# Appendix C <br> APPENDIX TO CHAPTER 3 

## C. 8 Summary Statistics Tables

## C.8.1 Censuses 1962-2012

Tables C.1-C. 13 provide summary statistics for the regression sample used in the baseline analysis in Figure 3.1 and Appendix Figure C.11. The regression sample consists of French migrant married women aged 30 to 49 . The last column of the tables provides the OLS coefficient from regressing the relevant characteristic on a migrant status indicator, where the sample also includes non-migrant married women aged 30 to 49. Statistical significance is indicated as follows: ${ }^{* * *}$ significant at the $1 \%$ level, ${ }^{* *}$ significant at the $5 \%$ level, and * significant at the $10 \%$ level.

Table C. 1
Summary Statistics, Census 1962

|  | Mean | S.d. | Min. | Max. | Obs. | Migrants -Non-Migrants |

## C.8.4 Gender and Generation Survey 2005

Tables C. 17 and C. 18 provide summary statistics for the regression sample used in section 3.3. It consists of French internal migrant individuals aged 18 to 79.

Table C. 17
Summary Statistics, Women, GSS 2005

|  | Mean | S.d. | Min. | Max. | Observations |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Military death rate | 0.14 | 0.04 | 0.06 | 0.29 | 1,689 |
|  |  |  |  |  |  |
|  |  | A. Individual Characteristics |  |  |  |
| Year of birth | 1,959 | 15 | 1,926 | 1,987 | 1,689 |
| Age | 46.2 | 15.4 | 18 | 79 | 1,689 |
| Employed | 0.53 | 0.50 | 0 | 1 | 1,689 |
| Primary or lower secondary | 0.17 | 0.38 | 0 | 1 | 1,689 |
| Technical secondary | 0.25 | 0.44 | 0 | 1 | 1,689 |
| High school | 0.16 | 0.37 | 0 | 1 | 1,689 |
| Higher education | 0.41 | 0.49 | 0 | 1 | 1,689 |
|  |  |  |  |  |  |

|  | B. Parental Characteristics |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Mother active | 0.55 | 0.50 | 0 | 1 | 1,689 |
| Mother primary or lower secondary | 0.63 | 0.48 | 0 | 1 | 1,689 |
| Mother higher education | 0.11 | 0.31 | 0 | 1 | 1,689 |
| Father high social class | 0.46 | 0.49 | 0 | 1 | 1,689 |
| Father primary or lower secondary | 0.58 | 0.49 | 0 | 1 | 1,689 |
| Father higher education | 0.15 | 0.36 | 0 | 1 | 1,689 |

|  | C. Household Characteristics |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | 1,689 |  |
| Number of children | 0.8 | 1.1 | 0 | 6 | 1,689 |
| House | 0.58 | 0.49 | 0 | 1 | 1,689 |
| Rooms | 4.0 | 1.6 | 1 | 10 | 1,689 |
| Home owner | 0.62 | 0.49 | 0 | 1 | 1,689 |
| Partner present | 0.71 | 0.45 | 0 | 1 |  |

Table C. 18
Summary Statistics, Men, GSS 2005

|  | Mean | S.d. | Min. | Max. | Observations |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Military death rate | 0.14 | 0.04 | 0.06 | 0.29 | 1,169 |
|  | A. Individual Characteristics |  |  |  |  |
| Year of birth | 1,958 | 16 | 1,926 | 1,987 | 1,169 |
| Age | 46.9 | 15.5 | 17 | 79 | 1,169 |
| Employed | 0.44 | 0.50 | 0 | 1 | 1,169 |
| Primary or lower secondary | 0.15 | 0.35 | 0 | 1 | 1,169 |
| Technical secondary | 0.32 | 0.47 | 0 | 1 | 1,169 |
| High school | 0.15 | 0.35 | 0 | 1 | 1,169 |
| Higher education | 0.38 | 0.49 | 0 | 1 | 1,169 |
|  | B. Parental Characteristics |  |  |  |  |
| Mother active | 0.57 | 0.49 | 0 | 1 | 1,169 |
| Mother primary or lower secondary | 0.66 | 0.47 | 0 | 1 | 1,169 |
| Mother higher education | 0.09 | 0.29 | 0 | 1 | 1,169 |
| Father high social class | 0.44 | 0.49 | 0 | 1 | 1,169 |
| Father primary or lower secondary | 0.60 | 0.49 | 0 | 1 | 1,169 |
| Father higher education | 0.14 | 0.35 | 0 | 1 | 1,169 |
|  | C. Household Characteristics |  |  |  |  |
| Number of children | 0.7 | 1.0 | 0 | 4 | 1,169 |
| House | 0.64 | 0.48 | 0 | 1 | 1,169 |
| Rooms | 4.1 | 1.7 | 1 | 14 | 1,169 |
| Home owner | 0.62 | 0.48 | 0 | 1 | 1,169 |
| Partner present | 0.78 | 0.42 | 0 | 1 | 1,169 |

Table C. 19
Characteristics Across Sex and Migration Status (GSS 2005)

|  | Migrants |  |  | Non-migrants |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | A | M | F | A | M | F |
| Military death rate | $\begin{gathered} 0.14 \\ (0.04) \\ \{3,320\} \end{gathered}$ | $\begin{gathered} 0.13 \\ (0.04) \\ \{1,361\} \end{gathered}$ | $\begin{gathered} 0.14 \\ (0.04) \\ \{1,959\} \end{gathered}$ | $\begin{gathered} 0.14 \\ (0.04) \\ \{4,528\} \end{gathered}$ | $\begin{gathered} 0.14 \\ (0.04) \\ \{1,946\} \end{gathered}$ | $\begin{gathered} 0.14 \\ (0.04) \\ \{2,582\} \end{gathered}$ |

| Religion | $\begin{gathered} 0.43 \\ (0.35) \\ \{3,298\} \end{gathered}$ | $\begin{gathered} 0.44 \\ (0.35) \\ \{1,353\} \end{gathered}$ | $\begin{gathered} 0.43 \\ (0.20) \\ \{1,945\} \end{gathered}$ | $\begin{gathered} 0.37 \\ (0.33) \\ \{4,473\} \end{gathered}$ | $\begin{gathered} 0.39 \\ (0.33) \\ \{1,918\} \end{gathered}$ | $\begin{gathered} 0.35 \\ (0.33) \\ \{2,555\} \end{gathered}$ |
| Marriage | $\begin{gathered} 0.58 \\ (0.21) \\ \{3,264\} \end{gathered}$ | $\begin{gathered} 0.57 \\ (0.21) \\ \{1,338\} \end{gathered}$ | $\begin{gathered} 0.58 \\ (0.21) \\ \{1,926\} \end{gathered}$ | $\begin{gathered} 0.56 \\ (0.21) \\ \{4,429\} \end{gathered}$ | $\begin{gathered} 0.56 \\ (0.21) \\ \{1,897\} \end{gathered}$ | $\begin{gathered} 0.56 \\ (0.20) \\ \{2,532\} \end{gathered}$ |
| Family | $\begin{gathered} 0.39 \\ (0.20) \\ \{3,193\} \end{gathered}$ | $\begin{gathered} 0.38 \\ (0.19) \\ \{1,312\} \end{gathered}$ | $\begin{gathered} 0.40 \\ (0.20) \\ \{1,881\} \end{gathered}$ | $\begin{gathered} 0.36 \\ (0.19) \\ \{4,360\} \end{gathered}$ | $\begin{gathered} 0.36 \\ (0.19) \\ \{1,865\} \end{gathered}$ | $\begin{gathered} 0.36 \\ (0.19) \\ \{2,495\} \end{gathered}$ |

Notes. This table presents the means for each cultural values index across various groups. A denotes all sexes, $M$ denotes males, and $F$ denotes females. Standard deviations are reported in parenthesis, and the number of observations in each group is reported in braces. The means are computed using the sample weights provided in the GSS dataset. See Appendix D for details about variables sources and definitions.

Table C. 20
Characteristics Across Migration Status
(GSS 2005)

| Dependent variable | Military death rate | Employed | Values index female labor |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | (1) | (2) | (3) | (4) | (5) |
| Internal migrant | $\begin{aligned} & -0.00 \\ & {[0.00]} \end{aligned}$ | $\begin{gathered} 0.01 \\ {[0.01]} \end{gathered}$ | $\begin{gathered} \hline 0.05^{* * *} \\ {[0.01]} \end{gathered}$ | $\begin{gathered} \hline 0.02^{* *} \\ {[0.01]} \end{gathered}$ | $\begin{gathered} 0.01 \\ {[0.01]} \end{gathered}$ |
| Educational attainment Other values | $\begin{aligned} & \text { No } \\ & \text { No } \end{aligned}$ | $\begin{aligned} & \text { No } \\ & \text { No } \end{aligned}$ | $\begin{aligned} & \text { No } \\ & \text { No } \end{aligned}$ | $\begin{aligned} & \text { Yes } \\ & \text { No } \end{aligned}$ | Yes Yes |
| Observations | 7,343 | 7,343 | 7,343 | 7,343 | 7,343 |
| Outcome mean (migrants) | 0.14 | 0.56 | 0.70 | 0.70 | 0.70 |
| Outcome mean (non-migrants) | 0.14 | 0.57 | 0.75 | 0.75 | 0.75 |

Notes. This table presents the OLS coefficients from regressing various outcomes on an indicator for the respondent being an internal migrant. Educational attainment contains indicators for primary education (omitted), technical secondary education, high school, higher education, and student. Other values contains the cultural values indices relative to religion, marriage, and the family. Standard errors are clustered at the level of the individuals' départements of birth. The estimates are computed using the sample weights provided in the ERFI dataset. See Appendix D for details about variables sources and definitions.
${ }^{* * *}$ Significant at the 1\% level. ${ }^{* *}$ Significant at the 5\% level.

## C. 9 Additional Regression Tables

## C.9.1 Baseline Regressions

Tables C.21-C. 33 provide the results from Figures 3.1 and C. 10 in table form for the Working outcome. Tables C. 34 to C. 46 provide the results from Appendix Figures C. 11 and C. 15 in table form for the Labor force participant outcome.

## Outcome: Employed

Table C. 21
The Impact of WWI Military Fatalities on FLFP, Census 1962

Notes. This table reports the OLS coefficients from estimating equation 3.1 in column 1, and alternative specifications in columns 2-6. Standard errors are in brackets and are clustered both at the level of respondents' départements of birth and départements of residence. The sample consists of migrant married women aged 30 to 49 . The estimates are computed using the sample weights provided in the censuses. See Figure 3.1 and Figure C. 10 notes for more details. See Appendix D for details about variables sources and definitions.

## C.9.2 Transmission from Husbands to Wives

Table C. 47
Transmission from Husbands to Wives, Census 1962

| Dependent variable | Employed |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $(1)$ | $(2)$ | $(3)$ | $(4)$ | $(5)$ | $(6)$ |
| Military death rate, husband origin | $0.46^{* *}$ | $0.42^{* *}$ | $0.38^{* *}$ | $0.31^{*}$ | $0.31^{* *}$ | $0.27^{*}$ |
|  | $[0.22]$ | $[0.20]$ | $[0.19]$ | $[0.16]$ | $[0.15]$ | $[0.14]$ |
| Birth year FE | Yes | Yes | Yes | Yes | Yes | Yes |
| Residence département FE | Yes | Yes | Yes | Yes | Yes | Yes |
| Birth département FE | No | No | No | Yes | Yes | Yes |
| Husband pre-war controls (1911) | Yes | Yes | Yes | Yes | Yes | Yes |
| Husband and household controls | No | Yes | Yes | No | Yes | Yes |
| Education level FE |  |  |  |  |  |  |
| Number of children aged 0-6 | No | No | Yes | No | No | Yes |
| Observations | No | No | Yes | No | No | Yes |
| Clusters | 64,145 | 64,144 | 64,144 | 64,145 | 64,144 | 64,144 |
| Départements of residence |  |  |  |  |  |  |
| Husbands départements of birth | 86 | 86 | 86 | 86 | 86 | 86 |

Notes. This table presents the OLS coefficients from estimating equation 3.6. Husband controls include husbands' age, age squared, indicators for their educational attainment, and an indicator for their employment status. Household controls include an indicator for housing ownership, the number of rooms in the home, and a measure for housing quality. Standard errors are in brackets and are clustered at the level of the individual' départements of birth and at the level of their husbands' départements of birth. The sample consists of non-migrant married women aged 30 to 49 . The estimates are computed using the sample weights provided in the censuses. See Appendix D for details about variables sources and definitions.
*** Significant at the $1 \%$ level. ** Significant at the $5 \%$ level. * Significant at the $10 \%$ level.

| Départements of residence |  |  |  |  |  |  |
| Husbands départements of birth | 91 | 91 | 91 | 91 | 91 | 91 |

Notes. This table presents the OLS coefficients from estimating equation 3.6. Husband controls include husbands' age, age squared, indicators for their educational attainment, and an indicator for their employment status. Household controls include an indicator for housing ownership, the number of rooms in the home, and a measure for housing quality. Standard errors are in brackets and are clustered at the level of the individual' départements of birth and at the level of their husbands' départements of birth. The sample consists of non-migrant married women aged 30 to 49. The estimates are computed using the sample weights provided in the censuses. See Appendix D for details about variables sources and definitions.
${ }^{* * *}$ Significant at the $1 \%$ level. ${ }^{* *}$ Significant at the $5 \%$ level. * Significant at the $10 \%$ level.

Table C. 54
Transmission from Husbands to Wives, Census 2007

| Dependent variable | Employed |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $(1)$ | $(2)$ | $(3)$ | $(4)$ | $(5)$ | $(6)$ |

Notes. This table reports the OLS coefficients from estimating specification 3.7. Standard errors are clustered at the level of individuals' départements of residence. Husband controls consist of husbands' age, age squared, indicators for their educational attainment, and an indicator for their employment status. Household controls consist of an indicator for housing ownership, the number of rooms in the home, and a measure of housing quality. The sample consists of non-migrant women aged 30 to 49 . The estimates are computed using the sample weights provided in the censuses. See Appendix D for details about variables sources and definitions.
*** Significant at the $1 \%$ level. ${ }^{* *}$ Significant at the $5 \%$ level. * Significant at the $10 \%$ level.

Table C. 68
Transmission from Migrants to Non-Migrants, Census 2009

| Dependent variable | Active |  | Employed |  |
| :---: | :---: | :---: | :---: | :---: |
|  | (1) | (2) | (3) | (4) |
| Immigrant norm | $\begin{gathered} 2.33^{* * *} \\ {[0.59]} \end{gathered}$ | $\begin{gathered} 2.38^{* * *} \\ {[0.60]} \end{gathered}$ | $\begin{gathered} 3.12^{* * *} \\ {[0.97]} \end{gathered}$ | $\begin{gathered} 3.20^{* * *} \\ {[0.99]} \end{gathered}$ |
| Birth year FE | Yes | Yes | Yes | Yes |
| Pre-war control norms (1911) | Yes | Yes | Yes | Yes |
| Share immigrants | Yes | Yes | Yes | Yes |
| Household and husband controls | Yes | Yes | Yes | Yes |
| Census assignment | $t-1$ | $t-2$ | $t-1$ | $t-2$ |
| Observations | 651,769 | 651,769 | 651,769 | 651,769 |
| Département of residence clusters | 92 | 92 | 92 | 92 |

Notes. This table reports the OLS coefficients from estimating specification 3.7. Standard errors are clustered at the level of individuals' départements of residence. Husband controls consist of husbands' age, age squared, indicators for their educational attainment, and an indicator for their employment status. Household controls consist of an indicator for housing ownership, the number of rooms in the home, and a measure of housing quality. The sample consists of non-migrant women aged 30 to 49 . The estimates are computed using the sample weights provided in the censuses. See Appendix D for details about variables sources and definitions.
*** Significant at the $1 \%$ level. ${ }^{* *}$ Significant at the $5 \%$ level. * Significant at the $10 \%$ level.

Table C. 69
Transmission from Migrants to Non-Migrants, Census 2010

| Dependent variable | Active |  | Employed |  |
| :---: | :---: | :---: | :---: | :---: |
|  | (1) | (2) | (3) | (4) |
| Immigrant norm | $\begin{gathered} 2.21^{* * *} \\ {[0.57]} \end{gathered}$ | $\begin{gathered} 2.26^{* * *} \\ {[0.58]} \end{gathered}$ | $\begin{gathered} 2.99^{* * *} \\ {[0.96]} \end{gathered}$ | $\begin{gathered} 3.06^{* * *} \\ {[0.97]} \end{gathered}$ |
| Birth year FE | Yes | Yes | Yes | Yes |
| Pre-war control norms (1911) | Yes | Yes | Yes | Yes |
| Share immigrants | Yes | Yes | Yes | Yes |
| Household and husband controls | Yes | Yes | Yes | Yes |
| Census assignment | $t-1$ | $t-2$ | $t-1$ | $t-2$ |
| Observations | 642,273 | 642,273 | 642,273 | 642,273 |
| Département of residence clusters | 92 | 92 | 92 | 92 |

Notes. This table reports the OLS coefficients from estimating specification 3.7. Standard errors are clustered at the level of individuals' départements of residence. Husband controls consist of husbands' age, age squared, indicators for their educational attainment, and an indicator for their employment status. Household controls consist of an indicator for housing ownership, the number of rooms in the home, and a measure of housing quality. The sample consists of non-migrant women aged 30 to 49 . The estimates are computed using the sample weights provided in the censuses. See Appendix D for details about variables sources and definitions.
