

Supplementary Table 2. GR expression in HeLa, HMLN-hGR, U2OS and UMLN-zfGR cells. GR expression was measured by [³H]-DEX binding assays and expressed in femtomoles/mg of protein. Values are means \pm SD of 3 independent experiments.

Cell line	hGR expression (fmol/mg)
HeLa	394 +/- 42
HMLN-hGR	535 +/- 30
U2OS	17 +/- 0.49
UMLN-zfGR	253 +/- 65
