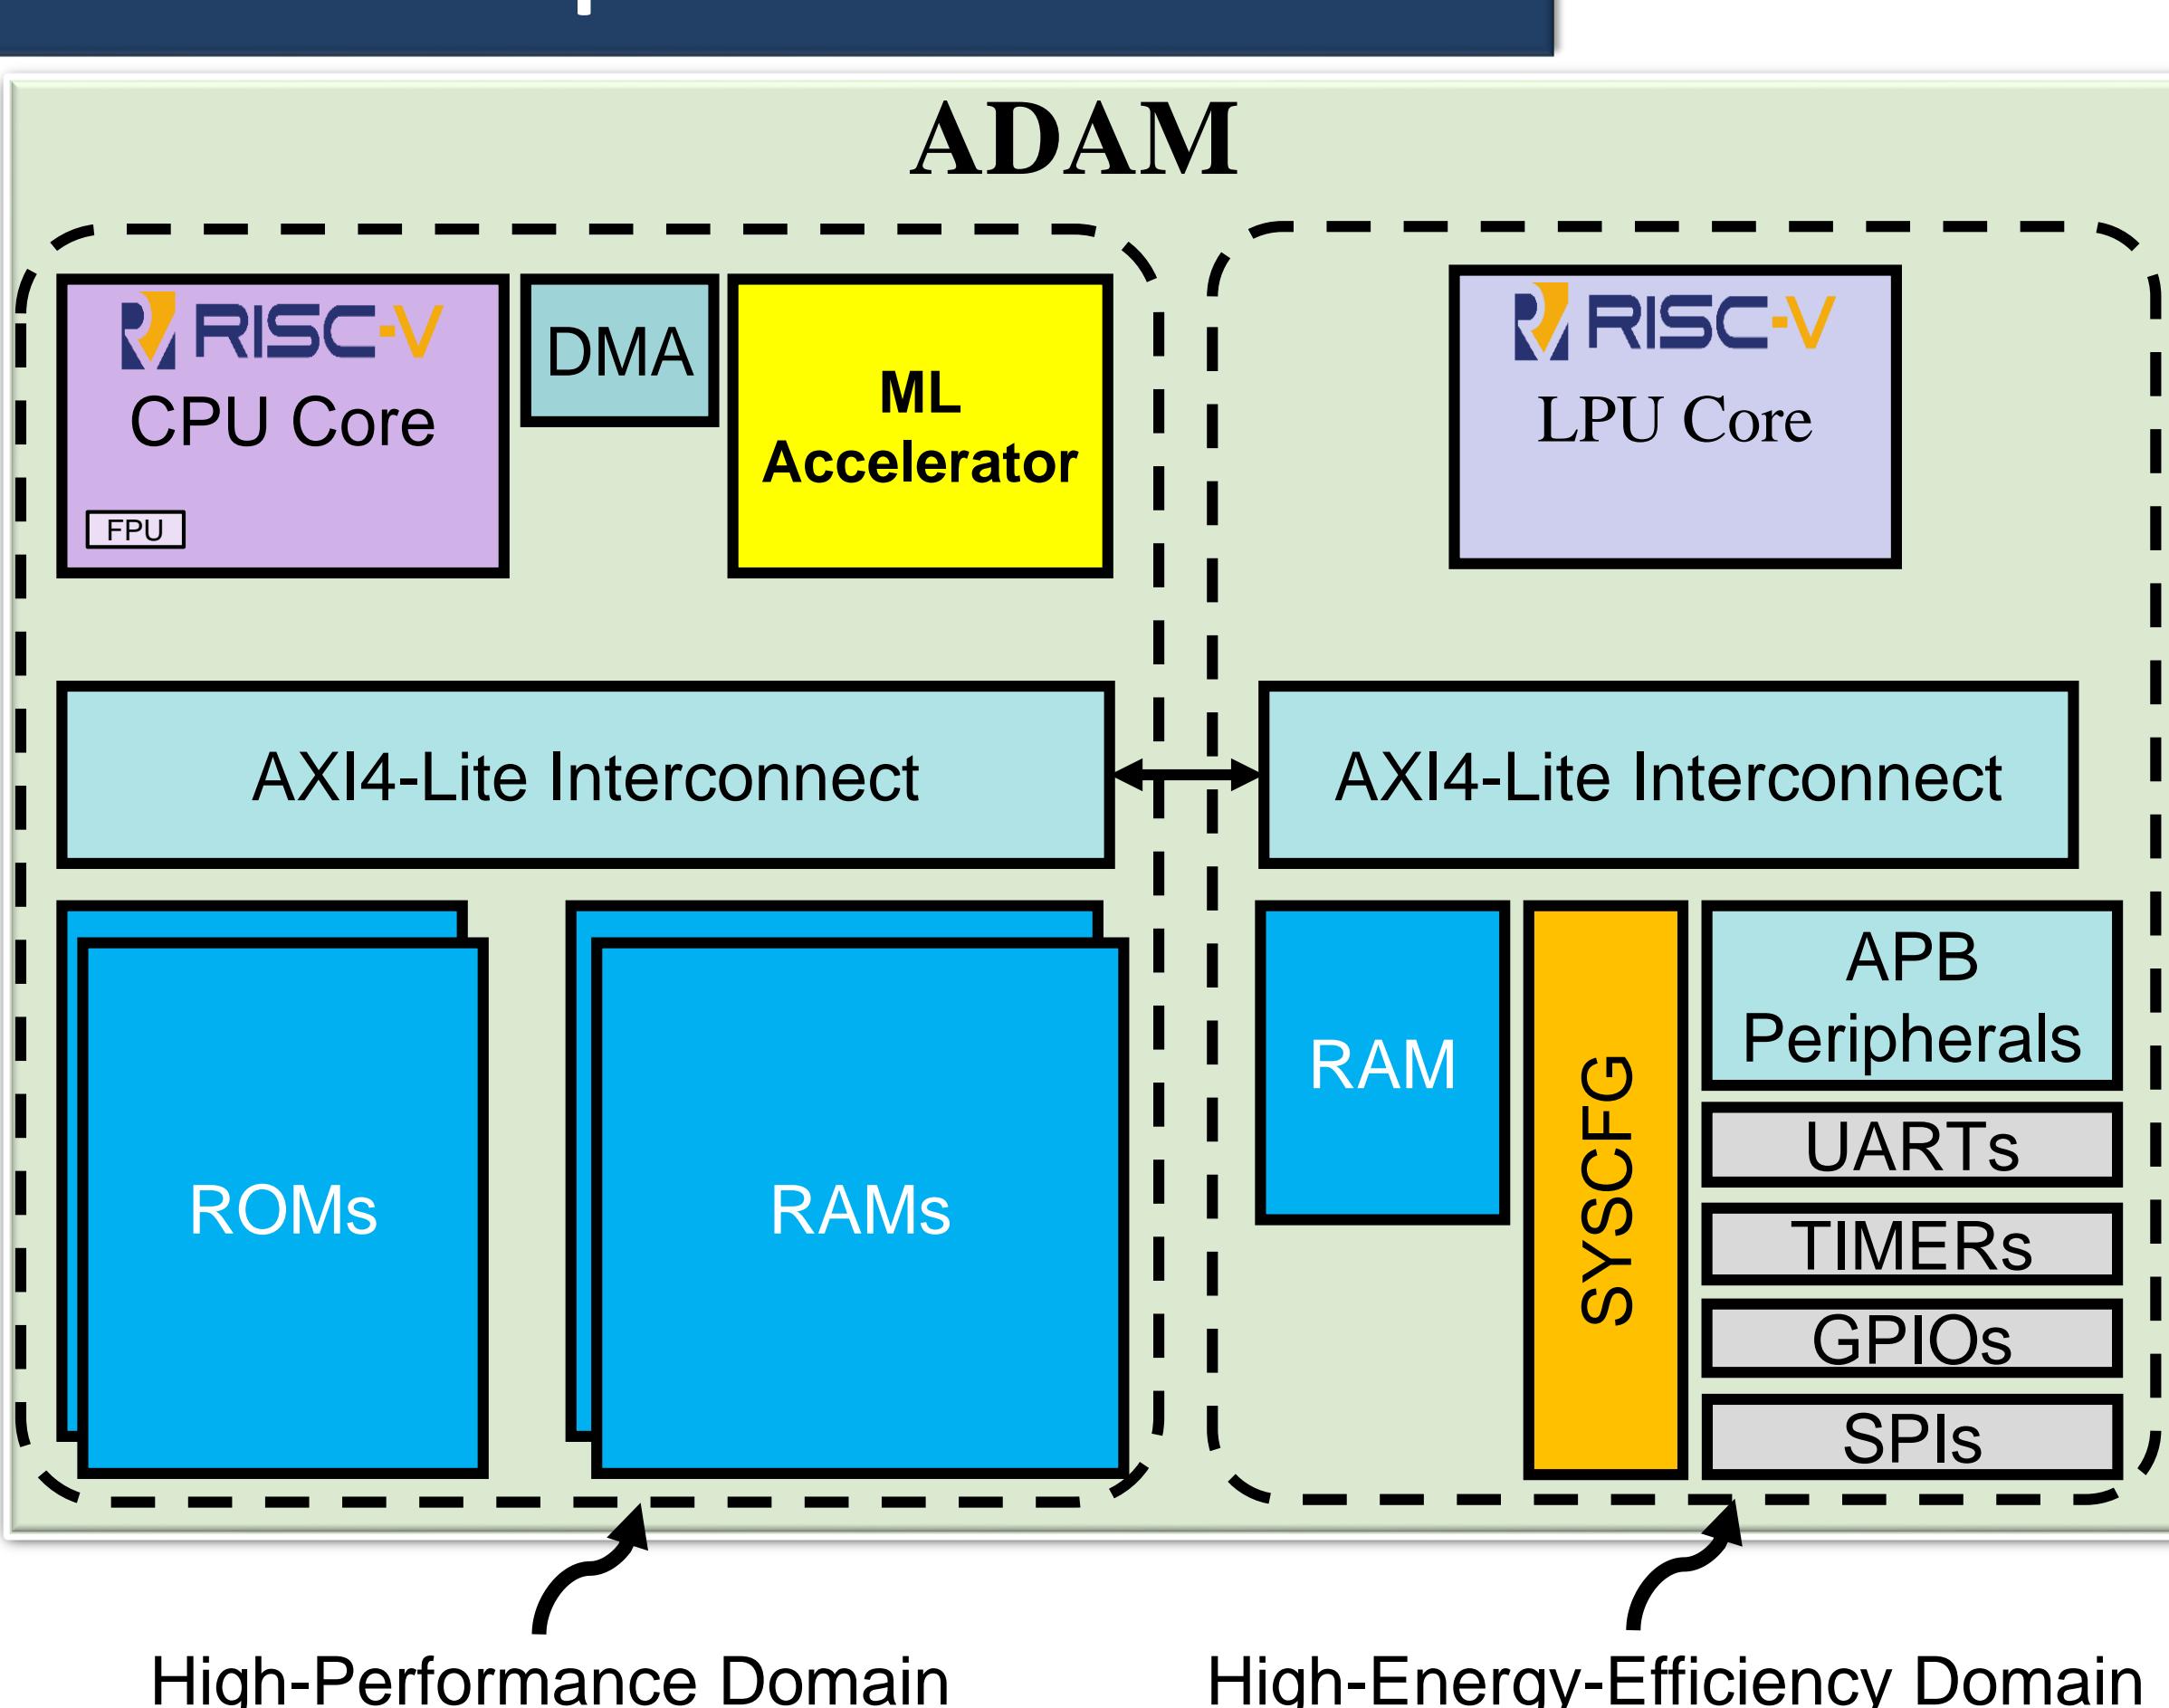

### 1- Dataflow Processors

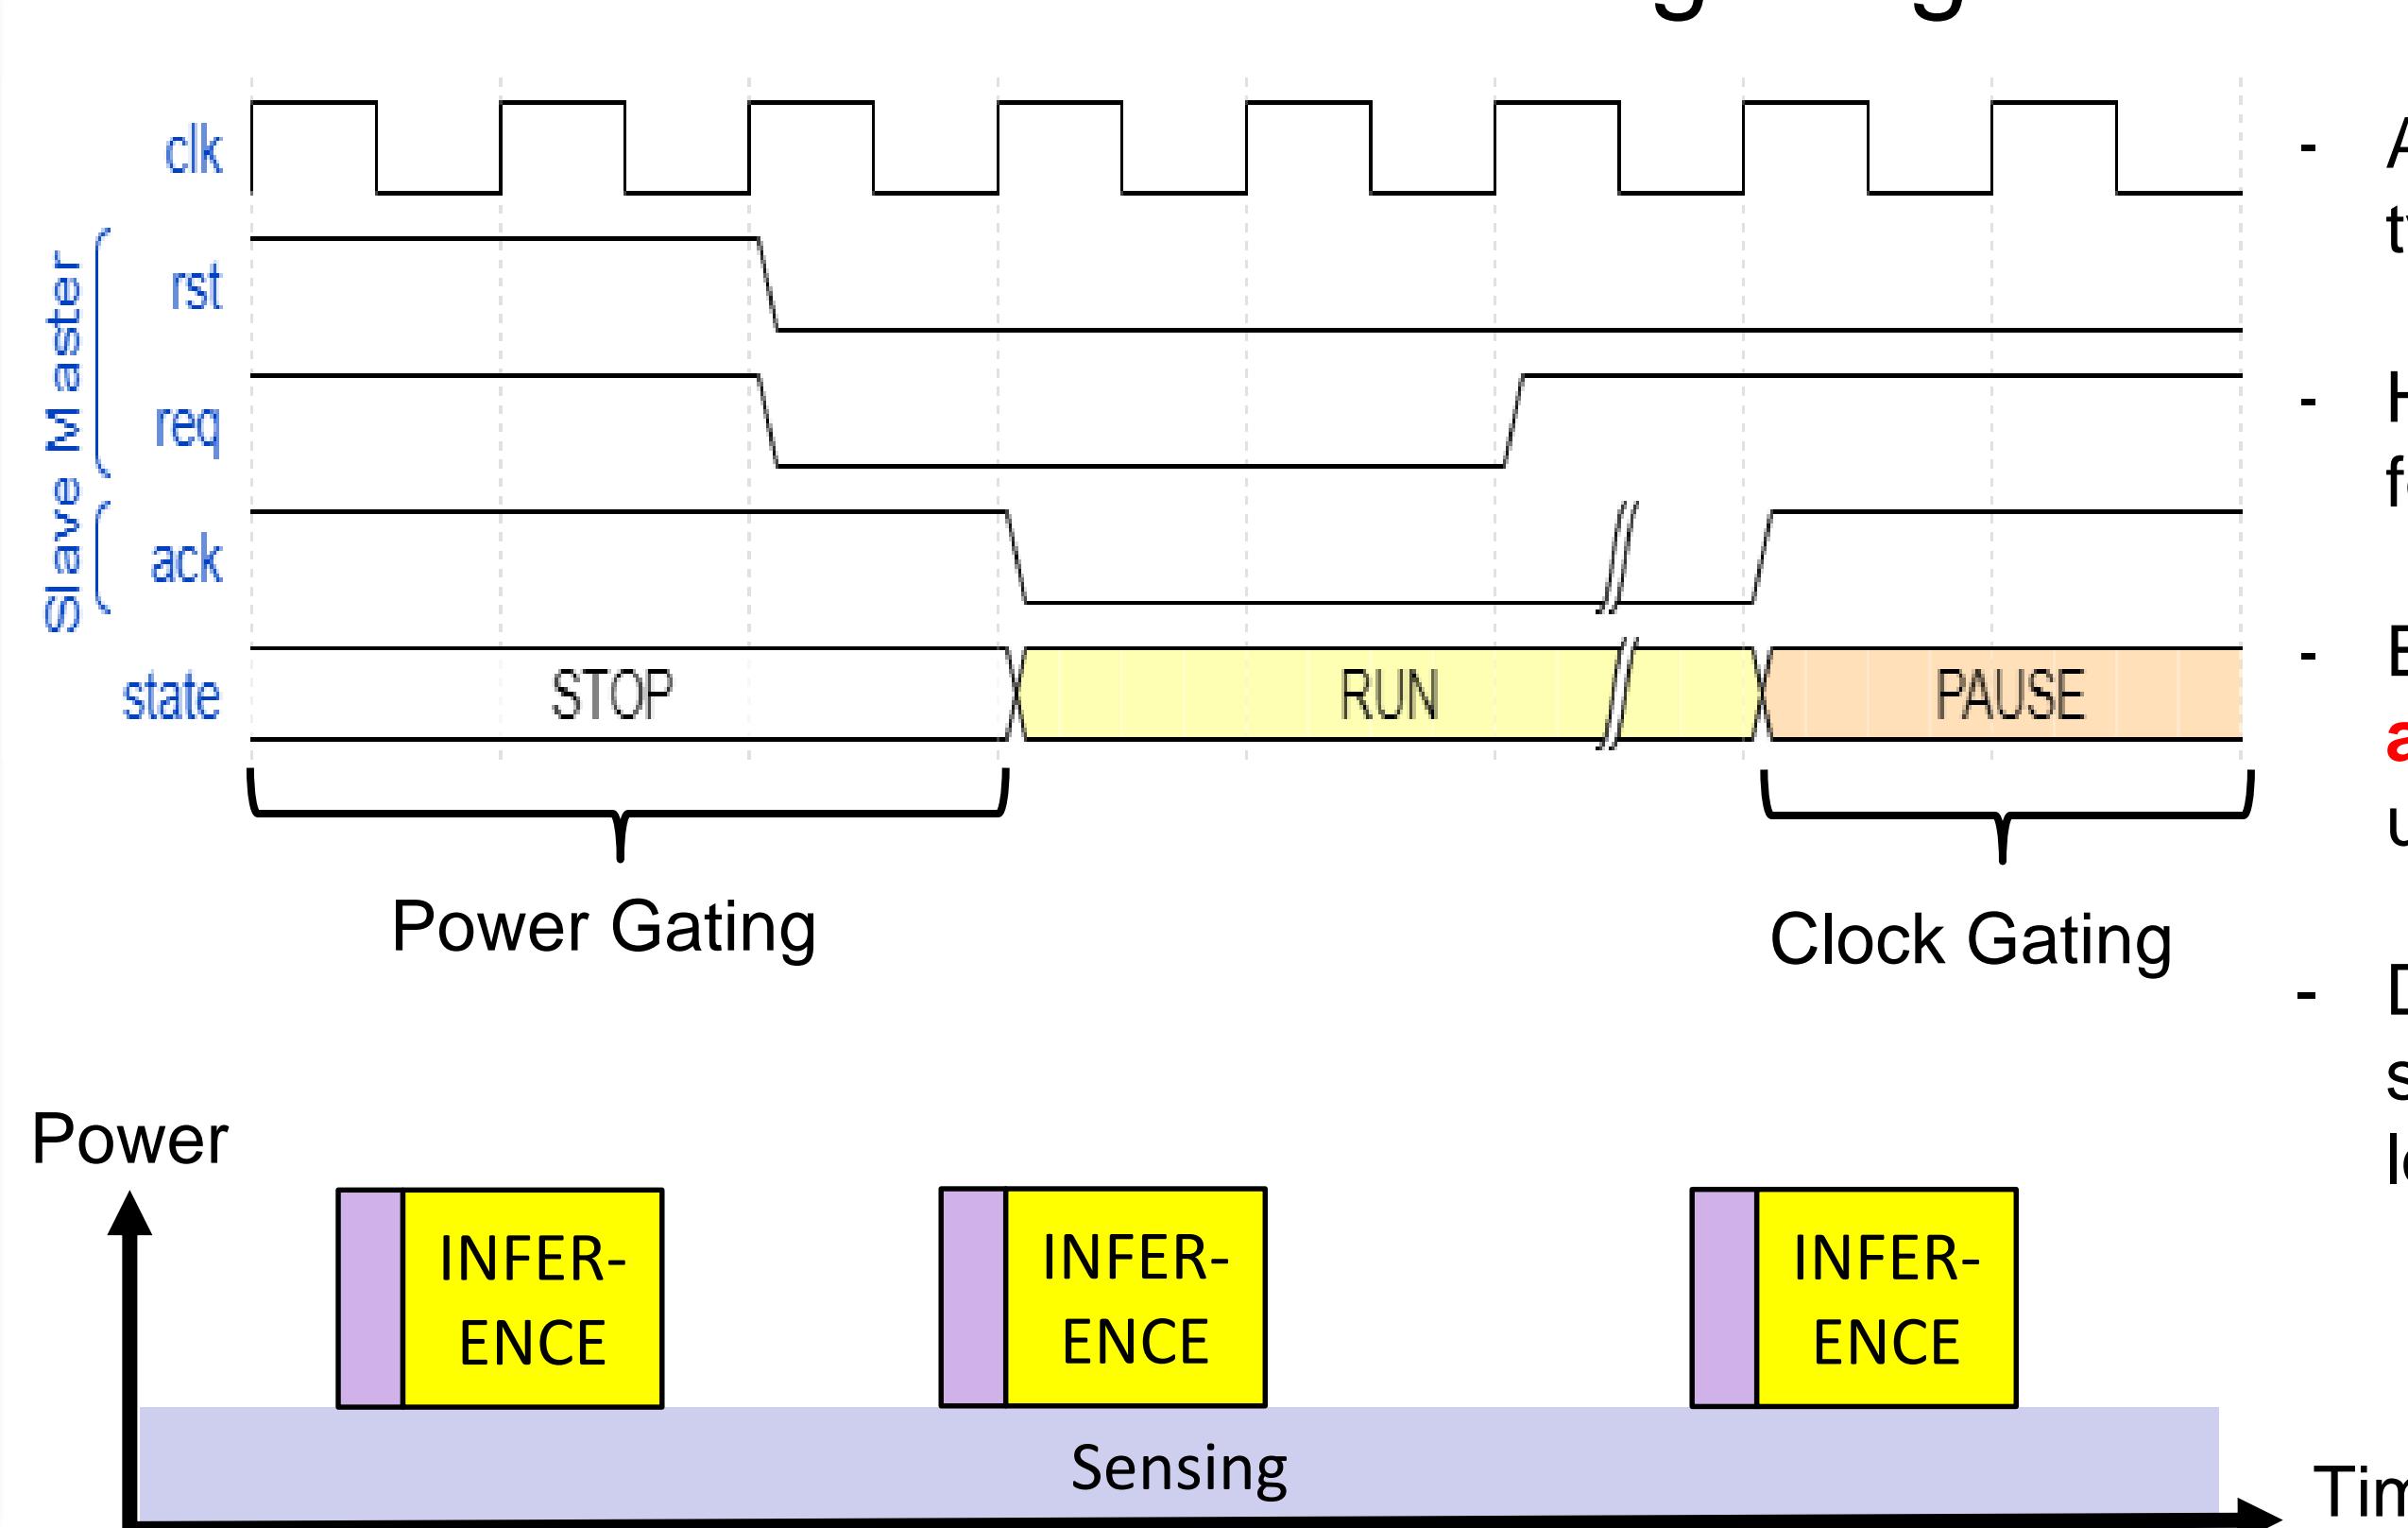

### 2- Process-In-Memory Accelerators<sup>2</sup>

## ADAM : ADaptive Microcontroller

## ADAM Pause Protocol Timing Diagram

- A modular **big.LITTLE** architecture type microcontroller
- Hardware and software exploration for **AI in the edge applications**
- Evaluate **performance, energy and accuracy** of ML applications using different types of accelerators
- Dedicated **pause/stop protocol** for safe clock and power gating for low-power applications
